

## **PRESS RELEASE**

### **EKTER Unveils Its New Logo**

***A symbol of evolution, consistency, and construction maturity***

**Athens, January 5, 2026:** EKTER S.A. unveils its new logo, ushering in a new chapter in its long-standing journey and reaffirming its strategic transition to a modern, mature, and outward-looking corporate identity.

Since its founding in 1959, EKTER has associated its name with integrity, reliability, and responsibility. The logo that accompanied the company for more than 65 years served as a symbol of stability and technical excellence, closely linked to a period of consolidation, growth, and strengthening of its presence in the Greek construction sector. Since 1994, when the company was listed on the Athens Stock Exchange, EKTER has further enhanced transparency, corporate governance, and its institutional role.

Today, EKTER stands at a different stage of construction maturity. With an expanded project portfolio exceeding €1 billion, increased corporate governance requirements, a strong focus on sustainable development, and a clear strategic orientation toward the future, its visual identity is evolving to reflect its current reality.

Retaining the recognizable verbal core of its name (an acronym derived from “Execution of Technical Works”), the new logo adopts cleaner, modern geometric lines and a dynamic, solid character that conveys technical excellence, reliability, and boldness. Chromatically, blue—beyond reflecting the company’s Greek identity—symbolizes trust, stability, and timelessness.

At the same time, it represents the natural continuation of a long journey, incorporating EKTER’s experience, know-how, and strategy to continue delivering projects with respect for people and the environment, creating added value not only for Greek society but also for its shareholders.

The new logo is not merely an aesthetic upgrade, but a starting point for EKTER’s new era.

#### **About EKTER S.A.**

Founded in 1959, EKTER S.A. is one of the largest and oldest construction companies in Greece. It holds a 6th class contractor license and operates in the sectors of construction, tourism, real estate development, and concessions/PPPs. Since 1994, the company has been listed on the Athens Stock Exchange.

EKTER possesses high-level expertise, know-how, and an expanded portfolio of infrastructure projects, hospitals (construction and EPC), hotels, airports, museums, as well as other building and refurbishment projects.

Having met all required criteria, the company recently submitted its application to the Ministry of Infrastructure and Transport for the acquisition of the highest 7th class contractor license, enabling it to participate in even larger public and private projects—an advancement that marks its entry into a new phase of growth.
