## Business development of the Eckert & Ziegler Group

### **Stable sales and constant EPS**

The Eckert & Ziegler Group has reached the sales level of prior quarters and has achieved sales of EUR 25.7 million in the first quarter of 2010 (average per quarter 2009: EUR 25.3 million). The profit after taxes and minority interests increased by 17% in comparison to the first quarter of 2009 and by 35% in comparison to the operating quarterly average for 2009, reaching EUR 2.5 million. This allowed earnings per share to be held constant at EUR 0.49 (operating average per quarter in 2009: EUR 0.49/share) in spite of a 36% increase in the number of shares in comparison to 2009.

In order to correctly assess the results of the first quarter of 2010 in comparison to 2009, we will make reference below to the average quarterly numbers for 2009 excluding special effects. This levels out effects from the integration of Nuclitec during the year and from the Russian project of the Therapy segment, for example. For comparison purposes, the notes once again in 2010 add sales and income from the new segment Environmental Services to the Industry segment, where the values were also included in 2009.

The most successful segment was once again the Industry segment. Revenue increased by 13%, the unadjusted margin by 34% and the EBIT by 91%. The successful integration of Nuclitec continues. The synergies become more obvious once restructuring expenses no longer apply. The segment was also able to report another increase in sales in the area of high-margin robust drill hole sources.

Environmental Services, which relate to taking back, reprocessing, recycling and disposal of low level radioactive waste, are included in the notes above on the Industry segment for comparison purposes. No new business was expected here in the first quarter of 2010, and with EUR 1.3 million in sales and expenses for preparations for new business that led to a small loss of EUR 46,000, this area developed within the framework of expectations. The annual sales target of the existing business (taking back sources and disposal of low level radioactive hospital waste) is EUR 5 million.

With sales of EUR 6.4 million and an EBIT of EUR 0.6 million, the Therapy segment experienced a quarter that was slightly below average. The relative reduction in sales in the first quarter of a year is normal and is based on strong sales in the last quarter of 2009. Sales and income from the Russian project are also absent, but will surely contribute to results in the rest of the year. Since the takeover bid and the accompanying increase in Ibt shares did not become effective until the middle of March 2010, no significant reduction in minority interests could be recorded.

The Radiopharmaceuticals segment is at the level of the previous year in terms of revenue and its cost positions. Half of the considerable increase in EBIT to EUR 0.7 million can be traced to income from transfers of shares and borrowings from Eckert & Ziegler EURO-PET Berlin GmbH.

The brief segment statistics on the following page (in thousands of euros) illustrate the sources of sales and income.

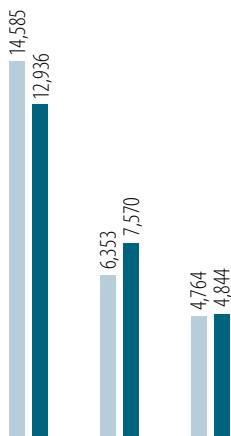

### **Liquidity**

The cash flow statement shows cash P&L earnings of EUR 4.9 million for the first quarter of 2010, which is 22% over the value from the first quarter of 2009. In contrast to 2009, however, net current assets increased by EUR 2.9 million, so that a cash inflow from operating activities of only EUR 2.0 million remains. In contrast with the previous year, investments do not include payments for acquisitions, which is why the cash outflow from investment activities is now in the normal range of EUR 1.1 million. No loans were taken out in the first quarter; instead, there were only repayments of a total of EUR 1.3 million. In sum, cash and cash equivalents remained nearly unchanged in comparison to December 31, 2009. On March 31, 2010, cash and cash equivalents were still EUR 44 million, but around half of this amount was used in April 2010 for the payment of the Ibt takeover bid.

**Brief segment overview**

**Profit after Taxes  
(in TEUR)**

**Balance sheet**

The Ibt takeover bid has major effects on the balance sheet. The financial obligation due in April 2010 of around EUR 22 million was posted in other current liabilities. Since Ibt has already been consolidated since the first quarter of 2008, there is no change on the asset side of the consolidated balance sheet in accordance with IFRS 3 (2008). Instead, the offsetting entry is made in shareholders' equity: On the one hand, minority interests are reduced by half from EUR 10 million to EUR 5 million due to the acceptance rate of approx. 55%. On the other hand, retained earnings are summarily reduced in accordance with IFRS. After the shareholders' equity ratio was again above 50% following the capital increase and the very good annual results from December 31, 2009, the ratio of shareholders' equity to total assets fell to 43% on March 31, 2010. The delayed payment from the takeover bid is unfavorable for the ratio. If the payment had occurred in March, the shareholders' equity ratio would have been 49% due to the balance sheet reduction.

## Milestones

- On the occasion of the Annual Congress of the European Association of Nuclear Medicine (EANM), the company offered the Eckert & Ziegler Abstract Award for the third time.
- At the Annual General Meeting on May 20, 2010, the Executive Board and Supervisory Board decide to propose the payment of a dividend of EUR 0.45 per share that is eligible for dividends
- Eckert & Ziegler concluded the takeover bid for the Belgian prostate implant manufacturer IBt and is now in possession of 72% of the shares eligible for dividends.

### Research and development

Work in the Therapy segment concentrated on the development of a complete plant for the production of prostate cancer implants for Russia. The first of the three components, a packaging system, was delivered. The second component, a system for chaining prostate seeds, was examined and accepted in Berlin by our Russian partners. A new and improved emergency container was also added to the accessories for our tumor irradiation equipment.

In the Radiopharmaceuticals segment, the focus was on further development of Modular Lab, a synthesis module family for the production of radioactive diagnostics. In the associated PharmTracer product series, cassettes, synthesis methods and programs were developed for the synthesis of radiodiagnostics on the basis of the isotope  $^{11}\text{C}$  (carbon isotope). For  $^{11}\text{C}$  choline,  $^{11}\text{C}$  methionine and  $^{11}\text{C}$  acetate, cassettes and synthesis sequences are now available that the customer can use in the Modular Lab PharmTracer systems. This makes it possible to use different isotopes in just one equipment system. The flexibility in production of radiopharmaceuticals is increased substantially in this way.

### Staff

As of March 31, 2010, the Eckert & Ziegler Group had 345 employees in Germany, and a total of 519 employees worldwide. Compared with the end of 2009, the number of staff decreased by 7 (December 31, 2009: 526). The change mainly relates to Nuclitec, where a net of 7 employees left the company during the period under review.

### Outlook

For the 2010 financial year, the target for sales is EUR 105 million. The Executive Board is keeping its profit forecast at EUR 9.5 million (EUR 1.80 per share). This goal can already be reached from the operating business without acquisitions, assuming the US dollar continues to increase in value in comparison with the euro or the annual average of the US dollar goes below the 1.33 mark.

## 1. General information

These unaudited interim consolidated financial statements as of March 31, 2010, comprise the financial statements of Eckert & Ziegler Strahlen- und Medizintechnik AG and its subsidiaries (also referred to hereinafter as "Eckert & Ziegler AG").

## 2. Accounting and valuation methods

The consolidated financial statements (interim financial statements) of Eckert & Ziegler AG as of March 31, 2010, have been prepared, like the annual financial statements for 2009, in accordance with the International Financial Reporting Standards (IFRS). All of the standards of the London-based International Accounting Standards Board (IASB) which were applicable in the EU on the balance sheet date, as well as the relevant interpretations of the International Financial Reporting Interpretations Committee (IFRIC) and the Standing Interpretations Committee (SIC), have been observed. The accounting policies described in the appendix to the annual financial statements for 2009 have been applied unchanged. For the preparation of the consolidated financial statements in compliance with the IFRS, it is necessary for estimates and assumptions to be made that have an impact on the amount and disclosure of recognized asset values and liabilities, income and expenditures. The actual values may differ from the estimates. Significant assumptions and estimates are made concerning useful lives, earnings attainable from goodwill and non-current assets, the realizability of receivables, and the recognition and measurement of provisions. This interim report contains all of the necessary information and adjustments required to produce a picture which reflects the actual circumstances in respect to the assets, financial situation and earnings position of Eckert & Ziegler AG at the time the interim report was produced. The earnings achieved during the course of the current fiscal year do not necessarily allow conclusions to be drawn about the development of future earnings.

## 3. Companies included in the consolidation

In the consolidated financial statements of Eckert & Ziegler AG, all companies are included where Eckert & Ziegler AG, either indirectly or directly, is able to determine the financial and business policies (control concept).

### Company acquisitions and disposals

Regarding acquisitions and disposals, please refer to the notes under section 4.

## 4. Limited comparability of group financial statements with the previous year

In January 2009, shares were acquired in the companies nuclitec GmbH, nuclitec s.a.r.l. and nuclitec Inc. In March 2010, the takeover bid for the shares of IBt S.A. that were not in possession of Eckert & Ziegler AG ended, whereupon Eckert & Ziegler increased its holdings in the IBt shares eligible for dividends to 72%. In March 2010, the Eckert & Ziegler Group increased its stake in Eckert & Ziegler EURO-PET Berlin GmbH from 70% to 100%. In March 2010, the Eckert & Ziegler Group increased its stake in Eckert & Ziegler f-con Europe GmbH from 74% to 77%. Compared with the first three months of 2009, this had a substantial impact on the financial situation and earnings position of the Group, which means that it is difficult to compare the Group report with the previous year's report.

## 5. Currency translation

The financial statements for the companies outside the European Monetary Union are translated based on the concept of functional currency. The following exchange rates were used for the currency translation: See the table below.

## 6. Portfolio of own shares

As of March 31, 2010, Eckert & Ziegler AG held 71,485 own shares. This equates to a share of 1.4% of the Company's nominal capital.

## 7. Substantial transactions with affiliated persons

In respect to substantial transactions with affiliated persons, we refer to the publications made in the consolidated financial statements dated December 31, 2009.
