COMMENTS BY THE PRESIDENT AND CEO

"It is with great satisfaction that I can report that the fourth quarter set new records in both sales and earnings," says Johan Molin, President and CEO. "Sales increased by a full 22%, while operating income increased by 17%. It was particularly pleasing that the Group's increasing exposure on the emerging markets meant that total organic growth amounted to a good 4% despite a weak demand on the mature markets.

"A number of innovative new products in both the mechanical and electromechanical areas were launched during the year, and the share of sales coming from new products rose to over 20%, almost a doubling compared to earlier figures. In addition, the acquisitions of ActivIdentity and LaserCard during the year mean that the Group now can offer complete systems for advanced public ID solutions. The strategic acquisition of Crawford meant that ASSA ABLOY took a leading position in the growing field of entrance automation.

"Operating income for the full year increased by a good 10%, supported by efficiency improvements and the continuing relocation of production to low-cost countries. Operating cash flow continued strong and exceeded 100% of pre-tax profit.

Press Release

"Acquisition activity was high throughout the year, and 18 acquisitions with a combined annualized sales of SEK 6,800 M were completed, representing 18% growth. The largest transaction during the year was the acquisition of Cardo and the subsequent divestments of Cardo Flow Solutions and Lorentzen & Wettre. During January the acquisitions of Albany Door Systems in America and Securistyle in Britain were completed. An agreement has also been signed for the acquisition of Dynaco in Belgium. This means that for 2012 the strategic target of 5% annual acquired growth has already been achieved.

"Looking forward into 2012, continued good growth on the emerging markets is expected, but at a lower level than last year. On the mature markets a stable development is expected with an unchanged or slightly positive sales trend. The underlying business cycle continues to be affected by the uncertainty on the financial markets and budget restrictions in many countries, which primarily impacts the market segments that are dependent on public financing."
