# **CEO STATEMENT.**

I am pleased to present the CEO's Statement for the period ended 30 June 2024. During the 2nd quarter we continued to see a strong demand for TWMA's services. The utilisation of our Rotomill fleet was 67% for the period which was lower than the previous quarter due to UK drilling campaigns coming to an end and subsequent relocation of Rotomill to the Middle East. Year to date, the utilisation of the Rotomill assets was 70%. Despite the lower utilisation in the UK, the Group started operations on the second of four new islands on the Ghasha Mega Project in Abu Dhabi and also performed well onshore in the UK. As a result the Group delivered above budgeted figures for the period with revenue of \$19.4m and an EBITDA for continuing operations of \$4.8m. The first six months of 2024 have delivered \$37.8m revenue and an EBITDA of \$9.5m compared to revenue of \$35.2m and an EBITDA of \$7.0m in 2023.

#### Review of the business.

In Offshore UK, three Rotomills were demobilised mid Q2, two of which were deployed to the UAE to satisfy the requirements of the  $3^{rd}$  and  $4^{th}$  island on the Ghasha Mega project. The third Rotomill is due to mobilise to another UK operator by the end of Q3 2024. In Norway, after a quiet first half of the year, preparations for the restart of our operations in September 2024 are proceeding and are in line with plans. Lastly in the North Sea, our UK onshore facility had a strong quarter with a high level of drill cuttings and slops processed and treated.

In the UAE, drilling operations were carried out on all four islands on the 'Upper Zakum' contract. During the quarter, the Group received a 'Letter of Award' for a new 1+1 year contract. We expect to complete the contract signing within Q3 2024. The scope of the award covers our existing operations on 'Upper Zakum', additional Jack Up operations and an onshore facility.

With regards to the Ghasha Mega Project, operations continued on the 1st island. In respect of the 2nd island, the mobilisation of equipment and personnel were completed on time and on budget. Drilling commenced in May 2024 and products and services became fully chargeable during this period. We now have 22-24 personnel deployed on the second island. The 3rd island start up is provisionally planned for September 2024.

In Egypt, the operation continued to prepare for the start of a new contract with an international operator. The contract with TWMA is to remove, recycle and treat the drilling waste. It is expected that the Rotomill will begin processing in September 2024 in line with expectations. There is currently a high level of tender activity in Egypt where the Group is well placed to be successful.

The Solid Control's business in the US performed satisfactorily in the quarter. The land rig market in the US continues to be 'soft' which has resulted in lower than expected volume of Solid Control work. During the quarter, the division supported an average of 24 Solid Control jobs per month.

#### People.

Safety of all our people is our number one priority. I am pleased that in the quarter, we continued our good safety performance and recorded 0 Lost Time Incidents (2023: 0). The Group is very satisfied that it continues to operate at a high standard of safety and that our employees, for the last two years have been free from an injury which would have resulted in them being unable to work.
