Henrik Blomqvist
CEO Bure Equity AB

The first quarter of the year was extremely busy with investments in Allgon and ACQ topping a packed agenda. Following an extension of the public offering to Allgon shareholders, Bure's holding amounts to 98.7 percent. The company was therefore delisted in March and we intend to compulsorily redeem the remaining shares. The investment in Allgon is an interesting addition to Bure's portfolio as it increases the proportion of unlisted holdings and the number of wholly owned operations. Allgon continued to perform well during the first quarter of the year.

On March 25, ACQ Bure was listed on the Nasdaq Stockholm. ACQ is Sweden's first special purpose acquisition company (SPAC) and Bure is the so-called sponsor and initiator. In total, ACQ raised SEK 3.5 billion, of which Bure invested SEK 700 million, which corresponds to a holding of 20 per cent. The aim is to acquire an unlisted company within 36 months.

ACQ is a significant investment for Bure and an interesting step in our development. Bure has grown strongly in recent years and we thus need to find somewhat larger investments to continue our expansion journey. Through ACQ, we will be able to invest in a larger company and leverage Bure's organization and network.

From the beginning of the year, we have changed the accounting principles used by Bure and will be classed as an investment entity. This change will, inter alia, to simplify Bure's consolidated accounts, which will thus correspond to Bure's net asset value.

During the quarter, Bure's net asset value per share decreased 1.5 per cent. However, the stock market as a whole remained strong despite continued Corona restrictions. The SIX RX index rose 14.3 per cent. After the end of the period, several of the portfolio companies have reported strong interim reports and Bure's net asset value per share has recovered.

Significant risks and uncertainties

In view of the rapid on the financial markets, special emphasis is placed on monitoring the effects of Bure's investments and their valuations. Bure has a number of basic principles regarding the management of risk. Bure's financial policy states that the Parent Company shall be essentially debt-free. Furthermore, each portfolio company shall be financially independent from the Parent Company, which means that the Parent Company is not financially liable for portfolio companies' obligations, and that portfolio companies are responsible for their own financing. Financing of respective portfolio companies shall be appropriate to each company's specific circumstances, such that overall risk is managed through a balance between operational and financial risk.

Bure's 2020 annual report provides a detailed description of the Group's risk exposure and risk management in the administration report and in Note 21. Bure's assessment is that no significant risks have arisen other than those described in the annual report and in this interim report. This year-end report has not been reviewed by the Group's auditors.

Notes

Note 1 – Accounting policies

Bure applies International Financial Reporting Standards (IFRS) as endorsed for application in the EU. This interim report has been prepared in compliance with IAS 34, Interim Financial Reporting, the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2, Accounting for Legal Entities.

Group consolidation principles

As of the beginning of the first quarter of 2021, the Board of Directors of Bure has judged that the criteria of IFRS 10 investment entity - have been met.

An investment entity does not consolidate subsidiaries in accordance with IFRS 10 Consolidated Financial Statements and does not apply IFRS 3 Business Combinations, with the exception of subsidiaries that are active in investment activities. An investment entity values portfolio companies at fair value in accordance with IFRS 9 Financial Instruments. Since 1 January 2021, the Bure investment entity has comprised of the parent company, Bure Equity AB, Atle Investment Management AB, and Bure Growth AB.

The change is only forward-looking, but a recalculation of comparison periods has been carried out to simplify comparisons. In the investment entity's accounts, recalculated historical financial data is presented under "Recalculated" in addition to historical financial data.

In its assessment prior to the decision to classify the company as an investment company in accordance with the criteria in IFRS 10 - Investment Entities, the Board of Directors of Bure Equity has considered the following:

- Bure is an investment entity whose goal is to create long-term total returns and thereby be a competitive investment alternative in the stock market. The starting point in Bure's operations is to actively participate in and develop wholly owned or partly owned companies and operations to increase the value of these assets over time through value growth or dividends.
- Since 2010, Bure has reported the net asset value of all portfolio companies valued at fair value.
- Bure is an investment entity that advocates active and long-term ownership. Bure assesses each investment and business opportunity over a period of three to five years, but investment horizons may be longer than this. Portfolio companies are continuously evaluated by Bure with an emphasis on development potential, valuation, risk, and alternative investment opportunities. When portfolio companies do not meet Bure's objectives and criteria, the holding may be sold in part or in its entirety. Over the years, Bure's portfolio has changed substantially.

Changes in accounting principles in the parent company

The parent company's principles for reporting investments in portfolio companies, (subsidiaries, associated companies, and other financial assets) were changed voluntarily in the first quarter of 2021, after which investments in participations in portfolio companies have been reported at fair value through profit or loss in the same way as in the investment entity. The change is only forward-looking, but a recalculation of comparison periods has been carried out to simplify comparisons. In the parent company's accounts, recalculated historical financial data is presented under "Recalculated" in addition to historical financial data.

For further information on accounting and valuation principles, please see Note 1 in the 2020 annual report.

New accounting principles applied from 1 January 2021: revised or amended IFRS standards are not considered to have any significant impact on earnings or balance statements. Bure continuously updates its analysis of upcoming changes.

Note 2 – Segment reporting

All activities in the entity are considered to constitute a single segment.

Note 3 – Effects of changed estimates and assessments

Important estimates and assessments are presented in Note 1 in the 2020 annual report. No changes to these estimates and assessments have been that could have a significant impact on the current interim report.

Note 4 – Financial instruments

Fair value and book value of financial assets and liabilities

Fair value has been calculated for all financial assets and liabilities in accordance with IFRS 13. Fair value is estimated to be equal to the book value of accounts receivable and other receivables, other current receivables, cash and other cash and cash equivalents, accounts payable, and other liabilities and borrowing. Book value less write-downs is an estimated fair value for accounts receivable and accounts payable. For long-term non-interest-bearing liabilities, fair value has been calculated by discounting future cash flows with current market interest rates regarding the term of the debt.

The investment entity's financial assets and liabilities are classified in accordance with IFRS 13 in the following three categories

Level 1: Listed prices in an active market for identical assets or liabilities.

Level 2: Other observable data for the asset or liability other than listed prices included in Level 1, either directly or indirectly.

Level 3: Data for the asset or liability that are not in their entirety based on observable market data.

Bure reports listed holdings at fair value with changes in value in the income statement (level 1). Bure's listed holdings consist of ACQ Bure AB, Cavotec SA, MedCap AB, Mentice AB, Mycronic AB, Ovzon AB, Vitrolife AB, and Xvivo Perfusion AB.

Bure has reported investments in unlisted associated companies and subsidiaries (level 3) at fair value since 1 January 2021. Unlisted associated companies have previously been valued according to the equity method in accordance with IAS 28 - Holdings in Associates and Joint Ventures, while subsidiaries have been reported at accrued acquisition value. Unlisted associated companies and subsidiaries consist of Allgon AB, Alcur Fonder AB, Atle Investment Services AB, BioLamina AB, Fondbolaget Fondita AB, Investment AB Bure, Mercuri International Group AB, My Driving Academy Sweden AB, ScandiNova Systems AB, and Teknik Innovation Norden Fonder AB. Since the introduction of IFRS 9, Yubico AB has been continuously revalued.

Bure has chosen to market value all financial assets based on International Private Equity and Venture Capital Valuation Guidelines (IPEV). The guidelines describe a number of methods for determining the fair value of each holding. Considerable emphasis is placed on recently completed market transactions in the company, e.g., share issues or the acquisition of existing shares. Transactions in comparable companies can also be used. Other valuation methods include discounting of forecast cash flows with relevant discount rates and applying valuation multiples such as EV/Sales, EV/EBITDA, EV/EBITA, EV/EBIT, PER and P/AuM which are adjusted to take into account differences in market, business, and risk. In general, a liquidity discount is also applied for unlisted assets. Valuation takes place on an ongoing basis and is published in conjunction with quarterly reports.

Definitions

Basic earnings per share

Profit/loss after tax divided by the average number of shares outstanding during the year. For the Group, net profit less the non-controlling interests' share in profit for the year.

Diluted earnings per share

Profit after tax divided by the average number of shares outstanding during the year after dilution. For the Group, net profit less non-controlling interests' share in profit for the year. The average number of shares after full dilution is calculated according to the rules in IFRS, IAS 33 Earnings per Share.

Earnings per share

Earnings after tax divided by the average number of outstanding shares during the period. For the parent company, net earnings is used less the minority share of earnings for the period.

The average number of shares after dilution is calculated according to IFRS regulation, IAS 33 Earnings per share.

EBIT

Operating profit after amortization of goodwill/acquisition-related surplus values and amortization of fixed assets.

Equity per share

Equity divided by the number of shares outstanding. As of the transition to IFRS on 1 January 2005, non-controlling interests are included in total equity.

Equity/asset ratio

Equity in relation to total assets. As of the transition to IFRS on 1 January 2005, non-controlling interests are included in total equity.

Growth

Increase in net sales in relation to net sales for the previous year. The key figure thus includes both organic and acquisition-driven growth.

IRR

Internal Rate of Return.

Management costs/net asset value

Management costs during the period divided by net asset value at the end of the period.

Market capitalization

Share price multiplied by the total number of shares outstanding.

Net asset value

Market value, (valued at fair value), of Bure's listed and unlisted holdings and short-term investments plus accrued acquisition value of other net assets and cash and cash equivalents.

Net loan liability

Same definition as net loan receivable, but is used when interest-bearing liabilities exceed interest-bearing assets.

Net loan receivable

Financial interest-bearing assets minus interest-bearing liabilities.

Return on equity

Profit/loss after tax divided by average equity.

Share buyback

For several years, Swedish companies have been permitted to repurchase up to 10 per cent of their own outstanding shares, provided that this is approved by the Annual General Meeting within the framework of non-restricted equity.

Total return

The total of the year's share price growth and reinvested dividends divided by the share price at the beginning of the year.
