Alfa Laval wins offshore oil and gas order worth SEK 90 million

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order from a South Korean company for freshwater generators to an offshore oil platform in Norway. The order, booked in the Energy & Environment segment, has a value of approximately SEK 90 million. Delivery is scheduled for 2014.

The Alfa Laval freshwater generators will be installed onboard the platform where they will convert seawater into both potable and process water. The oil platform is located in the Norwegian part of the North Sea.

“This order confirms a continued positive development of our oil and gas business and it proves that our equipment lives up to the industry’s high demands on reliability and uptime,” says Lars Renström, President and CEO of the Alfa Laval Group.

Did you know... that Alfa Laval has supplied equipment to the oil and gas industry for more than 40 years?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company’s equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval is listed on Nasdaq OMX, and, in 2012, posted annual sales of about SEK 29.8 billion (approx. 3.5 billion Euros). The company has today about 16 400 employees.
