SECTION D – RISKS												
D.2	Key risks that are specific to the Issuer, the Guarantor and the Group	<p>The payment of any amount due on the Securities is subject to our credit risk. The Securities are our unsecured obligations. The Securities are not bank deposits and are not insured or guaranteed by the U.S. Federal Deposit Insurance Corporation, the U.S. Deposit Insurance Fund, the UK Financial Services Compensation Scheme or any other government or governmental agency, or insurance protection scheme in any jurisdiction. The value of and return on your securities will be subject to our credit risk and to changes in the market's view of our creditworthiness.</p> <p>References in Elements B.12 and B.19 (B.12) above to the "prospects" and "financial or trading position" of the Issuer and Guarantor (as applicable), are specifically to their respective ability to meet their full payment obligations</p>										

		<p>under the Securities (in the case of GSI) or Guaranty (in the case of GSG) in a timely manner. Material information about GSI's and GSG's respective financial condition and prospects is included in the GSG periodic reports on Forms 10-K, 10-Q and 8-K which are incorporated by reference into the Base Prospectus. You should be aware, however, that each of the key risks highlighted below could have a material adverse effect on the Issuer's and Guarantor's businesses, operations, financial and trading position and prospects, which, in turn, could have a material adverse effect on the return investors receive on the Securities.</p> <p>As part of a leading global financial services group the Issuer and the Guarantor are subject to a number of key risks of the Group:</p> <ul style="list-style-type: none"> • The Group's businesses have been and may continue to be adversely affected by conditions in the global financial markets and economic conditions generally. • The Group's businesses have been and may be adversely affected by declining asset values. This is particularly true for those businesses in which it has net "long" positions, receives fees based on the value of assets managed, or receives or posts collateral. • The Group's businesses have been and may be adversely affected by disruptions in the credit markets, including reduced access to credit and higher costs of obtaining credit. • The Group's market-making activities have been and may be affected by changes in the levels of market volatility. • The Group's investment banking, client execution and investment management businesses have been adversely affected and may continue to be adversely affected by market uncertainty or lack of confidence among investors and CEOs due to general declines in economic activity and other unfavourable economic, geopolitical or market conditions. • The Group's investment management business may be affected by the poor investment performance of its investment products. • The Group may incur losses as a result of ineffective risk management processes and strategies. • The Group's liquidity, profitability and businesses may be adversely affected by an inability to access the debt capital markets or to sell assets or by a reduction in its credit ratings or by an increase in its credit spreads. • Conflicts of interest are increasing and a failure to appropriately identify and address conflicts of interest could adversely affect the Group's businesses. • The Guarantor is a holding company and is dependent for liquidity on payments from its subsidiaries, many of which are subject to restrictions. • The Group's businesses, profitability and liquidity may be adversely affected by deterioration in the credit quality of, or defaults by, third parties who owe the Group money, securities or other assets or whose securities or obligations it holds. • Concentration of risk increases the potential for significant losses in the Group's market-making, underwriting, investing and lending activities. • The financial services industry is both highly competitive and interrelated. • The Group faces enhanced risks as new business initiatives leads it to transact with a broader array of clients and counterparties and exposes it
--	--	---

		<p>to new asset classes and new markets.</p> <ul style="list-style-type: none"> • Derivative transactions and delayed settlements may expose the Group to unexpected risk and potential losses. • The Group's businesses may be adversely affected if it is unable to hire and retain qualified employees. • The Group's businesses and those of its clients are subject to extensive and pervasive regulation around the world. • The Group may be adversely affected by increased governmental and regulatory scrutiny or negative publicity. • A failure in the Group's operational systems or infrastructure, or those of third parties, could impair the Group's liquidity, disrupt its businesses, result in the disclosure of confidential information, damage its reputation and cause losses. • Substantial legal liability or significant regulatory action against the Group could have material adverse financial effects or cause significant reputational harm, which in turn could seriously harm the Group's business prospects. • The growth of electronic trading and the introduction of new trading technology may adversely affect the Group's business and may increase competition. • The Group's commodities activities, particularly its power generation interests and physical commodities activities, subject the Group to extensive regulation, potential catastrophic events and environmental, reputational and other risks that may expose it to significant liabilities and costs. • In conducting its businesses around the world, the Group is subject to political, economic, legal, operational and other risks that are inherent in operating in many countries. • The Group may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters.
D.6	Key risks that are specific to the Securities	<ul style="list-style-type: none"> • Your capital is at risk. Depending on the performance of the underlying asset(s), you may lose some or all of your investment. • You could also lose some or all of your investment in the Securities where: <ul style="list-style-type: none"> ◦ We (as Issuer and Guarantor) fail or are otherwise unable to meet our payment obligations; ◦ You do not hold your Securities to maturity and the secondary sale price you receive is less than the original purchase price; or ◦ Your Securities are redeemed early due to an unexpected event and the amount you receive is less than the original purchase price. • The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities. • Your Securities may not have an active trading market, and you may be unable to dispose of them. • We give no assurance that application for listing and admission to trading will be granted (or, if granted, will be granted by the issue date) or that an active trading market in the Securities will develop. We may discontinue

		<p>any such listing at any time.</p> <ul style="list-style-type: none"> The potential for the value of the Securities to increase is limited as the performance of the underlying asset(s) to which the Securities are linked is capped. <p>Risks associated with Securities linked to underlying asset(s):</p> <ul style="list-style-type: none"> Purchasers of Securities linked to one or more underlying asset(s) are exposed to the performance of such underlying asset(s), which may be subject to unpredictable change over time. Past performance of an underlying asset is not indicative of future performance. You will not have any rights of ownership in the underlying asset(s), and our obligations under the Securities to you are not secured by any assets. Following a disruption event, the valuation of the underlying asset(s) may be postponed and/or valued by us (as Calculation Agent) in our discretion. Past performance of an underlying asset is not indicative of future performance. Following the occurrence of certain extraordinary events in relation to the underlying asset(s), the terms and conditions of your Securities may be adjusted or the Securities may be redeemed early at the non-scheduled early repayment amount. Such amount may be less than your initial investment and you could lose some or all of your investment. The performance of indices is dependent upon many unpredictable factors, including in relation to its underlying components. You may receive a lower return on the Securities than you would have received from investing in the components of the index directly because the index level may reflect the prices of such index components without including the value of dividends paid on those components. The sponsor of an index may take any actions in respect of the index without regard to your interests as holders of the Securities, and any of these actions could negatively affect the value of and return on the Securities. Your Securities may be adjusted or redeemed prior to maturity due to a change in law. Any such adjustment may have a negative effect on the value of and return on your Securities; the amount you receive following an early redemption may be less than your initial investment and you could lose some or all of your investment. The Issuer of your Securities may be substituted with another company. We may amend the terms and conditions of your Securities in certain circumstances without your consent.
