Consolidated Turnover reached €5.3m in 2Q24 and €9.1m in 1H24, slightly below 2023, and despite the positive contribution from Media business.

EBITDA reached €47.4m in 1H24 (€26.7m in the 2Q24), significantly above 1H23, driven by the positive evolution from equity method contributions.

Equity method contributions increased from €19.6m to €52.7m in 1H24 (€11.7m to €29.1m in the 2Q24) fuelled by a higher stake in NOS when compared to last year (currently 37.37% versus 26.07% in June 23), its non-recurrent income related with the capital gain of €31m from the sale to Cellnex of a small portfolio of towers concluded in 2Q24, and its non-recurrent income related to a favourable court ruling regarding ANACOM activity fees in 1Q24.

Direct Results increased to €50.9m in 1H24 (€28.6m in 2Q24), from €18.9m in 1H23, driven by the higher EBITDA level.

Indirect Results, were negative by €1.8m in 1H24 (negative by €4.9m in 2Q24), explained by some fair value adjustments on Bright Pixel's portfolio, which were not offset by the positive impact from the exchange rate evolution. The indirect results in 1H23 were also driven by some fair value adjustments but also from negative impacts of exchange rate evolutions.

Net income group share stood at €49.2m (€23.7m in the 2Q24), above the €14.2m presented in 1H23, driven by both direct and indirect results evolution.

The **net cash position** stood at €176.9m at the end of 1H24, €38.6m above YE23. This performance was driven by (i) the €4.3m cash in from the sale of Reblaze at the end of 2023 and deferred prices (Bright Pixel's portfolio companies); (ii) the €67.4m of dividends received from NOS; (iii) the €21.4m dividend paid; and (iv) the negative operating cash-flow, financial activity and taxes amounting to €11.6m.
