Title Enefit Green production data - November 2021

Enefit Green produced 122.9 GWh electricity during November 2021 or 2.1% less than in the same period last year. The result was mainly driven by lower wind energy production in Estonian and higher production in Lithuanian wind farms. During November 2021 the average recorded wind speed was 7.3 m/s in both Estonian and Lithuanian wind farms (compared to average recorded wind speeds of 7.7 m/s and 7.1 m/s respectively in November 2020).

Heat energy production declined by 0.7% y-o-y to 55.6 GWh in November 2021.

Pellet production decreased by 6.2% y-o-y to 12.5 thousand tonnes in November 2021.

	November 2021	November 2020	Change, %
