

## Notes to unaudited pro forma condensed combined financial statements

### (A) Related Party Debt Financing/Interest Expense

The unaudited pro forma condensed combined statements of operations reflect an annual adjustment of approximately \$40.0 million for the expected interest expense on the Converted Term Loan and the BGC Notes that will remain outstanding following this offering. Pro forma interest expense reflects interest expense based on the simulated weighted average annual interest rate of 4.92% on our indebtedness to be incurred. A 0.25% increase or decrease in annual interest rate or the weighted average annual interest rate would increase or decrease pro forma interest expense by \$2.0 million annually. The following table reconciles the weighted average annual interest rate:

<u>Indebtedness</u>	<u>Principal</u>	<u>Rate</u>	<u>Proforma Annual Interest Expense</u>
Converted Term Loan . . . . .	400,000	3.7%	14,734
BGC Notes . . . . .	300,000	5.4%	16,125
BGC Notes . . . . .	112,500	8.1%	9,141
	<u>\$812,500</u>	4.92%	<u>\$40,000</u>

### (B) Separation of Partnership Interests

As described in “Structure of Newmark,” immediately following the completion of this offering, Newmark will own less than 68% of the economic interest in Newmark OpCo, but will indirectly have 100% of the voting power and control the management of Newmark OpCo. Newmark Holdings owns the remaining 32% interest in the Newmark OpCo. The founding/working partner units (which we refer to as “FPUs”), limited partnership units, and limited partnership interests held by Cantor, collectively, represent all of the “limited partnership interests” in BGC Holdings and represent 8%, 61%, and 31% of Holdings, respectively. Net income (loss) is allocated between the limited partnership interests and the common stockholders based on their respective weighted-average pro rata share of economic ownership of Newmark OpCo. The allocations of net income (loss) to FPU and limited partnership units are reflected as a component of compensation expense under “Allocations of net income and grant of exchangeability to limited partnership units” in Newmark’s unaudited pro forma condensed combined statements of operations. The allocation of net income to Cantor units is reflected as a component of “Net income attributable to noncontrolling interest” in Newmark’s unaudited pro forma combined statements of operations.

These pro forma adjustments adjust the historical BGC allocations to reflect the economic impact of this new ownership structure and the other pro forma adjustments had it been in place as of the beginning of the period presented.

The capital attributable to Newmark Holdings is recorded as “Redeemable partnership interest” and “Noncontrolling interests” in the Company unaudited pro forma condensed combined balance sheets.

Founding/working partners have a limited partnership interest in Newmark Holdings. Newmark accounts for FPU outside of permanent capital at their redemption value, as “Redeemable partnership interest,” in Newmark’s unaudited pro forma condensed combined balance sheet. This classification is applicable to FPU because these units are redeemable upon termination of a partner, including a termination of employment, which can be at the option of the partner and not within the control of the issuer. The units are also redeemable upon termination of a partner as a result of death. Upon termination, Newmark Holdings has a right, in the sole and absolute discretion of its general partner (which is owned 100% by the issuer), to redeem such interest for cash or, instead, provide Newmark common stock or other property for such interest.

FPUs are held by limited partners who are employees and generally receive quarterly allocations of net income. Upon termination of employment or otherwise ceasing to provide substantive services, the FPU are generally redeemed, and the unit holders are no longer entitled to participate in the quarterly allocations
