Earnings before interest and taxes in million €

Net income (loss) in million €

Earnings per preferred share in €

We make intralogistics your factor for success.

The increase in global distribution flows and the steadily accelerating pace of IT development are changing the face of intra-company logistics. The result is that made-to-measure, all-round solutions are replacing the classic product offering.

Jungheinrich AG is one of the leading international suppliers in the fields of materials handling equipment, warehousing technology and material flow technology.

The company offers its customers a comprehensive product range of forklift trucks, shelving systems, services and advice for complete intralogistics.

In its direct sales network with 17 sites in Germany. From Flensburg to Munich, from Bonn to Berlin.

With its own sales and service companies in 31 European and non-European countries. From Norway to Spain, from Brazil and Russia to China. And with a large number of representative offices such as for example those in Australia, South Africa and India. Mitsubishi Caterpillar Forklift America Inc. is Jungheinrich's exclusive sales partner in North America.

With the four production plants in Norderstedt, Lüneburg, Moosburg and Landsberg in Germany. With an additional plant in Qingpu (China).

The performance spectrum is being extended further. Jungheinrich has evolved from a producer of materials handling equipment to a manufacturing logistics service provider. Today, roughly 800 sales consultants as well as more than 3.400 mobile service engineers maintain a close-knit network providing competent consulting and comprehensive service all around the globe.

In short, they give you the good feeling that you can rely entirely on Jungheinrich in all questions of intra-company logistics.
