# ÅF Year-end Report Jan - Dec 2011

Press release, 13 February 2012

### Fourth quarter 2011

- Net sales totalled SEK 1,457 million (1,277)
- Operating profit totalled SEK 148 million (94)
- Operating margin was 10.2 percent (7.4)
- Earnings per share, before dilution: SEK 3.11 (2.02)

### Full year 2011

- Net sales totalled SEK 5,124 million (4,334)
- Operating profit<sup>1)</sup> totalled SEK 426 million (317)
- Operating margin<sup>1)</sup> was 8.3 percent (7.3)
- Earnings per share<sup>1)</sup>, before dilution: SEK 9.07 (6.55)
- Earnings per share, before dilution: SEK 9.07 (21.02)
- The Board proposes a divided per share for 2011 of SEK 5.00 (4.00)

<sup>1)</sup> Excluding capital gain from the sale of business operations. Earnings for the first quarter of 2010 included a capital gain of SEK 458 million resulting from the sale of the ÅF Group's Inspection Division, ÅF-Kontroll. Earnings for the third quarter of 2010 included a capital gain of SEK 30 million resulting from the sale ÅF TÜV Nord.

### A few words from the President, Jonas Wiström

The final three months of 2011 marked a record quarter for ÅF. Operating profit totalled SEK 148 million (94), corresponding to a profit margin of just over 10 percent. Cash flow for the period was SEK 185 million (145). Growth was14 percent: slightly more than half of this was organic growth, which is being positively affected by the fact that ÅF's appeal as an employer is stronger today than it has ever been.

The improvement in earnings may be attributed, first and foremost, to positive trends for the Industry, Infrastructure and Technology Divisions. The Industry Division, Sweden's leading industrial consulting organisation, reported a fourth-quarter operating margin of 13.9 percent. Technology once again showed strong organic growth in terms of both sales and profits. It is noteworthy, too, that Infrastructure continues to combine high levels of growth with an improvement in profits. Its margin for the period exceeded 10 percent.

For the Energy Division, however, 2011 was not the best of years. The accident at one of Japan's nuclear power plants and the increasing strength of the Swiss franc had a significant impact on the division's earnings. Nevertheless, the fourth quarter showed signs of an improvement and here at ÅF we remain convinced that 2012 will see the start of an upturn in

the market for international nuclear power. This positive vision of the future was affirmed recently when ÅF won an international tender to serve as principal technical consultant for the construction of a new nuclear power plant in Brazil.

New orders continued to flow in at a brisk rate as 2011 drew to a close. The market as a whole remained strong with only a few signs of any downturn. The prospects for 2012, however, remain uncertain in the face of the debt crisis in Europe.

ÅF's most important objective is to continue to generate levels of profitability that place us among the very best performers in our industry – regardless of the state of the economy. The company now has more than 4,600 highly qualified consultants and other members of staff, and our ambition is to continue to grow, both organically and through acquisitions, without compromising profitability. With good cash flows and a strong balance sheet ÅF is well placed to build upon and enhance its market positions even further.

Stockholm, Sweden - 13 February 2012

Jonas Wiström President and CEO

### Net sales and earnings, October–December 2011

Net sales for the quarter totalled SEK 1,457 million (1 277), an increase of 14 percent compared with the corresponding quarter in 2010. Organic growth totalled 8 percent while acquisitions contributed 6 percentage points, thanks chiefly to the acquisitions of Energo and the energy consulting specialist, Mercados. The impact of exchange rate fluctuations during the quarter was limited.

Operating profit was SEK 148 million (94), with an operating margin of 10.2 percent (7.4). Continued steady demand in combination with high levels of capacity utilisation in the Industry and Technology Divisions contributed to this positive development. Another contributory factor is the improved result from Infrastructure. The division reported an operating margin of 10.3 percent (5.5), which is significantly better than for both the previous year and previous quarters.

Uncertainty about the state of the global economy has delayed decisions about investments in new power plants in a number of markets. This, coupled with the effects of a strong Swiss franc and the accident at the Fukushima plant, has led to low levels of activity in the nuclear and thermal power business areas of our Swiss subsidiary, dragging down earnings in the Energy Division to a level below that in the other divisions. Even so, Energy reported an operating margin of 6.4 percent on the back of strong performances from several other units within the division.

Exchange rate fluctuations have had a positive impact of SEK 3 million on operating profit. There was a total of 63 working days in the quarter, one less than in the corresponding period in 2010. Capacity utilisation was affected by low levels of activity in the Energy Division and amounted to 72.9 percent (73.6) for the quarter as a whole. Both Infrastructure and Technology

reported an increase in capacity utilisation, while the figure for Industry remained stable at a satisfactory level.

Profit after net financial items was SEK 146 million (97). Profit after tax totalled SEK 106 million (70). Earnings per share, before dilution, were SEK 3.11 (2.02).

# Net sales and earnings Full year 2011

Net sales for the year totalled SEK 5,124 million, an increase of just over 18 percent compared with the figure of SEK 4,334 million for 2010. Organic growth accounted for just under 10 percent. Structural growth is attributable chiefly to the acquisitions in 2010 of Energo, Göteborgs Gatuaktiebolag's consulting operations and the energy consulting specialist, Mercados. There was a negative impact of exchange rate fluctuations of just less than 1 percent.

Operating profit<sup>1)</sup> for the year was SEK 426 million (317). In 2010 ÅF reported a capital gain of SEK 488 million from the sale of ÅF-Kontroll and ÅF TÜV Nord, which thus brought overall operating profit to SEK 806 million. Exchange rate fluctuations had a negative impact of SEK 4 million on earnings compared with the previous year.

The operating margin $^{1)}$  for the year was 8.3 percent (7.3).

There was a total of 251 working days in the year, one less than in 2010. Capacity utilisation was 73.1 percent (71.9).

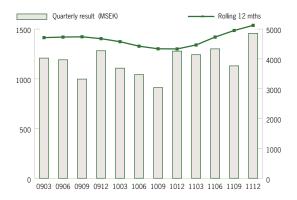

Profit after net financial items was SEK 426 million (798). The SEK 7 million improvement in net financial items is attributable mainly to the effects of defined-benefit pension plans. Profit after tax totalled SEK 312 million (717). Earnings per share, before dilution, were SEK 9.07 (21.02).

<sup>1)</sup> excluding capital gain from the sale of business operations.

### Net sales, MSEK

# Important events during Q4 2011 and after the reporting date

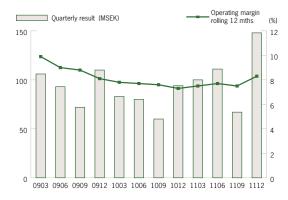

ÅF signed an agreement with Eneco relating to "qualified technical advisory services" for the construction of a new bioenergy plant in the Netherlands. The order is worth over one million euros for ÅF. Eneco is one of the three biggest energy companies in the Netherlands and specialises in the production, trading, transmission and supply of gas, electricity/heat and related energy services. The decision to build a new bioenergy plant in the Dutch municipality of Delfzijl was taken in 2011. When it becomes operational in 2013, the plant will produce 49.9 MW and will convert approximately 300,000 tonnes of wood chips each year from recycled waste wood into green electricity.

ÅF won an international tender via its Swiss subsidiary, ÅF Consult Switzerland, for the construction of a third reactor at the Álvaro Alberto nuclear power station (CNAAA) in Angra dos Reis in the state of Rio de Janeiro, Brazil. The owner of CNAAA is Eletrobrás Termonuclear S.A - Eletronuclear (ETN), a subsidiary of Eletrobrás, a major company listed in Brazil that has the Brazilian state as its principal owner. The order is worth almost 14 million Swiss francs (approx. SEK 100 million).

ÅF signed, together with Tyréns AB, a contract with the Swedish Nuclear Fuel and Waste Management Company, SKB, relating to preliminary studies prior to systematic project management of the storage of spent nuclear fuel at the Forsmark nuclear power plant. The order is worth approximately SEK 6 million and it is estimated that at least half of this sum will accrue to ÅF. Last week this was followed by the signing of a more extensive contract for systematic project management of the storage of the nuclear fuel. This project, which will run during 2012 and 2013, is estimated to be worth approximately SEK 75 million.

ÅF signed a framework agreement with ESS AB (European Spallation Source) in Lund, Sweden. ESS is a European project involving 17 partner countries. The aim is to build the world's foremost neutron source for materials science research in Lund. Following an extensive procurement process, ÅF is one of the technical consulting companies that ESS has chosen to sign a framework agreement with. ÅF's track record of experience from major projects in the specialist areas of

### Operating profit, MSEK / Operating margin, % (excl. capital gains)

industry, infrastructure, environment, nuclear power, mechanical engineering and IT was a major contributory factor towards its success in securing the framework agreement. ÅF has been involved in the project intermittently since 2003. Construction work on the ESS project is scheduled to start in 2013. The facility is expected to open in 2019 and should become fully operational by 2025.

ÅF won a substantial follow-up order for an ongoing hydropower project at the Nant de Drance power station in Switzerland. (ÅF reported its success in securing the initial order for the project, worth 27 million euros, in September 2009. For details, please see www.afconsult.com). This follow-up order is worth a further 15 million euros for ÅF. Following a decision to increase the capacity of the power plant from 600 MW to 900 MW, ÅF has been contracted to supply additional services within the areas of design, project management and construction services. The client is NdD SA, a joint venture between Switzerland's largest power producers, Alpiq and Swiss Federal Railways (SBB), and the Swiss regional power utility FMV. The new hydropower plant at Nant de Drance is scheduled to be operational in 2017.

### Acquisitions and sales of companies

ÅF acquired 100 percent of the shares in the Czech technical consulting company, CityPlan. The Prague-based company, established in 1992, works mainly with infrastructure consulting and has 70 members of staff.

CityPlan specialises in the fields of Energy and Environment, Transport and Infrastructure Security. One third of the company's earnings are generated by public investments in infrastructure.

CityPlan's annual sales total approximately SEK 30 million with an operating margin of 10 percent. The purchase price was SEK 15 million, together with an additional consideration to be based on the company's operating profit for the period 2011–2013.

Following the acquisition of CityPlan, ÅF now has a total of 200 consultants in the Czech Republic. This makes ÅF one of the country's leading technical consulting companies. CityPlan will be organised as part of ÅF's Infrastructure Division. Other operations in the Czech Republic are organised under the Energy Division.

# **Energy Division**

For the Energy Division the market situation in the fourth quarter remained much as it had been earlier in the year. The international market for hydropower was strong and there was a steady increase in demand for thermal and renewable energy, while demand from the nuclear power industry remained weak following the accident at Japan's Fukushima reactor. This meant that profit levels for the quarter were once again unsatisfactory despite the fact that the operating profit of SEK 24.5 million represented the division's best quarterly earnings in the year.

Growth totalled almost 20 percent over the quarter. Most of this is attributable to the effects of the acquisition of the Spanish management and technical consulting company AF-Mercados EMI and to increased project volumes in Russia.

The quarter's best earnings were reported in Finland, the Czech Republic and Spain.

The division's Swiss operations, which account for 30 percent of Energy's sales, reported slightly improved levels of profitability after a negative trend during the first nine months of the year. This is thanks to strong profits in the Renewable business

area and brisk demand for hydropower consulting services. However, the Fukushima accident and global concern about the world's economy have meant that levels of activity in the Nuclear and Thermal Power business areas remain low.

ÅF stands by its earlier assessment that 2012 will see the start of an upturn in the market for international nuclear power. This positive vision of the future was affirmed after the end of the reporting period when ÅF won a tender in January to serve as "principal technical consultant" for the construction of a third reactor at the Álvaro Alberto nuclear power station in Brazil.

### About the Energy Division:

The Energy Division offers technical consulting services for the energy sector. It has operations in many areas of the world, and is a market leader in the Nordic region, Switzerland and the Baltic countries. It enjoys a strong standing in various fields of expertise, particularly nuclear power, where it is a world leader among independent consulting companies.

	Oct-Dec	Oct-Dec	Full year	Full year
Key ratios - Energy	2011	2010	2011	2010
Operating income, MSEK	380.1	320.4	1,285.7	1,012.1
Operating profit, MSEK	24.5	21.4	75.0	83.1
Operating margin, %	6.4	6.7	5.8	8.2
Number of employees, FTEs	1,035	964	1,019	906

# **Industry Division**

The Industry Division reported good demand in most areas of operations throughout the fourth quarter, particularly from Swedish industrial clients. This resulted in a satisfactory capacity utilisation level which, in combination with positive deviations from project costings, meant that the division was able to post its best quarterly result to date. The operating margin for the fourth quarter was 13.9 percent.

A slight slackening in demand from the steel industry was offset by an increase in orders from the pulp and paper industry in Sweden and abroad, with new projects for the likes of Stora Enso and Smurfit Kappa being secured during the course of the fourth quarter.

Other major contracts signed during the reporting period included a long-term project engineering assignment for the Swedish Nuclear Fuel and Waste Management Company's facility for the storage of spent nuclear fuel, a project that is of particular strategic significance. The division's extensive knowledge in this field and broad experience of energy plants weighed heavily in its favour during the procurement negotiations.

Levels of activity in the Swedish power sector remain high and the division is involved in large-scale projects for the nation's hydropower and nuclear power industries. Order volumes from Sweden's nuclear power operators increased quarter by quarter throughout 2011.

Growth totalled almost 10 percent in the fourth quarter. This was fuelled primarily by acquisitions. Towards the end of 2010 the division's offer had been reinforced by 80 employees from the Energo acquisition including hydro power specialists.

Organic growth also continues to increase. Several initiatives were taken during the year to put a firmer focus on growth through recruitment, and the division added a total of more than 300 new engineers to its workforce in 2011, specialists qualified in all areas of technology and all branches of industry.

#### About the Industry Division:

The Industry Division is the leading industrial consultant in the Nordic countries. Its mission is clear: to improve profitability for its clients. Experience from previous projects guarantees stability, competitive strength and peace of mind for clients. Geographical proximity to clients and a thorough understanding of the sectors in which they work are the most important foundations for long-term client relations.

	Oct-Dec	Oct-Dec	Full year	Full year
Key ratios - Industry	2011	2010	2011	2010
Operating income, MSEK	427.6	390.3	1,533.4	1,340.0
Operating profit, MSEK	59.6	44.4	177.9	119.9
Operating margin, %	13.9	11.4	11.6	9.0
Number of employees, FTEs	1,299	1,228	1,280	1,200

### Infrastructure Division

The market for Infrastructure's services remained strong in the fourth quarter, driven by substantial investments in new public infrastructure and sustained interest in making all types of premises more energy efficient. The capacity utilisation rate rose during the reporting period, thanks chiefly to increased levels of activity in conjunction with the Stockholm Bypass project and more business in the west of Sweden.

The division continued to build on its long-term portfolio of orders. One example of these is the contract with the Swedish Nuclear Fuel and Waste Management Company, SKB, for project management services in conjunction with the storage of spent nuclear fuel. The division's track record of expertise in technical installations played an important role in the procurement of this contract.

The brisk inflow of orders is evidence of the fact that Infrastructure is continuing to take new shares of the market. Growth in the fourth quarter amounted to 16 percent, with just over 6 percent attributable to the business generated by the acquisition of Energo and the Czech consulting company, CityPlan. The integration of CityPlan is proceeding well and according to plan.

The scope of ÅF's involvement in planning the technical installations for Nya Karolinska Sjukhuset, a new major hospital in Stockholm, also continues to expand. This helped to ensure

that the division's largest business area, Installations with some 750 employees, once again reported a high level of capacity utilisation. Operations in Norway have continued to recover from the significant profitability problems experienced in 2010, again posting results that chart a steady improvement in performance. Profitability for the fourth quarter of 2011 was on a par with that for the division's Swedish Installations business.

Other business areas reported similar improvements in earnings. Results for the Sustainability business area showed a clear improvement after a prolonged period of poor profitability. Also worthy of note in the fourth quarter were the order that Sound & Vibrations secured with the Swedish Defence Materiel Administration, FMV, and the project that Lighting won relating to the illumination of a number of bridges in China.

#### About the Infrastructure Division:

The Infrastructure Division enjoys a leading position in the Scandinavian market for technical solutions for infrastructure projects. The division's strengths include a strong sales organisation, sound commercial skills and a portfolio of services that offers clients sustainable, hi-tech solutions. Through its ability to develop innovative solutions that boost client profitability and target fulfilment, the division is continuously enhancing its market potential.

	Oct-Dec	Oct-Dec	Full year	Full year
Key ratios - Infrastructure	2011	2010	2011	2010
Operating income, MSEK	431.0	372.3	1,527.7	1,233.1

Operating margin, %	10.3	5.5	7.6	5.6
Number of employees, FTEs	1,333	1,185	1,294	1,065

# **Technology Division**

The Technology Division reported an increase in profitability and continued high levels of growth for the fourth quarter. Organic growth for the final three months of the year rose to 17 percent. The division recruited more than 200 new employees in 2011, which is fully in line with the target set at the start of the year. The improvement in the division's profitability is due to sustained good levels of capacity utilisation and to reductions in costs. The initiative to increase the proportion of project business has also contributed to the improvement in profits.

Technology enjoys a strong position in the telecom industry, which currently accounts for close to half of the division's sales. Growth continues to be driven by increasing demand for mobile broadband, and this has led directly to a number of new contracts for ÅF, several of which are for test systems for mobile systems. Demand also remains good from the defence industry, where the division won new contracts with clients that include Saab and the Swedish Defence Materiel Administration, FMV.

The Technology Division has maintained its strategic focus on offering a greater number of sustainable solutions as part of its Eco Design concept. In the fourth quarter this resulted in new orders from Scania, Bombardier and others, as well as an order from Thule for an "ÅF – Green Business Screening" process.

#### About the Technology Division:

The Technology Division is active mainly in Sweden, where it is a leading name in Swedish product development and defence technology. A firm base and a long track record of success provide stability and give clients peace of mind. The Technology Division also has strong offers within its specialist fields relating to various aspects of sustainability.

	Oct-Dec	Oct-Dec	Full year	Full year

Operating margin, %	12.0	9.2	10.8	9.6
Number of employees, FTEs	716	643	699	616

### Cash flow and financial position

Cash flow for the fourth quarter was strong, totalling SEK 185 million (145) from operating activities. The improvement in cash flow was attributable first and foremost to better operating profits, but also to a lower operating capital despite the rise in volumes.

Cash flow from operating activities for the full year 2011 was SEK 414 million (201). Cash flow relates mainly to trends in earnings. It is worth noting that, despite organic growth of 10 percent, operating capital has been reduced. One reason for this is an increase in the number of advance payment contracts.

Total cash flow for the period was SEK 18 million (-10). Corporate acquisitions and additional considerations paid totalled SEK 44 million (513). Dividends to ÅF's shareholders totalled SEK 135 million (135) and the net of borrowing and amortisation of loans had an effect on cash flow of SEK -163 million (-150). Last year's cash flow was affected positively by income of SEK 624 million following the sale of ÅF-Kontroll and ÅF TÜV Nord.

The Group's liquid assets totalled SEK 345 million (328) at the end of the reporting period. The net cash balance was SEK 131 million (35). ÅF AB has credit facilities amounting to SEK 1,000 million.

Equity at the end of the year was SEK 2,450 million (2,361), equivalent to equity per share of SEK 72.38 (69.47). The equity/assets ratio was 59.4 percent (59.8).

### Number of employees

The number of full-time equivalents was 4,367 (3,966). The total number of employees at the end of the reporting period was 4,649 (4,475): of these 3,235 (3,148) were employed in Sweden and 1,414 (1,327) outside Sweden.

### Parent company

Parent company operating income for 2011 totalled SEK 358 million (330) and relates chiefly to internal services within the group.

Profit after net financial items was SEK 406 million (1,021). Dividends from subsidiaries and associated companies together with Group contributions received totalled SEK 455 million (673.) Last year the parent company made a financial gain of SEK 501 million on the sales of ÅF-Kontroll and ÅF TÜV Nord.

Cash and cash equivalents totalled SEK 42 million (54), and gross investment in machinery and equipment amounted to SEK 12 million (7).

### Risks and uncertainty factors

The significant risks and uncertainty factors to which the ÅF Group is exposed include business risks linked to the general economic situation and the propensity of various markets to invest, the ability to recruit and retain qualified co-workers, and the potential impact of political decisions. In addition, the Group is exposed to write-downs in fixed-price contracts as well as to a number of financial risks, including currency risks, interestrate risks and credit risks. The risks to which the Group is exposed are described in detail in ÅF's Annual Report for 2010. No significant risks are considered to have arisen since the publication of the annual report.

### Accounting principles

This interim report has been prepared in accordance with IAS 34 ("Interim Financial Reporting"). The accounting principles conform with International Financial Reporting Standards (IFRS), as well as with statements on interpretation from the International Financial Reporting Interpretations Committee (IFRIC) as approved by the European Commission for use in the EU, and with the relevant references to Chapter 9 of the Swedish Annual Accounts Act. The report has been drawn up using the same accounting principles and methods of calculation as those in the Annual Report for 2010 (see Note 1, page 83).

The parent company has implemented the Swedish Financial Reporting Board's Recommendation RFR 2, which means that the parent company in the legal entity shall apply all the IFRS and related statements approved by the EU as far as this is possible, while continuing to apply the Swedish Annual Accounts Act and the Pension Obligations Vesting Act and paying due regard to the relationship between accounting and taxation in the preparation of the legal entity's annual accounts.

### ÅF shares

The ÅF share price at the end of the reporting period was SEK 111; this represents a fall in value of 20 percent since the start of the year. During the same period the Stockholm Stock Exchange's OMXSPI index fell by 17 percent and the OMX Mid Cap index by 25 percent.

#### Dividend

The Board of Directors proposes a dividend for 2011 of SEK 5.00 (4.00) per share.

### ACQUIRED COMPANIES' NET ASSETS AT TIME OF ACQUISITION (in millions of SEK)

	Jan-Dec
Date of acquisition	2011
Intangible non-current assets	0.3
Tangible non-current assets	1.5
Accounts receivable and other receivables	8.9
Cash equivalents	6.2
Accounts payable and other liabilities	-5.7
Net identifiable assets and liabilities	11.2
Goodwill	21.8
Fair value adjustment intangible assets	1.2
Fair value adjustment non-current provisions	-0.2
Non-controlling interest	-0.9
Acquisition cost incl estimated additional purchase price	33.1
Deduct:	
Cash (acquired)	6.2
Estimated additional purchase price	7.8
Net outflow of cash	19.1

Acquisition analyses are preliminary as the assets in the companies acquired have not been definitively analysed. In the case of the above acquisitions, the purchase price has been greater than the assets recognised in the companies acquired: as a result, the acquisition analysis has created intangible assets. The acquisition of a consulting business involves in the first instance the acquisition of human capital in the form of the skills and expertise of the workforce: thus, the greater part of the intangible assets in the companies acquired is attributable to goodwill. The acquisitions refer to Elektroprojektering Uppsala (business acquisition), Eriksson Sprinklerkonsult (business acquisition), CityPlan spol s.r.o. and Oy Vesirakentaja.
