

Press release

Amoéba: Edison sets a target price of €2.01

Chassieu (France), 8 September 2025 – 8:00 a.m. Amoéba (FR0011051598 - ALMIB), an industrial greentech specialized in the development of natural microbiological solutions based on the patented use of amoebae, announces that **Edison Group**, a financial services company based in London (United Kingdom), has published a study entitled ‘Amoéba – Ready to launch’.

In this study, **Edison set its initial target price at €2.01 (representing a potential upside of more than 100% compared to the closing price of 5 September 2025)**. Edison highlights in particular the growing demand for natural solutions, the very good results obtained in preliminary studies and the distribution partnerships already in place as key factors supporting future growth.

The study can be consulted on the company's website (Investor / Investors Documentation / Financial Analysis) or by clicking [here](#).

As a reminder, Amoéba is also covered by the Euroland Corporate research firm (with a target price of €1.90 and a Buy recommendation) and by the research firm of the Belgian financial services group KBC Securities (with a target price of €1.50 and a Buy recommendation).

About Amoéba:

Founded in 2010, Amoéba is a greentech company based in Chassieu (Lyon, France) whose ambition is to become a major player in the treatment of microbiological risk based on the patented use of amoebae in the plant protection and cosmetics sectors.

With know-how that is unique in the world and protected by numerous patents, Amoéba is currently the only company capable of exploiting the full potential of the *Willarta* amoeba on an industrial scale and cultivating it in sufficient volumes to offer biological solutions that constitute a viable alternative to the chemical products widely used today. Amoéba is currently focusing on the global biocontrol market for plant protection and on the cosmetics market. As the marketing of plant protection products is subject to obtaining local regulatory authorisations, the Company has carried out the necessary regulatory procedures and filed registration dossiers in Europe and the United States. With regard to the active substance, it has already obtained approval in 2022 in the USA and a positive and definitive report from EFSA in Europe. Product approvals are expected in the coming months.

The cosmetic application does not require prior approval from a competent authority in Europe or the United States. The cosmetic ingredient is already registered on the INCI (International Nomenclature of Cosmetic Ingredients) list, paving the way for it to be marketed worldwide except in China, where local approval is required.

Amoéba is listed on Euronext Growth (ALMIB). The company is a member of the Bpifrance Excellence network and is eligible for the PEA-PME scheme. For more information, visit www.amoeba-nature.com.
