AMORIM

CORTICEIRA AMORIM CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2025

First semester 2025 (1H25) (Audited)
Second quarter 2025 (2Q25) (Non audited)

CONSOLIDATED MANAGEMENT REPORT

1. SUMMARY OF ACTIVITY

In the first half of 2025, global economic activity unfolded in a climate of heightened uncertainty and volatility, reflecting the impact of growing trade and geopolitical tensions. The period began with the U.S. announcement of reciprocal tariffs, referred to as 'Liberation Day.' The implementation of these tariffs was repeatedly postponed, suspended, and even used as a political bargaining tool, continuously fueling market instability. In this context, central banks adopted a cautious stance. The U.S. Federal Reserve (FED) kept USD interest rates stable while monitoring the impact of trade tensions on the American economy. Meanwhile, the European Central Bank (ECB) expressed concern over the weakening of economic activity in the Eurozone, particularly the fragile performance observed in Germany.

The U.S. economy is estimated to have recorded solid annualized growth of 3.0% in the second quarter of 2025, reversing the contraction seen in the first three months of the year and thus exceeding expectations. The main driver of growth was the recovery in external trade, with a decline in imports offsetting the early-year surge driven by fears of tariff imposition.

The Eurozone is estimated to have posted a 0.1% increase in the second quarter, below the previous quarter's growth but still above the expected flat performance. Portugal and Spain continued to outperform expectations, helping to offset Germany's slowdown and highlighting the lack of synchrony within the region. Despite a quarter marked by uncertainty, the services sector remained robust. In contrast, the industrial sector showed signs of weakening resilience and increased internal divergence.

Corticeira Amorim's consolidated sales reached €473.1 million in the first six months of 2025, a decrease of 5.5% compared to the same period last year. Excluding the impact of the scope change resulting from the sale of the stake in Timberman Denmark, sales would have declined by 2.2%.

The foreign exchange effect in the first half amounted to \in 2.2 million; excluding this effect, sales at the end of the semester would have decreased by approximately 5.1%.

All business units (BUs) experienced sales pressure, except Amorim Cork, whose sales grew to €395.2 million (+0.5%) compared to 1H24. Amorim Cork Solutions saw a 25.6% decline, mainly due to reduced activity in the flooring segment. Excluding the consolidation perimeter change, the decline would have been 11.9%.

Amorim Florestal sales declined by 4.3%, impacted by reduced activity levels in other BU.

Consolidated EBITDA amounted to €86.9 million, compared to €94.4 million in 1H24. Despite the positive contribution from reduced structural costs and improved industrial efficiencies, profitability was penalized by higher consumption prices, cork raw material quality, and a less favorable product mix. The EBITDA/Sales ratio stood at 18.4% (1H24: 18.9%). The incorporation of cork acquired during the 2024 campaign into production is

expected to support margins, with this effect already evident in Q2 2025 (EBITDA margin of 19.5% vs. 19.1% in Q2 2024).

The results from associates and non-controlling interests declined by 13.9% and 24.8%, respectively, compared to 1H24.

After accounting for results attributable to non-controlling interests, Corticeira Amorim closed the first half of 2025 with a net profit of \odot 36.8 million, a increase of 0.8% compared to 1H24.

At the end of June, net interest-bearing debt stood at $\[\]$ 153.1 million. Despite dividend payments ($\[\]$ 42.6 million) and investment in fixed assets ($\[\]$ 14.1 million), the favorable evolution of working capital requirements (a decrease of $\[\]$ 26.3 million) supported a reduction in net debt of $\[\]$ 42.6 million compared to the end of December 2024 ($\[\]$ 195.7 million).

2. OPERATING ACTIVITY - FIRST HALF 2025

The **Amorim Florestal BU** recorded sales of €117.6 million, a decrease of 4.3% compared with the same period of 2024. This drop in activity was due to reduced demand from Corticeira Amorim's other BUs.

EBITDA totalled $\[\in \]$ 5.7 million, a reduction compared with the same period of the previous year ($\[\in \]$ 8.0 million). The reduction in the EBITDA margin (6.5% in 1H24 to 4.9% in 1H25) was mainly due to higher raw material consumption prices, the quality of cork batches processed at the beginning of the year, and increased operating expenses—particularly electricity, personnel, and transportation costs.

Profitability already improved in the second quarter of 2025, as cork from the 2024 harvest campaign was gradually incorporated into production.

The 2025 cork purchasing campaign is nearly complete, with extraction volumes falling short of initial expectations. This reflects lower demand and a normalization of cork prices, which have declined following the sharp increases observed during the 2022 and 2023 campaigns.

The **Amorim Cork BU** recorded sales of €395.2 million, an increase of 0.5% compared with the same period in 2024. Challenging market conditions and uncertainty surrounding tariffs in the U.S. continued to impact sales performance. The consolidation of the Intercap group added €5.6 million to sales.

The segments of cork stoppers for spirits and sparkling wines showed positive sales performance, surpassing that of still wine, which continues to be the most affected by negative trends impacting global alcohol consumption. The Neutrocork® stopper category showed resilient performance, mainly driven by strong growth in Xpür®.

EBITDA for the business unit amounted to €73.1 million (vs. €84.7 million in 1H24). The EBITDA margin stood at 18.5% (vs. 21.5% in 1H24). Despite the recent decline, cork costs still had a negative impact on the EBITDA margin, which was also penalized by the deterioration of the product mix, the increase in energy costs, and higher personnel expenses.

Amorim Cork Solutions Business Unit recorded sales of €81.7 million, a decrease of 25.6% compared to the same period in 2024. Sales were negatively impacted by changes in the consolidation perimeter (sale of Timberman in December 2024)—excluding this effect, sales would have decreased by 11.9%.

Volume performance continued to be the main factor behind the organic sales decline, despite a marginal increase in selling prices.

Strong performances were recorded in the Flooring Producers, Power Industry, and Rail segments, while the Final Flooring, Insulation, and DIY segments continued to reflect challenging market conditions. Portugal, the USA, and Germany were the markets where the largest sales declines were observed.

EBITDA for the business unit reached €7.1 million, compared to €6.4 million in 1H24. Despite the adverse impact of operational activity, the EBITDA margin improved significantly, mainly driven by reduced operating costs (especially personnel, marketing, transportation, and maintenance), reflecting the benefits of the reorganization process initiated last year.

The transfer of the Silves industrial unit to Vendas Novas resulted in non-recurring expenses of \bigcirc 0.9 million and an extraordinary impairment of \bigcirc 2.0 million (recognized under depreciation).

3.CONSOLIDATED PROFIT AND LOSS ACCOUNT AND FINANCIAL POSITION

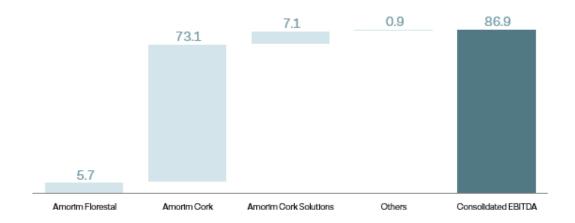

As previously mentioned, the drop in sales (-5.5%) results from a reduction in sales across all the Group's BUs, except for Amorim Cork.

The gross margin percentage is in line with the same period last year, increasing from 54.2% to 54.3%.

In regard to operating expenses, the increase of approximately $\bigcirc 1.1$ million in personnel costs (-1.1%) compared with the same period of 2024 is explained by the reduction in the average number of employees. Third party supplies and services decreased by 9.6%. Despite a increase in the energy item (3.2%), the decrease in other items, such as transportation (-7.6%) led to a reduction in third party supplies and services during the period.

The effect of exchange rate differences on receivable assets and payable liabilities and the respective exchange rate risk hedges included in other operating income/gains was positive, amounting to approximately \bigcirc 1.6 million (1S24: \bigcirc 0.3 million).

EBITDA decreased by 8.0% to €86.9 million. The EBITDA-sales ratio was 18.4% (1S24: 18.9%).

As previously explained, during this semester, \bigcirc 0.9 million in non-recurring expenses and \bigcirc 2.0 million in extraordinary depreciations were recognized in the Amorim Cork Solutions BU.

Compared with the same period of 2024, financial results improved, reflecting a decrease in both the cost and average level of financing.

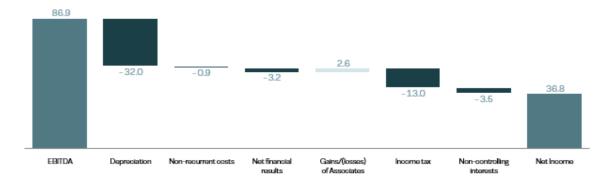

The earnings of associated companies totalled \in 2.6 million, a reduction compared with the same period of the previous year (1S24: \in 3.1 million).

As in previous years, it will only be possible to estimate the value of investment tax benefits for 2025 (RFAI and SIFIDE) at the end of the financial year. As a result, any tax gain will be recorded only at the close of the 2025 accounts.

Earnings from non-controlling interests decreased compared with the same period in 2024 (\odot 3.5 million vs \odot 4.7 million).

After income tax of $\[Delta 13.0$ million and the allocation of results to non-controlling interests, the net result attributable to Corticeira Amorim shareholders totalled $\[Delta 36.8$ million, a increase of 0.8% compared with net results of $\[Delta 36.5$ million in the first half of 2024.

Earnings per share were €0.277 (1S24: €0.275).

In terms of the Group's financial position, assets decreased by \bigcirc 49.6 million compared with December 2024. The increases under the Trade receivables item (\bigcirc 33.2 million) and Other current assets (\bigcirc 23.6 million) was mainly due to advances made for raw material purchases. The Inventories item decreased by about \bigcirc 71.1 million, thus achieving Corticeira Amorim's objective of improving inventory management.

The change in Equity (excluding non-controlling interests) was mainly due to the results for the period (\pm 36.8 million) and the dividends distributed (\pm 42.6 million). The variation in the Non-controlling interests item results from the earnings for the period attributable to non-controlling interests, offset by dividends distributed to non-controlling interests.

In regard to liabilities, there was a significant reduction in Interest-Bearing Debt (- \in 49.7 million) and Other Financial Liabilities (- \in 4.8 million). On the other hand, the Trade Payables item increased by around \in 12.6 million, as did Income Tax Payable (+ \in 0.8 million), due to the increase in estimated tax.

At the end of June 2025, Equity stood at €821.3 million. The financial autonomy ratio was 62.6%.

4.KEY CONSOLIDATED INDICATORS

Includes non-recurring results and impairments related to the transfer of industrial facility from Silves to Vendas Novas. Current

5. OUTLOOK FOR THE SECOND HALF

The second half of 2025 will continue to be marked by high macroeconomic uncertainty, driven by geopolitical tensions, market volatility, and doubts regarding the trajectory of monetary policies. This context may affect Corticeira Amorim's performance in the second half of 2025. Nevertheless, the goal is to recover part of the activity loss, although some constraints may arise that could impact market progression.

6.BUSINESS RISKS AND UNCERTAINTIES

Corticeira Amorim, like all other companies, operates in the climate of economic uncertainty that is affecting global markets.

²⁾ EBITDA of the past four quarters.

³⁾ Net interest includes interest from loans deducted of interest from deposits (excludes stamp tax and commissions).

The risks and uncertainties listed in the Company's annual report remain up to date. It should be noted that at the end of the first half of 2025, with the Group's cork purchasing needs for 2026 assured, Corticeira Amorim will continue to respond uninterruptedly to its customers needs throughout the world, adopting the best and most appropriate practices at all times. The Company's diversification policy and practices - not just one product, not just one currency - will provide additional balance.

Corticeira Amorim's activity is exposed to a variety of financial risks: market risk (including exchange-rate risk and interest-rate risk), credit risk, liquidity risk and capital risk. The Company's objectives and policies regarding the management of these risks, including its hedging policies for each of the main categories of likely transactions for which hedging accounting is used, as well as exposure to price, credit, liquidity and cash flow risks are set out in the note: "Financial Risk Management", which is included in the Notes to the Consolidated Accounts.

7.OWN SECURITIES

Throughout the first half of 2025, Corticeira Amorim did not acquire or dispose of any of its own shares.

On June 30, 2025, Corticeira Amorim did not hold any of its own shares.

8. SHAREHOLDERS' EQUITY

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. INTRODUCTION

At the beginning of 1991, Corticeira Amorim, S.A. was transformed into Corticeira Amorim, S.G.P.S., S.A., the holding company for the cork business sector of the Amorim Group. In this report, Corticeira Amorim will be the designation of Corticeira Amorim, S.G.P.S., S.A., and in some cases the designation of Corticeira Amorim, S.G.P.S. together with all of its subsidiaries.

Corticeira Amorim is mainly engaged in the acquisition and transformation of cork into a numerous set of cork and cork related products, which are distributed worldwide through its network of sales company.

Corticeira Amorim is a Portuguese company with a registered head office in Mozelos, Santa Maria da Feira. Its share capital amounts to 133 million euros, which are publicly traded in the Euronext Lisbon – Sociedade Gestora de Mercados Regulamentados, S.A.

Amorim - Investimentos e Participações, S.G.P.S, S.A. held, as of December 31, 2024 and June 30, 2025, 67,830,000 shares of Corticeira Amorim, corresponding to 51.00% of the capital stock. Corticeira Amorim consolidates in Amorim - Investimentos e Participações, S.G.P.S., S.A., which is its controlling and Mother Company. Amorim - Investimentos e Participações, S.G.P.S., S.A. is owned by Amorim family.

These financial statements were approved in the Board Meeting of July 28, 2025. Shareholders have the capacity to modify these financial statements even after their release.

Except when mentioned, all monetary values are stated in thousand euros (Thousand euros = K euros = $K \in \mathbb{N}$).

2. SUMMARY OF ACCOUNTING POLICIES

The condensed consolidated financial statements as of June 30, 2025 were prepared using accounting policies consistent with International Financial Reporting Standards (IFRS) and in accordance with International Accounting Standard 34 - Interim Financial Reporting, and include the statement of financial position, the income statement, the income statement and other comprehensive income, the statement of changes in equity and the condensed statement of cash flows, as well as the selected explanatory notes. The remaining notes were excluded because they have not suffered any changes in their standards which may affect the understanding of the financial statements.

The accounting policies adopted in the preparation of the condensed consolidated financial statements of Corticeira Amorim are consistent with those used in the preparation of the financial statements presented for the year ended December 31, 2024.

Changes in accounting policies and disclosures

The standards and interpretations that became effective as of 1 January 2025 are as follows:

• IAS 21 (amendment), 'The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability'. This amendment adds requirements for determining whether a currency can be exchanged for another currency (exchangeability) and defining how to determine the spot exchange rate to be used when it is not possible to exchange a currency for a long period of time. This change also requires the disclosure of information that allows understanding how the currency that cannot be exchanged for another currency affects, or is expected to affect, the financial performance, financial position and cash flows of the entity, in addition to the spot exchange rate used on the reporting date and how it was determined. This amendment is applied retrospectively without restating the comparatives. The entity is required to translate the affected amounts at estimated spot exchange rates at the date of initial application, with

an adjustment to retained earnings (if between foreign and functional currency) or to the reserve for cumulative translation differences (if between functional and presentation currency).

These amendment had no material impact on Corticeira Amorim's consolidated financial statements.

The standards (new and amended) published, the application of which is mandatory for economic periods beginning after January 1, 2026, and have already been endorsed by the EU::

- IFRS 9 (amendment) and IFRS 7 (amendment), 'Amendment to classification and measurement of financial instruments' (effective for annual periods beginning on or after 1 January 2026). These amendments are still subject to endorsement by the European Union. These amendments intend to: i) clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system; ii) clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion such as: 1) non-recourse assets; 2) contractually associated instruments; and 3) instruments with characteristics linked to compliance with environmental, social and governance ("ESG"); iii) add new disclosure requirements for instruments with contractual conditions that can change cash flows; and iv) update the disclosure requirements for equity instruments designated at fair value through other comprehensive income, separating the fair value reserve into the fair value gains or losses of the investments derecognized and those held at the end of the period. These amendments apply at the date they become effective without restating the comparatives.
- IFRS 9 (amendment) and IFRS 7 (amendment), 'Contracts referencing nature-dependent electricity' (effective for annual periods beginning on or after 1 January 2026). These amendments intend to improve the report of the financial effects of nature-dependent electricity contracts, subject to variability of quantity generated because it is dependent of uncontrollable natural conditions. These amendments intend to: i) clarify the application of the "own use" exemption requirements of IFRS 9; ii) allow the application of hedge accounting when nature dependent electricity purchase contracts are designated as hedging instrument; and iii) add new disclosure requirements to IFRS 7 to better understand the impact of these contracts on entity's the financial performance and cash flows. This amendment shall be applied retrospectively without restating prior periods, except for hedging designation, which shall be applied prospectively.
- Annual Improvements 'Volume 11' (effective for annual periods beginning on or after 1 January 2026). The annual improvements intend to clarify application issues or correct inconsistencies in standards. This volume of improvements affects the following accounting standards: IFRS 1, IFRS 7, IFRS 9, IFRS 10 e IAS 7. These amendments are still subject to endorsement by the EU.

Standards (new and amendments) that have been published and are mandatory for the accounting periods beginning on or after 1 January 2026, but are not yet endorsed by the EU:

- IFRS 18 (new standard), 'Presentation and Disclosure in Financial Statements' (effective for annual periods beginning on or after 1 January 2027). This new standard is still subject to endorsement by the European Union. This new standard will replace the current IAS 1. While retaining many of the existing principles of IAS 1, it is focused on the specification of a structure for the statement of profit or loss, composed of categories and required subtotals. Items in the statement of profit or loss will be classified into one of three categories: operating, investing, financing. Specified subtotals and totals will be required being the main change the mandatory inclusion of the subtotal "Operating profit or loss". This standard also includes improvements to the disclosure of management performance measures including the reconciliation with the most similar specified subtotal in IFRS Accounting standards. This standard also enhances guidance on the principles of aggregation and disaggregation of information in the financial statements and respective notes, based on their shared characteristics. This standard applies retrospectively.
- IFRS 19 (new standard), 'Subsidiaries without Public Accountability: Disclosures' (effective for annual periods beginning on or after 1 January 2027). This new standard is still subject to endorsement by the

European Union. IFRS 19 is a voluntary standard which allows "Eligible" subsidiaries to use IFRS Accounting Standards with reduced disclosure requirements. IFRS 19 is a disclosure-only standard and works alongside other IFRS Accounting Standards for recognition, measurement, and presentation requirements. A subsidiary is "Eligible" if (i) it does not have public accountability; and (ii) has a parent that prepares consolidated financial statements available for public use that comply with IFRS Accounting Standards. IFRS 19 can be applied by "Eligible" subsidiaries when preparing their own consolidated, separate or individual financial statements. Complete comparative information needs to be prepared under IFRS 19 unless any exemption applies.

Corticeira Amorim is evaluating the impact resulting from these changes and will apply these standards in the year in which they become effective, or in advance when permitted.

3. FINANCIAL RISK MANAGEMENT

The activities of Corticeira Amorim are exposed to a variety of financial risks: market risks (including exchange rate risk, interest rate risk and raw material price risk), credit risk, liquidity risk and capital risk.

Market risk

As regards market risks, the monitoring procedures reported on December 31, 2024 are maintained. International market volatility requires thorough compliance with the already defined procedures in order to avoid the eventual impacts of adverse events.

Credit risk

The credit risk results essentially from the balances receivable from clients resulting from commercial transactions. Corticeira Amorim is attentive to the question of collecting accounts receivable even though, in a universe of almost 30,000 clients around the world, the risks are significantly dispersed. The credit risk is naturally lower given the geographic scope of sales and a very high number of clients on every continent with no individual entity accounting for over 2% of total sales.

The client credit risk is evaluated by the Financial Departments of operating companies taking into account the track record of the commercial relationship, its financial position as well as other information that may be obtained through the business networks of Corticeira Amorim. The credit limits established are regularly subject to analysis and revised whenever necessary.

In general terms, no guarantees are requested from clients. Corticeira Amorim makes occasional recourse to credit insurance. The credit risk also results from the available cash balances and derivative financial instruments. Corticeira Amorim undertakes prior analysis of the respective financial institution ratings in order to minimise the risks of non-compliance by counterparties.

The maximum amount of credit risk is that which results from the non-receipt of the totality of financial assets (June 2025: 338 million euros and December 2024: 313 million euros).

The amounts registered in the Cash and equivalents item by Corticeira Amorim are dispersed across over 100 subsidiaries. In terms of the quality of credit risk, associated with Cash and Equivalents, on June 30, 2025, Corticeira Amorim selects financial institutions with ratings that do not call into doubt the return of these assets.

Liquidity risk

The Corticeira Amorim financial departments regularly analyse the provisional cash-flows in order to ensure there is sufficient liquidity for the group to meet its operational needs and, simultaneously, comply with the obligations assumed under the auspices of various lines of financing. Any amounts of surplus liquidity are invested in remunerated short term deposit accounts. Hence, this underpins the necessary flexibility for running the business.

The coverage of liquidity risks essentially stems from the existence of an immediately available series of credit lines and commercial bond issues, and, eventually, by the existence of bank account deposits. Corticeira Amorim closed the six months with unused credit lines and commercial bond issue programs totalling \bigcirc 330,0 million (on December 31, 2024, the comparative amount stood at \bigcirc 302.9 million). When combined with Cash and Equivalents, the Liquidity Reserve at the end of the aforementioned period amounted to \bigcirc 399,5 million (\bigcirc 379.5 million on December 31, 2024).

Capital risk

The fundamental objective of the Board is to ensure the continuity of operations, providing an appropriate level of remuneration to Shareholders and the corresponding benefits to the remaining Stakeholders in Corticeira Amorim. To achieve this objective, the careful management of the capital deployed in the business is fundamental alongside ensuring an optimal capital structure that thereby brings about a reduction in capital costs. Corticeira Amorim is a solid business endowed with an appropriate and balanced capital structure, responsible for its core activity of underpinning the sustainability of the entire cork sector. Without the stoppers produced by Corticeira Amorim, thousands of wine-makers and bottlers would not be able to operate across the most varied geographies.

Within the framework of maintaining or adjusting the capital structure deemed most appropriate, the Board may propose to the General Shareholder Assembly the measures considered necessary and that may involve adjustments to the pay-out regarding the dividends payable, transactions in the company's shares, raising equity capital through issuing shares and selling assets, among other measures. The indicator applied to monitor the capital structure is the Financial Autonomy ratio. The Board has established as its target a level of Financial Autonomy of no less than 40% taking into account the characteristics of the company and its respective sector of activity.

Financial Autonomy reported the following trend:

			thousand euros
	June 30, 2025	December 31, 2024	June 30, 2024
Equity	821,347	835,057	811,139
Assets	1,312,599	1,362,194	1,444,950
Financial Autonomy	62.6%	61.3%	56.1%

Fair value of the financial assets and liabilities

The Group measures part of its financial assets and liabilities by their fair value on the reference date for the financial reporting. The derivative financial instruments acquired by Corticeira Amorim are not market traded and have no listing (derivatives negotiated over the counter).

Furthermore, the accountancy norms establish a hierarchy of fair value that classifies the data across the three levels incorporated into the measurement techniques for the fair value of financial assets and liabilities:

Level 1 Data - listed prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 Data – distinct data on the listed prices that are observable for the asset or liability, directly or indirectly;

Level 3 Data – non-observable data relating to the asset or liability. During the financial year, there were no transfers among the aforementioned levels.

The value of the derivative financial instruments recognised in the report on the Corticeira Amorim financial position, dated June 30, 2025, amounts to 4,854 K \oplus in the assets (December 31, 2024: 111 K \oplus), and 10 K \oplus in liabilities (December 31, 2024: 1,868 K \oplus), as notes 14 and 24.

Corticeira Amorim makes recourse to outright forwards and options for exchange rate risk coverage as is detailed below. The evaluation of exchange rate risk hedging instruments involved valuation techniques that apply observable inputs (Level 2). The fair value is calculated through a model owned by Corticeira Amorim and developed by Reuters that adopts the updated cash-flow method for the outright forwards while applying the Black & Scholes calculation model to options contracts.

The main inputs deployed in valuation are: forward exchange rate curve and currency volatility estimates.

Currency operations contracted with credit institutions

On 30 June 2025, there were options and outright forwards contracts relating to the currencies used by Corticeira Amorim transactions.

It is foreseeable that such transactions in foreign currencies are very likely to happen, which were therefore subject to exchange rate risk coverage, and taking place during the second half of 2025. The amount recognised in the "under Adjustment of Accountancy Coverage" will be recognised in the financial results for the same period.

The amount recognised in integral earnings related to variations in the fair value of efficient cash flow coverage was 249 K \in (1H24: -127 K \in).

4. CRITICAL ESTIMATES AND JUDGEMENTS

The preparation of consolidated financial statements requires the Group's management to make judgments and estimates that affect the statement of financial position and the reported results. These estimates are based on the best information and knowledge about past and/or present events and on the operations that the Company considers it may implement in the future. However, at the date of completion of such operations, their results may differ from these estimates.

Changes to these estimates that occur after the date of approval of the consolidated financial statements will be corrected in the income statement in a prospective manner, in accordance with IAS 8 - "Accounting Policies, Changes in Accounting Estimates and Errors".

The estimates and assumptions that imply a greater risk of giving rise to a material adjustment in assets and liabilities are described below:

Entities included in the consolidation perimeter

To determine the entities to be included in the consolidation perimeter, the Group assesses the extent to which it is exposed, or has rights, to variability in return from its involvement with that entity and can take possession of them through the power it holds over this entity.

The decision that an entity must be consolidated by the Group requires the use of judgment, estimates, and assumptions to determine the extent to which the Group is exposed to return variability and the ability to take possession of them through its power.

Other assumptions and estimates could lead to the Group's consolidation perimeter being different, with direct impact on the consolidated financial statements.

Impairment of non-current assets, excluding goodwill

The determination of a possible impairment loss can be triggered by the occurrence of various events, such as the availability of future financing, the cost of capital or other market, economic and legal changes or changes with an adverse effect on the technological environment, many of which are beyond the Group's control. The identification and assessment of impairment indicators, the estimation of future cash flows, and the calculation of the recoverable value of assets involve a high degree of judgment by the Board.

Impairment of goodwill

Goodwill is annually subjected to impairment tests or whenever there are indications of a possible loss of value in accordance with the criteria described in Note 2 b). The recoverable values of the cash-generating units to which goodwill is allocated are determined based on the calculation of current use values. These calculations require the use of estimates by management.

Intangible and tangible assets

The life of an asset is the period during which the Company expects that an asset will be available for use and this should be reviewed at least at the end of each financial year. The determination of the useful lives of assets, the amortisation/depreciation method to be applied, and the estimated losses resulting from the replacement of equipment before the end of its useful life due to technological obsolescence is crucial in determining the amount of amortisation/ depreciation to be recognised in the consolidated income statement each period.

These three parameters are defined using management's best estimates for the assets and businesses concerned, and taking account of the practices adopted by companies in the sectors in which Corticeira Amorim operates.

Consumable biological assets

When determining the fair value of consumable biological assets, the present value method of discounted cash flows is used, which were determined using a model developed internally.

In the model developed, assumptions corresponding to the nature of the assets under evaluation are considered, namely, the development cycle, productivity, mortality rate, cork sales price, deducted from the extraction cost.

Provisions

The Group periodically reviews any obligations arising from past events, which should be recognised or disclosed. The subjectivity involved in determining the probability and amount of internal resources required to meet obligations may give rise to significant adjustments, either due to changes in the assumptions made, or due to the future recognition of provisions previously disclosed as contingent liabilities.

Fair value of financial assets and liabilities

When the fair value of a financial asset or liability is calculated, on an active market, the respective market price is used. When there is no active market, which is the case with some of Corticeira Amorim's financial assets and liabilities, valuation techniques generally accepted in the market, based on market assumptions, are used.

The Group applies evaluation techniques for unlisted financial instruments, such as derivatives, financial instruments at fair value and instruments measured at amortised cost. The most frequently used valorisation models are models of discounted cash flows and option models, which incorporate, for example, interest rate and market volatility curves.

For certain types of more complex derivatives, more advanced valuation models are used containing assumptions and data that are not directly observable in the market, for which the Group uses the proprietary model specified in Note 3.

5. EXCHANGE RATES USED IN CONSOLIDATION

Exchage rates		June 30, 2025	Average 2025	Average 2024	December 31, 2024

- (a) Equity method consolidation.
- (b) Corticeira Amorim directly or indirectly controls the relevant activities line-by-line consolidation method.
- (c) Merger by incorporation of Corkeen North America, Ltd. (incorporated company) into Amorim Cork Composites, Inc. (incorporating company).
- (d) Company acquired in 2025.
- (e) Acquisition of the remaining 45% in the Intercap Group, resulting in full ownership.

The percentages indicated are the percentages of interests and not of control. $\label{eq:control}$

For entities consolidated by the full consolidation method, the percentage of voting rights held by "Non-Controlling Interests" is equal to the percentage of share capital held.

7. SEGMENT REPORT

Corticeira Amorim is organized into the following Business Units: Amorim Florestal, Amorim Cork and Amorim Cork Solutions.

Corticeira Amorim has decided to implement a new organizational model by creating the Amorim Cork Solutions Business Unit, which, as of January 1, 2025, will encompass all "non-cork stopper" operations. Formally, this reorganization results from the merger by incorporation of Amorim Cork Flooring, S.A. and Amorim Cork Insulation, S.A. (the incorporated companies) into Amorim Cork Composites, S.A. (the incorporating company), which will henceforth be named Amorim Cork Solutions, S.A.

There are no differences between the measurement of profit and loss and assets and liabilities of the reportable segments, associated to differences in accounting policies or centrally allocated cost allocation policies or jointly used assets and liabilities.

For purposes of this Report, the Business approach was selected as the primary segment. This is consistent with the formal organisation and evaluation of business. Business Units correspond to the operating segments of the company and the segment report is presented the same way they are analysed for management purposes by the board of Corticeira Amorim.

The following table shows the main indicators of the business units, and, whenever possible, the reconciliation with the consolidated indicators:

						thousand euros
1H25	Amorim Florestal	Amorim Cork	Amorim Cork Solutions	Corticeira Amorim and Others	Adjustm.	Consolidated

Adjustments = eliminations inter-BU and amounts not allocated to BU.

(*) EBITDA = Profit before net financing costs, depreciation, non-controlling interests, income tax and non-recurrent results.

Provisions and asset impairments were considered the only relevant non-cash material cost.

The decision to report EBITDA figures (excluding non-recurring operational results – see note 27, which due to its materiality or nature could distort Corticeira Amorim's financial performance, as well as its comparability), allows a better comparison of the different BU performances, disregarding the different financial situations of each BU. This is also coherent with the existing Corporate Departments, as the Financial Department is responsible for the bank negotiations, being the tax function the responsibility of the Holding Company.

Amorim Cork main product is the different types of existing cork stoppers. The main markets are the bottling countries, from the traditional ones like France, Italy, Germany, Spain and Portugal, to the new markets like USA, Australia, Chile, South Africa and Argentina.

Amorim Florestal is, by far, the most integrated in the production cycle of Corticeira Amorim, with 90% of its sales to others BU, in particular the sale of cork boards and disks to the Amorim Cork.

Amorim Cork Solutions produce and sell a wide range of products that use the raw material left over from the production of stoppers, as well as the cork raw material that is not susceptible to be used in the production of stoppers. Main products are cork floor tiles, cork rubber for the automotive industry and anti-vibration systems, expanded agglomerates for insulation and acoustic purposes, technical agglomerates for civil construction and shoe industry, as well as granulates for agglomerated, technical and champagne cork stoppers.

The main markets are concentrated in Europe. The Business Unit carries out the bulk of its production in Portugal, where almost all of the invested capital is therefore located. The significant improvement in the profitability of this Business Unit, already evident by the end of March, highlights the effects of more efficient operations management and optimization of existing assets, as well as the synergies resulting from the sharing of means and resources. Still within the scope of this Business Unit, the decision to transfer the industrial unit located in Silves to the unit in Vendas Novas is expected to contribute to greater competitiveness in the expanded cork business.

Capex was concentrated in Portugal. Assets in foreign subsidiaries, particularly the items of tangible fixed assets, inventories and customers, totalise 453 M \in , and are mostly composed by inventories (157 M \in) and trade receivables (171 M \in).

In non-current assets, it is important to note the 294 M \in (2024: 306 M \in) of tangible fixed assets, 2.1 M \in (2024: 2.2 M \in) of property investment, and 6.9 M \in (2024: 8.6 M \in) of intangible assets, located in Portugal.

Sales by markets:

		_	thous	sand euros
Markets	1H25	1H25		
European Union	320,830	67.8%	341,910	68.3%

					.20,02

The impairment adjustments of assets recognized in 2024 and 2025 were offset by the Depreciation/Amortization line in the consolidated income statement by nature.

Expenses to place the assets in the required location and condition related with tangible fixed assets had no impact.

In other tangible fixed assets, biological assets for production with a net value of 3,206 K \oplus are included, mainly consisting of vines and cork oak from Herdade do Rio Frio.

No interest was capitalised during the period.

Intangible Assets essentially include software, autonomous product development projects and innovative solutions, and customer portfolio acquired.

With the exception of goodwill, there are no intangible assets of indefinite life.

t	housand	Leuros

2024	Opening balance	Increase Decr	rease Transalatio

thousand euros

1H25	Opening balance	Increase Decrease	Transalation differences	End balance
Bourrassé	8,431			8,431
Grupo Saci	9,045		- 25	9,020
Grupo VMD	4,993		34	5,027
Grupo Intercap	5,595	- 157		5,438
Elfverson	1,101		31	1,132
Goodwill	29,165	157	40	29,047

Impairment tests are carried out annually. In the tests, cash-flows were designed, based on the budget and plans approved by management. The growth assumptions considered the expected growth of each company's business, essentially in the wine, champagne and sparkling wine market, as well as the evolution of the subsidiaries' market share in this business.

In the case of Bourrassé, the 2025 budget was considered (with a 166% growth in operating income) without cash-flows growth in 2026 and 2027, with a growth rate of 1.3% being considered for the following periods. The growth in operating income results from the restoration of profitability levels observed in 2023, as the year 2024 was affected by the decrease in margin due to the increase in raw material costs.

In the impairment test of Elferson, the 2025 budget was considered without cash-flows growth in 2026 and 2027, with a growth rate of 2% being considered for the following periods.

For the impairment test of the VMD group, the 2025 budget was considered (with a 36% decrese in operating income) without growth in cash-flows in 2026 and 2027, with a growth rate of 1.2% being considered for the periods following.

The discount rate used in the tests described above was 7.3%. Sensitivity analyzes (adjusting the discount rate by an additional 10% and the perpetuity growth rate by an additional 20%) would not imply recording an impairment in the accounts for the four cash-generating units under analysis.

Considering the performance of the first half of 2025, it is concluded that it is not necessary to change the previously approved plans and impairment tests.

The detail of the value of biological assets, as of June 30, 2025, is as follows:

	Cork	Cattle	Total
Opening balance (Jan 1, 2024)	5,584	758	6,342
Transfers and reclassifications	5	-	5
Closing balance (Jun 30, 2024)	5,589	758	6,347
Opening balance (Jan 1, 2025)	4,416	619	5,035
Transfers and reclassifications	1	-	-
Closing balance (Jun 30, 2025)	4,417	619	5,036

As of June 30, 2025, there are no biological assets whose ownership is restricted or which are pledged as collateral for liabilities as well as commitments relating to the development or acquisition of biological assets.

Fair value measurement

According to accounting standards, a fair value hierarchy is established that classifies the data to be used in fair value measurement techniques into three levels. At the level of biological assets, level 3 data is considered: unobservable data regarding the asset or liability.

When measuring the fair value of cork trees, around 353 thousand arrobas are considered at the beginning and end of the period.

Biological assets are measured at their fair value less estimated costs at the point of sale. The respective fair value is determined based on the present value of discounted cash flows method.

The following assumptions were considered:

- Productivity of the Herdade's history;
- Average sales price for the quality of cork deducted from extraction costs;
- Discount rate: 3%.

Closing balance (Jun 30, 2025)	2,09

The amount of 2,094 K \odot , referred as Investment Property (December 31, 2024: 2,204K \odot), is due, mainly, to land and buildings that are not used in production.

The fair value of the Investment Properties, in the case of the land, is close to the value recorded in the accounts.

At the end of the year, management analyzed these assessments and considered that they remained up to date. These properties are not generating income and conservation and repair costs are insignificant.

13. INVESTIMENTS IN ASSOCIATES AND JOINT-VENTURES

Others	8,855	12,515	11,942
Other debtors	38,060	40,558	40,690

Investments in funds, capitalization insurance and similar essentially refer to SACI Group's capitalization insurance. These insurance policies (insurance policies associated with investment funds) are short-term investments, which can be sold when necessary without any particular constraint.

Assets included in other non-current financial assets (June 30, 2025: 2,618 K, December 31, 2024: 1,640 K) refer to financial assets at fair value through profit or loss, including essentially equity instruments. They are measured at fair value and when it is estimated that there are no significant differences in relation to the cost this is maintained. The assets were acquired with the main purpose of sale or resale, as appropriate, and in certain cases ensuring the maintenance and survival of entities that Corticeira Amorim considers partners for its business. The effective management of the underlying operations and assets continues to be exclusively provided by the partners, serving the financial participation as a mere "guarantee" of the investment made.

In June 2025 and at the end of 2024, there were no overdue in the amounts of VAT.

15. DEFERRED TAX / INCOME TAX

Deferred tax and income tax

The difference between the tax due for the current period and prior periods and the tax already paid or to be paid of these periods is booked as "deferred tax" in the consolidated income statement and amounts to $-318 \text{ K} \in (30/06/2024:-1.764 \text{ K} \in)$.

On the consolidated statement of financial position this effect, excluding tax contingencies, amounts to 18,733 $\mathbb{K} \in (31/12/2024:20,379\,\mathbb{K} \in (31/12/2024:40,586\,\mathbb{K} \in (31/12/2024:40,586))$

Deferred tax related with items directly registered in equity was 43 K€ (credit balance) and relates to hedge accounting. No other deferred tax values related with other equity movements were booked.

It is conviction of the Board that, according to its business plan, the amounts registered in deferred tax assets will be recovered as for the tax carry forward losses.

Provisions for tax contingencies

Provisions for tax contingencies in terms of income tax ended with a value of €31.5 M (31.12.2024: €33.1 M). During the year, contingencies for taxes payable in the statement of financial position decreased by €1.6 million.

The processes that remain open, both in the judicial and grace phases, and which may adversely affect Corticeira Amorim, refer to the 2015 financial year. The 2020 financial year was the last financial year reviewed by the Portuguese tax authorities.

At the end of each year, an analysis of the tax cases is made. The procedural development of each case is important to decide new provisions, or reverse or reinforce existing provisions. Provisions correspond to situations that, for its procedural development or for doctrine and jurisprudence newly issued, indicate a probability of an unfavourable outcome for Corticeira Amorim and, if that happens, a cash outflow can be reasonably estimated. Note that during the year there were no developments worthy of note in the processes mentioned above.

In addition to the tax provisions referred to above, Corticeira Amorim has recorded a provision to cover the tax benefits to apply for 2024 and applied in previous years. The certification requirement by ANI of SIFIDE projects, the requirement for maintenance of jobs over five years in RFAI projects as well as other constraints to the realization of benefits, has led Corticeira Amorim to record provisions in order to take account of future breaches of such requirements. It should be noted that the determination of the tax benefits can not be concluded, since its constraints extend over several years, in particular as regards the maintenance of jobs.

There are no tax proceedings that have not been provisioned, thus, contingent liabilities are zero.

Corticeira Amorim has a large number of other favourable processes. They refer, in essence, to payments related with autonomous taxation, inspection fees and tax benefits. The value of these processes amounts to 0.8 M€, which is not recorded as part of its assets. Total contingent assets amounts to 4.2 M€ (including amounts paid under the RERD and PERES).

Pillar 2 - Calculation of supplementary tax

The group falls within the scope of the BEPS 2.0 Pillar Two Global Anti-Base Erosion Model Rules (GloBE MR), as it is a multinational group of companies with annual revenues equal to or exceeding Euro 750,000,000 in at least two of the four fiscal years immediately preceding the 2024 fiscal year.

Law No. 41/2022, of November 8, transposed Directive No. 2022/2523, of December 14, 2023, commonly referred to as the Pillar 2 Directive, into national legislation. It has been effectively applied in the fiscal year starting on January 1, 2024. No deferred taxes related to Pillar 2 were recognized due to the mandatory temporary exception of IAS 12.

Corticeira Amorim assessed its exposure to Pillar Two legislation, considering the obligation to pay an additional tax ("top-up tax") corresponding to the difference between the effective GloBE tax rate per jurisdiction and the minimum rate of 15%.

The analysis revealed that in certain jurisdictions, the effective tax rate was below 15%, in which case the transitional safe harbors and specific adjustments provided in the Pillar Two legislation were applicable. The final amount determined in the remaining jurisdictions where the effective tax rate was below 15% and which did not comply with the transitional safe harbour proved to be immaterial.

Incometax-Estimationandothers	5,763	5,012	14,524
Incometax(liabilities)	5,763	5,012	14,524

In 2013, Corticeira Amorim made the payment instituted by DL 151-A / 2013 (RERD) in the amount of $4.3\,\mathrm{M}\odot$, a payment that does not imply the abandonment by Corticeira Amorim of defending the respective processes. In 2023, the final decision on cases won by Corticeira Amorim took place, with an amount of $1.5\,\mathrm{M}\odot$ being received. In this way, the amount that remains open for ongoing proceedings paid under the RERD is $0.6\,\mathrm{M}\odot$.

At the end of 2016, a special Plan for the Reduction of Indebtedness to the State (PERES) was approved by Decree-Law no. Corticeira Amorim decided to partially adhere to that measure. In December 2016, approximately 7.4 M€ were paid in respect of Stamp Tax / VAT (2 M€) and Income Tax (IRC) in the amount of 5.4 M€. In 2023, Corticeira Amorim received €1.6M of the amounts paid under PERES, whose impairment was

reversed in 2022. In 2024, another €1.6M of the amounts paid under PERES was received. The remaining payments are still pending.

To be noted that Corticeira Amorim was not a debtor to the social security and to the tax authority. Those amounts were subject to court litigation. The disputs that were chosen to adhere are old cases whose values of interest on late payments and fines to be paid, in case of loosing, would be high.

RERD and PERES allowed for the payment of the capital without any payment regarding late payment interests and other costs. Due to the fact that adhesion to RERD and PERES does not imply a mandatory abandonment of the court cases and those processes are still in court, Corticeira Amorim will continue to fight for its rights.

The liability amount under this caption includes the estimate of the income tax payable under the Special Regime for Taxation of Groups of Companies and by some foreign subsidiaries.

Decreases	- 1,719	- 3,156	- 2,521
Others	- 610	- 514	- 214

Increases and decreases were recognised under the account heading, impairment of assets, in the income statement.

At the end of each period, Trade receivables credit quality is analysed. As a result of the adoption of IFRS 9 to the balances up to 90 days, an expected credit loss is recognised. From 90 to 120 days a 30% impairment register is considered and from 120 to 180 days 60%. Over 180 days as well as all doubtful balances are fully impaired. These rules do not overlap the need for analysis of specific cases.

20. CAPITAL AND RESERVES

Share Capital

As of June 30, 2025, the share capital is represented by 133,000,000 ordinary registered shares, conferring dividends, with a par value of 1 Euro.

The Board of Corticeira Amorim is authorised to raise the share capital, one or more times, respecting the conditions of the commercial law, up to 250,000,000€.

Treasury stock

As of June 30, 2025, Corticeira Amorim held no treasury stock.

No purchases were registered during the first half of 2025.

Legal reserve and share premium

Legal reserve and share premium are under the legal reserve rule and can only be used for (art. 296 CSC - Portuguese commercial law):

- Offset losses in the financial position that cannot be offset by the use of other reserves;
- Offset losses of prior year that cannot be offset by the profit of the year nor the use of other reserves;
- Incorporation in share capital.

Legal reserve and share premium values are booked in Corticeira Amorim, SGPS, S.A. separate accounts.

Other reserves

Value is composed from other reserves account and prior year's results of Corticeira Amorim, SGPS, S.A. books, as well as non-distributed cumulative results of Corticeira Amorim, SGPS, S.A. subsidiaries.

Dividends

In the Shareholders' General Meeting of May 6, 2025, a dividend distribution of 0.32 euros per share was approved. The respective payment was made on May 28, 2025.

		thou	usand euros

Commercial paper	26,750	55,150	114,400
Interest-bearing loans - current	103,020	153,270	192,336

Non-current interest bearing loans was as follows:

		t	thousand euros
	1H25	2024	1H24
Bank loans	4,441	4,807	5,993
Leasing	2,684	2,797	2,788
Commercial paper	112,450	111,450	85,200
Bond loans	-	-	30,000
Interest-bearing loans - non-current	119,575	119,053	123,981

From non-current and current interest-bearing debt, 161.8 M€ carries floating interest rates. Remaining 60.8 M€ carries fixed interest rate. Average cost, during 2025, for all the credit utilised was 2.4% (2024: 3.7%).

On March 5, 2015, Corticeira Amorim entered into a loan agreement with the EIB in the amount of 35 M €, ten years, with a four-year grace period. This loan allowed Corticeira Amorim to expand substantially its maturity curve at a competitive price.

On 3 December 2020, Corticeira Amorim launched its first Green Bond issue, in the amount of \bigcirc 40 M, by private subscription, without guarantees and for a period of 5 years, earning interest at a fixed rate every six months and with staggered repayment (25% at the end of the 4th year and 75% at maturity). This issue was an important milestone in its sustainability strategy, reaffirming its ongoing commitment to the application of ESG (Environmental, Social and Governance). The first capital repayment instalment, amounting to 10 M \bigcirc , was settled on December 3, 2024. The remaining amount will be settled on December 3, 2025.

Corticeira Amorim's 3rd ESG operation - a program for the issuance of green commercial paper of 11.6 M€ was carried out on 17 December 2021 and will expire on 22 December 2026, intended to finance the investment in photovoltaic panels by some companies from the different Business Units of Corticeira Amorim.

During 2022, Corticeira Amorim completed 2 more ESG operations: (i) a 35 M€ green commercial paper issue program maturing on 26 November 2029 and (ii) a green commercial paper issue program of 20 M€ maturing on 20 June 2027; both under the Corticeira Amorim Green Finance Framework – November 2022. Issuances

carried out within the scope of said programs are intended to refinance the acquisition of the company Herdade de Rio Frio, S.A., the acquisition of a land of 1,855 hectares and the financing of investment in new plantations of cork oaks, all within the scope of the Intervention Project Corticeira Amorim Forestry.

In 2024, Corticeira Amorim contracted 2 sustainability-linked commercial paper issuance programs totalling 55 M€, with maturities of 3 and 5 years, under Corticeira Amorim's Sustainability-Linked Financing Framework - May 2024. The interest rate of the issuances under these programs will be influenced by the achievement, or not, of the objectives defined for the 2 adopted KPIs: (i) women in management positions and (ii) energy efficiency.

As of June 2025, Corticeira Amorim had credit lines with contractual clauses that include covenants generally used in these types of contracts, namely: cross-default, pari-passu and in some cases negative pledge. It is not expected that the Corticeira Amorim will have difficulties in fulfilling the contracted covenants.

Corticeira Amorim and two foreign subsidiaries used financing as at 30 June 2025 (a total of around 54.8 M€) to which financial covenants were associated. These consisted, essentially, in the fulfillment of ratios that allow monitoring the financial situation of companies, namely:

- Asset coverage ratio quarterly observation;
- Fixed charge coverage ratio annual observation;
- Net income annual observation;
- Net debt/ EBITDA (Interest-bearing loans and equivalent/ total cash-flow) annual observation; and
- Equit / Net total assets annual observation.

The above ratios are not restrictive and the requirements contained in the contracts that formalised the referred financing were largely and fully complied with. In the event of non-compliance, there would be a possibility that this would lead to the early repayment of the debts.

In addition, it is important to inform that the capacity to ensure debt service was further enhanced by the existence, as of June 30, 2025, of 330.0 M€ of credit lines approved, but not used.

23. TRADE PAYABLES

	thousand eur		
	1H25	2024	1H24

Non-repayable - grants	7,053	7,831	5,923
Income to be recognized	2,229	810	280
Accrued costs - staff costs	26,407	19,392	27,976
Other liabilities - current	35,689	28,033	34,180

In other non-current liabilities, the non-current component of salaries to be settled related to Corticeira Amorim's new remuneration policy is recognized.

25. PROVISIONS

		tho	ousand euros
	1H25	2024	1H24
Tax contingencies	127	127	80
Guarantees to customers	1,329	1,300	761
Others	4,359	4,263	7,506
Provisions	5,816	5,691	8,347

Claims by the tax authorities are related with income tax, stamp tax and marginally VAT.

Trade receivables guarantees are essentially from Amorim Cork Solutions and are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

Other contingencies essentially include restructuring provisions (0.4 M \oplus), provisions for termination of employment (2.5 M \oplus) and ongoing processes (0.6 M \oplus).

26. IMPAIRMENTS OF ASSETS

	thousand euros	
	1H25	1H24
Receivables	- 1,317	309
Tangible, intangible assets and others	- 120	- 89
Impairments of assets and non-current costs	- 1,437	220

Receivables include customers and other debtors.

27. NON-RECURRENT RESULTS

Non-recurring results, as of June 2025 relate to the impact of transference of industrial unit from Silves, mainly severance payments and equipment disassembly costs.

	th	ousand euros
	1H25	1H24
Industrial unit closure	- 947	-
Restructuring costs	-	- 4,000
Product line discontinuation	-	- 3,496
Partial reversal of restructuring expenses	-	2,200
Non-current results	- 947	- 5,296

28. RELATED-PARTY TRANSACTIONS

Corticeira Amorim consolidates directly in Amorim – Investimentos e Participações, S.G.P.S., S.A. with head-office at Mozelos (Santa Maria da Feira, Portugal), Amorim Group holding company.

As of June 30, 2025, financial stake of Amorim – Investimentos e Participações, S.G.P.S., S.A. in Corticeira Amorim was 51%, corresponding to 51% of the voting rights.

Corticeira Amorim related party transactions are, in general, due to the rendering of services through some of AIP subsidiaries. Total sales of these subsidiaries to the remaining Corticeira Amorim companies totalled 325 K€ (Jun. 2024: 231 K€).

Cork acquired during 1H2025, from companies held by the main indirect shareholders of Corticeira Amorim, amounted to $888 \, \text{K} \in \text{(Jun. 2024: 1,908 K} \in \text{)}$.

Balances at year-end 2024 and of June 30, 2025 are those resulting from the usual payment terms (from 30 to 60 days) and so are considered to be immaterial.

Services are usually traded with related parties on a "cost plus" basis in the range of 2% to 5%.

29. ATIVITY DURING THE YEAR

Corticeira Amorim sales are composed by a wide range of products that are sold through all the five continents, over 100 countries. Due to this notorious variety of products and markets, it is not considered that this activity is concentrated in any special period of the year. Traditionally first half, specially the second quarter, has been the best in sales; third and fourth quarter switch as the weakest one.

30. OTHER INFORMATION

a. Net profit per share calculation used the average number of issued shares deducted by the number of average owned shares. The non-existence of potential voting rights justifies the same net profit per share for basic and diluted.

	1\$25	1\$24
Total issued shares	133 000 000	133 000 000
Average nr. of treasury shares	-	-
Average nr. of outstanding shares	133 000 000	133 000 000
Net Profit (thousand euros)	36 836	36 542
Net Profit per share (euros)	0,277	0,275

b. Guarantees

In the course of its operational activity, Corticeira Amorim issued guarantees to third parties amounting to 270 $K \in$ on 30/06/2025 (Dec. 2024: 262 $K \in$).

t	housand	deuros

Total as of June 30, 2025	231,622	168,583	8	400,213

Corticeira Amorim understands that the fair value of the classes of financial instruments presented does not differ significantly from its book value, taking into account the contractual conditions of each of these financial instruments.

Current assets and liabilities, given their short-term nature, have an accounting value similar to fair value

Non-current net debt is mostly payable at a variable rate. The only fixed-rate was contracted during the year 2015. As there were no significant changes in the reference interest rates, the rate does not differ substantially from the current market conditions, and therefore the fair value does not differ significantly from the value Accounting. The remaining fixed -rate non -current debt corresponds to the Green Bonds.

In the case of Other financial liabilities (mainly grants with no interest bearing measured at fair value at initial recognition), given the initial adjustment differential for recognising in income, maturities and current interest rate levels, difference between book value and fair value is not significant.

d. Reconciliation of Alternative Performance Measures

According to the guidelines of the ESMA (European Sales and Marketing Association) of October 2015 on Alternative Performance Measures (APM), Corticeira Amorim presents below a table to reconcile APMs that are not directly readable in the primary financial statements.

Consolidated financial statements
Sales - Cost of goods sold and materials consumed + Change in manufactured inventories
Gross margin / (Sales + Change in manufactured inventories)
Third party supplies and services + Staff costs + Impairments of assets - Other income and gains + Other costs and losses + Depreciation
Inventories + trade receivables - trade payables + other operating assets - other operating liabilities
Goodwill + tangible fixed assets + intangible assets + right of use + working capital + investment properties + Investments in associates and joint ventures + other operating assets / (liabilities)
Current and non-current Interest-bearing loans - cash and cash equivalents
Gross margin + operational costs
Gross margin + Third party supplies and services + Staff costs + Impairments of assets - Other income and gains + Other costs and losses
Operating profit before depreciation and non-recurrent
EBITDA/Sales
Result before taxes and expenses/financial income
Equity / Total assets

31. SUBSEQUENTS EVENTS

No significant events that could materially affect the financial position or the future results of Corticeira Amorim, or the subsidiary companies that make up the consolidated group, occurred prior to the date of issue of this report.

Limited Review Report on the Condensed Consolidated Financial Statements

Introduction

We have performed a limited review on the accompanying condensed consolidated financial statements of Corticeira Amorim, S.G.P.S., S.A. (the Group), which comprise the Consolidated Statement of Financial Position as at 30 June 2025 (showing a total of 1,312,599 thousand euros and a total equity of 821,347 thousand euros, including a net profit attributable to equity holders of the Group of 36,836 thousand euros), the Consolidated Statement of Income by Nature, the Consolidated Statement of Comprehensive Income, the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the six months period then ended, and notes to the condensed consolidated financial statements.

Management responsibilities

Management is responsible for the preparation of condensed consolidated financial statements in accordance with International Financial Reporting Standards as endorsed by the European Union, for the purpose of interim financial reporting (IAS 34), and for the design and maintenance of an appropriate internal control system to enable the preparation of consolidated financial statements that are free from material misstatement due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a conclusion on the accompanying condensed consolidated financial statements. We conducted our review in accordance with ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and other technical and ethical standards and guidelines as issued by the Institute of Statutory Auditors. These standards require that our work is performed in order to conclude whether anything has come to our attention that causes us to believe that the financial statements are not prepared in all material respects in accordance with International Financial Reporting Standards as endorsed by the European Union, for the purpose of interim financial reporting (IAS 34).

A limited review of financial statements is a limited assurance engagement. The procedures performed consisted primarily of making inquiries and performing analytical procedures, and evaluating the evidence obtained.

The procedures performed in a limited review are substantially less in scope than those performed in an audit conducted in accordance with International Standards of Audit (ISA). Accordingly, we do not express an audit opinion on these financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated financial statements of Corticeira Amorim, S.G.P.S., S.A. as of 30 June 2025, have not been prepared, in all material respects, in accordance with International Financial Reporting Standards as endorsed by the European Union, for the purpose of interim financial reporting (IAS 34).
