### Alfa Laval wins SEK 50 million cleantech order in Malaysia

**Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has received an order for an evaporation system to a pulp and paper mill plant in Malaysia. The order value is about 50 MSEK and delivery will be completed in 2011.**

The Alfa Laval evaporation system will be used in a process to concentrate black liquor, a by-product from the pulp and paper production, for further re-use as fuel in the plant. In addition the steam, which is the result from the concentration process, will be condensed and re-used as water in the process thus further reducing the environmental impact of the plant.

“The new plant is designed to enable a higher concentration of the black liquor than industry average, which will result in a better quality of the fuel as well as more process water recovered for the plant. All in all, an environmentally sound solution”, says Lars Renström, President and CEO of the Alfa Laval Group.

**Did you know...** that the Alfa Laval process solution results in such high quality of the black liquor that it can supply the majority of the plant's energy demand?

#### **About Alfa Laval**

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval wins SEK 50 million cleantech order in Malaysia

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval is listed on the Nordic Exchange, Nordic Large Cap, and, in 2009, posted annual sales of about SEK 26 billion (approx. 2.45 billion Euros). The company has 11 400 employees.
