1. NATURE OF OPERATIONS

Focus Graphite Inc. (the "Company" or "Focus") was incorporated on December 30, 1998 under the Canada Business Corporations Act.

Focus is engaged in the acquisition, exploration and development of mineral properties in Quebec, Canada. The Company is in the exploration stage and does not derive any revenue from its properties. The address of the Company's corporate office is 1505 Laperriere Ave, Suite 505, Ottawa, Ontario, Canada. Focus Graphite Inc.'s common shares are listed for trading on the TSX Venture Exchange ("TSX-V") under the symbol "FMS" and on the OTCQX Exchange in the U.S. under the symbol "FCSMF".

2. GOING CONCERN ASSUMPTION

These condensed interim financial statements have been prepared on a going concern basis, which assumes that the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company is in the exploration stage and has not earned revenue from operations. As at March 31, 2026, the Company had cash of $1,166,634 and a working capital deficit of $1,471,720. During the six month period ended March 31, 2026, the Company had a net loss of $2,651,813 and had negative cash flows from operations of $3,366,536. In addition, the Company has a deficit of $106,906,617.

The above factors indicate that a material uncertainty exists that raises significant doubt about the Company's ability to continue as a going concern. In assessing whether the going concern assumption is appropriate, Management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. This assessment is based upon planned actions that may or may not occur for a number of reasons including the Company's own resources and external market conditions.

The Company's ability to continue as a going concern, realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative expenses and continue its exploration activities over the next twelve months is dependent upon Management's ability to obtain additional financing, through various means including but not limited to equity financing. No assurance can be given that any such additional financing will be available, or that it can be obtained on terms favorable to the Company.

These condensed interim financial statements do not reflect adjustments that would be necessary if the going concern assumption was not appropriate. If the going concern basis was not appropriate for these condensed interim financial statements, then adjustments would be necessary to the carrying amounts of assets and liabilities, the reported expenses and the classifications used in the statements of financial position.

3. BASIS OF PRESENTATION AND COMPLIANCE WITH IFRS

The condensed interim financial statements for the three and six month periods ended March 31, 2026 are expressed in Canadian dollars, which is the functional currency of the Company. They have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). They do not include all of the information and disclosures required in annual financial statements in accordance with International Financial Reporting Standards ("IFRS") and should be read in conjunction with the Company's financial statements for the years ended September 30, 2025 and 2024.

The condensed interim financial statements have been prepared in accordance with the accounting policies used in the Company's financial statements for the years ended September 30, 2025 and 2024.

When preparing the condensed interim financial statements, management undertakes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgments, estimates and assumptions made by management. The judgments, estimates and assumptions applied in the condensed interim financial statements, including the key sources of estimation uncertainty, were consistent with those applied in the Company's financial statements for the years ended September 30, 2025 and 2024.

13. RISK MANAGEMENT AND CAPITAL MANAGEMENT

Risk management

The Company thoroughly examines the various financial risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk, liquidity risk, currency risk and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(i) Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk are primarily composed of cash, amounts due from related parties and other receivables and maximum exposure is equal to the carrying values of these assets, totalling $1,190,876 at March 31, 2026. The Company's cash is held at several reputable financial institutions with high external credit ratings. The exposure to credit risk for the Company's receivables is considered immaterial. It is Management's opinion that the Company is not exposed to significant credit risk.

None of the Company's financial assets are secured by collateral or other credit enhancements.

Management considers that all the above financial assets that are not impaired or past due for each of the reporting dates are of good credit quality. There are no financial assets that are past due but not impaired for the periods presented.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages its liquidity needs by carefully monitoring cash outflows due in day-to-day business. As at March 31, 2026, the Company had a working capital deficiency of $1,471,720. During the six month period ended March 31, 2026, the Company had negative cash flows from operations of $3,366,536 (2025 - $561,105). The Company's ability to realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative expenses and continue its exploration activities over the next twelve months is dependent upon Management's ability to obtain additional financing, through various means including but not limited to equity financing. No assurance can be given that any such additional financing will be available, or that it can be obtained on terms favorable to the Company.

As at March 31, 2026, the Company has financial liabilities of $2,971,916 ($4,140,609 as at September 30, 2025), all of which are due within twelve months.

(iii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company has limited exposure to financial risk arising from fluctuations in foreign exchange rates given that its transactions are carried out primarily in Canadian dollars.

(iv) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's financial assets exposed to interest rate risk include cash held in interest bearing bank accounts with variable interest rates. The Company has not entered into any derivative contracts to manage this risk. The Company's policy as it relates to its cash balances is to invest excess cash in highly liquid, low-risk, short-term interest-bearing investments with maturities of 360 days or less from the original date of acquisition. As at March 31, 2026, the Company had cash balances of $1,166,634 ($575,952 as at September 30, 2025) and interest income derived from these investments during the six month period ended March 31, 2026 was $9,252 (2025 - $Nil).

The Company has limited exposure to financial risk arising from fluctuations in variable interest rates earned on cash given the low interest rates currently in effect and the low volatility of these rates.

<u>Capital management</u>

The Company manages its capital to ensure its ability to continue as a going concern and to provide an adequate return to its shareholders as well as ensuring that all flow-through monies obtained are utilized in exploration activities and spent by the required deadline. In the management of capital, the Company includes the components of shareholders' equity. As long as the Company is in the exploration stage of its mining properties, it is not the intention of the Company to contract additional debt obligations to finance its work programs. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares. When financing conditions are not optimal, the Company may enter into option agreements or find other solutions to continue its activities or may slow its activities until conditions improve.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than those of the TSX Venture Exchange ("TSXV") which require adequate working capital or financial resources of the greater of (i) $50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months. As of March 31, 2026, the Company was non-compliant with respect to the above TSXV capital requirement. Any impact of non-compliance is at the discretion of the TSXV.
