Hexagon strengthens its presence in India

Hexagon announces the inauguration of a new assembly and manufacturing facility in Noida, India. In the following weeks Hexagon will start the delivery of locally assembled coordinate measuring machines to Indian customers. The facility will gradually cover the full range of metrology products including articulated arms.

Hexagon's subsidiary Hexagon Metrology India is a leading supplier of precision metrology products to customers throughout the Indian subcontinent. In addition to locally produced measurement systems, the company supplies other Hexagon coordinate measuring machine brands including Leitz, DEA, Brown & Sharpe and the PC-DMIS software. ROMER portable measuring arms and Leica Geosystems measuring systems, complete the Hexagon product offering to Indian customers.

"The new assembly and manufacturing facility in Noida is Hexagon's latest step in increasing presence, support and supply of local products to our customers on the Indian subcontinent. Through our 19 locations and with more than 130 employees, we are committed to continue providing ever improving high quality products and services in the region", says Ola Rollén, CEO and President of Hexagon AB.
