Title Enefit Green signed a co-development agreement for early-stage onshore wind projects in

After market close yesterday, 11 April 2024, Enefit Green's subsidiary Enefit Green sp. z o.o. signed a Development Service Agreement with a Polish development company - RES Global Investment sp. z o.o. to acquire 100% of development rights in multiple early-stage onshore wind projects in Poland.

The signed agreement covers 8 separate early-stage onshore wind projects with targeted total installed capacity of up to 360 MW. The start of construction of these projects is estimated to be no sooner than 2028. According to current expectations the completed projects will operate either under merchant market conditions or a power purchase arrangement to be entered into at the time of investment decision.

Total estimated investments amount to ca EUR80m, which includes the project acquisition cost and other development costs needed to achieve "ready to build" status for all projects in the scope. The timing and size of the payments depend on achievement of certain development milestones established in the executed agreement and the relevant grid requirements.
