Alfa Laval wins SEK 110 million refinery order in India

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has received an order for Alfa Laval Packinox heat exchangers to be used in an Indian refinery. The order value is about SEK 110 million and delivery will be finalized during 2011.

The Alfa Laval Packinox heat exchangers will be used in a catalytic chemical process for mixed xylene which, among other things, can be used for production of PET bottles.

“India became our fourth largest market during the third quarter and I expect it to become number three in the near future”, says Lars Renström, President and CEO of the Alfa Laval Group. “Once again our energy-efficient Packinox heat exchangers prove their unmatched performance for the refinery and petrochemical industries.”

Did you know that... Alfa Laval Packinox heat exchangers are installed in more than 60 percent of all Indian refineries?

About Alfa Laval
