
ANNOUNCEMENT

LIMASSOL 7 FEB 2013

The company Kerverus Holding IT Plc, announces that on March 13, 2013 at 13:13 GMT will officially begin the operation of the pioneering and innovative product/website that has exclusively been designed, developed, and operated of the subsidiary Kerverus IT (CY) Ltd; it is Mobmail.eu and can be found on page www.mobmail.eu

To mobmail.eu uses the following logo in blue and white colors which depicts a capital letter M (acronym for Mobile and Mail) in a variant file.

The vanguard of mobmail is that it uses the Global unique telephone number of the mobile phone user to create an address email (email address).

The site is hosted on server owned by the company in the U.S. The mobile phone user and the email address of the certified and verified, while for the exchange of all data is encrypted 2048 bit, similar to that of e-banking. Not required access to a new mailbox as all incoming emails are automatically forwarded to user's email account indicated by the user during registration.

World premiere of mobmail:

1. Unique certified email address format 306912345678@mobmail.eu
2. Ability to find and communicate with people in your contact list with just knowing their mobile number.
3. Ability to use the logo mobmail to indicate the user simultaneously on your mobile phone and the email.
4. Ability of finding the mobile phone carrier which user uses, to save or use free airtime.

Additionally users depending on the level of use may have to communicate through SMS at very competitive prices, while also companies can send mass SMS communication, information, and advertising to their customers and users on mobmail.

The final testing stage is the application for mobile phones and tablets.

The service Mobmail as well as the application for smart phones and tablets will initially be available for FREE and soon there will be a VIP and PRO user accounts with more privileges.
