Alfa Laval wins SEK 55 million repeat order for marine exhaust gas cleaning systems

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order for four Alfa Laval PureSOx exhaust gas cleaning systems. The order, booked in the Marine & Offshore Systems segment late September, has a value of approximately SEK 55 million and delivery is scheduled for 2015 and 2016.

The order includes Alfa Laval PureSOx exhaust gas cleaning systems (closed loop systems) to be installed on new vessels.

“I am very pleased to announce this repeat order for our scrubber technology. The order confirms our system’s reliability and performance for reducing sulphur oxide, be it for retrofits or for installation aboard new vessels,” says Lars Renström, President and CEO of the Alfa Laval Group.

IMO’s convention for the reduction of sulphur oxides (SOx) will affect all vessels, both new and existing. The convention demands that sulphur emission levels in certain Emission Control Areas (ECAs) shall be cut to 0.1 percent from the year 2015 and that the global emission level must not exceed 0.5 percent from the year 2020. To reach these levels ship owners can either use more expensive low-sulphur fuel or, on vessels where it is suitable, continue to run the ship on heavy fuel oil and invest in a scrubber such as Alfa Laval’s PureSOx.

Did you know that... Alfa Laval recently unveiled PureSOx 2.0, a more compact system with new options and increased flexibility?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company’s equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them

Alfa Laval wins SEK 55 million repeat order for marine exhaust gas cleaning systems

to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.

Alfa Laval's products are also used in power plants, aboard ships, oil and gas exploration, in the mechanical engineering industry, in the mining industry and for wastewater treatment, as well as for comfort climate and refrigeration applications.

Alfa Laval's worldwide organization works closely with customers in nearly 100 countries to help them stay ahead in the global arena.

Alfa Laval is listed on Nasdaq OMX, and, in 2013, posted annual sales of about SEK 29.8 billion (approx. 3.5 billion Euros). The company has today, after the acquisition of Frank Mohn AS about 17 500 employees.
