

## PRESS RELEASE

Halmstad December 7, 2010

### Intellicom Innovation AB receives break through SEK 1.7 m order.

**Intellicom Innovation AB, a company member of the HMS Networks group and a market leader in the area of M2M and Remote Device Management, has received an initial breakthrough order in the telecom industry. The order value amounts to SEK 1.7 m and will be delivered during 2010 and 2011.**

The order is for the delivery of remote monitoring and control solutions in base stations for telecommunication in Turkey. The provided solution is based on standard Netbiter® communication gateways together with the Netbiter Argos server solution which acts as a central portal for management of remote sites, data and software.

The total value of this contract amounts to SEK 1.7 m with an additional annual order value for the Netbiter Argos server license fees. The first part of the project is already being rolled out and the whole project will be delivered and installed by the end of the first quarter 2011.

”We are pleased to see that the Netbiter solution meets the customer’s requirements for monitoring and control of telecom base stations. It is an interesting market segment in which our standard Netbiter solution not only improves efficiency and cut costs in the service organization but also prevents unexpected downtime of the base stations, resulting in an immediate increase of revenues for the telecom operators”, says Henrik Ebeklint, Managing Director Intellicom Innovation AB

**Intellicom Innovation AB**, is one of the leading companies providing solutions in the area of Machine-to-Machine (M2M) communication and remote device management. With customers in more than 50 countries Intellicom has an extensive track record delivering solutions to major customers in the area of Industrial Automation. Netbiter® is a registered trademark of Intellicom Innovation AB. Intellicom Innovation is with a 52% ownership a member of the HMS Group.

**HMS Networks AB (publ)** is a world-leading supplier of communication technology for industrial automation. Sales amounted to SEK 325 million for the last twelve months. Over 90% of these sales were to customers located outside Sweden. All development and the major portion of manufacturing is carried out at the head office in Halmstad. Sales offices are located in Japan, China, Germany, the USA, Italy and France. HMS has 175 employees and produces network interface cards and products to interconnect different networks under the trademark Anybus®. The network interface cards are embedded in automation equipment such as inverter drives, robots, control systems and sensors. This allows subcomponents in machines to communicate with one another and with different networks in order to build more efficient and flexible automation systems with reduced energy consumption. HMS is listed on NASDAQ-OMX Nordic Exchange in Stockholm in the category Small Cap, Information Technology.
