Alfa Laval wins SEK 95 million refinery order, for the largest heat exchanger so far

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has received an order from an Indian refinery for the largest Alfa Laval Packinox heat exchanger ever. The order value is about 95 MSEK and delivery is scheduled for 2011.

The Alfa Laval Packinox plate heat exchanger, with a height of 25 meters is the largest heat exchanger Alfa Laval has built so far, and it will be used in a catalytic reforming unit for the production of gasoline in an Indian refinery.

“Two thirds of our large orders the last 6 months have included our unique Alfa Laval Packinox heat exchangers”, says Lars Renström, President and CEO of the Alfa Laval Group. “It proves the unmatched performance of this unique product and the continuous investments in energy efficiency.”

Did you know that... the largest Alfa Laval Packinox heat exchanger will weigh 450 tonnes, which corresponds to the weight of 83 Indian elephants?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.
