Communiqué

The National Power Grid Company "Transelectrica" SA hereby informs the interested public investors regarding the conclusion of the agreement for financing through European funds of the project of common interest "Internal line between Cernavodă and Stâlpă" between the European Commission and Transelectrica.

The National Power Grid Company Transelectrica SA collected the first tranche, amounting to 2.2 million euro, from the funds approved in January by the European Commission for building the high-voltage internal line Cernavodă-Stâlpă, one of the projects of common interest. The total value of the grant approved by the European Commission via the Connecting Europe Facility amounts to 27 million euro. This amount covers 50% of the investment's eligible expenses, the rest of the amount will be covered through the Company's own financial sources. The deadline for completion of the investment is December 31st, 2020.

"The Cernavodă - Stâlpă 400 KV line is the first project to receive funding out of the six projects of Transelectrica on the European Commission's list of projects of common interest. This grant is the result of the extraordinary efforts made by Transelectrica's teams of experts and of the consistent endeavors from recent months in order to accelerate the Company's investment program", says Georgeta - Corina Popescu, Chief Executive Officer of Transelectrica.

The Cernavodă – Stâlpă d.c. 400 KV line aims at strengthening the cross section between the West coast of the Black Sea (Eastern Romania) and the rest of the European system, contributing at the same time to the strengthening of the Romanian electricity transmission grid, the increase in interconnection capacity between Romania and Bulgaria and the integration of wind energy in the Dobrogea area.

The new 400 KV line will have a length of ca. 160 km and in order to commission it, we must construct the Stâlpă 400 KV substation and extend the Cernavodă and Gura Ialomiței substations.
