

34th Annual J. P. Morgan Healthcare Conference

January 11th -13th, 2016

San Francisco

**FRESENIUS
MEDICAL CARE**

1

Business update

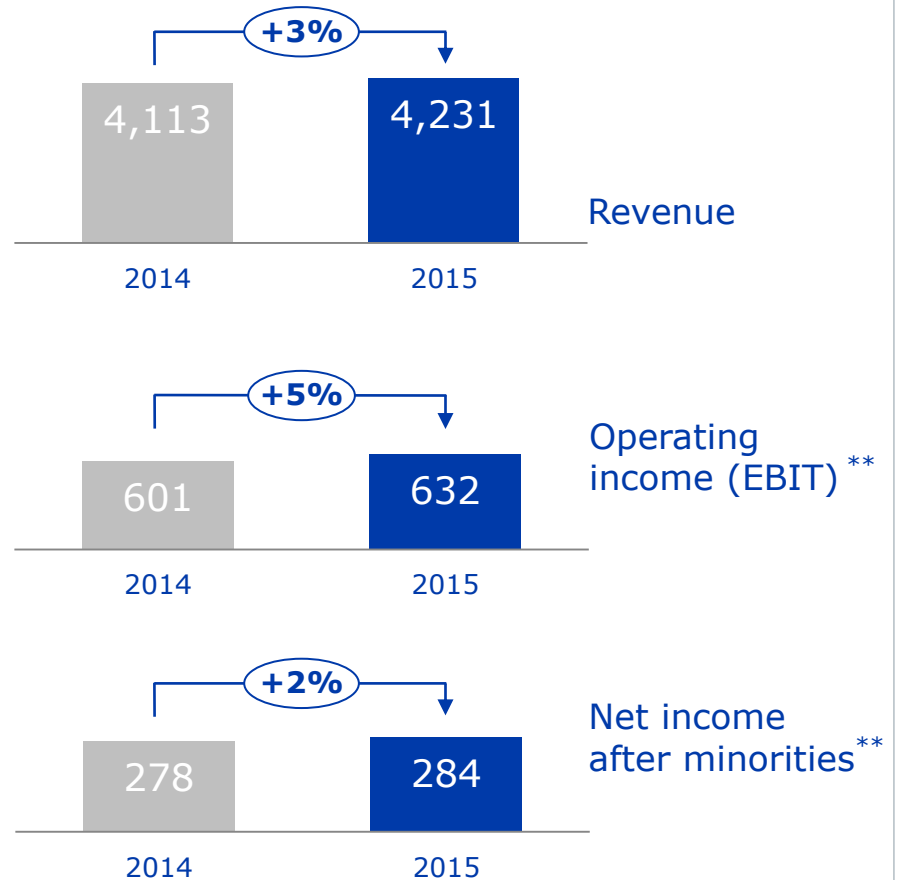

Q3 and nine months 2015

Strong underlying operational performance

Q3/9m Highlights

- ▶ Strong operational performance in North America leading to clearly improved earnings contribution
- ▶ International business impacted by currency and one-time items*
- ▶ Good growth in Care Coordination activities
- ▶ 2015 outlook confirmed

Q3 Performance (US\$ million)

Diagrams: different scales applied

* For detailed information see reconciliation, page 24

** excluding one-time items

Revenue breakdown for Q3 2015

North America

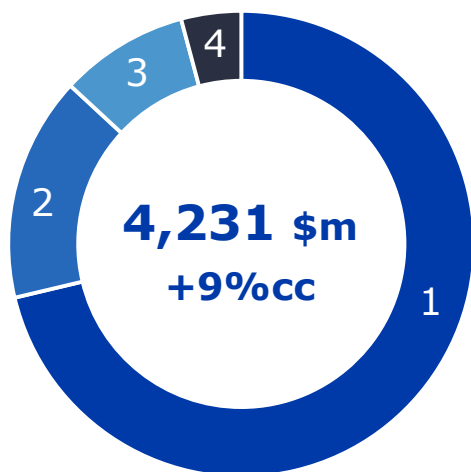

US\$ million

Revenue	3,013	+11%
Organic growth		+6%

International

US\$ million

Revenue	1,213	+5%cc
Organic growth		+6%

1	North America	71%
2	EMEA	16%
3	Asia-Pacific	9%
4	Latin America	4%

EMEA

Revenue	659	+2%cc
Organic growth		+2%

Asia-Pacific

Revenue	378	+9%cc
Organic growth		+10%

Latin America

Revenue	176	+7%cc
Organic growth		+13%

cc = constant currency

Confirmed - 2015 outlook and beyond

	2015 E	2016 projection
Revenue growth	5-7% 10-12%cc	7-10%cc
Net income growth	0-5%	15-20%

Assumptions:

- ▶ The 2015 outlook and the projections for 2016 are based on current exchange rates and include savings from the Global Efficiency Program
- ▶ Potential acquisitions are not included
- ▶ Investments in the business are consistent with our 2020 strategy

cc = constant currency

Summary Q3 2015 development

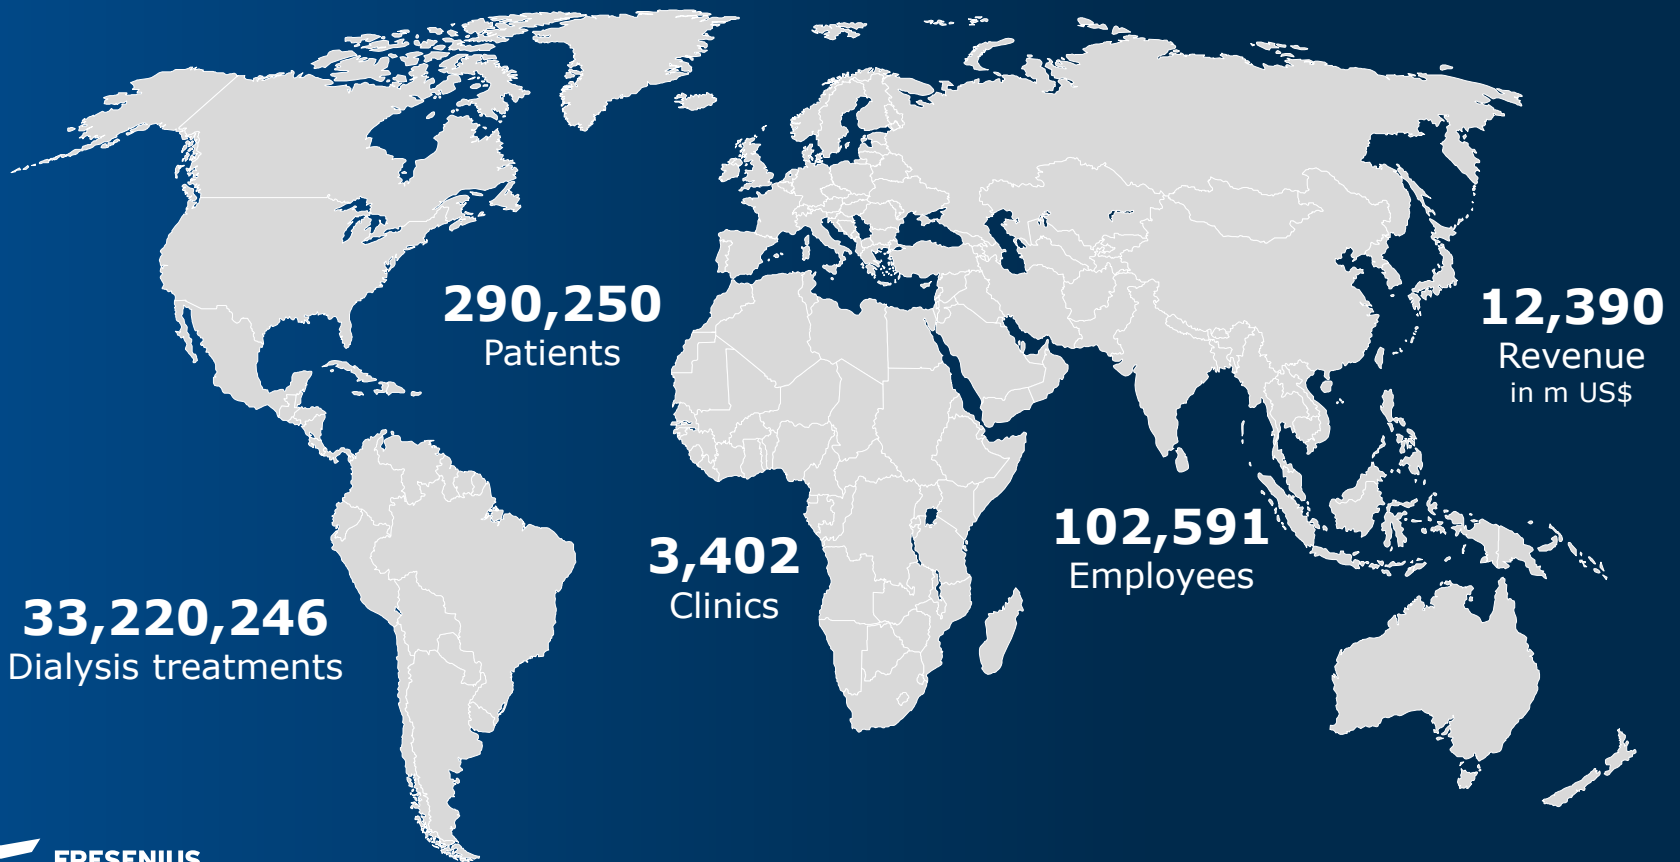

- ▶ Impressive performance in North America
- ▶ Utilization of “Mircera” going well
- ▶ International business impacted by
 - Strong fx headwinds (EMEA, Asia Pacific)
 - Divestiture in Venezuela
 - Normalized growth in dialysis products in Q3 after an outstanding H1

2

Market Dynamics & Strategy

Our motivation in numbers – 9m 2015

Every 0.8 seconds we provide a dialysis treatment somewhere on the globe in one of our dialysis clinics.

2020 growth strategy

Growing in our
core
business

Opening up
new
business
areas

Enhancing
products
and
treatments

Increasing
efficiency
and
flexibility

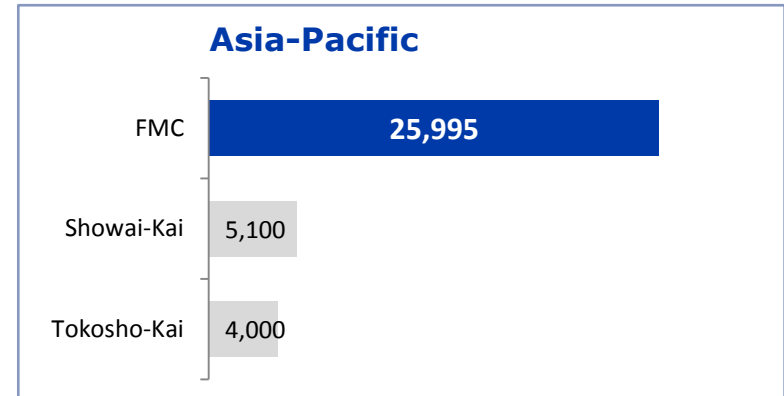

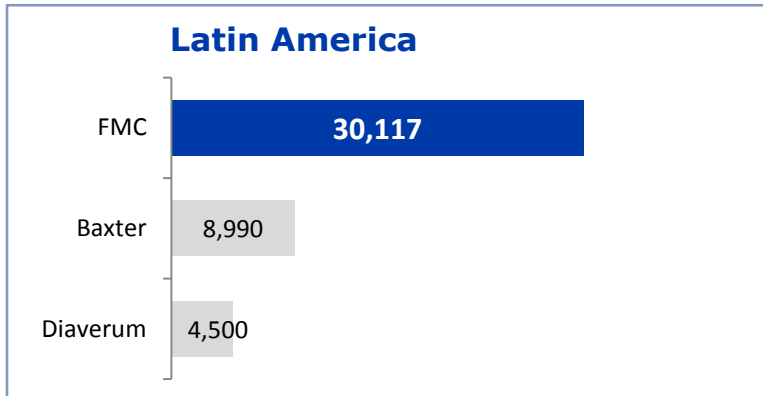

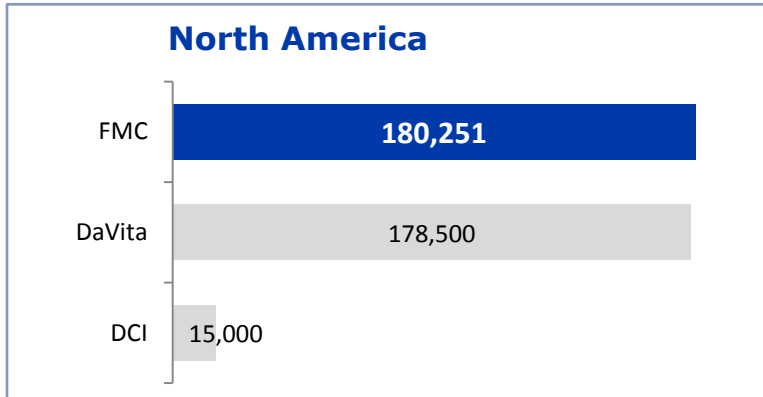

Expected development of global dialysis patient population

- ▶ Expected patient growth of around 6%
- ▶ Driven by age, lifestyle and higher life expectancy

¹ Internal estimates

Dialysis services worldwide – Number of patients treated¹

**USD
~77bn
Market**

**We lead in every major market,
treating > 290,000 patients worldwide**

¹ as of December 31, 2014 , based on company statements and own estimates, FMC: September 2015

Market position by major product groups 2014

	Position 1
Dialyzers	FMC
Dialysis machines	FMC
Hemodialysis concentrates	FMC
Bloodlines	FMC
Peritoneal dialysis products	Baxter

Dialyzers

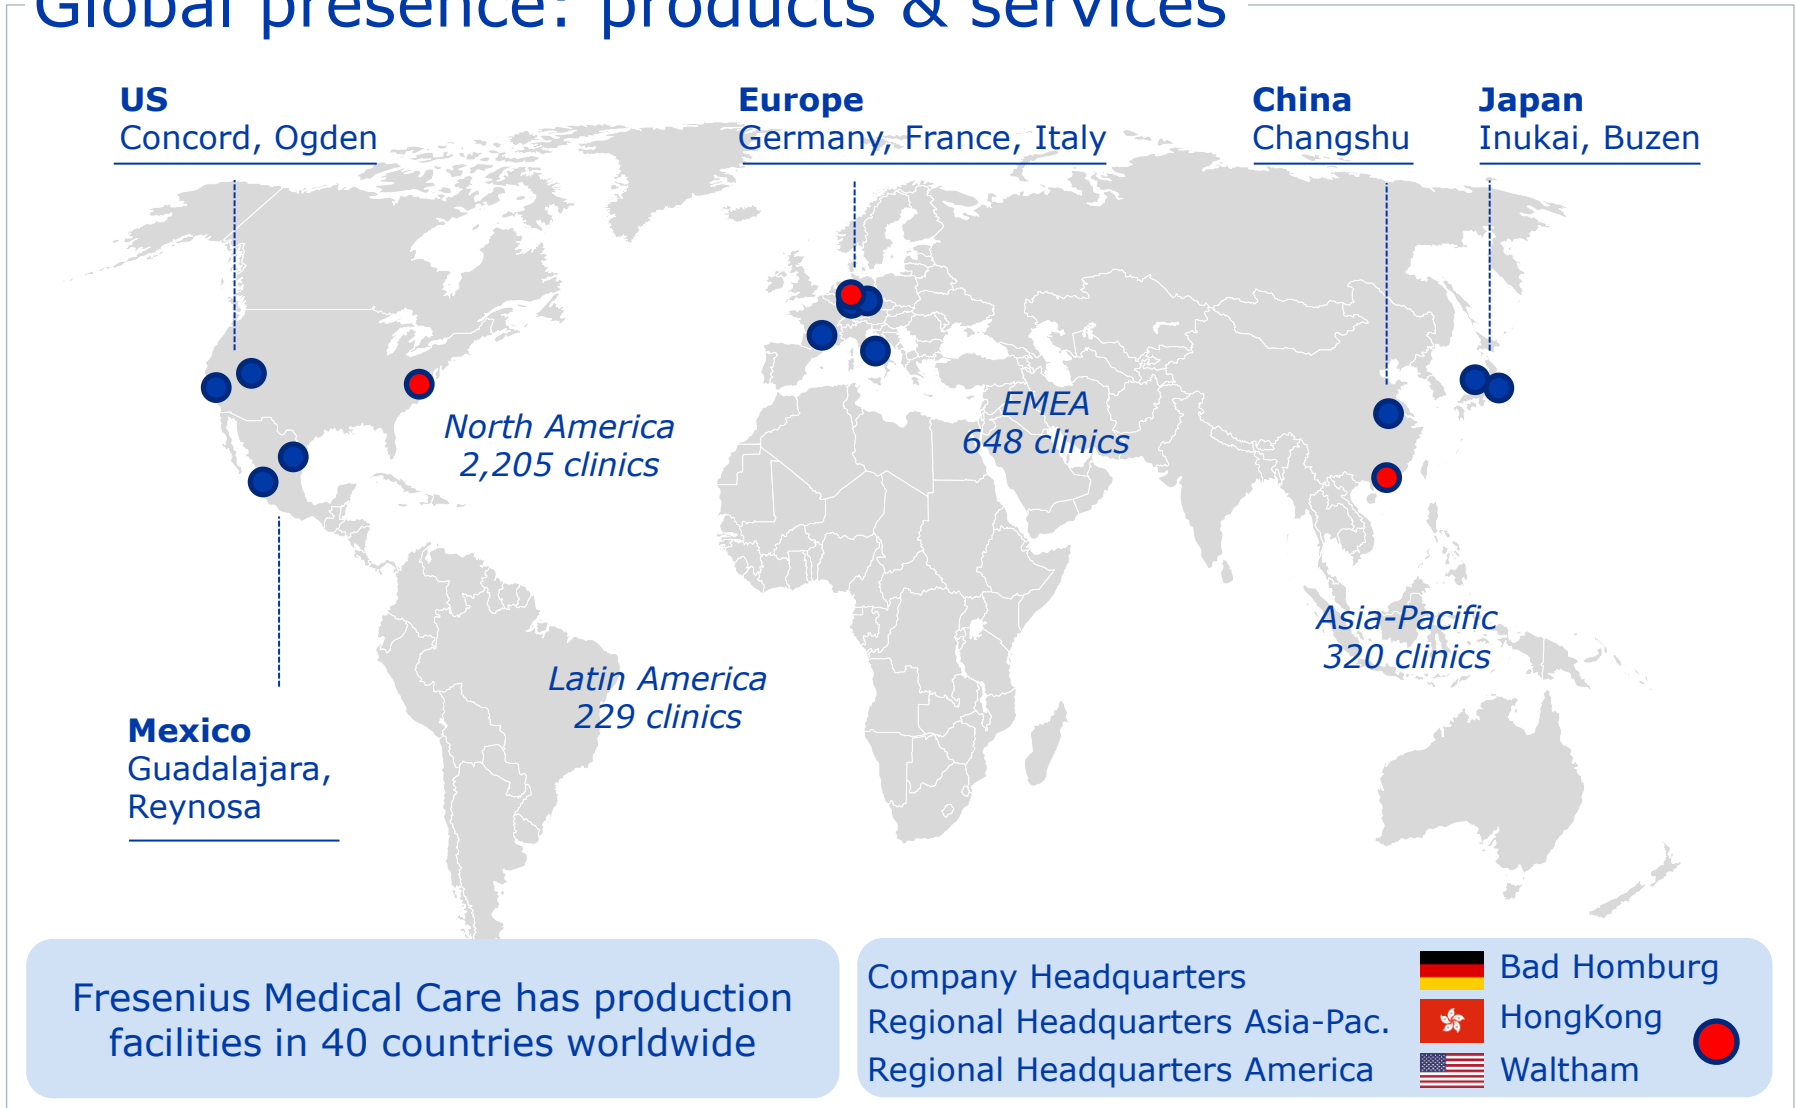

Dialysis machines

Sold around 115 million dialyzers in 2014

Why Care Coordination?

2020 target of \$28bn of revenue ...
high single digit EAT growth

Our focus is chronically ill patients;
by coordinating the network and
organizing care, we can actively
manage the medical cost

Value-based care in the U.S. is a reality.
This environment helps us drive forward
our care coordination strategy and
developed markets around the world are
adapting in their own way

Care Coordination is the only way
to manage high cost chronic illness

Patients want organized support for managing care

The healthcare system needs specialized integrated networks to better meet the needs of the chronically ill

90%

of patients say that they are prepared to take care of their needs arising from their disease

66%

of physicians say they would treat patients more effectively if they had more access to integrated care networks

86%

of the general population says that a coordinated treatment experience is important

66%

of patients are non-compliant which is a significant obstacle for two-thirds of physicians

Safe harbor statement: This presentation includes certain forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Act of 1934, as amended. The Company has based these forward-looking statements on its views with respect to future events and financial performance. Actual results could differ materially from those included in the forward-looking statements due to various risk factors and uncertainties, including changes in business, economic competitive conditions, regulatory reforms, foreign exchange rate fluctuations, uncertainties in litigation or investigative proceedings and the availability of financing. Given these uncertainties, readers should not put undue reliance on any forward-looking statements. These and other risks and uncertainties are discussed in detail in Fresenius Medical Care AG & Co. KGaA's (FMC AG & Co. KGaA) reports filed with the Securities and Exchange Commission (SEC) and the German Exchange Commission (Deutsche Börse).

Forward-looking statements represent estimates and assumptions only as of the date that they were made. The information contained in this presentation is subject to change without notice and the company does not undertake any duty to update the forward-looking statements, and the estimates and assumptions associated with them, except to the extent required by applicable law and regulations.

If not mentioned differently the term net income after minorities refers to the net income attributable to the shareholders of Fresenius Medical Care AG Co. KGaA independent of being the reported or the adjusted number. The term EMEA refers to the region Europe, Middle East and Africa. Amounts are in US-\$ if not mentioned otherwise.

Constant currency: Changes in revenue include the impact of changes in foreign currency exchange rates. We use the non-GAAP financial measure “at constant exchange rates” in our filings to show changes in our revenue without giving effect to period-to-period currency fluctuations. Under U.S. GAAP, revenues received in local (non-U.S. dollar) currency are translated into U.S. dollars at the average exchange rate for the period presented. When we use the term “constant currency,” it means that we have translated local currency revenues for the current reporting period into U.S. dollars using the same average foreign currency exchange rates for the conversion of revenues into U.S. dollars that we used to translate local currency revenues for the comparable reporting period of the prior year. We then calculate the change, as a percentage, of the current period revenues using the prior period exchange rates versus the prior period revenues. This resulting percentage is a non-GAAP measure referring to a change as a percentage “at constant exchange rates.”

We believe that revenue growth is a key indication of how a company is progressing from period to period and that the non-GAAP financial measure constant currency is useful to investors, lenders, and other creditors because such information enables them to gauge the impact of currency fluctuations on its revenue from period to period. However, we also believe that data on constant currency period-over-period changes have limitations, particularly as the currency effects that are eliminated could constitute a significant element of our revenue and could significantly impact our performance. We therefore limit our use of constant currency period-over-period changes to a measure for the impact of currency fluctuations on the translation of local currency revenue into U.S. dollars. We do not evaluate our results and performance without considering both constant currency period-over-period changes in non-U.S. GAAP revenue on the one hand and changes in revenue prepared in accordance with U.S. GAAP on the other. We caution the readers of this report to follow a similar approach by considering data on constant currency period-over-period changes only in addition to, and not as a substitute for or superior to, changes in revenue prepared in accordance with U.S. GAAP. We present the fluctuation derived from U.S. GAAP revenue next to the fluctuation derived from non-GAAP revenue. Because the reconciliation is inherent in the disclosure, we believe that a separate reconciliation would not provide any additional benefit.
