## 2025/Q2

### April–June 2025<sup>1</sup>

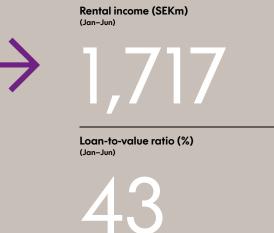

- Net lettings for the quarter totalled SEK -12m (-38)
- Leases totalling SEK 52m (23) were renegotiated, with an average decline in rental value of -3.1 per cent (-4.8). Leases worth SEK 72m (61) were also extended on unchanged terms.
- Rental income totalled SEK 852m (864).
   In a like-for-like property portfolio, income fell by -3.8 per cent compared with the previous year (4.9).
- Net operating income amounted to SEK 633m (650). In a like-for-like property portfolio, net operating income declined by -6.0 per cent (6.1).
- Revenue from residential development amounted to SEK 128m (0) and gross earnings totalled SEK 29m (-6).
- The surplus ratio was 74 per cent (75).
- Net interest items amounted to SEK -240m (-245).
- Profit from property management amounted to SEK 372m (331).
- Realised and unrealised changes in the value of properties amounted to SEK -85m (-80).
- Impairment of developable properties amounted to SEK -21 (0)
- Unrealised changes in the value of fixed-income derivatives totalled SEK -356m (-184).
- Earnings before tax for the period amounted to SEK -91m (67).
- Earnings after tax for the period amounted to SEK -117m (17), corresponding to earnings per share of SEK -0.37 (0.05).

### Jan–June 2025

- Net lettings for the period totalled SEK -6m (-74)
- Leases totalling SEK 103m (59) were renegotiated, with an average decline in rental value of 3.1 per cent (-2.3). Leases worth SEK 161m (145) were also extended on unchanged terms.
- Rental income totalled SEK 1,717m (1,731).
   In a like-for-like property portfolio, income fell by 3.3 per cent compared with the previous year (8).
- Net operating income amounted to SEK 1,233m (1,269). In a like-for-like property portfolio, net operating income declined by -5.7 per cent (8).
- Revenue from residential development amounted to SEK 128m (142) and gross earnings totalled SEK 23m (-5).
- The surplus ratio was 72 per cent (73).
- Net interest items amounted to SEK -482m (-486).
- Profit from property management amounted to SEK 657m (659).
- Realised and unrealised changes in the value of properties amounted to SEK -687m (-1,457).
- Impairment of developable properties amounted to SEK -21 (0)
- Unrealised changes in the value of fixed-income derivatives totalled SEK -329m (29).
- Earnings before tax for the period amounted to SEK -383m (-769).
- Earnings after tax for the period amounted to SEK -267m (-682), corresponding to earnings per share of SEK -0.85 (-2.17).

### Summary, SEKm

	2025	2024	2025	2024

The comparison figures for income and expense items relate to values for the Apr–Jun and Jan–Jun 2024 periods, and for balance sheet items at 31 December 2024. See page 31 for key performance indicator definitions.

### Message from the CEO

Rental income during the second quarter amounted to SEK 852m (864). Reduced income due to the sale of the Ynglingen 10 property and relocations was partly offset by occupations in completed project properties. The completion of the first phase of housing in Haga Norra contributed positively and the gross profit increased to SEK 662m (644). Net operating income decreased somewhat and interest expenses were slightly lower. The surplus ratio was in line with our expectations. Generally, a stable result in a continued weak market with a focus on letting and the daily grind of managing our properties.

#### Macro

Fabege's home market Stockholm is Sweden's growth engine with a high share of knowledge-intensive companies and a strong labour market in the service sector, tech, life science and finance, which are industries with a high proportion of office-related professions. The assessment is that employment in office-related professions in Stockholm is expected to be relatively stable or to increase slightly during 2026–2027, which could increase demand for offices. I hope that in a few years when we look in the rearview mirror, we will see that this was the quarter when the economy bottomed out.

Right now, however, I can state that uncertainty remains high. When I wrote in the 2024 Annual Report that there were still many uncertainties about the state the world, but that compared to the beginning of 2024, we know a little more about what applies because many elections are over. I could not have been more wrong. If anything, geopolitical uncertainty has actually increased further during the spring. For example, the uncertainty surrounding tariffs and the various wars is making it difficult for companies to plan their operations and investments. Private individuals

are also becoming uncertain and cautious. This also makes it difficult to predict the economic cycle. However, the Swedish economy is expected to gradually recover during the remainder of 2025 and 2026. GDP growth is expected to be around 1.5–2.0 per cent per year during 2025–2026. The Riksbank's interest rate cut in June was positive and another cut in the second half of the year cannot be ruled out. The foreign exchange market has been turbulent and the krona has strengthened by almost 20 per cent during the year.

#### Market

During the second quarter, we noted increased activity in the number of inquiries and viewings, which bodes well for the second half of the year and 2026. We also see that sustainability is continuing to become even more important for both larger and smaller tenants. Customers are increasingly demanding premises in environmentally-certified buildings that support their own sustainability goals. Buildings with low energy consumption, a good indoor environment and social qualities are prioritised during searches.

Despite the slightly positive signals, it can still be said that Stockholm's office market has two tiers and remains weak compared to a few years ago. Premium offices in central locations are withstanding the pressure, while peripheral and older properties face greater challenges in terms of both vacancies and rents. In central locations, rents have been stable or rising slightly. Prime rents in the CBD are continuing to reach well above SEK 10,000 per sqm. We see that there is a willingness to pay for modern, certified offices with good communications and high technical standards. The letting work continues to take a long time and customers are cautious about taking decisions. However, during the second quarter, activity in terms of inquiries and viewings has increased, which bodes well for the second half of the year.

Our occupancy rate was unchanged at 87 per cent during the quarter. The change since year-end was largely attributable to relocations as a result of the previous year's terminations. Net lettings turned downwards again in the guarter, SEK -12m, and during the entire period were slightly negative, SEK -6m. However, there was relatively low activity both in the number of newly signed leases and in the number terminated. It was positive that we signed a lease at a good level with Granitor for premises at Stjärntorget 1 in Arenastaden (Telia's former office space).

Renegotiated leases during the period amounted to SEK 103m with a decrease of 3.1 per cent. Still a relatively small volume. However, the trend is that we are extending the majority of leases on unchanged terms. In the entire portfolio, our rent levels are in line with current market rents. Generally, I do not see any major upside or downside in the leases

#### Projects

We have started two new projects during the quarter. The Wenner-Gren Center is an iconic building on the border between Stockholm inner city and Solna that was opened in 1962. Now we are replacing the facade and upgrading the technical standard. Several of the customers that moved out during the renovation have already signed new leases to move back in 2026.

In Arenastaden, we have started dismantling the properties Farao 15 and Kairo 1 and have initiated an investment in infrastructure along the railway. In total, this creates the potential for more than 70,000 sqm of offices and about 700 new homes in the district. Provided we sign agreements, occupation can occur during 2028, which is being made possible by the investments we have now initiated.

The most fun part of the quarter was handing over the keys to Alfa Laval in Flemingsberg. We are also starting to get closer to occupation for SAAB in Solna Strand.

#### Valuations and financing

About 40 per cent of the portfolio was independently valued during the quarter, which resulted in a minor impairment of SEK -85m. The yield largely moved sideways and came in at 4.56 per cent, up 1 point from

the first quarter. I expect that the yield will remain at around these levels during the rest of the year. The main factors affecting valuations in the first half of the year were expectations of longer vacancy periods and slightly lower rent levels. In the building rights portfolio, we have assumed that the implementation period will be pushed back. The transaction market for offices is selective. Good properties in good locations find good buyers at good prices, whereas it is more difficult to sell inferior properties in less attractive locations. The transactions that have been completed have confirmed our valuations. In other segments, e.g. logistics and light industry the level of activity remains high. In summary, it can be said that there are more potential buyers out there and that modern properties in good locations are attractive investment objects.

cent. Today it has fallen to 2.89 percent, and I expect that we can maintain a level below 3 per cent for the rest of the year. We are refinancing maturities on an ongoing basis both in banks and in the capital market. Our financing feels secure and our balance sheet remains strong.

#### Summarv

The second augrter of 2025 is characterised somewhat by the rhetorical question "is the glass half empty or half full"? The question is whether we have reached the bottom of the economic cycle and whether we will see a gradual improvement in the second half of the year and beyond?

There are good arguments on both sides. However, for us, it is a matter of focusing on the day-to-day, taking care of our customers and properties and working actively and even more proactively with lettings. We believe in the office and in the importance of offices for the wellbeing and development of companies and individuals. We believe in our position in Stockholm and our areas, with our existing portfolio, good communications and good development and One year ago, the average interest rate was 3.17 per project opportunities. We are well-equipped to seize, and actively create, new opportunities.

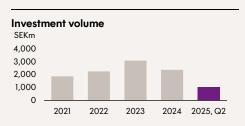

Finally, I would also like to mention that we have donated 1,600 windows to Ukraine. The windows come from the Kairo/Farao project and are a collaboration between us and the Swedish Civil Contingencies Agency (MSB). Being able to make a concrete contribution to the reconstruction of Ukraine feels meaninaful.

I wish all customers, partners, shareholders and employees a happy summer and a good second half of the year.

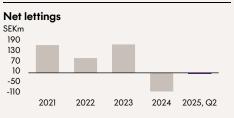

Stefan Dahlbo

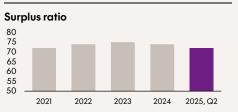

In May, Alfa Laval's approximately 700 employees moved into their new office and innovation centre in the Separatorn 1 building. The property is approximately 24,000 sam and has BREEAM-SE Excellent

2022 2023 2024 2025, Q2 2021

Target: 95% by 2030 Cumulative outcome Q2 2025: 87%

### Earnings Jan–Jun 2025<sup>1</sup>

Earnings after tax for the period amounted to SEK -267m (-682), corresponding to earnings per share of SEK -0.85 (-2.17). Earnings before tax amounted to SEK -383m (-769). Net operating income declined slightly, while residential development made a positive contribution. Interest expenses were slightly lower than last year. Unrealised changes in the value of the property portfolio were negative during the period.

#### Rental income and net operating income

Rental income amounted to SEK 1,717m (1,731) and net operating income to SEK 1,233m (1,269). In a like-for-like portfolio, income decreased by SEK 53m, corresponding to approximately -3 per cent (8), which was mainly attributable to vacancies as a result of the previous year's negative net lettings. This was partly offset by the net effect of increased income related to occupancy of completed project properties and reduced income resulting from the sale of properties. Property expenses amounted to SEK -484m (-462). The amount included nonrecurring costs of SEK -7m. Furthermore, the new property tax assessment meant that property tax increased by roughly SEK 13m. Net operating income in a like-for-like portfolio decreased by 5.7 per cent (increase 8 per cent). The surplus ratio was 72 per cent (73).

#### Profit from residential development

Income recognition takes place on project completion. No revenue was recognised in the first quarter. The second quarter saw completion of the first phase of Haga Norra, comprising 23 apartments, resulting in residential development revenue of SEK 128m (142). Costs relating to residential development amounted to SEK -105m (-147). Gross earnings totalled SEK 23m (-5).

#### Central administration

Central administration costs amounted to SEK -59m (-60). The amount includes variable remuneration paid for the previous year.

#### Net financial items

Net interest items amounted to SEK -482m (-486). The average interest rate at 30 June 2025 was 2.89 per cent (2.98). Higher debt was offset by lower average interest rates during the period. Ground rent amounted to SEK -21m (-21).

#### Share in profit/loss of associated companies

The share in profit of associated companies amounted to SEK -37m (-38), of which SEK -38m (-49) related to Arenabolaget. The share of the profits from Urban Services and part-owned projects at Birger Bostad amounted to small sums.

#### Changes in the value of properties

The property portfolio is valued using a wellestablished process. The entire property portfolio is independently valued at least once a year. Due to the market situation, a larger proportion has been independently valued each quarter for the last few years. Approximately 40 per cent of the portfolio was valued independently in the second quarter of 2025, while the remaining properties were valued internally based on the most recent independent valuations. The total market value at the end of the period was SEK 78.3bn (78.9). Unrealised changes in value totalled SEK -650m (-1,461). The average yield requirement was 4.56 per cent (4.54). In the first quarter, the negative changes in value of SEK -565m were mainly due to the valuers assuming longer vacancy periods and slightly lower rent levels, mainly in Solna, while in Flemingsberg we assumed a longer implementation period for future project opportunities and have therefore written down the values of the older properties including existing development rights. In the second quarter, changes in value totalled SEK -85m; a net figure of slight value adjustments up and down to individual properties.

Impairment of developable properties amounted to SEK -21m (0) and was attributable to future project opportunities within Birger Bostad.

The sale and vacating of Ynglingen 10 resulted in a realised change in value of SEK -37m attributable to deductions for deferred tax.

#### Changes in value, derivatives

The surplus value of the derivatives portfolio decreased during the period by SEK -329m (increase 29).

#### **Financial targets**

Fabege's Board of Directors has adopted the following financial targets:

- Loan-to-value ratio of max. 50 per cent.
- Interest coverage ratio of at least 2.2x.
- Debt ratio of max. 13.0x.
- Equity/assets ratio of 35 per cent min.

#### Outcome 2025-06-30

- Loan-to-value ratio of 43 per cent
- Interest coverage ratio of 2.4x
- Debt ratio of 14.1x
- Equity/assets ratio of 45 per cent

#### Tax

The tax expense for the period totalled SEK 116m (87) and related to deferred tax. Tax was calculated at a rate of 20.6 per cent on taxable earnings. The sale of Ynglingen 10 resulted in a reversal of deferred tax of SEK 128m. The interest deduction limitations are not expected to have a material effect on taxes paid over the next few years.

#### Segment reporting

The Property Management segment generated net operating income of SEK 1,162m (1,218), representing a surplus ratio of 74 per cent (76). The occupancy rate was 87 per cent (90). Profit from property management amounted to SEK 653m (718). Unrealised changes in the value of properties amounted to SEK -601m (-1,124).

The Property Development segment generated net operating income of SEK 57m (65), resulting in a surplus ratio of 55 per cent (52). Profit from property management amounted to SEK 25m (15). Unrealised changes in the value of properties amounted to SEK -62m (-400).

The Projects segment reported unrealised changes in value of SEK 13m (78). Project gains were offset to some extent by impairment due to increased yield requirements when assessing the final value of the project properties and impairment of the value of development rights.

The Residential segment generated gross earnings of SEK 29m (-2). Profit from property management amounted to SEK 27m (-6).

Impairment of devlopable properties amounted to SEK -21m (0). Unrealised changes in value totalled SEK 0m (-15). Further information about the breakdown by segment is provided in the segment report on page 12.

#### Goodwill

Recognised goodwill of SEK 205m (205) is entirely attributable to the acquisition of Birger Bostad AB.

#### Properties

Recognised property value relates to Fabege's investment property portfolio, including project and land properties. At the end of the quarter, the property value totalled SEK 78.3bn (78.9).

#### **Developable properties**

This refers to ongoing in-house projects and developable properties for future production within Birger Bostad. The value at the end of the quarter totalled SEK 935m (754), SEK 729m (550) of which relates to ongoing construction and SEK 206m (204) to developable properties for future development.

#### Financial position and net asset value

Shareholders' equity amounted to SEK 37,548m (38,445) at the end of the period, and the equity/assets ratio was 45 per cent (46). Equity per share attributable to parent company shareholders amounted to SEK 119 (122). EPRA NRV amounted to SEK 147 per share (148).

#### Cash flow

Cash flow from operating activities before changes in working capital amounted to SEK 673m (660). Changes in working capital had an impact on cash flow of SEK -93m (179). Investing activities had an impact of SEK -126m (-1,317) on cash flow, while cash flow from financing activities amounted to SEK -496m (403). In investing activities, cash flow is driven by property transactions and projects. During the period, investments in new construction and refurbishment totalled SEK -1,018m (-1,251), of which SEK 960m related to the sale and vacating of Ynglingen 10. Cash and cash equivalents declined by a total of SEK -42m (-75) during the period.

## Financing

Fabege's goal is to be an attractive borrower, with the aim of supporting Fabege's long-term strategic development. Financing is mainly provided through long-term credit lines with fixed conditions and the lenders are mainly major Nordic banks and capital market investors.

#### Our sources of financina

Fabege strives to achieve a balance between different forms of financing on both the capital and banking markets, with long-term relationships with major financial backers having a high priority. Fabege's bank facilities are complemented by an MTN programme of SEK 18bn, a commercial paper programme of SEK 5bn and the possibility of borrowing a maximum of SEK 6bn via SFF's secured MTN programme. In early June, a new green framework was launched to help develop sustainability work across the organisation.

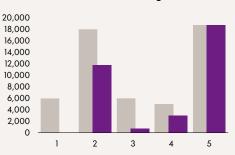

#### Developments during the period

Continued weak economic growth and subdued inflationary pressures prompted the Riksbank to cut the policy rate further in June, resulting in lower short-term market rates. Longer-term market rates also declined slightly having seen a sharp rise in the first quarter of the year. With increased global unrest, conflicts in the Middle East and an unpredictable US tariff policy, growth looks set to remain sluggish. The market believes that this is

likely to continue to push short-term rates down but lona-term rates up.

Despite international developments, both the banking and capital markets have functioned well, contributing to continued good access to capital. During the period, Fabege refinanced bank debt of SEK 1.5bn, issued bonds totalling SEK 1.1bn and simultaneously repaid SEK 0.9bn and reduced outstanding commercial paper by SEK 0.2bn. Overall, the total loan volume amounted to SEK 34.2bn, of which SEK 15.5bn was via the capital market and SEK 18.7bn was via the banking market. The average interest rate remained relatively stable during the period, amounting to 2.89 per cent at the end of the quarter.

<sup>2</sup> The fixed interest rate period adjusted by the estimated maturity of callable swaps amounted to 2.4 years (2.6)

#### Financing, 30/06/2025

Committed lines of credit and undrawn credit facilities, including the backup facility for the commercial paper programme, amounted to SEK 6.0bn at the end of the quarter.

The capital commitment period was 3.2 years (3.5) and the fixed-rate period was 1.5 years (1.8). The part of the swap portfolio that contributes directly to fixed rates, i.e. the part consisting of traditional interest rate swaps, totalled SEK 14.4bn at the end of the period. These swaps mature in 2032 and carry fixed annual interest of between 0.11 and 2.18 per cent. The closable swaps, which are mainly aimed at improving cash flow, totalled SEK 7.0bn.

The fixed-rate period would be adjusted upwards to 2.4 years (2.6) if the estimated maturity of the closable swaps was included.

Net financial items included other financial expenses of SEK 15m (20), which mainly related to

Interest maturity structure, 2025-06-30

accrued opening charges for credit agreements and costs relating to bond and commercial paper programmes. During the period, interest totalling SEK 35m (47) relating to project properties was capitalised.

#### Green financing

99 per cent of Fabege's loan portfolio is classed as being green. Green financing offers Fabege better terms and access to more financing alternatives. Fabege's green financing framework was updated in June 2025. The framework has been designed to give Fabege broad opportunities for green financing and is based on third party-certified properties and ambitious energy consumption targets. It is based on the green bond principles, adapted to the EU Taxonomy and linked to Fabege's ambition to contribute to the goals of Agenda 2030. S&P has issued a second opinion with a medium green rating regarding the green terms and conditions. Find out more about Fabege's green financing at www.fabege.se/en/investors/financing/greenfinancing/, where you will also find the investor reports.

### Operations Jan–Jun 2025<sup>1</sup>

#### Property portfolio and property management

Fabege's property management and urban and property development activities are concentrated on a few selected submarkets in and around Stockholm: Stockholm city centre, Solna, Hammarby Sjöstad and Flemingsberg. On 30 June 2025, Fabege owned 99 properties with a combined rental value of SEK 4.1bn, lettable floor space of 1.3m sqm and a carrying amount of SEK 78.3bn, of which development and project properties accounted for SEK 11.2bn.

#### Occupancy rate

The investment property portfolio's financial occupancy rate was 87 per cent (88) at the end of the period. The change was largely attributable to previously announced vacating of the Barnhusväderkvarn and Ormträsket properties. Other significant vacancies mainly relate to three properties in Solna Business Park and vacancies in Arenastaden due to ICA and Telia vacating part of the space. The former project properties Ackordet 1 and Påsen 1, which have been transferred to property management, are included to the extent that the space is ready to let.

The financial occupancy rate for development properties is not measured, as most of these properties are vacant, or have been partially let on short-term leases pending demolition or redevelopment. These cover an area of 137,000 sqm, of which 119,000 sqm are being let for a current annual rent of SEK 209m. The project portfolio's occupancy rate was 92 per cent (85) at the end of the quarter.

#### Net lettings

During the period, 93 (60) new leases were signed with a combined rental value of SEK 124m (83), with 100 per cent (94) of the space being connected to green leases. Lease terminations amounted to SEK -130m (-157). Net lettings amounted to SEK -6m (-74). Leases worth SEK 161m (145) were extended on unchanged terms. Leases totalling SEK 103m (59) were renegotiated, with an average decline in rental value of -3.1 per cent (-2.3). The retention rate during the period was 74 per cent (58).

#### Changes in the property portfolio

During the first quarter, the Ynglingen 10 property was sold and vacated. The purchase price was SEK 960m before deduction of deferred tax.

#### Projects and investments

The aim of Fabege's project investments in the investment property portfolio is to reduce vacancy rates and increase rents in the property portfolio, thereby improving cash flows and values. Investments in existing properties and projects during the period totalled SEK 1,044m (1,299), of which SEK 636m (922) related to investments in project and development properties. Capital invested in the investment property portfolio amounted to SEK 408m (377), a significant proportion of which related to tenant customisations.

#### Completed projects

The project relating to Separatorn 1, Flemingsberg, was completed, and Alfa Laval took possession of its premises as planned on 30 April. The loan-tovalue ratio at the end of the quarter was 97 per cent. Furthermore, the projects in Påsen 1 (Hammarby Sjöstad) and Ackordet 1 (Haga Norra) have been completed. The occupancy rates in both properties were 86 per cent and 71 per cent respectively. Additional rental value relating to unoccupied premises and remaining vacancies amounted to SEK 44m, and remaining investments are estimated to amount to approximately SEK 300m.

#### Major ongoing projects

The redevelopment of Nöten 4, Solna Strand, is proceeding according to plan. The entire property i leased by Saab, which will take possession of parts of the premises on 1 September and the rest of the property on 1 November 2025. The estimated investment totals just under SEK 1.2bn. The property is being certified to BREEAM In-Use standard, Outstanding.

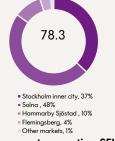

The investment to replace the facade and upgrade technical installations at Ormträsket 10 (Wenner-Gren Center) is ongoing. The high-rise section was vacated in the spring and work on the facade has been initiated. The investment is estimated at around SEK 0.5bn and works are expected to be completed during the first quarter 2027. the complexity of the project entails a certain uncertainty regarding both the schedule and investment volume. Several of the tenants that temporarily vacated the property have signed leases to move back in. The occupancy rate for the high-rise section was 36 per cent at the end of the quarter. When fully let, both project properties will provide an additional annual rental value of SEK 208m.

#### Preparatory development of western Arenastaden

In November 2023, the local development plan for the Farao 15, 16, 17 and Kairo 1 properties in Arenastaden was granted legal approval. The upcoming project includes a commercial development right of 77,000 sqm and a residential development right of 15,000 sqm, as well as the creation of a new road running alongside the railway. The project has started with the dismantling of the existing buildings. The investment relating to the dismantling of the existing buildings and the realignment of infrastructure is estimated at SEK 245m and is a prerequisite for the future development of the buildings along Dalvägen.

The comparison figures for income and expense items relate to values for the Jan–Jun 2024 period and for balance sheet items at 31 December 2024.

#### **Birger Bostad**

Birger Bostad's project portfolio comprises 15 projects, four of which (all the phases in Haga Norra) are currently in ongoing production. The estimated investment volume in ongoing projects amounts to just short of SEK 800m, excluding land acquisitions. The project in Haga Norra comprises a total of 288 apartments, of which 78 are rental apartments. The construction is proceeding according to schedule. The first phase, Brf Alma with 23 apartments, was completed and finalised in the second quarter. The rental and owner-occupied parts will be completed from the second half of 2025. Brf Mathilda and Brf Ingetora will be completed in 2026. Of Brf Alma's 23 apartments, 20 have been sold and occupied. In addition, 57 apartments in Haga Norra's future phases have been reserved via booking agreements.

<sup>1</sup> Operational occupancy rate at 30 Jun 2025.

<sup>2</sup> Rental value including additions. The annual rent for the largest projects in progress could increase to SEK 208m (fully let) from SEK 0m in annualised current rent at 30 Jun 2025.

#### Changes in ongoing projects

During the second quarter, the Ackordet 1, Påsen 1 and Separatorn 1 projects were finalised. The properties were then transferred from the Projects segment to Property Management. Additional projects include the redevelopment of part of Ormträsket 10 and the dismantling and infrastructure project at the Kairo/Farao properties in Arenastaden.

Other	20,000	100	1,500	Other	-	-	-
Total	701,000	45	6,800	Total	523,400	37	7,600

Areas and carrying amount relate to additional development rights space. Development will in some cases require the demolition of existing areas, which will impact project calculations. The volumes are not maximised. The ongoing planning work aims to increase the volume of future development rights. All agreed land allocations have been included. The carrying amount also includes future, unpaid purchase prices for agreed land allocations. Development right changes during the period

As a land allocation agreement with Solna has expired, previously included development rights along the Mälarbanan rail line have been excluded. Furthermore, development rights in Flemingsberg have been redistributed between residential and commercial usage, in accordance with the current local development plan.

#### Breakdown of segments

The segments are presented using the

- management's perspective, broken down into:
   Property Management properties under ongoing, long-term management.
- Property Development properties awaiting a redevelopment or extension that will have a significant impact on ongoing property management and net operating income.
- Projects land and properties undergoing new construction/complete redevelopment.
- Residential development and management of housing. Run by Birger Bostad.

#### Changes during the period

The Bocken 47 property, which has been vacated and is being prepared for a renovation project, was transferred in Q1 from the Property Management segment to the Projects segment.

During the second quarter, the Ackordet 1, Påsen 1 and Separatorn 1 projects were finalised. The properties were then transferred from the Projects segment to Property Management. Furthermore, Paradiset 27 was transferred from Property Development to Projects.

### Fabege's sustainability work

Fabege's sustainability strategy shall contribute to the company's attractiveness, create value and ensure long-term competitiveness. This involves responsibly managing and developing sustainable city districts, properties, premises and services, in turn leading to increased growth.

#### Management

Sustainability issues are an integral part of Fabege's business concept, business model and corporate culture. Sustainability data and social aspects play a key role in decision-making at management level. Every year, management establishes policies, sustainability objectives and governing documents. In 2024, the management team and the Board of Directors were involved in the preparation and approval of a double materiality analysis.

#### Material sustainability topics

- Climate change
- Resource usage and the circular economy
- Own workforce
- Workers in the value chain
- Responsible business conduct

#### Our focus areas

City districts

Fabege strives to make the best possible contribution to creating sustainable and appealing cities and urban districts that attract both people and businesses. We aim for our areas to be characterised by a good mix of offices, retail, service and residential units, and good transport links and environmental engagement.

During the quarter, travel surveys were conducted with customers in Solna Business Park and Arenastaden with the aim of obtaining an overview of current conditions for commuting to work. The response data will be compiled over the summer and used to further develop public transport and cycling infrastructure for the neighbourhoods and for Fabege's climate report.

Along Dalvägen in Solna, older buildings are now being dismantled as we make way for the next major investment in Arenastaden, with new offices and housing. The aim is to reuse or recycle at least 80 per cent of the demolition material. We dismantled 1,600 windows in the quarter, to be used for repairs in Ukraine.

#### Properties

The ambition is to create pleasant working environments that encourage customers to want to go to the office. For sustainability key performance indicators, see the table on page 14. Fabege's Science Based Targets initiative (SBTi) target means that Fabege aims to halve its Scope 1 and Scope 2 emissions by 2030 at the latest and measure and reduce its Scope 3 emissions compared with 2018 levels. Fabege's own climate targets go beyond the above-mentioned SBTi targets. Fabege aims to achieve climate-neutral property management by 2030, with a halving of Scope 3 per GFA and a reduction in Scopes 1 and 2 of at least 90 per cent.

During the quarter, Fabege operated according to the following environmental objectives:

- <70 kWh/sqm Atemp in energy use per year</p>
- 100% renewable energy
- 100% environmental certification of investment properties and new builds
- 20% circularity index for renovations
- 35% lower CO2 footprint for new builds compared with 2018 level (Scope 3)

#### Employees

Having a committed and motivated workforce is a key success factor, and Fabege wants to be an attractive place to work. Organisations with a strong identity often perform better than others. The working environment must be safe and free from the risk of Fabege employees, or those working at Fabege, being injured or falling ill at work. All our employees have undergone basic health and safety training, and new staff are offered the same opportunity.

During the quarter, training in Fabege's Code of Conduct was initiated for employees in all market areas. The training is compulsory and will continue in the autumn. It is also based on other policy documents within the area of HR, such as the gender equality and health and safety policies.

#### Supply chain

A sustainable supply chain is essential for creating long-term profitability, reducing our risks and boosting Fabege's brand. Fabege endeavours to operate according to the principles of responsible business conduct, safeguard human rights at all levels and reduce its climate footprint. Fabege supports several international guidelines, such as the UN's fundamental human rights conventions, the ILO's fundamental principles and rights at work, and the UN Global Compact's ten principles. Fabege's Code of Conduct for framework agreement suppliers includes these guidelines and they must be complied with in all areas.

#### Targets for 2030

- Climate-neutral property management.
- Halving of the climate impact of project development per GFA.

#### Average energy use in 2024

#### Fabege's highest result ever in GRESB 2024

With a rating of 95 in the assessment relating to property management and 98 in project development, Fabege received the highest rating, 5 stars, and is ranked number 1 in offices, listed companies in Northern Europe and number 2 in the categories offices in Europe and listed companies in Europe.

#### Science Based Targets

Our ambitious climate target has been SBTiapproved since 2020.

Several renegotiations are currently underway in our procurement operations. During the quarter, 26 new framework agreement suppliers underwent a sustainability inspection.

#### Financina

Fabage's green financing is a natural extension of the sustainability efforts that are conducted throughout the organisation. All Fabege's capital providers, including banks and capital markets, offer green financing of environmentally-certified properties. Since November 2023, Fabege has been listed as a green share, known as Green Equity Designation. Fabege has taken into account the EU Taxonomy and mapped the applicable categories to the EU environmental objectives and to economic activities. Fabege endeavours to align the qualifying green assets with the EU Taxonomy to the best of its

ability, including the 'do no significant harm' criteria (DNSH) and minimum safeguards.

#### Customers

Customers are at the centre of Fabege's work. Good relationships and cooperation with customers are prerequisites for enabling Fabege to create sustainable offices, services and urban environments. Continuous dialogues with Fabege's 700 customers ensure long-term cooperation in and around our properties.

The basis for the strategic sustainability work with customers is the green leases. Fabege has also drawn up a guide to climate-efficient tenant customisations, which customers can take into account to increase the sustainability performance of their premises and contribute to the property's environmental certification.

#### **Certified properties\***

System	Quantity	Sqm, GLA	Percentage of certified area, %
BREEAM In-Use	46	720,989	67%
BREEAM-SE**	15	351,669	32%
Miljöbyggnad	1	5,593	1%
Total certified properties	62	1,078,251	100%

\* The properties for which certification has not yet begun include land and development properties for future project development.

\*\* BREEAM-SE now also includes the properties certified according to BREEAM Bespoke, as BREEAM Bespoke is a customised manual based on BREEAM-SE.

Sustainability performance measures	2025, Q2	2024	2023	Target
Energy performance, KWh/sqm Atemp*	35	70	71	Max. 70 kWh/sqm*
Proportion of renewable energy, %	90	90	90	100
Environmental certification, number of properties**	62	62	63	-
Environmental certification, % of total area	86	82	82	100
Green leases, % of newly signed space	100	98	96	100

Satisfied employees, confidence rating, %	n/a	88	88	2024 >88
GRESB, points	n/a	95	93	>9]

Atemp is the total internal area for each floor, loft and basement that is heated to more than 10°C. Areas occupied by internal walls, openings for stairs, shafts and the like are included. The area of a garage, within the building, in a residential building or a commercial building other than a garage, is not included

\*\* The properties for which certification has not yet begun include land and development properties for future project development.

#### **Business** ethics

Good business ethics, continuous dialogue and responsiveness are fundamental to Fabege's relationships with its employees and customers, as well as suppliers and lenders. Fabege applies commonly accepted good business practice and international human rights, labour and environmental standards in accordance with the Global Compact and the ILO's fundamental conventions on human rights at work. The Code of Conduct forms the basis for the conduct of all emplovees.

The Code of Conduct has been updated and adopted by the Board. In the second quarter, training was initiated for all employees in the Code of Conduct, with a target of 100 per cent by the end of the financial year.

#### About the Sustainability Report

The quarterly report is not prepared according to the same guidelines as Fabege's annual sustainability report and therefore does not address certain issues.

An overall picture of the company's sustainability work is published once a year in the Sustainability Report; find out more at https://www.fabeae.se/en/sustainability.

#### **EU Taxonomy**

Fabege is subject to the EU's Non-Financial Reporting Directive. Reporting of the extent to which the Group's activities are eligible for, and aligned with, the EU Taxonomy can be found in Note 1 EU Taxonomy, page 29.

The full tables in accordance with EU Taxonomy objective 1, including DNSH criteria and minimum safeguards, are presented in the 2024 Annual Report.

#### Small Cap 30 ESG Responsible Index

Fabege is included in the OMX Sweden Small Cap 30 ESG Responsible Index (OMXSS30ESGGI) on Nasdaa Stockholm, which highlights companies on the Swedish stock market that show leadership in environmental, social and governance (ESG) issues.

#### Examples of social sustainability initiatives

- Collaboration in Huddinge/BID Flemingsberg
- TalangAkademin
- The L\u00e4xhj\u00e4lpen foundation
- Young Opera/Young Dramatic Theatre
- Flemingsberg Science
- Innovation Station
- Stockholm Talent
- Pep Parks
- Street Gallery
- Support for Stockholm City Mission

### Other financial information

#### Sensitivity analysis – property values

	Impact on earnings	Equity/assets	Loan-to-value
Change in value, %	after tax, SEKm	ratio, %	ratio, %
+]	622	45.2%	43.5%
0	0	44.9%	43.7%
-1	-622	44.6%	43.9%

Earnings and key performance indicators are affected by realised and unrealised changes in the value of properties. The table shows the effect of a 1 percentage-point change in value after deferred tax deduction.

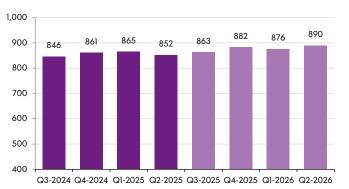

#### Sensitivity analysis - cash flow and earnings

	Change	Effect, SEKm
Rental income, total	1%	34.1
Rent level, commercial income	1%	33.4
Financial occupancy rate	l percentage point	36.8
Property expenses	1%	-9.1
Interest expenses, LTM	±1 percentage point	-96 / + 153

The sensitivity analysis shows the effects on the Group's cash flow and earnings, on an annualised basis, after taking into account the full effect of each parameter.

#### Rental income - trend for the next four quarters

SEKm

The chart above shows the trend in contracted rental income, including announced occupancies and vacancies and renegotiations, but excluding letting targets. The chart is not a forecast, but instead aims to illustrate the rental trend for the existing lease portfolio on the balance sheet date.

#### Human resources

At the end of the period, 224 people (225) were employed by the Group.

#### **Parent Company**

Revenue during the period amounted to SEK 202m (209) and earnings before appropriations and tax totalled SEK 569m (1,569). Net financial items include dividends from subsidiaries of SEK 1,005m (1,750). Net investments in property, equipment and shares totalled SEK 0.5m (1).

#### Events after the balance sheet date

There are no events to report after the balance sheet date.

#### Rental value per category

#### Lease maturity structure

#### Opportunities and risks

Risks and uncertainties relating to cash flow from operations relate primarily to changes in rents, vacancies and interest rates. Risks and opportunities in the Parent Company are linked to the ownership of subsidiaries. The effect of the changes on consolidated profit, including a sensitivity analysis, and a more detailed description of risks and opportunities, are presented in the section on Risks and opportunities in the 2024 Annual Report (pages 56–65).

Properties are recognised at fair value and changes in value are recognised in profit or loss. The effects of changes in value on consolidated profit, the equity/assets ratio and the loan-to-value ratio are also presented in the section on Risks and opportunities and the sensitivity analysis in the 2024 Annual Report. Financial risk, defined as the risk of insufficient access to long-term funding via loans, and Fabege's management of this risk, are also described in the Risks and opportunities section of the 2024 Annual Report (pages 56–65).

Fabege's aims for its capital structure are to have an equity/assets ratio of at least 35 per cent and an interest coverage ratio of at least 2.2x. The target for the loan-to-value ratio is a maximum of 50 per cent. The long-term debt ratio shall amount to a maximum of 13x.

No material changes in the company's assessment of risks have arisen, aside from the above, since the publication of the 2024 Annual Report.

#### **Seasonal variations**

Expenses for the running and maintenance of properties are subject to seasonal variations. For example, cold and snowy winters give rise to higher costs for heating and snow clearance, while hot summers result in higher cooling costs. Activity in the rental market is seasonal. Normally, more business transactions are completed in the second and fourth quarters, which means that net lettings in these quarters are often higher.

#### Market outlook

The office rental market in Stockholm weakened last year. Global concerns and a weaker economy have given rise to increased uncertainty in the rental market. Letting processes are taking longer, as companies consider their options. We note that activity in the rental market in Stockholm has been more cautious, but rent levels generally remain stable. Lettings continue to be agreed at good levels, but indexlinked increases in the last two years have limited future potential for renegotiations. Vacancies have generally increased over the past year. Access to capital market financing improved significantly last year, with continued good access to capital and lower margins. Market interest rates have fallen in line with the Riksbank's cuts in the policy rate, which following the cut in June is now at 2.0 per cent. In its communication, the Riksbank has indicated there may be a further cut in the autumn. Approximately 49 per cent of Fabege's loan portfolio is fixed, which provides good predictability for the next few years. Rising interest rates in recent years impacted yield requirements in property valuations. The Riksbank's cuts in the policy rate led to a reversal of the trend in the second half of 2024.

Yield requirements, which had increased since the second half of 2022, have stabilised and even decreased slightly in the most central parts of Stockholm. Completed transactions in Fabege's submarkets confirm that the decline in values has levelled out and that long-term investors are willing to pay well for quality in Stockholm.

Fabege enjoys a consistently strong financial position. We have created good investment opportunities in our areas via the acquisitions completed in recent years. With the acquisition of Birger Bostad in the autumn of 2021, we took a step towards more comprehensive urban development by also including residential units. Fabege's hallmark is stability – we have a portfolio of modern properties in attractive locations, stable customers and committed employees. We are well prepared to take on the challenges and opportunities open to us on the market over the coming year.

#### Accounting policies

This Interim Report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act.

Disclosures in accordance with IAS 34.16A Interim Financial Reporting are submitted both in the notes and in other sections of the Interim Report.

The Group has applied the same accounting policies and valuation methods as in the most recent annual report.

New or revised IFRS accounting standards or other IFRIC interpretations that came into effect after 1 January 2025 have not had any material impact on the consolidated financial statements. The Parent Company prepares its financial statements in accordance with RFR 2 Accounting for Legal Entities and the Swedish Annual Accounts Act, and has applied the same accounting policies and valuation methods as in the most recent annual report.

Stockholm, 7 July 2025

Stefan Dahlbo, CEO

This Interim Report has not been reviewed by the company's auditors.

#### Signing of the report

The Board of Directors and Chief Executive Officer hereby certify that this half-year report provides a true and fair overview of the development of the Parent Company and Group's operations, position and earnings and describes significant risks and uncertainties faced by the company and Group companies.

Stockholm, 7 July 2025

Jan Litborn Chairman of the Board Anette Asklin Board Member Tomas Eriksson Board Member Mattias Johansson Board Member

Lennart Mauritzson Board Member Bent Oustad Board Member Sofia Watt Board Member

### Share information

#### Shareholders\*

Fabege had a total of 43,633 known shareholders at 31 May 2025, including 59.5 per cent Swedish ownership. The 12 largest shareholders control 57.1 per cent of the capital and 60 per cent of the votes.

#### Dividend 2024

The Annual General Meeting decided on a dividend of SEK 2.00 (1.80) per share, to be paid quarterly at SEK 0.50 per share.

#### **Dividend policy**

Fabege aims to pay a dividend to its shareholders comprising the part of the company's profit that is not required for consolidation or development of the business. Under current market conditions, this means that the dividend is expected to amount to, on an long-term basis, at least 50 per cent of the profit from ongoing property management and the gains realised on the sale of properties after tax.

#### Acquisition and transfer of treasury shares\*

The 2025 AGM passed a resolution authorising the Board, for the period until the next AGM, to acquire and transfer shares in the company. Share buybacks are subject to a limit of 10 per cent of the total number of shares outstanding at any time. The company held 16,206,048 treasury shares on 30 June 2025. Repurchases have been made at an average price of SEK 120.23 per share. The holding represents 4.9 per cent of the total number of registered shares. There were no repurchases during the period.

#### Green Equity Designation

Fabege's share is green according to the Nasdaq Green Equity Designation. The criteria are that at least 50 per cent of turnover and 50 per cent of investments must be considered to be green, and less than 5 per cent of turnover linked to fossil fuels.

### Notes

#### Note 1 EU Taxonomy

		Activities eligible for the		Activities not eligible for
Key ratios	Total, SEKm	taxonomy, %	Omfattas ej av taxonimin, %	the taxonomy, %
Revenue	1,717	100		71
Operating expendit	68	100		58
Capital expenditure	1,044	100		71

#### Percentage of activities eligible for the taxonomy

Fabege owns and manages properties, with a primary focus on commercial properties in the Stockholm area. The vast majority of the property portfolio falls within the scope of the taxonomy and the economic activities applied are

CCM 7.1 Construction of new buildings CCM 7.7 Acquisition and ownership of buildings

The proportion of economic activities that are environmentally sustainable according to the EU Taxonomy Regulation is reported based on three financial indicators: turnover, operating expenditure and capital expenditure.

#### Recognition of turnover:

All turnover relating to the properties included in the economic activities above is recognised. This relates to rental income including customary supplements and the turnover attributable to Birger Bostad's sale of completed homes. No material income that should be excluded has been identified.

Recognition of operating expenditure: Operating expenditure includes property management costs, ongoing repairs, maintenance and expensed tenant customisations. Birger Bostad's production costs for residential development are recorded as operating expenses but are not included here, as they do not fall within the definition of operating expenses according to the taxonomy.

#### Recognition of capital expenditure:

Relates to capital expenditure for acquisitions and capitalised investment expenditure relating to the properties included in the economic activities.

### Percentage of activities aligned with the taxonomy

Fabege contributes significantly to objective 1, i.e. climate change mitigation, including the Do No Significant Harm criteria. The existing properties assessed as being aligned with objective 1 have an EPC-A level energy performance certificate or are in the top 15 per cent in terms of primary energy use in Sweden (in accordance with the definition applied by the Swedish Property Federation for existing buildings). The properties have undergone a climate resilience analysis.

Fabege assesses that 71 per cent of its turnover, 58 per cent of its operating expenditure and 71 per cent of its capital expenditure are aligned with the taxonomy, based on fulfilment of objective 1 (CCM), including the DNSH criteria. The outcome for the primary energy rating is taken from the currentlyvalid energy performance certificate. The reason for the percentage of capital expenditure that is green being reported as low is that Fabege has chosen to make a conservative assessment of ongoing new construction projects and interpret that they are covered by all DNSH requirements in 7.1. The same interpretation has been made regarding the turnover attributable to Birger Bostad's sale of completed homes. These are reported as noncompliant with the taxonomy, as interpretations of the DNSH requirements and documentation of this to demonstrate compliance are not yet fully in place. Fabege's assessment is that, in the long term at least, parts of the capital expenditure and turnover attributable to residential development will be able to be classified as aligned with the taxonomy.

Fabege also meets the taxonomy's requirements for minimum safeguards relating to human rights, anti-corruption, transparency regarding tax burdens and fair competition.

The full tables are only presented annually and can be found on pages 88–92 of Fabege's Annual and Sustainability Report for 2024.

#### Note 2 Fair value of financial instruments

Derivatives are measured continuously at fair value as Level 2 assets in the balance sheet. The derivatives portfolio is measured at the present value of future cash flows. Changes in value are recognised in profit or loss. Changes in value are recognised for accounting purposes and have no impact on cash flow. At maturity, the market value of derivative instruments is always zero. The valuation assumptions have not changed significantly compared with the most recent annual report. For all other financial assets and liabilities, the carrying amount is deemed to be a good approximation of fair value.

#### Note 3 Contingent liabilities

On the balance sheet date, contingent liabilities comprised guarantees and commitments in favour of associated companies of SEK 326m (327), subsidiaries of SEK 4m (6) and other 0 (0).

#### Note 4 Segment reporting

Rental income and property expenses, as well as realised and unrealised changes in the value of properties, are directly attributable to properties in the respective segments (direct income and expenses). If a property changes type during the year, the earnings attributable to that property are allocated to the respective segments based on the period of time for which the property belonged to each segment. Central administration costs and net financial items have been allocated to segments on a standardised basis according to each segment's share of the total property value (indirect income and expenses). Property assets are directly attributed to the respective segments and recognised on the balance sheet date. All revenue and expenses attributable to Birger Bostad's operations are recognised in the Residential segment.

#### Note 5 Transactions with related parties

Backahill AB has a controlling interest in Hansan AB. Consulting services totalling SEK 0.2m (0.2) were procured during the period. During the period, consulting services totalling SEK 0.2m (0.7) were also purchased from Born Advokater, where Fabege's Chairperson Jan Litborn is a partner. Contributions and loans of SEK 38m (26) have been made to Arenabolaget i Solna KB. Nya Svensk Fastighets Finansiering AB (SFF) is a finance company with a covered MTN programme. The company is owned by Catena AB, Diös Fastigheter AB, Fabege AB, Platzer Fastigheter Holding AB and Wihlborgs Fastigheter AB, each owning 20 per cent. The bonds are secured by property mortgage deeds and share pledges. The MTN framework amounts to SEK 12,000m (12,000). As of 31 March 2025, Fabege had outstanding bonds totalling SEK 738m (738). All transactions are conducted based on market terms and conditions.

### This is Fabege

Fabege is one of Sweden's leading property companies. We develop attractive and sustainable city districts, with a primary focus on commercial properties within a limited number of welllocated submarkets in the Stockholm region.

We are one of the largest property owners in Stockholm and have a clear strategy for our property holdings, with a portfolio grouped into clusters. The Group also includes Birger Bostad, which is a property development company focused on residential and public-services property. The large number of residential development rights that we hold means that together we have a great opportunity to create mixed-use developments in our city districts. The concentration of our properties in well-contained clusters ensures greater customer proximity and, when coupled with Fabege's thorough knowledge of the market, creates a solid foundation for efficient property management and high occupancy rates. At the end of the quarter, Fabege owned 99 properties, with a combined rental value of SEK 4.1bn, lettable floor space of 1.3m sqm and a carrying amount of SEK 78.3bn, of which development and project properties accounted for SEK 11.2bn. The value of developable properties in Birger Bostad totalled SEK 935m.

#### **Business concept**

Fabege develops sustainable city districts, with a primary focus on commercial properties within a number of well-located submarkets in the Stockholm region.

Value is created via property management, property development, project development and transactions. We are keen to be a supportive partner that puts people front and centre and enables companies, locations and our city to develop.

#### **Business model**

Fabege is active in three business areas: Property Management, Property Development and Transactions.

#### Strategy for growth

Fabege's strategy is to create value by managing, improving and developing its property portfolio and, through transactions, acquiring and divesting properties with the aim of increasing the property portfolio's potential. Fabege's properties are located in the most liquid market in Sweden. Modern properties in attractive locations and customeroriented operation and management by our own staff ensure low vacancy rates and high costefficiency in the investment portfolio. With concentrated portfolios and a large portfolio of development rights, there is an opportunity for value-creation project development on land owned by the company.

#### Value drivers

Fabege's operations are affected by a number of external factors, such as the pricing of and demand for premises, the transaction market's yield requirements, and changes in market interest rates, which create the conditions for the company's success.

#### The Stockholm market

Stockholm is one of the five metropolitan areas in Western Europe with the highest rate of population growth. The population of Stockholm County is forecast to continue to grow over the next 20 years. However, the growth in the number of people employed in office activities has levelled off and, in general, vacancies have increased over the last two years.

#### Changing demand

New technology and new working methods are fuelling demand for flexible, space-efficient premises in prime locations. Peripheral services and effective communication links in the form of public transport are in increasing demand, as are environmentally-certified offices and green leases.

#### Economic trends

The property market is impacted by trends in both the Swedish and the global economy. Demand for premises is closely linked to GDP growth and companies' need for premises. Changes in market interest rates affect required rates of return.

#### Sustainable urban development

Sustainability issues are becoming increasingly important in terms of both individual properties and entire areas. Interest in environmental considerations relating to the choice of materials and energy-saving measures is on the rise. Demand is increasing for premises in areas with a good mix of offices, retail, service and residential units, and good transport links and environmental engagement.

#### **Business model**

#### Property Management

The essence of Fabege's operations is finding the right premises for a customer's specific requirements and ensuring that the customer is content. This is accomplished through long-term engagement based on close dialogue with the customer, building mutual trust and loyalty.

#### Property Development

High-quality property development is the second key cornerstone of our business. Fabege has long-standing expertise in pursuing extensive property development projects, with the aim of attracting long-term tenants to properties that have not yet been fully developed and can be redesigned based on the customer's specific requirements.

#### Transactions

Property transactions are an integral part of Fabege's business model and make a significant contribution to the company's earnings. The company continuously analyses its property portfolio in order to utilise opportunities to generate capital growth through acquisitions and divestments.

### Definitions<sup>1</sup>

Actual deferred tax - Estimated actual deferred tax has been calculated as approximately 4 per cent based on a 3 per cent discount rate. Furthermore, it has been assumed that loss carryforwards are realised over four years with a nominal tax rate of 20.6 per cent, which results in a net present value for deferred tax assets of 19.7 per cent. The calculation is also based on the property portfolio being realised over 50 years, 10 per cent being sold directly with a nominal tax rate of 20.6 per cent, and the remaining 90 per cent being sold indirectly via companies with a nominal tax rate of 6 per cent, which results in a net present value for deferred tax liabilities of 4 per cent.

**Cash flow from operating activities per share** - Cash flow from operating activities (after changes in working capital) divided by the average number of shares outstanding.

**Debt/equity ratio -** Interest-bearing liabilities divided by shareholders' equity.

**Debt ratio** - Interest-bearing liabilities divided by rolling twelve-month gross earnings less central administration costs.

**Developable properties**<sup>2</sup> - Properties held for the purpose of developing and disposing of housing, including rental and tenant-owner apartments and public-services property.

**Earnings per share** - Parent Company shareholders' share of earnings after tax for the period, divided by the average number of shares outstanding during the period. Definition according to IFRS.

**EPRA EPS** - Profit from property management less tax at the nominal rate attributable to profit from property management, divided by the average number of shares. Taxable profit from property management is defined as the profit from property management less such items as tax-deductible depreciation and amortisation and renovations. **EPRA NDV – NET disposal value** - Equity according to the balance sheet with reversal of goodwill according to the balance sheet. Reversal of approved, unpaid dividends.

**EPRA NDV per share** - EPRA NDV divided by the number of shares at the end of the period.EPRA NTA –

**NET tangible assets** - Shareholders' equity according to the balance sheet following the reversal of fixedincome derivatives, goodwill and deferred tax according to the balance sheet. Adjusted for actual deferred tax instead of nominal deferred tax. Reversal of approved, unpaid dividends.

**EPRA NTA per share** - EPRA NTA divided by the number of shares at the end of the period.

**EPRA NRV – NET reinstatement value**– shareholders' equity according to the balance sheet following the reversal of fixed-income derivatives and deferred tax according to the balance sheet. Reversal of approved, unpaid dividends.

**EPRA NRV per share** - EPRA NRV divided by the number of shares at the end of the period

**EPRA vacancy rate -** Estimated market vacant rents divided by the annual rental value for the entire property portfolio.

**EPRA Rental income change like-for-like portfolio** The difference between rental income like-for-like portfolio in the current period and rental income likefor-like portfolio in the previous period, divided by rental income like-for-like portfolio in the previous period.

**Equity/assets ratio** - Shareholders' equity including non-controlling interests divided by total assets.

**Equity per share** - Parent Company shareholders' share of equity according to the balance sheet, divided by the number of shares outstanding at the end of the period.

**Financial occupancy rate<sup>2</sup>** - Lease value divided by rental value at the end of the period.

Improvement properties\* - Properties for which a redevelopment or extension is in progress or planned that has a significant impact on the property's net operating income. Net operating income is affected by limitations on lettings prior to imminent development work.

Interest coverage ratio - Ratio of gross earnings, including ground rent less central administration costs, to net interest items (interest expenses less interest income).

Land and project properties<sup>2</sup> - Land and developable properties, and properties undergoing new construction/complete redevelopment.

**Lease value<sup>2</sup> -** Stated as an annual value. Indexadjusted basic rent under the rental agreement plus rent supplements.

**Like-for-like portfolio<sup>2</sup>** - The properties not classified as project properties and that are owned by Fabege throughout the financial period and during the corresponding financial period in the previous year.

**Loan-to-value ratio, properties** - Interest-bearing liabilities divided by the carrying amount of the properties at the end of the period.

Management properties - Properties that are being actively managed on an ongoing basis

**Net lettings<sup>2</sup>** - New lettings signed during the period less notices of termination received.

**Return on invested capital in the project portfolio\*** The change in the value of project and development properties, divided by the capital invested (excluding the initial value) in project and development properties during the period.

**Return on equity** - Profit for the period/year divided by the average shareholders' equity including noncontrolling interests. In interim reports, the return is converted into its annualised value without taking seasonal variations into account.

**Return, share** - Dividend for the year divided by the share price at year-end.

**Retention rate<sup>2</sup>** - Proportion of leases that are extended in relation to the proportion of cancellable leases.

**Surplus ratio<sup>2</sup>** - Net operating income divided by rental income.

**Total return on properties** - Net operating income for the period plus unrealised and realised changes in the value of properties, divided by market value at start of period plus investments for the period.

- <sup>1</sup> Fabege presents certain financial performance measures in the Interim Report that are not defined in IFRS. The company believes that these measures, which are more specific to the industry sector, provide valuable supplementary information for investors and the company's management, as they enable an assessment and benchmarking of the company's reporting. Since not all companies calculate financial performance measures in the same way, they are not always comparable with measures used by other companies. These financial performance measures should therefore not be regarded as substitutes for measures defined in IFRS. The key performance indicators are not defined in IFRS, unless otherwise stated.
- <sup>2</sup> This key ratio is operational and is not regarded as an alternative performance measure according to ESMA's guidelines.
