Explanatory notes

In Vilkyškiai the dairy was established in 1934, in 1985 it was closed and equipment was disassembled. In 1993 a group of people decided to recreate the company and in May of that year they have started the reconstruction in the premises of the former dairy. In November the company started separating milk, after a year the company started producing fermented cheese, and after two years butter production workshop has been opened. All the necessary service structure has been created, all dairy equipment has been changed or bought, new workshops (cheese workshop, salting workshop, freezing chamber, ripening workshop) have been built.

Vilkyškių pieninė AB is one of the most up-to-date cheese factories in Lithuania, occupying about 15 percent of Lithuanian cheese production market. According to this criterion, the company takes the fourth place among the producers of the country. Internal capacity is always increasing in the company as well: the company is increasing cheese assortment, last year it launched whey processing workshop where whey is processed into the whey concentrate. The assortment of Vilkyškių pieninė AB consists of even 11 cheese types of 56 different names and butter and butter blends of 7 names.

Vilkyškių pieninė AB started expanding in January 2006 when it has acquired controlling portfolio of shares of the company Modest UAB. Then Vilkyškių pieninė AB added to its assortment of cheeses Mozzarela cheese. This year one other strong and perspective company joint to the group of Vilkyškių pieninė AB. On the 28th of April 2008 the company finally finished the transaction of Kelmės pieninė AB acquisition and took over the title of ownership to 99.09 % of company's shares. As Kelmės pieninė AB has been connected to the group of companies of Vilkyškių pieninė AB, the company entered the market of fresh products. Kelmės pieninė AB specializes in the production of curd products.

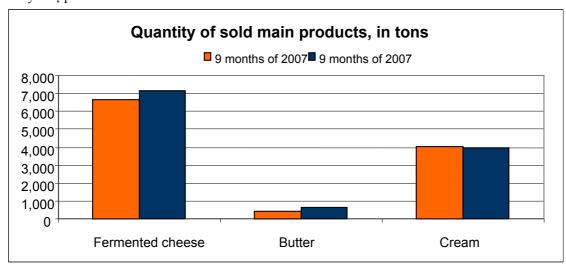

The main clients of the company are all major Lithuanian trade networks, purchasers of the EU countries and Russia. At present Prussia, Maasdam, Memel Blue and Mozzarella cheeses of higher added value are the most famous and mostly liked. The group of companies, taking advantage of fresh products' assortment of Kelmès pieninè AB, is actively entering the markets of Latvia, Estonia and other countries, and this allows for the group of companies to exploit better its productive capacities. As it has been planned, the joining of Kelmès pieninè AB provides with the possibility to exploit effectively common strategy of marketing as well as to use human resources productively. Common departments of trade and raw material procurement contribute to the effectiveness as well.

The total number of employees of Vilkyškių pieninė AB is 409 employees and together with its controlled Modest UAB and Kelmės pieninė AB, the number of employees amounts to 780.

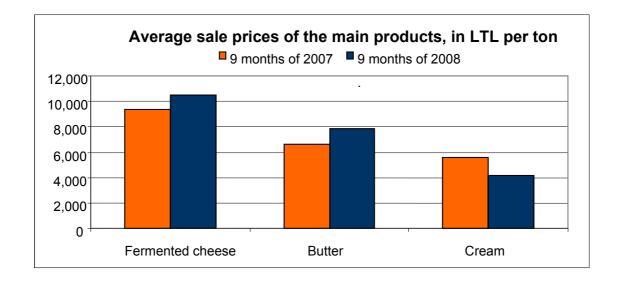

The year 2007 was unconventional and especially successful, over the period of which the demand of dairy products has exceeded the supply, and therefore the prices rocketed up significantly. However, this year the demand has declined and the prices of products have been reduced, as a result the company has suffered losses. The main cause of loss suffered by the group of companies during the 1st half-year was high winter and spring prices of raw materials, whereas cheeses made of which after the ripening were sold at the beginning of summer, when the prices of sale dropped in the markets of export. The prices of dairy products were even lower than in the local market in 2007. The other reason was low prices of dairy products caused by dairy production excess in the Europe, moreover, the possibility to export production into the third countries was slowed down due to low interest rate of US dollar.

The group of companies of Vilkyškių pieninė AB, having suffered almost LTL 9 million of loss over the period of nine months of this year, expects more successful 4th quarter. The company has already sold its production which has been made out of expensive raw materials, and therefore the company should not suffer any losses in the 4th quarter. As Lithuanian markets of dairy export are not reviving and as the conditions of credit are disimproving, Vilkyškių pieninė AB starts reducing its expenditures. The company reduces productive, management and administrative expenses, moreover, the company was forced to abnegate various trainings, consultations and various services and well as some of the investment projects. The company expects that the results of the 4th quarter and of the year will be depended on the effectiveness of reduction of expenses and on unconventional decisions implemented by the group of companies.

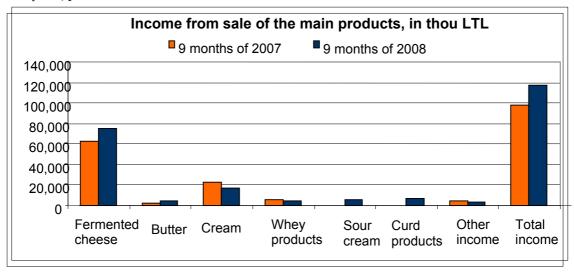

The company plans to carry out the purposeful automation of productive processes and it plans to produce the products which distinguish by higher added value. This year in Taurage Modest UAB has launched a new line of Mozzarella cheese. Moreover, the company plans to strengthen trademarks of the company itself and of different products both in Lithuanian and in foreign markets. Besides, the company plans to expand its assortment by offering to the market new exclusive kinds of cheese. This summer the company started working in the markets of Balkan countries and in the markets of new EU member-countries.
