

## China Yangtze Power Co., Ltd. Announcement on Generation Capacity Performance in Q3 of 2020

The board of directors and all directors of China Yangtze Power Co., Ltd. (the "Company") warrant that there are no false representations and misleading statements contained in, or material omissions from, this announcement, and severally and jointly accept the responsibility for the truthfulness, accuracy and completeness of the contents of this announcement.

According to the preliminary statistics of the Company, the total volume of water for the Xiluodu Reservoir in the upper reaches of the Yangtze River by Q3 of 2020 was 75.50 billion cubic meters, representing a year-on-year increase of 35.34%. The total volume of water for the Three Gorges Reservoir was about 269.99 billion cubic meters, representing a year-on-year increase of 49.29%. The Company has a generation capacity of about 91,052 GWh in Q3 of 2020, representing a year-on-year increase of 21.67%. Such capacity is realized by the following stations: the Three Gorges Hydropower Station realized a generation capacity of 46,940 GWh, representing a year-on-year increase of 38.39%; Gezhouba Hydropower Station realized 5,396 GWh, representing a year-on-year decrease of 9.35%; Xiluodu Hydropower Station realized 26,066 GWh, representing a year-on-year increase of 16.41%; and Xiangjiaba Hydropower Station realized 12,650 GWh, representing a year-on-year increase of 0.64%.

In the third quarter of 2020, the Company's four power stations generated electricity in the following volumes:

Name of hydropower station	Gross generation capacity (100 GWh)
Gezhouba Hydropower Station	53.96
Three Gorges Hydropower Station	469.40
Xiangjiaba Hydropower Station	126.50

Xiluodu Hydropower Station	260.66
Total	910.52
