## 2. Asset details

Under the Act, MKIF is required to report the net asset value per share (NAV per share) of its portfolio.

The total net asset value of MKIF's portfolio is calculated by subtracting total liabilities from total assets of MKIF. MKIF's assets include its equity and debt investments in concession companies, cash and deposits and other investment securities. The net asset value per share of MKIF is calculated by dividing total net asset value by the number of outstanding shares.

The Collective Investment Property Appraisal Committee of MKAM has chosen to adopt the acquisition cost as its assessment of fair value for the unlisted equity investments under the Act and accounting principles generally accepted in Korea (KGAAP). In addition, the loan investments are measured at amortised cost under the Act and KGAAP.

The calculation of the NAV per share of MKIF is set out in the table below. For the purposes of this calculation, asset and liability information is based on the balance sheet of MKIF, which is attached as Appendix II.

Type	Q2 2013	Q3 2013	(Unit: KRW, Share)
			% Change
Total Assets (A)	2,078,815,667,118	2,094,224,879,774	0.74 %
Total Liabilities (B)	382,362,925,229	436,999,576,902	14.29 %
Net Asset Amount (C=A-B)	1,696,452,741,889	1,657,225,302,872	-2.31 %
Shares (D)	331,459,341	331,459,341	0.00 %
NAV per share (E=C/D) *	5,118.13	4,999.78	-2.31 %

\* NAV per share of MKIF is calculated by dividing total net asset value by the number of outstanding shares. However, as MKIF is listed on the Korea Exchange and the London Stock Exchange, its shares are traded at share price.

### ※ Distribution payment (during the third quarter)

Date of Payment	Distribution Amount (KRW Million)	Balance after Payment (Shares)	NAV per share		Remarks

## II Management performance and term performance

### 1. Overview

Established on 12 December 2002, MKIF is a leading private sector infrastructure investor in Korea under the PPI Act and governed by the Act. MKIF is mandated to invest in concession companies that construct or operate infrastructure assets through equity and debt. MKIF focused on generating profits from its investments and distributing these profits to its shareholders. As of 30 September 2013 MKIF has committed to invest in 11 toll roads, one subway and one port with total investment commitment of KRW1,658.8billion.

### 2. Management plan

MKIF is focusing on investments in loans to, and unlisted equity and equity-linked securities of, concession companies that operate infrastructure assets such as toll roads and other infrastructure under concessions from Korean central, provincial or city governments throughout the country. These infrastructure assets have been, or are being, constructed under the PPI Act and benefit from various forms of government support. Also, these assets offer opportunities to maximise MKIF's profit through capital restructuring initiatives.

### 3. Management performance

The table below sets out the historical NAV (including the distribution paid) for MKIF. As explained above and given that the majority of MKIF's assets are held at their acquisition cost, the net asset value is not representative of changes in the value of the MKIF portfolio.

#### A. Short-term performance

(Unit: %)				
Type	3 Month	6 Month	9 Month	12 Month
MKIF	1.79	4.29	5.89	7.76
