CEO'S OVERVIEW

During the third quarter, net sales rose by 16 percent. The acquisitions we have completed over the past two years have had a good development and work well with the other subsidiaries. During the quarter, Bufab also achieved substantial organic growth in both operating segments thanks to an increased market share and slightly stronger underlying demand.

Gross margin for the quarter was significantly stronger year-on-year, primarily due to cost savings in sourcing. The stronger gross margin combined with a good contribution from acquired companies also led to an improved operating margin, despite operating expenses being somewhat high during the quarter.

In segment Sweden, net sales rose by 6 percent, driven primarily by organic growth. The market share is estimated to have increased slightly, which we see as a sign that our long-term and intensive focus on sales in our home market is beginning to pay off. The increase is particularly gratifying against the background of greater uncertainty among telecommunications customers. The gross margin and operating margin both increased.

Segment International performed well. Net sales rose by 21 percent, as a result of acquisitions and an increased market share. Organic growth was 4 percent, which was lower than earlier in the year due to weaker market growth. Despite this slackening, we continue to see growth in most major markets, with the exception of China and Norway.

We have yet to see any negative effects on sales volumes connected to an impending Brexit. A strengthened gross margin during the quarter was offset in part by higher operating expenses, primarily for obsolescence and negative currency effects. We are continuing to strengthen the sales organisation in the segment. For example, Bufab established a subsidiary in Singapore during the quarter, in line with the aim of increasing our presence in Asia. In total, segment International increased its operating profit by 30 percent.

So far this year, Bufab has performed well with both organic and acquired growth, higher margins, improved earnings and a healthy cash flow. Growing uncertainty in the business environment, a slightly weaker order intake, the prevailing exchange rates and a risk of rising commodities prices are challenges that we face towards the end of 2016 and in 2017. Nevertheless, we intend to achieve continued favourable performance by means of increased market share and improved sourcing and logistics efficiency. We also see opportunities to make additional value-creating acquisitions.

Operating profit rose to SEK 66 million (52), equal to an operating margin of 9.8 percent (9.0). The operating margin increased as a result of a higher gross margin, but was negatively affected by somewhat high operating expenses during the quarter in segment International.

Exchange-rate fluctuations impacted operating profit negatively by SEK 4 million, volumes positively by SEK 7 million, price/cost mix and other factors by SEK 0 million and acquisitions positively by SEK 11 million.

JANUARY-SEPTEMBER

Order intake was SEK 2,143 million (1,846), which was slightly lower than net sales.

Net sales rose by 16 percent to SEK 2,148 million (1,847). The Group's organic growth was +4 percent, +6 percent for segment International and +1 percent for segment Sweden.

Underlying demand is considered unchanged, and the market share as slightly higher than in the year-earlier period.

Gross margin strengthened during the period, primarily due to savings in sourcing but also to higher gross margins in the acquired companies.

Operating profit rose to SEK 219 million (159), equal to an operating margin of 10.2 percent (8.6).

Exchange-rate fluctuations had a negative impact of SEK 9 million on operating profit, volume had a positive impact of SEK 17 million, price/cost mix and

Cash flow from operations	83	79	255	160
Investments excluding acquisitions	-6	-9	-16	-18
Operating cash flow	77	70	239	142

Operating cash flow amounted to SEK 77 million (70) for the period. The year-on-year increase resulted from improved operating profit but with a reduction in working capital being lower year-on-year. The lower reduction in working capital this year is due to a higher growth rate compared to previous year. Operating cash flow for the nine-month period was SEK 239 million (142).

Average working capital in relation to net sales during the past 12 months was 36.6 percent (36.0). A reduction in tied-up inventory and an increase in payables had a positive impact on this key figure, while the higher capital tied-up in the acquisition of Apex Stainless Holdings had a negative impact. Excluding this acquisition, average working capital

in relation to net sales during the past 12 months would have amounted to 34.1 percent (36.0).

On 30 September 2016, the Group's net debt totalled SEK 791 million (612).

Net debt increased, mainly due to loans taken in conjunction with the acquisition of Apex Stainless

Holdings and Magnetfabriken. On 30 September 2016, the debt/equity ratio was 61 percent (51).

Segment Sweden

Third quarter

Order intake amounted to SEK 215 million (208) and was below net sales.

Net sales rose by 6 percent to SEK 219 million (206). Organic growth was +4 percent. Underlying demand during the period is estimated to be slightly improved. As in previous quarters, growth was burdened by customers' relocation of production from Sweden to other countries, primarily Eastern Europe, corresponding to around 1 percent of the segment's sales. Segment International benefits from these production relocations. The market share in Sweden is otherwise estimated to be unchanged or slightly better.

Gross margin rose to 30.1 percent (29.2), with the improvement due to cost savings in sourcing.

Operating profit was SEK 28 million (24), equal to a higher operating margin of 12.6 percent (11.8). Exchange-rate fluctuations affected operating profit negatively by SEK 2 million, volumes positively by SEK 3 million, price/cost mix and other factors positively by SEK 2 million and the Magnetfabriken acquisition positively by SEK 1 million.

January-September

Order intake was SEK 724 million (708) and was lower than net sales.

Net sales increased to SEK 735 million (719). Organic growth was +1 percent. Growth in the period was burdened by slightly more than 1 percentage point by customers' relocation of production to primarily Eastern Europe. Underlying demand during the period is estimated to be unchanged and the market share unchanged or slightly improved.

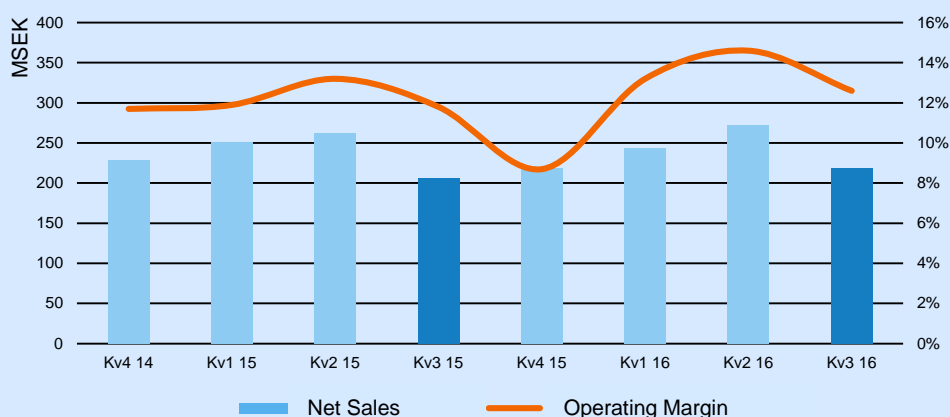

Gross margin rose to 30.0 percent (28.9), with the improvement due to cost savings in sourcing.

Operating profit was SEK 99 million (89), equal to an operating margin of 13.5 percent (12.3). Exchange-rate fluctuations had a negative impact of SEK 5 million on operating profit, volumes a positive impact of SEK 1 million, price/cost mix and other factors a positive impact of SEK 12 million, and the acquisition of Magnetfabriken a positive impact of SEK 2 million.

Underlying demand is deemed to be unchanged year-on-year.

Gross margin rose to 29.3 percent (27.5). Just over half of the improvement is attributable to cost savings in sourcing and almost half to the acquired company's higher gross margin.

Operating profit rose to SEK 41 million (32), equal to an operating margin of 9.1 percent (8.5). The operating margin during the quarter was burdened by high costs for revaluation items, primarily for obsolescence and currency. January-September

Operating profit rose to SEK 138 million (89), equal to an operating margin of 9.7 percent (7.9). Exchange-rate fluctuations had a negative impact of SEK 6 million on operating profit, volumes a positive impact of SEK 16 million, price/cost mix and other factors a positive impact of SEK 3 million, and acquisitions a positive impact of SEK 36 million.

and the remaining SEK 9 million is subject to conditions. Of the conditional portion of SEK 9 million, SEK 5 million was paid in the third quarter. The conditional portion of SEK 9 million comprises about 57 percent of the maximum payment outcome. The acquisition has added SEK 15 million to the Group's accumulated net sales since the transfer. The net impact on accumulated operating profit was SEK 3 million and the effect on profit after tax was SEK 2 million. Transaction costs for the acquisition amounted to SEK 0 million. The acquisition would have positively impacted the Group's net sales by an estimated SEK 17 million, operating profit by about SEK 3 million and profit after tax for the period by about SEK 2 million had it been implemented on 1 January 2016. The amounts of the assets and liabilities included in the acquisitions according to the preliminary acquisition analysis were as follows:

Auditors' report of the review of the financial information in summary (interim report)

Introduction

We have conducted a review of the financial information in summary (interim report) for Bufab AB (publ) (556685-6240) as of 30 September 2016 and the nine-month period that ended on that date. The Board of Directors and the President are responsible for preparing and presenting this interim report in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express an opinion on this interim report based on our review.

Focus and scope of the review

We have conducted our review in accordance with the Standard on Review Engagements ISRE 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (ISA). The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Opinion

Based on our review, nothing has come to our attention that causes us to believe that, in all material respects, the accompanying interim report has not been prepared for the Group in accordance with IAS 34 and the Annual Accounts Act and for the Parent Company in accordance with the Annual Accounts Act.

Alternative performance measures

Bufab uses certain performance measures not defined in the rules for financial reporting adopted by Bufab. It should be pointed out that these alternative performance measures, as they are defined, are not fully comparable with other companies' performance measures with the same name.

Organic growth

Because Bufab has operations in many countries with different currencies, it is essential to provide an understanding of the company's performance without current effects when translating foreign subsidiaries. In addition, Bufab has an important strategic objective in carrying out value-generating acquisitions. For these reasons, growth is recognised also excluding currency effects when translating foreign subsidiaries and excluding acquired operations within the term Organic growth. This performance measure is expressed in percentage points of last year's net sales.
