For **Infosys Limited**

A G S Manikantha
Company Secretary

PRESS RELEASE

Infosys Joins Salesforce Partner Ecosystem to Deliver Analytics Cloud Applications

Infosys will build Analytics Cloud applications to enable intelligent insights and actions throughout organizations

Bangalore - February 07, 2017: [Infosys](#) (NYSE: INFY), a global leader in consulting, technology and next-generation services, has announced that it will set up a new practice that will build and provide implementation services for Salesforce's Analytics Cloud applications, helping business users access, explore and act on their organizational intelligence faster. Infosys will be among the first Analytics Cloud partners to bring both systems integrator leadership as well as a proven independent software vendor (ISV) capability.

Infosys brings expertise in data, analytics and advanced IT platforms integration to help customers implement Analytics Cloud applications, enabling them to gain full access to the massive potential of their organizational data. This unlocks their ability to increase efficiency and drive new sources of revenue. Analytics Cloud allows sales, service and marketing teams to explore data independently and derive insights without relying on disparate systems and complex spreadsheets that are difficult to use and often siloed within an organization.

Infosys has committed to develop an Analytics Cloud training program that will scale into a large, dedicated practice to support the ever-increasing need enterprises have for analytics, with the convenience and economics of the cloud. Infosys will also leverage its platform and engineering capabilities to develop new analytics applications on the Analytics Cloud platform. In parallel, Analytics Cloud will be integrated into Infosys Information Platform (IIP), an industry-leading data and analytics platform that helps enterprises leverage their data assets for innovation and enhance business growth.

"Today's challenge is to make sense of all available data fast enough to remain responsive and deliver business growth. Analytics Cloud is a unique platform that helps business leaders easily make sense of large amounts of data and to collaborate across the enterprise, at any time, in real time, on any device," **said Ravi Kumar S., President and Deputy Chief Operating Officer, Infosys.** "With a similar passion for data-driven insight and intelligent platforms, Infosys is thrilled to partner with Salesforce and bring our considerable strengths together for the benefit of our customers."

"Salesforce Analytics Cloud is seeing rapid global adoption, as companies everywhere look to transform the way they explore data, find answers and take action," **said Bob Stutz, CEO of Marketing Cloud and**

Chief Analytics Officer at Salesforce. “Partners such as Infosys provide the best practices, industry experience and expertise that make it easier than ever for Salesforce customers to extend Analytics Cloud for every business need.”

About Infosys Ltd

Safe Harbor

Certain statements in this press release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2016. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of the date of this press release. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
