The electricity distribution tariffs charged for invoicing are calculated by adding the specific tariffs for the electricity distribution service depending on the voltage in the point for delimitation of electric installations belonging to the concessionaire distribution operator from those belonging to the end consumer, as established under the electricity distribution agreement.

The income achieved from distributing electricity by the distribution operator within Electrica Group in 2023 will rely on the electricity distribution tariffs.

The ANRE Order related to the approval of the specific tariffs for electricity distribution service and of the price for reactive electricity for 2023 for Societatea Distributie Energie Electrica Romania S.A. is available, in electronic format, on the Company's website at <https://www.electrica.ro/en/investors/results-and-reports/current-reports/>.
