Sales Development

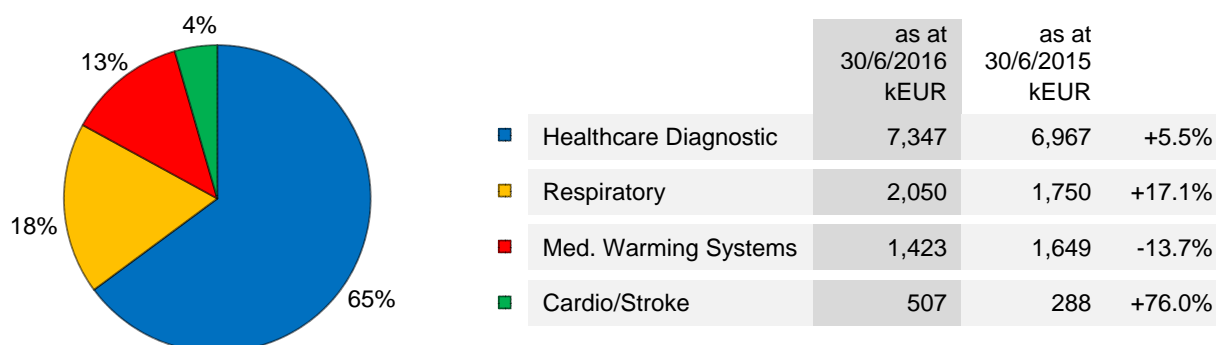

Sales trends on the German market, in Europe and in the Middle East region were positive. Almost all product groups reported growth in sales. Sales in Germany were positively influenced in particular by the sales expansion reported by the subsidiary apoplex medical. The strong growth recorded in the Middle East region benefited from a weak period last year. The drop in sales posted on the U.S. market can be attributed to the weak performance of LMT Medical, which reported a good sales situation for this market last year. Geratherm products registered a drop in sales because of the continuing economic difficulties prevailing in South America.

Sales by regions 1/1 - 30/6/2016

The current growth posted by Geratherm Medical is increasingly supported by the positive development in the new business areas. Based on current estimates, this should continue over the coming quarters.

Sales by segments 1/1 - 30/6/2016

The Healthcare Diagnostic segment managed to report a sales growth of +5.5 % during the first 6 months. Growth was driven by the analog clinical thermometer product group and medical capillaries. The product group showed a 11.3 % sales jump and accounted for a 39.4 % share of the the overall sales of the Geratherm Group. The digital clinical thermometer and blood pressure monitor product groups exhibited a weaker development.

The Respiratory segment continued to grow in the six months of the business year and registered a jump in sales of +17.1 %. Its share in total sales posted by the Geratherm Group is now 18.1 %.

The sales in the Medical Warming Systems segment decreased by -13.7 %. The weaker sales reported by LMT Medical for the first six months of the current business year played a key role in this case. We assume that this segment will show positive development again in the coming quarters.

Sales development in the Segment Cardio/Stroke segment was satisfying. The segment managed to increase its sales substantially by +76.0 % during the first six months compared to the same period last year. Besides the increasing demand for apoplex products, performance was positively influenced by the inclusion of apoplex products in a clinical trial for regulatory approval. apoplex cooperates in this regard with Bayer AG in a "multicenter phase III study". About 7,000 patients from more than 25 countries worldwide are participating in the study at 350 study centres.

During the course of the study, apoplex medical is equipping approx. 160 centres with its Stroke Risk Analyser product (SRA) all over the globe.

Earnings Situation

The operating result posted in the first half of the current business year showed good growth due to the positive sales trend and increasing integration of higher-margin products.

The EBITDA margin increased slightly from 17.8 % to 18.6 % compared to the same reference period last year. The write-offs increased to 562 kEUR (2015: 422 kEUR).

Income taxes weighed on the result with -264 kEUR (2015: -410 kEUR). The effective taxes amounted, however, to only 172 kEUR. The remaining amount of 92 kEUR accounted for the decrease of non-cash effective deferred tax assets due to the use of losses carried forward.

The consolidated net profit for the first six months of 2016 was 1,131 kEUR (2015: 886 kEUR), an increase of 27.5 %. After redeeming the result attributable to minority interests, a net income of 988 kEUR (-6.5 %) for the first half of the year was generated for the shareholders of the parent company. The result per share for the first six months is 20 EUR cents (2015: 21 EUR cent).

Notes on Interim Consolidated Financial Statements for the Period from 1 January 2016 to 30 June 2016

Accounting and Valuation Methods

The interim consolidated financial statements of Geratherm Medical AG were prepared for the first six months of the 2016 business year in accordance with the rules of the International Financial Reporting Standards (IFRS) valid on the date of the financial statements and in consideration of the guidance provided by the International Financial Reporting Interpretations Committee (IFRIC), as is mandatory in the European Union.

The accounting, evaluation and consolidation principles were maintained, as shown in the Notes to Consolidated Financial Statements for 2015 Business Year.

The valuation of assets and liabilities is based in part on estimates and/or assumptions about future developments. For instance, the statements on economic useful life for long-term assets are based on estimates and assumptions. In addition, the assessment of the intrinsic value of deferred taxation allocated to the losses carried forward and the impairment tests of the cash-generating units and the assets is based on the corporate planning, which of course involves uncertainties such that the actual values may deviate from the made assumptions and estimates in individual cases. Estimates and the underlying assumptions are regularly checked and evaluated with regard to possible impact on accounting.
