"These very good results were driven by the business performance of the operating divisions and demonstrate our Group's capacity to grow while continuing to manage risks and resources thoroughly. The 3rd quarter particularly illustrates CIB's capacity to gain market shares and IPS's strong business momentum, especially in Insurance and Asset Management. Our Commercial & Personal Banking is likely to gradually benefit from the positive shift in the rate environment. On this basis, we confirm our 2024 trajectory and remain focused on continuing our long-term development, notably with the planned acquisition of AXA IM, which is a major initiative, repositioning IPS strategically within the Group. I thank all our teams for their ongoing mobilisation alongside our customers."

CONSOLIDATED GROUP RESULTS AS OF 30 SEPTEMBER 2024

Group 3rd quarter 2024 results

Revenues

In the 3rd quarter 2024 (hereinafter: 3Q24), **Group revenues** amounted to €11,941m, up by 2.7% compared to the 3rd quarter 2023 on a distributable basis¹ (hereinafter: 3Q23).

Corporate & Institutional Banking (CIB) revenues rose sharply (+9.0% vs. 3Q23) under the combined effect of a very good performance in all three business lines. Particularly, Global Banking (+5.9% vs. 3Q23) was driven by Capital Markets activities in EMEA (+12.4%⁸ vs. 3Q23), Advisory in EMEA and Transaction Banking activities in the Americas and APAC. Global Markets (+12.4% vs. 3Q23) benefitted from the strong growth at Equity & Prime Services (+13.2% vs. 3Q23) and FICC (+11.8% vs. 3Q23). Securities Services (+6.6% vs. 3Q23) was driven up by its net interest margin and by the increase in its outstandings.

Revenues at **Commercial, Personal Banking & Services (CPBS)**⁹ decreased (-2.6% vs. 3Q23) but were stable (-0.1% vs. 3Q23) excluding revenues from used-cars disposals at Arval.

Revenues decreased slightly (-1.1% vs. 3Q23; -1.3% vs. 9M23) at Commercial & Personal Banking in the euro zone. The 3rd quarter nevertheless showed an improvement, with particularly a stabilisation of average loans (€434bn) and a slight recovery in individual loans (+0.1% vs. 2Q24). Excluding headwinds (inflation hedges, mandatory reserves, and the Belgian government bonds), revenues at Commercial & Personal Banking in the euro zone rose by +2.1% vs. 9M23. Overall, these banks should benefit from (i) a favourable shift in the interest rate environment given the downward steepening of the interest rate curve expected by the market and (ii) the tapering off from headwinds on the business growth (with impacts of -€149m in 1Q24 vs. 1Q23, -€139m in 2Q24 vs. 2Q23, and -€63m in 3Q24 vs. 3Q23).

Revenues at Specialised Businesses decreased (-5.7% vs. 3Q23), due mainly to Arval and Leasing Solutions (-10.6% vs. 3Q23) with two different situations: revenues rose by +3.2% at Leasing Solutions, but Arval was impacted by the normalisation of used-car prices, despite its good business performances, as illustrated by the increase in its organic revenues (+15.3%).

Personal Finance revenues decreased overall (-3.3%), but rose on the core perimeter (+1.5%), in accordance with the ongoing strategic plan. Revenues at New Digital Businesses and Personal Investors were stable.

Revenues at **Investment & Protection Services (IPS)** were up by 4.9%. Asset Management (+7.9% vs. 3Q23) and Insurance (+6.4% vs. 3Q23) had a very good quarter and continued to support revenue growth in the division. Wealth Management (-0.5% vs. 3Q23) was stable with an increase in fees.

Operating expenses

Operating expenses (€7,213m) were kept under control in 3Q24 (+1.7% vs. 3Q23). The jaws effect was positive (+1.0 point) and benefitted from the impact of operational efficiency measures implemented, representing €655m in the first nine months of the year, in line with the announced trajectory of €1bn for 2024. These measures mainly include: (i) the Personal Finance adaptation plan, (ii) the reduction in external spending, (iii) the deployment of Shared Service Centres (SSCs), (iv) the optimisation of business premises (~100,000m² released since 2023) and (v) automation / robotisation efforts (number of robots: +15% since the end of 2023).

Operating expenses rose at **CIB** (+8.6% vs. 3Q23) in support of growth. The jaws effect was positive overall at CIB (+0.4 point), as well as at Global Banking (+0.1 point), Global Markets (+0.5 point) and Securities Services (+1.8 points).

CPBS⁹ lowered its operating expenses (-0.9% vs. 3Q23). At Commercial & Personal Banking in the euro zone, they decreased by 1.9% and the jaws effect was positive (+0.8 point). Specialised Businesses also reduced their operating expenses, by 1.3%. The jaws effect was positive (i) at Personal Finance (+2.3 points; +2.7 points on the core perimeter), in connection with the adaptation plan and (ii) at Leasing Solutions (+2.4 points).

Operating expenses were kept under control at **IPS** (-0.4% vs. 3Q23) in all business lines in connection with the acceleration of operational efficiency measures. The jaws effect was very positive at IPS (+5.2 points) and positive in all operating business lines (except Real Estate).

On this basis, **Group gross operating income** in 3Q24 came to €4,728m, up by 4.2% compared to 3Q23 (€4,536m).

Cost of risk

In 3Q24, Group cost of risk stood at €729m⁴ (€734m in 3Q23), or 32 basis points of customer loans outstanding, remaining below 40 basis points throughout the cycle, thanks to the quality and diversification of credit portfolio. In 3Q24, cost of risk reflected €217m releases of provisions on performing loans (stages 1 and 2) and a €946m provision on non-performing loans (stage 3).

Operating income, Pre-tax income and net income, Group share

Group operating income came to €3,957m (€3,802m in 3Q23) and **Group pre-tax income** to €4,060m (€3,862m in 3Q23). The average corporate income tax rate stood at 27.4% in the 3rd quarter.

Net income, Group share amounted to €2,868m in 3Q24, up by 5.9% compared to 3Q23 (€2,709m).

On this basis, **earnings per share⁵** came to 2.38 euros, up by +11.2% compared to 3Q23.

Social responsibility

Beyond financial results, the first nine months of the year illustrate BNP Paribas' commitment to social responsibility, as highlighted by recent agencies and NGO ratings (FTSE Russell, Moody's ESG Solutions and WDI Shareaction) and by certifications highlighting BNP Paribas' commitments (LSEG, Top Employer and Afnor). The Group continues to implement the People Strategy 2025, while establishing the conditions for equality. This has been demonstrated by the constant gender diversity progress in senior management positions and the improvement in gender diversity on the Group's Executive Committee, which now stands above the average of the executive committees of SBF 120 companies and of the Financi'Elles federation members.

Group results in the first nine months of 2024

Over the first nine months of 2024 (hereinafter: 9M24), **revenues** amounted to €36,694m, up by 2.0% compared to the first nine months of 2023 on a distributable basis¹ (hereinafter: 9M23).

CIB revenues (€13,405m) rose by 5.0% compared to 9M23, driven by increased revenues at Global Banking (+5.8% vs. 9M23), Global Markets (+3.6% vs. 9M23) and Securities Services (+8.0% vs. 9M23).

CPBS⁹ revenues were stable at €20,026m, with positive trends, notably at Commercial & Personal Banking (BNL: +5.4% vs. 9M23; CPBL: +5.0% vs. 9M23).

At **IPS**, revenues came to €4,381m (+2.9% vs. 9M23), driven by the growth of revenues at Insurance (+5.3% vs. 9M23), Wealth Management (+3.5% vs. 9M23) and Asset Management¹⁰ (+7.1% vs. 9M23).

Group **operating expenses** came to €22,326m, up by 1.3% compared to 9M23 (€22,035m). They included the exceptional impact of restructuring and adaptation costs (€143m) and IT reinforcement costs (€254m) for a total of €397m. At the operating division level, operating expenses increased by 3.7% at CIB and by +2.6% at CPBS⁹ (+1.1% in Commercial & Personal Banking in the euro zone and -0.3% at Specialised Businesses). They were stable at IPS.

At the Group level, the jaws effect was therefore positive (+0.6 point).

The Group's **Gross Operating Income** thus came to €14,368m in the first 9 months of 2024, up by 3.1% compared to 9M23 (€13,939m).

Group cost of risk⁴ stood at €2,121m (€1,935m in 9M23).

At €344m in 9M24, the Group's exceptional non-operating items include the reconsolidation of activities in Ukraine¹¹ (+€226m) and a capital gain on the divestment of Personal Finance activities in Mexico (+€118m).

Group pre-tax income came to €12,845m, up by 2.6% compared to 9M23 (€12,515m).

Taking into account the 25.8% average corporate income tax rate, **net income, Group share** amounted to €9,366m (vs. €9,225m in 9M23).

As of 30 September 2024, the **return on non-revaluated tangible equity** stood at 11.8%. This reflects the BNP Paribas Group's solid performances on the back of its diversified and integrated model.

A very solid financial structure as of 30 September 2024

The **common equity Tier 1 ratio** stood at 12.7% as of 30 September 2024, down by 30 basis points compared to 30 June 2024 but remaining far above SREP requirements (10.27%) and the 12% Group objective.

On 1 July 2024, Arval was prudentially consolidated with a 30-bps impact, as announced. The common equity Tier 1 ratio therefore stood at 12.7% as of 1 July 2024. As of 30 September 2024, it remains stable due to the combined effects of (i) organic capital generation net of changes in risk-weighted assets in 3Q24 (+20 bps) and (ii) of the distribution of the 3Q24 result (-20 bps on the basis of a 60% pay-out ratio). In 4Q24, the planned securitisation programme should allow to decrease the risk-weighted assets by more than 10 bps.

The **leverage ratio¹²** stood at 4.4% as of 30 September 2024.

The **Liquidity Coverage Ratio¹³** (end-of-period) stood at a high level of 124% as of 30 September 2024 (132% as of 30 June 2024) and the **immediately available liquidity reserve¹⁴** came to €467bn as of 30 September 2024, equivalent to more than one year to manoeuvre in terms of wholesale funding.

2024 trajectory confirmed

On the strength of its results as of 30.09.2024, **BNP Paribas confirms its 2024 trajectory**: (i) revenues growth greater than 2% compared to 2023 distributable revenues (€46.9bn); (ii) a positive jaws effect²; (iii) a cost of risk below 40 bps, and (iv) Net Income, Group share greater than the 2023 distributable net income (€11.2bn).

This trajectory leverages several positive trends identified during the first nine months of the year:

- Ongoing market share gains at CIB while retaining a balanced allocation of capital;
- Improving outlooks at Commercial & Personal Banking in the euro zone given 1) the positive shift in the rate environment given the steepening of the yield curve expected by the market; 2) stabilising credits and deposits and 3) the gradual decrease of the impact of headwinds on the business growth;
- Strong momentum at Asset Management and Insurance in IPS;
- Further implementation of operational efficiency measures: €655m achieved in cost savings throughout the first three quarters of the year, €345m expected for 4Q24;
- Control of the cost of risk throughout the cycle.

The trajectory also takes into account the negative impacts linked to used-car prices at Arval, despite its good business performances, illustrated by the continued growth in its organic revenues.

An update of the **2026 outlook** taking into account the redeployment of capital will be given on the publication of the 2024 annual results.

CPBS – Specialised Businesses – Personal Finance

In the 3rd quarter 2024, Personal Finance continued the transformation of its operating model, generating: (i) a very positive jaws effect and (ii) good performance on the core perimeter. It should benefit from the decrease of short-term interest rates.

Customer loans outstanding rose by 3.7%⁸ compared to 3Q23 (+5.2% vs. 3Q23 on the core perimeter, following the geographical refocusing), with greater selectivity at origination. Margins at production continued to improve despite sustained competitive pressure.

Operationally, the effects of the implementation of the mobility partnership strategy can be seen in the weight of auto loans outstanding, which amounted to 44% of core outstandings as of 30 September 2024 and structurally improved the risk profile. The partnerships with Orange in France and Spain continued to be rolled out.

The quarter saw the continuation of the aforementioned geographical refocusing of businesses on the core perimeter with the closing of the divestment of activities in Hungary. This geographical refocusing overall included the sale of activities in Central and Eastern Europe (Bulgaria, the Czech Republic, Slovakia, and Hungary) and Mexico, as well as the placement of activities in run-off in Romania, Brazil, and Nordic countries (Sweden, Denmark and Norway).

At €1,249m, revenues decreased by 3.3% compared to 3Q23 but rose by 1.5% on the core perimeter, driven by growth in volumes and pricing efforts and despite the increased medium-term financing costs.

At €672m, operating expenses decreased by 5.7% (-1.2% vs. 3Q23 on the core perimeter), in connection with the impact of cost-saving measures. As a result, the jaws effect was very positive on the quarter (+2.3 points, +2.7 points on the core perimeter).

At €857m, combined revenues of Arval and Leasing Solutions decreased by 10.6%, impacted by the aforementioned trend in used-car prices at Arval, partly offset by the 15.3% growth in organic revenues (financial margin and margin on services) and the increase in Leasing Solutions revenues from the volume impact and improved margins.

Operating expenses, at €381m, rose by 3.6%, due to inflation and business momentum.

Methodology: Comparative analysis at constant scope and exchange rates

The method used to determine the effect of changes in scope of consolidation depends on the type of transaction (acquisition, sale, etc.). The underlying purpose of the calculation is to facilitate period-on-period comparisons.

In cases of acquired or created entity, the results of the new entity are eliminated from the constant scope results of current-year periods corresponding to the periods when the entity was not owned in the prior-year.

In cases of divested entities, the entity's results are excluded symmetrically for the prior year for quarters when the entity was not owned.

In cases of change of consolidation method, the policy is to use the lowest consolidation percentage over the two years (current and prior) for results of quarters adjusted on a like-for-like basis.

Comparative analysis at constant exchange rates is prepared by restating results for the prior-year quarter (reference quarter) at the current quarter exchange rate (analysed quarter). All of these calculations are performed by reference to the entity's reporting currency.

Reminder

DISCLAIMER

The figures included in this presentation are unaudited.

As a reminder, on 29 February 2024 BNP Paribas reported restated quarterly series for 2023 to reflect, in particular, the end of the build-up of the Single Resolution Fund (SRF), effective 1 January 2024, and the assumption of a similar contribution to local bank taxes at a level estimated at about 200 million euros annually beginning in 2024, as well as an accounting heading separated from cost of risk and entitled "Other net losses for risks on financial instruments", beginning in the fourth quarter 2023. This presentation reflects this restatement.

This presentation includes forward-looking statements based on current beliefs and expectations about future events. Forward-looking statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future events, operations, products and services, and statements regarding future performance and synergies. Forward-looking statements are not guarantees of future performance and are subject to inherent risks, uncertainties and assumptions about BNP Paribas and its subsidiaries and investments, developments of BNP Paribas and its subsidiaries, banking industry trends, future capital expenditures and acquisitions, changes in economic conditions globally, or in BNP Paribas' principal local markets, the competitive market and regulatory factors. Those events are uncertain; their outcome may differ from current expectations which may in turn significantly affect expected results. Actual results may differ materially from those projected or implied in these forward-looking statements. Any forward-looking statement contained in this presentation speaks as of the date of this presentation.

Consequently, actual results may differ from those projected or implied in these forward-looking statements due to a variety of factors. These factors include among others: i) BNP Paribas's ability to achieve its objectives, ii) the impacts from central bank interest rate policies, whether due to continued elevated interest rates or potential significant reductions in interest rates, iii) changes in regulatory capital and liquidity rules, iv) continued elevated levels of, or any resurgence in, inflation and its impacts, v) the various geopolitical uncertainties and impacts related notably to the invasion of Ukraine and the conflict in the Middle East, or vi) the precautionary statements included in this presentation.

2. RISK AND CAPITAL ADEQUACY – PILLAR 3 (NOT AUDITED)

**PILLAR 3 – CHAPTER 5 OF THE 2023
UNIVERSAL REGISTRATION DOCUMENT
30 September 2024**

KEY FIGURES

The capital ratio data below take into account the transitional provisions related to the introduction of IFRS 9 (Article 473a of Regulation (EU) No. 575/2013 as amended by Regulation (EU) No. 2020/873). The impact of these transitional measures on regulatory capital and regulatory ratios is presented under *Regulatory capital* (see Table 16 IFRS9-FL).

As a reminder, the Group carried out in full in the first half of 2024 the 2024 share buyback programme for a total amount of EUR 1.055 billion.

Since 1 July 2024, the entities, under exclusive control, of the Arval business are fully consolidated in the prudential scope. As at 30 September 2024, this evolution had an impact of -30 basis points on the Group's Common Equity Tier 1 (CET1) ratio linked to the 20.2 billion euro increase in these entities' risk-weighted assets, mainly on credit risk.

Update of the 2023 Universal Registration Document, table 1 pages 388-389.

Qualitative information on LCR (EU LIQ-B)

The Group's rolling month-end average LCR over the last 12 months stands at 133%, which corresponded to a liquidity surplus of EUR 94 billion compared with the regulatory requirement. The Group ratio averaged between 133% and 137%.

After application of the regulatory haircuts (weighted values), the Group's rolling month-end average liquid assets over the last 12 months amounted to EUR 382 billion, and mainly consist of central bank deposits (46% at the end of September) and government and sovereign bonds (54%).

Rolling month-end average cash outflows over the last 12 months under the thirty-day liquidity stress scenario amount to EUR 288 billion, a large part of which corresponds to thirty-day deposit outflow

assumptions of EUR 231 billion. Reciprocally, cash inflows on loans under the thirty-day liquidity regulatory stress scenario amount to EUR 70 billion.

Cash flows on financing transactions and collateralised loans, representing repurchase agreements and securities exchanges, record net rolling month-end average inflows over the last 12 months of EUR 1 billion, given the regulatory haircuts applied to collaterals. Flows linked to derivative instruments and regulatory stress tests record net outflows of EUR 18 billion after netting of cash outflows (EUR 47 billion) and inflows (EUR 29 billion).

Lastly, the rolling month-end average drawdown assumptions on financing commitments over the last 12 months amounted to EUR 51 billion.

There was no excessive imbalance on any significant currency.

5.2 Significant change

Save as disclosed in this amendment to the 2023 Universal Registration Document, there has been no significant change in the Group's financial position or financial performance since 30 September 2024, and no material adverse change in the prospects of BNPP since the end of the last financial period for which audited financial information has been published.

As far as BNP Paribas is aware, there have not been any recent events which are to a material extent relevant to the evaluation of BNP Paribas's solvency since 30 September 2024.

5.3 Contingent liabilities: legal proceedings and arbitration

BNP Paribas (the "Bank") is party as a defendant in various claims, disputes and legal proceedings (including investigations by judicial or supervisory authorities) in a number of jurisdictions arising in the ordinary course of its business, including *inter alia* in connection with its activities as market counterparty, lender, employer, investor and taxpayer.

The related risks have been assessed by the Bank and are subject, where appropriate, to provisions disclosed in note 4.k *Provisions for contingencies and charges* of the consolidated Financial Statements at June 30, 2024; a provision is recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle an obligation arising from a past event and a reliable estimate can be made of the amount of the obligation.

The main contingent liabilities related to pending legal, governmental, or arbitral proceedings as of 30 September, 2024 are described below. The Bank currently considers that none of these proceedings is likely to have a material adverse effect on its financial position or profitability; however, the outcome of legal or governmental proceedings is by definition unpredictable.

The Bank and certain of its subsidiaries are defendants in several actions pending before the United States Bankruptcy Court for the Southern District of New York brought by the Trustee appointed for the liquidation of Bernard L. Madoff Investment Securities LLC ("BLMIS"). These actions, known generally as "clawback claims", are similar to those brought by the BLMIS Trustee under the U.S.

Bankruptcy Code and New York state law against numerous institutions, and seek recovery of amounts allegedly received by BNP Paribas entities from BLMIS or indirectly through BLMIS-related "feeder funds" in which BNP Paribas entities held interests.

As a result of certain decisions of the Bankruptcy Court and the United States District Court between 2016 and 2018, the majority of the BLMIS Trustee's actions were either dismissed or substantially narrowed. However, those decisions were either reversed or effectively overruled by subsequent decisions of the United States Court of Appeals for the Second Circuit issued on 25 February 2019 and 30 August 2021. As a result, the BLMIS Trustee refiled certain of these actions and, as of end May 2023, had asserted claims amounting in the aggregate to approximately USD 1.2 billion. As of end June 2024, following the dismissal of certain of the BLMIS Trustee's actions or claims, the aggregate amount of the claims stood at approximately USD 1.1 billion. BNP Paribas has substantial and credible defenses to these actions and is defending against them vigorously.

Litigation was brought in Belgium by minority shareholders of the previous Fortis Group against the Société fédérale de Participations et d'Investissement, Ageas and BNP Paribas seeking (amongst other things) damages from BNP Paribas as restitution for part of the BNP Paribas Fortis shares that were contributed to BNP Paribas in 2009, on the ground that the transfer of these shares was null and void. On 29 April 2016, the Brussels Commercial court decided to stay the proceedings until the resolution of the pending Fortis criminal proceeding in Belgium. The criminal proceeding, in which the Public Prosecutor had requested a dismissal, is definitively closed, as the Council Chamber of the Brussels Court of first instance issued on 4 September 2020 a ruling (which since became final) that the charges were time-barred. Certain minority shareholders are continuing the civil proceedings against BNP Paribas and the Société fédérale de Participations et d'Investissement before the Brussels Commercial court; BNP Paribas continues to defend itself vigorously against the allegations of these shareholders. Hearings on the matter took place in September and October 2024 before the Brussels Commercial court; a judgment is expected to be rendered in the coming months.

On 26 February 2020, the Paris Criminal Court found BNP Paribas Personal Finance guilty of misleading commercial practice and concealment of this practice. BNP Paribas Personal Finance was ordered to pay a fine of EUR 187,500 and damages and legal fees to the civil plaintiffs. On 28 November 2023, the Paris Court of Appeals upheld the Paris Criminal Court's decision relating to misleading commercial practice and the concealment of those practices. As for the damages owed to the civil plaintiffs, though the Paris Court of Appeals adjusted the calculation methodology, the majority of the damages had already been paid by provisional enforcement of the Paris Criminal Court's judgment. An agreement was also entered into with the Consommation Logement Cadre de Vie association to settle the case with customers wishing to do so.

Like many other financial institutions in the banking, investment, mutual funds and brokerage sectors, the Bank has received or may receive requests for information from, or be subject to investigations by supervisory, governmental or self-regulatory agencies. The Bank responds to such requests, and cooperates with the relevant authorities and regulators and seeks to address and remedy any issues that may arise.

In 2023, BNP Paribas premises (along with those of other financial institutions) were searched by the French financial prosecutor's office; BNP Paribas was informed that the office had opened a preliminary investigation relating to French securities transactions.

There are no other legal, governmental or arbitration proceedings (including any such proceedings which are pending or threatened of which the Bank is aware) that may have or have had, in the previous twelve months, any significant effects on the Bank's financial position or the profitability of the Bank and/or the BNP Paribas Group.
