MEDIA RELEASE

26 June 2003

APPOINTMENT OF GENERAL MANAGER - GEOLOGY

The Directors of View Resources Limited (**View**) are pleased to announce the appointment of Geoff Chapman as its General Manager – Geology. Geoff will have a key involvement in all mining and exploration activities to be undertaken by the Company. Geoff's most recent role has been at WMC Resources Limited ("**WMC**") Mt Keith Nickel Operations as Planning Manager and Geology Manager responsible for mine geology, geotechnical management, mine exploration, ore reserves estimation and short to long term planning.

Prior to Mt Keith, Geoff was the Senior Mine Geologist at WMC's Kambalda Nickel operations with responsibility for mine geology, mine exploration and ore reserve estimation at all operations including the Carnilya Hill Mine.

View managing Director Derek Lenartowicz said "Geoff has significant experience in the world class Kambalda nickel region. This will greatly assist the Company in fulfilling its production objectives in the immediate future. In particular, Geoff's previous work on, and experience with, the Carnilya Hill mine represents a significant opportunity for the Company to expedite the reopening of the mine."

"View now has some impressive core competencies to deliver positive results from its Carnilya Hill tenements and capitalise on the recent strong growth in the world nickel price" he said.

For further inquiries, please contact Derek Lenartowicz on (08) 9381 6588 or Peter Landau on (08) 9322 7600.
