Title Enefit Green signed a €100 million loan agreement with EBRD

On 2 August 2024, Enefit Green signed a EUR100 million loan agreement with the European Bank for Reconstruction and Development (EBRD) to finance its ongoing investment programme. The term of the concluded contract is 8 years.

Enefit Green will use the loan capital for the construction of the Sopi-Tootsi wind farm in Estonia. Sopi-Tootsi wind farm is the largest wind farm under construction in Estonia with a capacity of 255 MW. After its completion in 2025, this wind farm will cover approximately 40% of annual electricity consumption of Estonian households. Sopi-Tootsi wind farm will help to further decarbonise Estonia's electricity production by saving an estimated 480,000 tonnes of CO<sub>2</sub> emissions per year.

Enefit Green is currently constructing five wind and three solar farms in Estonia, Lithuania, Poland and Latvia with a total capacity of 637 MW. After commissioning 72MW Tolpanvaara wind farm in Finland earlier this year, Enefit Green's operating electricity generation capacity has risen to 587 MW.
