9 UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Notes for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.

Autocall Event

An "**Autocall Event**" occurs if the Autocall Reference Value on any Autocall Observation Date is greater than or equal to the Autocall Level for such Autocall Observation Date.

Defined terms used above:

- **Autocall Level**: 105 per cent. (105%) of the Asset Initial Price of the Underlying Asset.
- **Autocall Reference Value**: the Reference Price of the Underlying Asset on the relevant Autocall Observation Date.

Non-scheduled Early Repayment Amount

Unscheduled early redemption: The Securities may be redeemed prior to the scheduled maturity (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the underlying assets or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Security, an amount representing the fair market value of the Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging and funding arrangement.

The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.

Final Redemption Amount

Unless previously redeemed, or purchased and cancelled, the Final Redemption Amount payable in respect of each nominal amount of each Security equal to the Calculation Amount on the maturity date will be:

If a Barrier Event has not occurred, the Final Redemption Amount payable in respect of each nominal amount of each Security equal to the Calculation Amount will be calculated in accordance with the formula below:

$$\mathrm{CA} \times \mathrm{Redemption\ Percentage}$$

If a Barrier Event has occurred, the Final Redemption Amount payable in respect of each nominal amount of each Security equal to the Calculation Amount will be calculated in accordance with the formula below:

$$\mathrm{CA} \times \frac{\mathrm{Final\ Reference\ Value}}{\mathrm{Initial\ Reference\ Value}}$$

Defined terms used above:

		underwriting, investing and lending activities. • The financial services industry is both highly competitive and interrelated. • GSI faces enhanced risks as new business initiatives lead it to transact with a broader array of clients and counterparties and exposes it to new asset classes and new markets. • Derivative transactions and delayed settlements may expose GSI to unexpected risk and potential losses. • GSI's businesses may be adversely affected if GSI is unable to hire and retain qualified employees. • GSI may be adversely affected by increased governmental and regulatory scrutiny or negative publicity. • Substantial legal liability or significant regulatory action against GSI could have material adverse financial effects or cause significant reputational harm to GSI, which in turn could seriously harm GSI's business prospects. • The growth of electronic trading and the introduction of new trading technology may adversely affect GSI's business and may increase competition. • GSI's commodities activities, particularly its power generation interests and physical commodities activities, subject GSI to extensive regulation potential catastrophic events and environmental, reputational and other risks that may expose it to significant liabilities and costs. • In conducting its businesses around the world, GSI is subject to political, economic, legal, operational and other risks that are inherent in operating in many countries. • GSI may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters.
D.6	**Key risks that are specific to the Securities**	• **Your capital is at risk. Depending on the performance of the underlying asset(s), you may lose some or all of your investment.** • You could also lose some or all of your investment in the Securities where: ° We (as Issuer) fail or are otherwise unable to meet our payment obligations; ° You do not hold your Securities to maturity and the secondary sale price you receive is less than the original purchase price; or ° Your Securities are redeemed early due to an unexpected event and the amount you receive is less than the original purchase price. • The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities. • Your Securities may not have an active trading market, and you may be unable to dispose of them. • We give no assurance that application for listing and admission to trading will be granted (or, if granted, will be granted by the issue date) or that an active trading market in the Securities will develop. We may discontinue any such listing at any time. • The potential for the value of the Securities to increase is limited as the performance of the underlying asset(s) to which the Securities are linked is capped. • Indices which are deemed 'benchmarks' are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, or have other consequences which cannot be predicted. *Risks associated with Securities linked to underlying asset(s):* • The value and return on the Securities depends on the performance of such underlying asset(s), which may be subject to unpredictable change over time. • Past performance of an underlying asset is not indicative of future performance. • You will not have any rights of ownership in the underlying asset(s), and our obligations under the Securities to you are not secured by any assets. • Following a disruption event, the valuation of the underlying asset(s) may be postponed and/or valued by us (as Calculation Agent) in our discretion. • Following the occurrence of certain extraordinary events in relation to the underlying asset(s) or in relation to index linked securities, following the occurrence of an index adjustment event, depending on the terms and conditions of the particular Securities, amongst other potential consequences, the terms and conditions of your Securities may be adjusted, the underlying asset may be substituted, or the Securities may be redeemed early at the non-

		scheduled early repayment amount. Such amount may be less than your initial investment and you could lose some or all of your investment. *Risks associated with Index Linked Securities:* • The performance of indices is dependent upon many unpredictable factors, including in relation to its underlying components. • You may receive a lower return on the Securities than you would have received from investing in the components of the index directly because the index level may reflect the prices of such index components without including the value of dividends paid on those components. • The sponsor of an index may take any actions in respect of the index without regard to your interests as holders of the Securities, and any of these actions could negatively affect the value of and return on the Securities. • In certain circumstances, we (as Calculation Agent) may substitute the underlying asset for another index (or basket of indices). • Your Securities may be adjusted or redeemed prior to maturity due to a change in law. Any such adjustment may have a negative effect on the value of and return on your Securities; the amount you receive following an early redemption may be less than your initial investment and you could lose some or all of your investment. • The Issuer of your Securities may be substituted with another company. • We may amend the terms and conditions of your Securities in certain circumstances without your consent.
