The Company is a parent company of the CEZ Group ("the Group"). Main business of the Group is the production, distribution, trade and sale of electricity and heat, trade and sale of natural gas and coal mining.

2. Summary of Significant Accounting Policies

2.1. Financial Statements

The interim consolidated financial statements for the three months ended March 31, 2018 have been prepared in accordance with IAS 34 and have not been audited by an independent auditor. The interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with [the Group's annual financial statements as of December 31, 2017](#).

2.2. Changes in Accounting Policies

The accounting policies adopted in the preparation of the interim consolidated financial statements are consistent with those followed in the preparation of [the Group's annual financial statements for the year ended December 31, 2017](#), except for as follows. As of January 1, 2018 the Group applies new International Financial Reporting Standards IFRS 9 Financial Instruments and IFRS 15 Revenues from Contracts with Customers. Several other amendments and interpretations apply for the first time in 2018, but do not have an impact on the interim consolidated financial statements.

The Group has applied IFRS 9 retrospectively, with the initial application date of January 1, 2018 and adjusting the presentation of the comparative information for the period beginning January 1, 2017. Under IFRS 9, the Group split old category of Available-for-sale financial assets into new categories Debt instruments and Equity instruments. The impact of the change in the presentation affected the layout of Consolidated statement of changes in equity and Consolidated statement of comprehensive income for the actual and previous period.

Due to the application IFRS 9, some assets were reclassified from category Available-for-sale to category Fair value through profit or loss and accumulated reserve from revaluation of Available-for-sale financial assets amounting CZK 350 million was transferred to retained earnings. Impact of creation of new allowances on receivables and other assets is stated in the table below.

The Group adopted IFRS 15 using the modified retrospective method of adoption. The effect as of the date of application, resulting from recognition of deferred connection fees received from customers prior 2009 in retained earnings, is disclosed in the table below.

The Group recognized as of the date of application of IFRS 9 and IFRS 15 following impact affecting amount of equity (in CZK millions):

	IFRS 9	IFRS 15	Total
Receivables, net	(62)	-	(62)
Other	(17)	-	(17)
Total assets	(79)	-	(79)
Deferred tax liability	13	(581)	(568)
Other long-term liabilities	-	3,091	3,091
Total liabilities	-	2,510	2,523
Impact on Total equity	(66)	2,510	2,444
Less: Non-controlling interests	(4)	(20)	(24)
Impact on Total equity attributable to equity holders of the parent	(62)	2,530	2,468

In addition to above mentioned effect of IFRS 15 related to connection fees, the Group as a result of application of IFRS 15 changed from January 1, 2018 also the way of presentation revenue and costs in situation when the Group acts as energy provider without distributing it. In these circumstances the Group acts as an agent under IFRS 15 and no revenue and costs for distribution services is recognized, with no effect to net income. The table below presents amounts for selected items of statement of income for 1-3/2017 comparing previously reported figures according to IAS 18, which was replaced from January 1, 2018 by IFRS 15, and adjustments which would be necessary for compliance with IFRS 15 (in CZK millions):

	1-3/2017 according to IAS 18	Effect of connection fees	Effect of agent vs. principal	1-3/2017 according to IFRS 15
Sales of electricity and related services	43,862	-	(5,564)	38,298
Sales of gas, coal, heat and other revenues	8,508	(172)	-	8,336
Total revenues and other operating income	52,822	(172)	(5,564)	47,086

Income taxes	(1,987)	26	-	(1,961)
Net income	8,674	(146)	-	8,528

3. Seasonality of Operations

The seasonality within the segments Generation - Traditional Energy, Generation - New Energy, Distribution and Sales usually takes effect in such a way that the revenues and operating profits of these segments for the 1st and 4th quarters of a calendar year are slightly higher than the revenues and operating profits achieved in the remaining period.
