Alfa Laval wins SEK 60 million energy-efficiency order in South Korea

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has received an order for Alfa Laval Packinox heat exchangers from a refinery in South Korea. The order value is about SEK 60 million and delivery is scheduled for 2013.

The Alfa Laval Packinox heat exchangers will be used in the production of mixed Xylenes used for PET bottles, among other things.

“This is the second order in a short time for our Alfa Laval Packinox heat exchangers to the refinery industry in South Korea”, says Lars Renström, President and CEO of the Alfa Laval Group. “It proves our ability to meet the high demands for energy efficient products in the refinery business.”

Did you know... that one Alfa Laval Packinox heat exchanger can replace up to four traditional shell-and-tube heat exchangers in this specific application?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval wins SEK 60 million energy-efficiency order in South Korea

Alfa Laval is listed on Nasdaq OMX, and, in 2011, posted annual sales of about SEK 28.6 billion (approx. 3.2 billion Euros). The company has today about 16 000 employees.
