

Year-End Report 2010

Highlights during the fourth quarter

- > The Board of Directors proposes a dividend to shareholders of SEK 5.00 per share (4.00).
- The acquisition of shares in Mölnlycke Health Care was finalized, and the company is now a consolidated operating subsidiary. The reported value of Investor's 96 percent holding is SEK 13.4 bn., including the SEK 2.4 bn. positive revaluation of the existing holding.
- Investor invested SEK 0.5 bn. in 3 million additional shares in Electrolux.
- Investor announced the acquisition of shares in NASDAQ OMX for USD 176 m. After receiving approval on January 17, the 9.7 percent holding (including existing holdings) will be reported within Operating Investments. The holding in the financial investment Elekta was divested for SEK 1.6 bn., generating a capital gain, including dividends, of SEK 1 bn.

Financial information

- Net asset value amounted to SEK 169,947 m. (SEK 224 per share) on December 31, 2010, compared to SEK 142,673 m. (SEK 187 per share) at year-end 2009, corresponding to a change, with dividend added back, of 21 percent for 2010 (26).
- Consolidated net profit for the period, including unrealized change in value, was SEK 30,693 m. (SEK 40.35 per share), compared to SEK 31,368 m. for 2009 (SEK 41.12 per share).
- Core Investments contributed SEK 26,035 m. to growth in net asset value in 2010 (31,851). Atlas Copco had the largest positive impact, SEK 13,774 m., while AstraZeneca had a negative impact, SEK 431 m.
- Operating Investments contributed SEK 3,478 m. to net asset value during 2010 (-1,410).
- Private Equity Investments contributed SEK 1,294 m. to net asset value for the period (664).
- Leverage (net debt/total assets) was 6.3 percent as of December 31, 2010 (0.4).
- The total return on the Investor share was 11 percent during the year (18). The total annual return averaged 4 percent over the past 5-year period.

Platform for value creation

In 2010 our holdings continued to make good progress. We also completed several larger transactions, including the addition of Aleris and Mölnlycke Health Care as operating subsidiaries. Since the start of the economic downturn we have invested SEK 25 bn., and we are now back within our target leverage range of 5-10 percent. Disappointingly, our total return lagged the overall market during 2010 and our discount widened.

As we are in a more "stable" business environment, my macro comments have been limited in the last quarters. Global growth is driven by Asia and Latin America. While Europe and the U.S. are improving, they are still likely to remain relatively slower due to excessive debt levels and unresolved imbalances. Although we are confident in the prospects of sustainable growth, inflation is a wild card in the outlook and could become a pesky problem.

Core Investments in strong positions

During November, we took advantage of an attractive price level in Electrolux by investing close to SEK 0.5 bn., further strengthening our position. Earlier in the year, we invested some SEK 1.2 bn. in Saab AB, Atlas Copco and Husqvarna. Strengthening our ownership in Core Investments is a vital part of our strategy. Larger ownership gives us more of the value created and more leverage as an active owner to impact strategic agendas. In addition, our track-record shows that we can enhance returns by buying when we are not restricted and when we consider valuations attractive from a longer term perspective.

During 2010 our Core Investments have realized benefits from the cost efficiency measures implemented during the trough in 2008/09. But more importantly, several companies have also reaped the benefit of investments during the last several years in strengthening the product offerings, broadening the aftermarket businesses, building brand names, expanding presence in Asia and Latin America, as well as implementing more flexible business models.

During the year, Electrolux has achieved the formerly elusive margin target. Atlas Copco is benefitting from its flexible business model, large aftermarket and strong position in emerging markets. Ericsson has managed to cope with increased competition and is well positioned to benefit from the strong growth in wireless data traffic. Husqvarna is streamlining operations and has started to strengthen its product platform. The combination of the recovery in the Baltics, a strong capital base and well functioning operations gives SEB a good position to grow when credit demand rebounds. ABB has traditionally been late cyclical and we believe it is well positioned to benefit as the catch-up investments return in power equipment. AstraZeneca has built up a very large presence in growth regions, but the key challenge to improve R&D success rate still remains. And finally. Saab AB's order intake has recently rebounded with a number of important deals, which in combination with the ongoing operational efficiency program supports good potential for future development.

An attractive dividend yield is an important part of the total return for us as owners. Among other things it signals an ability to combine growth with a healthy cash flow. When we assess a company's distribution capacity, we want to ensure that the company has sufficient capital to capture the value creating opportunities in its strategic plan. So while a company may look over-capitalize on the surface, it may not cover all aspects of its strategic considerations.

Investment in NASDAQ OMX

Late December we announced an acquisition of shares in NASDAQ OMX. The transaction received clearance on January 17, 2011. We started to acquire shares in early 2010, when we found the valuation compelling. The rationale for merging OMX and NASDAQ in 2007 was a changing regulatory environment that we believed would spur new competitors, leading to price pressure and consequently the need for greater scale. Over the last few years, incumbent exchanges in Europe have lost significant market share, which shouldn't really be a surprise because with 100 percent market share there is only one way to go when the market is deregulated. Price pressure has been severe. The management of NASDAQ OMX has done a good job with the integration and by now we believe that market adjustments are well reflected in its current share price. We believe long term growth prospects are strong. An exchange is at the core of the financial system's infrastructure and we believe that over time more products will be standardized and thus traded on exchanges. It is not unlikely that regulators will push this development as well. We will account for NASDAQ OMX as an Operating Investment and we will be a leading shareholder with board representation.

As shown in the NASDAQ OMX case, we can gradually build a position in a public company when we think it is an attractive long-term investment and we have an opportunity to become a significant shareholder. A similar case was our financial investment in Elekta. It is a great company, but after the sharp appreciation in the stock price since our investment, we decided to realize our gain (including received dividends) of SEK 1 bn.

Attractive to own operating subsidiaries

The acquisition of an additional 34 percent in Mölnlycke Health Care closed during the quarter. After this, we have three operating subsidiaries: Mölnlycke, Aleris and Grand Hôtel. By owning these companies in full, value creation will exclusively accrue to our shareholders. In addition we have strategic control of the companies, including the use of their surplus cash flow. In the near term, the cash generated by each company will be used to pay down their respective debt, but in a few years time this gives Investor greater investment and dividend capacity.

Mölnlycke continued to show overall solid growth with high margins, mainly as a result of the performance of the Wound Care division. The new product area Avance™ (negative pressure wound therapy), which was launched in the spring, is starting to show growth, albeit from small numbers.

In Aleris we are, as planned, investing in further improving quality and building up an infrastructure to strengthen its position in the upcoming tenders and ability to grow. We believe these investments, in combination with our long-term view on building sustainable enterprises, will differentiate us from other market participants. We are also starting up several new sites leading to significant up-front costs. All-in-all, short-term the P&L suffers notably from these investments. The efforts to turn around the Danish business continue.

A turnaround plan, including resolving the import ban in the U.S. and revitalizing the product portfolio, was launched immediately after we took Gambro private in 2006. After four intensive years of transforming Gambro into a more innovative and competitive supplier of extracorporeal therapies for Chronic and Acute, the company is now in a stronger position. The management has done a good job with the critical turnaround. Gambro is now entering the next phase to build a truly best-in-class company, which will take some time and require renewed commitment. In the light of this, we recently agreed with the CEO that now was the right time to initiate the search for a replacement.

CaridianBCT continued to perform very strongly and new products made significant progress during the year. By focusing on product innovation, CaridianBCT has built a very strong franchise in the market, making it a strategically valuable asset.

After a soft 2009, Lindorff's new management has worked hard to put the company back on track. Developments during 2010 have been very encouraging, with major operational improvements and also good momentum in portfolio acquisitions. In late November, Lindorff closed the acquisition of EBH FinansService in Denmark, partly financed by equity from the owners.

3 Scandinavia continues to show healthy growth in customer intake. Thanks to its high quality network suitable for demanding services such as smart phones, 3 maintains a market leading revenue per user. Several important spectrum licenses were purchased during the fourth quarter, allowing 3 to launch LTE/4G during the first half of 2011. Capex for the roll-out will be modest, and can easily be financed through internally generated funds. While cash flow was positive for the full year 2010, 3 did not generate positive cash flow during the September-November period due to anticipated seasonal working capital build-up for December sales and the spectrum payment for Denmark. Should capital needs arise, for example for additional spectrum in upcoming auctions, we are prepared to inject more equity, provided it is value creating.

During the last 5 years we have built a portfolio of Operating Investments with a reported value of SEK 28 bn. We expect to continue to create value by means of investments in, active ownership of, and divestitures of companies. We believe Operating Investments will be a strong contributor to our overall returns over the coming years.

Strong value potential in Investor Growth Capital

The value appreciation was 8 percent in local currencies in the fourth quarter of 2010. Positive contributors were higher valuations in the public markets and further operational progress in some later stage companies. As always in venture capital, some investments fail. In the fourth quarter, we wrote-off the remaining value of AirPlusTV due to underperformance of Dahlia, its Italian business.

It is difficult to value venture financed companies before they are realized. A recent case is ChinaCache: up until September 29, we valued our investment at USD 21 m., in the IPO on September 30, it was priced at USD 49 m. and the day after it traded at USD 95 m. Therefore, it is more meaningful to look at realized returns. From inception to date, Investor Growth Capital has generated gross returns of 13 percent per year on more than 150 realized investments, exceeding our cost of capital net of costs. Excluding investments during 1999-2002 (the IT-bubble) when investments in aggregate had a negative return – the

IRR has clearly exceeded 20 percent, with particular strength in the U.S. and in the health care sector. The returns vary between the years and was evidently hurt by the tech investments during the bubble.

Several years ago, Investor Growth Capital refocused on late stage venture capital, mostly due to our poor returns of earlier stage investments. Regardless of stage, venture capital returns in Europe have been weak over the last 10-15 years. I just hope that this is not representative of the entrepreneurial spirit in Europe.

Investor Growth Capital companies still span a range of risk profiles, whether due to geography, sector or company specific factors, and we will continue to evolve our investment strategy over time and differentiate return requirements across the scope of our investment activities. Overall, we believe Investor Growth Capital has an attractive return potential going forward.

EQT bounces back

Our investments in the EQT funds had a value appreciation of 13 percent in local currencies during the quarter. Operating performance of many companies continued to improve. EQT made several new investments during the quarter, and a number of holdings should be ripe for exit, depending on market conditions. We remain confident in the potential of our investments in EQT.

Back within our leverage target range

Over the past nine quarters we have invested some SEK 25 bn. in new and existing companies. As a consequence, we are now within our long-term target leverage range of 5-10 percent, with our leverage at 7 percent, including the now finalized acquisition of shares in NASDAQ OMX. With a maximum leverage guideline of 25 percent, we still have ample financial resources to deploy in attractive existing or new investments. Competition for new opportunities remains high, which is also illustrated by an increasing interest from strategic buyers in many of our existing investments.

Over the last few years, our total return to shareholders has been lower than the general market, which to a large part has been driven by a sharp increase in what is traditionally considered cyclical companies. Thus, part of the underperformance depends on our asset mix with a larger share of less cyclical investments, but a part also relate to a widening of the discount to net asset value. As per year end 2010, the discount was an unsatisfactory 37 percent, or SEK 62 bn., using our book values of our unlisted holdings within Operating Investments. However, the valuation does not take into account the strategic value of owning control of these companies.

Dear shareholder, finding a way to sustainably reduce the discount is value creating for shareholders and we take this very seriously. We will work hard to explore ways to structurally affect the discount. We will not, however, engage in any activities that may well result in a temporary reduction of the discount, but that compromise our structural ability to optimize long-term value creation. I truly believe that we have built a platform from which we should be able to leverage several value creating opportunities in 2011 and beyond.

Börje Ekholm

Development of the Group

In 2010, the net asset value increased from SEK 142.7 to SEK 169.9 bn. The profit for the period, including unrealized change in value, was SEK 30.7 bn. (31.4). The corresponding figure for the fourth quarter was SEK 17.5 bn. (5.0). Investor's net debt¹⁾, excluding the ring-fenced net debt of the consolidated subsidiaries within Operating Investments, amounted to SEK 11.5 bn. at year-end (0.6), corresponding to leverage of 6.3 percent (0.4).

Net asset value

The net asset value amounted to SEK 169,947 m. (SEK 224 per share) on December 31, 2010, compared to SEK 142,673²⁾ m. (SEK 187 per share) at the beginning of the year. The change in net asset value was SEK 27,274 m. during 2010 (27,440), and SEK 17,544 m. in the fourth quarter (4,611).

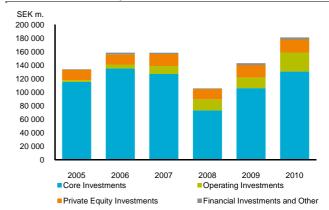

The increase in net asset value, with dividend added back, was 21 percent during the year (26) and 12 percent during the fourth quarter (3). During the same periods, the total return of the Stockholm Stock Exchange (SIXRX) was 27 percent and 7 percent, respectively.

The acquisition of shares in Mölnlycke Health Care was finalized and the company is now a consolidated operating subsidiary of Investor. The reported value of Investor's 96 percent holding is SEK 13.4 bn., including the SEK 2.4 bn. positive revaluation of the existing holding.

Unlisted assets as a share of total assets amounted to 25 percent at the end of the year (25).

- Does not include the ring-fenced debt financings of Operating Investments and the announced acquisition of shares in NASDAQ OMX. For more information on Investor's definition of net debt, see page 23.
- For balance sheet items, figures in parentheses refer to year-end 2009 figures. For income items, the figures in parentheses refer to the same period last year.

Holdings, including any shares on loan.
Calculated in accordance with the disclosure regulations of Sweden's Financial Instruments Trading Act (LHF), unless otherwise specified.
Valued according to the class of share held by Investor, with the exception of Saab AB and Electrolux, for which the most actively traded class of share is used.
Calculated in accordance with Swiss disclosure regulations.
Calculated in accordance with British disclosure regulations.
The reported value of Mölnlycke includes the SEK 2.4 bn., positive revaluation of Investor's existing holding.
Capital after full conversion and including shareholder loans.
Includes the holdings in Kunskapsskolan, Novare, SamSari Act Group, as well as acquired debt in Operating Investments holdings.
Investor's share of capital in the 14 EQT funds varies from 10 to 64 percent.

Core Investments

Core Investments contributed to the growth in net asset value by SEK 26.0 bn. in 2010 (31.9), of which SEK 13.1 bn. in the fourth quarter (3.6). The total return for the business area was 25 percent during the year, of which 11 percent during the fourth quarter.

Read more at www.investorab.com under "Our Investments" >>

During the fourth quarter Core Investments delivered a strong contribution to the net asset value, where most companies generated high total shareholder returns, particularly Atlas Copco and Saab AB.

In line with Investor's communicated strategy to strengthen ownership in existing Core Investments when we find the valuation attractive and are not restricted, we acquired shares in Electrolux during November.

The Core Investments are in good shape to capture attractive growth opportunities and strengthen their competitive position. Taking advantage of strong balance sheets, some of the holdings announced significant acquisitions within prioritized areas, such as ABB's announced intended acquisition of U.S. company Baldor Electric, and Electrolux' announced intended investment in the Egyptian company Olympic Group.

Investments and divestments

3,001,062 shares were purchased in Electrolux.

Events occurring earlier during the year In Saab AB, 11,166,173 B-shares, corresponding to 10.2 percent of the capital, were acquired from BAE Systems. 1,000,000 shares in Husqvarna and 1,087,000 shares in Atlas Copco were purchased.

Dividends

Dividends from Core Investments totaled SEK 3,203 m. in 2010 (2,358), of which SEK 0 m. in the fourth guarter (-).

Net asset value

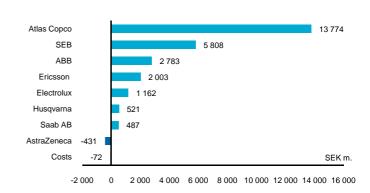

Core Investments contributed to the net asset value by SEK 26,035 m. in 2010 (31,851), of which SEK 13,147 m. in the fourth quarter (3,591). Atlas Copco had the largest positive impact during 2010 of SEK 13,774 m., followed by SEB of SEK 5,808 m. AstraZeneca had a negative impact of SEK 431 m.

Total returns, Core Investments

	Total return for Investor ¹⁾ 2010 (%)	Average total market return ²⁾ 5 years (%)

Operating Investments

Operating Investments contributed to net asset value with SEK 3,478 m. in 2010 (-1,410), of which SEK 2,257 m. was in the fourth quarter (-393). The increase was largely attributable to the positive revaluation of SEK 2.4 bn. relating to Mölnlycke Health Care.

Read more at www.investorab.com under "Our Investments" >>

Operationally, the holdings within Operating Investments generally continued to develop well during the quarter.

In December, Investor announced the acquisition of 8 million shares in NASDAQ OMX Group, adding to its existing holding of 9 million shares. After receiving approval on January 17, the 9.7 percent holding (including existing holdings) will be reported within Operating Investments. In total, Investor's investment in NASDAQ OMX Group to date amounts to USD 356 m.

The previously communicated acquisition of additional shares in Mölnlycke Health Care was finalized. According to IFRS accounting rules, the reported equity value of Investor's holding in Mölnlycke, is based on the price agreed for this transaction. Including a positive revaluation of approximately SEK 2.4 bn. of the existing holding, the value of the 96 percent holding amounts to SEK 13.4 bn. For more information see page 25-26.

Lindorff's previously communicated acquisition of EBH FinansService, Denmark's leading debt collection agency, was finalized during the quarter. Investor provided EUR 31 m. (pro rata) in equity and shareholder loans.

Net asset value

The major holdings' contribution to net asset value is presented in the table below.

SEK m.	Q4 2010	2010	Q4 2009	2009
Mölnlycke Health Care	2 700	2 686	68	214

3 Scandinavia	-27	-209	75	-120
Gambro Holding	-110	-319	-551	-1 328

Debt financing

Investor guarantees SEK 4.2 bn. of 3 Scandinavia's external debt. For all other Operating Investments, including majorityowned holdings, debt financing is arranged on a standalone, ring-fenced basis, without guarantees from Investor and based on each investments' own debt bearing capacity. At the time of investment, the debt financing for each company was structured to take into account the projected growth and stability of earnings and the level of cash conversion. Consequently, the level of debt financing for holdings within Operating Investments varies.

The external debt of 3 Scandinavia matures in late 2012. The next material loan maturity within Operating investments is in 2013.

Valuation methodology within Operating Investments

Investor provides information about the companies' important news, operating performance as well as key figures, such as net sales, EBITDA, normalized EBITDA (when relevant), net debt and number of employees. In normalized EBITDA, material one-off items, such as one-time gains, restructuring costs, write-downs, and specific investments, are excluded to better reflect the underlying operating result. The major associated companies report quarterly figures with one month's delay, while consolidated subsidiaries report without any delay.

Listed holdings

For listed holdings the official share price (bid) on the stock market is used for valuing the holding.

Associated companies (20-50% of votes)

Associated companies (20-50% of votes)

Non-listed investments classified as associated companies are reported according to the equity method. Investor's share of the holding's equity constitutes the valuation of the holding when the equity method is applied (according to IFRS) and Investor's share of the holding's net result is included in the income statement. Thus, for companies incurring large costs that impact short-term profits negatively, the value of the holding declines in Investor's net asset value.

Subsidiaries (>50% of votes)

holding's equity, including any surplus values and goodwill relating to acquisitions.

Activities during the quarter

The fiscal austerity in many geographic markets, in particular Southern Europe, is beginning to impact the behavior of health authorities and health care providers. Despite this more challenging environment, Mölnlycke Health Care continued its positive development and strong performance at the same pace as during previous quarters.

The Wound Care Division generated good growth in all regions, particularly in the U.S. and in Asia-Pacific. Mölnlycke Health Care is now the second largest player within advanced wound care in the U.S. The market entry in the Negative Pressure Wound Therapy (NPWT) segment continues to gather momentum, with an increasing number of patients being treated with the Avance™ system.

The Surgical Division faced a continued difficult market in terms of growth, increasing raw material prices and rising freight costs. However, the Procedure Pak® surgical trays business continues to significantly outperform competition both in terms of growth and profitability. Within gloves, growth in the important U.S. market was good during the quarter with Mölnlycke Health Care further building its position in the synthetic glove segment.

In December, as a result of a tax audit, the Swedish tax authorities challenged the tax deductability of interest charges on shareholders' loans. The company has already and is providing extensive evidence to support the interest rate deducted as being at market level and intends to appeal the decision.

Financial performance 2010

During the year, net sales grew by 10 percent, or 6 percent in constant currencies, compared to 2009. EBITDA continued to grow at a higher pace than sales and rose by 14 percent, driven by volume, product mix and efficiency gains. The EBITDA margin increased to 28 percent (27).

Cash flow remained strong and during the fourth quarter, Mölnlycke Health Care once again repaid debt of approximately EUR 80 m. ahead of plan.

Acquisition of shares in Mölnlycke finalized

The previously announced acquisition of Morgan Stanley Principal Investments' shares in Mölnlycke Health Care was closed on December 1. Investor owns 96 percent of the company, which is now a consolidated subsidiary. Following consolidation, income and balance sheet items have been restated and are no longer reported with one month's delay.

Impact from Purchase Price Allocation

The preliminary purchase price allocation, performed in conjunction with the acquisition of the majority in Mölnlycke Health Care allocates EUR 50 m. to inventory. This value will be consumed during December 2010 and 2011 and impacts EBITDA negatively.

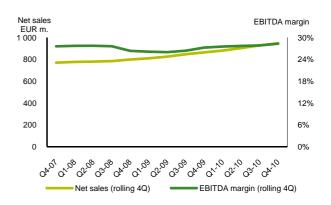

Key figures, Mölnlycke Health Care¹⁾

	2	010	2009		
Income statement items	Q4	YTD	Q4	YTD	
Net sales (EUR m.)	246	949	226	865

Balance sheet items	Q4 2010	Q4 2009
Net debt (FLIR m.)	1 578	1 673

- Following consolidation of Mölnlycke Health Care as a subsidiary on December 1, 2010, income statement items and balance sheet items have been restated back to 2008 and are no longer reported with one month's delay.
- 2) The preliminary purchase price allocation, performed in conjunction with the acquisition of the majority in Mölnlycke Health Care allocates EUR 50 m. to inventory. This value will be consumed during December 2010 and 2011 and impacts EBITDA negatively.

Development of net sales and EBITDA margin

Brief facts, Mölnlycke Health Care

Investment year	2007
Investor's ownership (capital incl. shareholder loans) %	96

Mölnlycke Health Care is a world-leading manufacturer and provider of singleuse surgical and wound care products and services, primarily for the professional healthcare sector.

	Q4 2010	Q4 2009
Number of employees, end of period	6 985	6 745

Investor's view of Mölnlycke Health Care

We are encouraged by Mölnlycke Health Care's continued steady growth. A strong product offering, a promising product pipeline and an expanded sales force create a platform for the company to keep growing faster than the overall market. The company's strong cash flow generation opens up for additional growth initiatives, both organic and through acquisitions. With several important products still ramping up, there is room for further profitability improvement.

Read more at: www.lindorff.com >>

Activities during the quarter

Within the Collection business area, the volume inflow decreased and together with the new fee regime in Norway, this affected revenues during the end of the quarter. The trend of improved solution rates has stabilized and the work to improve efficiency remains key.

The Capital business area continues to see a good deal flow, but the number of closed transactions during the quarter was limited. However, the acquisitions of portfolios made in previous quarters are starting to yield good returns and combined with the slowly improving macro economic situation, performance continued to improve.

The acquisition of EBH FinansService, Denmark's leading debt collection agency, closed on November 30. EBH FinansService is focused on the financial sector, which is a good strategic fit with Lindorff. The acquisition is in line with the communicated strategy to make value creating acquisitions. The acquisition was financed by a combination of equity, shareholder loans and external debt. The two owners, Investor and Altor, provided equity to finance the acquisition on a pro rata basis. Investor injected EUR 31 m. in equity and shareholder loans.

At the end of the year, Investor provided EUR 13 m. (pro rata) in equity and shareholder loans to finance the acquisition of a debt portfolio that has not yet been announced.

Financial performance 2010

Net sales increased by 16 percent, or 6 percent in constant currencies compared to 2009. EBITdA³⁾ increased by 51 percent, primarily due to efficiency gains and improved solution rates both within Collection and Capital. Adjusted for the portfolio revaluations with a positive impact on EBITdA of EUR 7 m. reported during the first quarter, the increase was 39 percent.

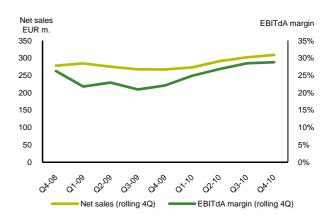

Key figures, Lindorff^{1, 4)}

Income statement items	2	010	2009	
	Q4	YTD	Q4	YTD
Net sales (EUR m.)	76	309 ²⁾	69	267 ²⁾

- 1) Income statement items and balance sheet items are reported with one month's delay. 2 Including amortization of surplus value of EUR -3 m. for Q4 2010, EUR -7 m. for 2010,
- 2 Including amortization of surplus value of EUR -3 m. for Q4 2010, EUR -7 m. for 2010 EUR -7 m. for Q4 2009 and EUR -27 m. for 2009.
- 3) EBITdA=EBITDA after portfolio depreciation.
- 4) Income and balance sheet items have been restated due to a change of accounting principles.

Development of net sales and EBITdA margin

Brief facts, Lindorff

Investment year	2008
Investor's ownership (capital after full conversion) %	58

A leading credit management company in the Nordic region with a growing European presence. Lindorff has offices in Denmark, Estonia, Finland, Germany, Latvia, Lithuania, the Netherlands, Norway, Russia, Spain and Sweden

	Q4 2010	Q4 2009
Number of employees, end of period	2 465	2 270

Investor's view of Lindorff

Lindorff has the capacity to take advantage of an improvement in the market for credit portfolio acquisitions going forward. We expect Lindorff to continue evaluating any value creating acquisitions in Europe. Lindorff's focus on efficiency improvements remains a key priority, both in its core markets and in more recently established markets. Consequently, we believe Lindorff is well positioned for strong growth.

Activities during the quarter

Aleris has been focusing on operational performance, new tenders and M&A activity, as well as investments in infrastructure for long term growth, quality of services and competitiveness. Actions to improve performance in some underperforming units have also been taken. Short-term, these actions are negatively impacting results, but are important components of the investment plan.

Within Diagnostics (Sweden), performance continues to be good and is very stable. A consolidation of labs in the Stockholm area to improve capacity utilization and performance is being implemented.

Health Care (Sweden) performed well in most of its facilities, but is facing cost issues at two sites that are being restructured. Several important tenders are ongoing. One primary care unit in Stockholm was acquired.

Division Care (Sweden) continued to performed well.

For the Norway division, most parts of the business continued the very strong performance. Short term, the start-up of the PET/CT scanning facility in Oslo and restructuring costs relating to other units put pressure on the results. A strategically important tender for radiology in Oslo was won, but the tender has been appealed.

Within the Denmark division, senior care performs well but health care experiences difficult market conditions. An action plan to improve results is being implemented.

Financial performance 2010

During the period, net sales increased by 6 percent, or 8 percent in constant currencies, compared to 2009. EBITDA decreased by 11 percent, resulting in an EBITDA margin of 7 percent (9). The EBITDA decrease was to some extent explained by weaker than expected profitability in some ongoing businesses. The main decline, however, was attributable to a number of additional initial costs, including premature discontinuation of a customer contract, business development and start-ups of new businesses, and quality related investments. In total, non-recurring expenses for 2010 amount to approximately SEK 60 m.

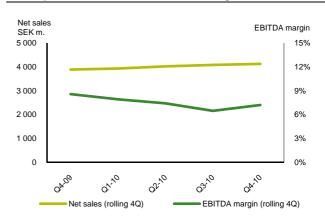

Key figures, Aleris^{1, 2)}

	2010			2009	
Income statement items	Q4	YTD	Q4	YTD

- 1) Owned and consolidated by Investor since August 2010.
- 2) Income and balance sheet items have been restated.

Development of net sales and EBITDA margin

Brief facts, Aleris

Investment year	2010
Investor's ownership (capital incl. shareholder loans). %	97

Aleris is one of the leading providers of healthcare and care in the Nordic region. Aleris provides services on behalf of municipalities, county councils and insurance companies within four different areas; healthcare, diagnostics, senior care and mental health.

	Q4 2010	Q4 2009
Number of employees	3 775	3 790

Investor's view of Aleris

Aleris has a strong market position in the Nordic region and solid development potential in an industry that fits well into our ownership model and long-term approach. The Nordic healthcare and care market is a large and stable industry with long-term sustainable growth, where private care companies can outgrow the market. Aleris provides an attractive platform for continued growth, both organic and through acquisitions. Aleris' commitment to quality care resonates well with our long-term ambitions for the company and we look forward to developing the company further.

Read more at www.gambro.com >>

Activities during the quarter

Overall business conditions remained challenging in terms of competition and pricing pressure in the market.

In October, Gambro announced that it will significantly expand its capacity for producing dialyzers with synthetic membranes at its existing dialyzer plant in Hechingen, Germany. With the planned investment in production capacity, Gambro will be adding more than 8 m. additional dialyzers annually to meet growing market demand.

Results from new clinical studies were presented at the American Society of Nephrology's Renal Week 2010. One of them supports that the dialyzer design in Gambro's Polyflux® Revaclear dialyzer can achieve the same urea removal at lower dialysate flow rates. Results from another international clinical study indicate that a dialyzer with a heparin-grafted membrane can be beneficial to reduce bleeding risk and other side effects of heparin administration. Gambro's product Evodial®, is the only dialyzer with heparin grafted to the membrane.

The previously communicated licensing of the U.S. water business to Mar Cor Purification, a subsidiary of Cantel Medical Corporation, was concluded during the quarter, and the divestiture of the peritoneal dialysis (PD) business to Fresenius Medical Care was closed in late December. In total, these operations have generated approximately SEK 500 m. in annual revenue. These changes enhance Gambro's focus on its core business.

In January 2011, the search for a new CEO of Gambro was initiated.

Financial performance 2010

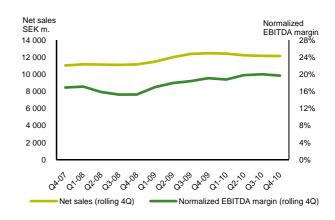

Net sales for the year declined by 3 percent compared to last year. In constant currencies net sales rose by 2 percent. There was some negative price mix effect affecting sales and earnings. Normalized EBITDA was flat, and the EBITDA margin was 20 percent (19).

Key figures, Gambro1)

	2010		2009	
Income statement items	Q4	YTD	Q4	YTD

1) Income statement items are reported with one month's delay.

Development of net sales and normalized EBITDA margin

Brief facts, Gambro

Investment year	2006
Investor's ownership (capital) %	49

Gambro is a global medical technology company and a leader in developing, manufacturing and supplying products and therapies for Kidney and Liver dialysis, Myeloma Kidney Therapy, and other extracorporeal therapies for Chronic and Acute patients.

	Q4 2010	Q4 2009
Number of employees, end of period	7 650	8 040

Investor's view of Gambro

The continued progress made by Gambro in terms of profitability and accelerated momentum in product roll-outs is encouraging. It is important that focus is maintained on the ongoing restructuring program and quality enhancement efforts as well as product development. We remain committed to making additional investments, should this be deemed value creating.

Activities during the quarter

CaridianBCT recorded another strong quarter. Growth was good despite some cost containment among blood banks and hospitals.

Automated Collections grew across all regions and in the Asia-Pacific region and Latin America in particular. Gross margins continued to strengthen.

Therapeutic Systems had another strong quarter. The Quantum Cell Expansion system was introduced in the market and a full launch will be made during the first quarter 2011. The market reception has so far been positive.

For the Whole Blood Processes business area, the development was stable with good growth for Atreus® (Whole Blood Processing System) disposables.

Within Pathogen Reduction Technologies, sales and market momentum continued to build with accelerated interest in the Mirasol® system. Several important new orders both in Europe and in developing markets were won. Numerous additional clinical trials in a number of countries and for several applications are ongoing. Further trials will be initiated in the coming months.

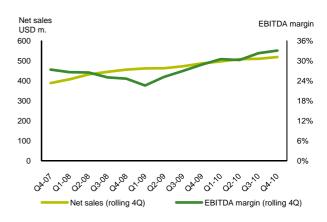

Financial performance 2010

Net sales increased by 7 percent, or 6 percent in constant currencies compared to 2009. EBITDA rose by 22 percent, resulting in an EBITDA margin of 33 percent (29). The increase was mainly driven by an improved gross margin, but also by continued strong cost control. Cash flow generation remained strong.

Key figures, CaridianBCT1)

	20	010	200	9
Income statement items	Q4	YTD	Q4	YTD
Net sales (USD m.)	134	518	125	486
EBITDA (USD m.)	45	171	38	140
EBITDA (%)	34	33	30	29
1) Income statement items are report	ted with one mor	nth's delay		

Development of net sales and EBITDA margin

Brief facts. Caridian BCT

Investment year	2006
Investor's ownership (capital) %	49

CaridianBCT is a leading global provider of technology innovations and services focused on enhancing blood quality, safety, supply and efficiency in the blood banking and transfusion medicine industry.

	Q4 2009
Number of employees, end of period 2 270	2 160

Investor's view of CaridianBCT

CaridianBCT's market position is strong. The company is the clear global leader in automated apheresis both for blood collection and for therapeutics. Focus should continue to be on capturing growth opportunities in the market, both within the existing business areas and through newer products, such as Mirasol PRT and Quantum CES. Investments should be made in new geographic areas, e.g. Asia. It is also important that the company continues to reduce manufacturing costs per unit and manage its operating expenses. We believe there is an attractive potential for further sales and profit growth and thus value creation.

Gambro Holding

Gambro Holding owns Gambro and CaridianBCT. Since net debt of the companies has not been formally distributed, the effect on Investor's net asset value and net debt are reported as a total for the two companies.

Combined key figures, Gambro Holding¹⁾

Balance sheet items	Q4 2010	Q4 2009

Activities during the quarter

Growth continued, with the subscriber base increasing by 77,000. Intake of voice customers was strong, driven by the increased sales of smart phones. The revenue per user (ARPU) remained at a market leading level..

- 3 Scandinavia won, for the second consecutive year, the most prestigious independent network test for both voice and broadband (ISP) network in Denmark. This, together with the wins in Swedish tests, ranking 3 Scandinavia as the preferred choice nationally in mobile data and the best provider of voice coverage in Stockholm, Gothenburg and mid-Sweden during the summer, illustrates the company's strong position as a high-quality mobile services provider and technology leader. Going forward, 3 Scandinavia will further increase network investments, including investments in spectrum, to defend its top position.
- 3 Scandinavia was awarded 2x5 MHz spectrum in the 900 band and 2x10 MHz spectrum in the 1800 MHz band in Denmark. In Sweden, an agreement to acquire 50 MHz of TDD spectrum from Intel was reached. With the added capacity, 3 Scandinavia has taken another step towards securing enough spectrum to remain the top provider also of next generation services.
- 3 Scandinavia is currently concluding a purchasing agreement relating to 4G/LTE and is planning a rapid roll-out, aiming for a commercial launch during the spring.

Financial performance 2010

Net sales rose by 20 percent compared to 2009, or 24 percent in local currencies. EBITDA more than doubled to SEK 1,067 m. (434) and the EBITDA margin increased to 15 percent (7). While cash flow was positive for 2010, it was negative during the fourth quarter due to seasonal inventory build-up in preparation for the Christmas season and payment for the Danish license.

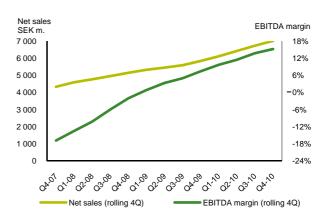

During 2010, Investor invested SEK 140 m. (245), of which 0 m. in the fourth quarter (69).

Key figures, 3 Scandinavia¹⁾

- 3) Other key figures are reported without delay
- 4) Average monthly revenue per user (ARPU) refers to the past 12-month period

Development of net sales and EBITDA margin

Brief facts, 3 Scandinavia

Investment year	1999
Investor's ownership (capital) %	40

Mobile operator providing mobile voice and broadband services in Sweden and Denmark.

	Q4 2010	Q4 2009
Number of employees, end of period	2 245	2 095

Investor's view of 3 Scandinavia

Focus will remain on developing new attractive services and offerings, as well as ensuring the speed and quality of the network. Investments in this area are key to sustain strong momentum and a market-leading position. Growth and cost control are the key parameters to create value. Since 3 Scandinavia is cash flow positive, it has further strengthened its strategic position. However, we should remain committed to extend our funding should it be deemed value creating, for example in conjunction with additional investments in upcoming spectrum auctions or network expansion. While the voice business remains the primary revenue contributor, maintaining market leadership in mobile broadband is important for continued growth.

Activities during the quarter

Grand Hôtel ended the year with high activity in the restaurants and a number of well-visited holiday related events. The spa made progress in terms of a gradual increase in the number of visitors during the quarter.

Grand Hôtel continued to invest in the business to maintain its market leading service offering as a five star hotel and made several important enhancements during the guarter.

Financial performance 2010

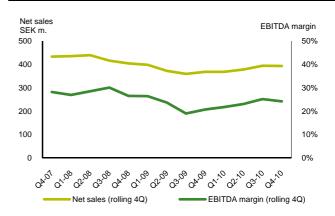

Net sales increased by 7 percent compared to 2009.

EBITDA rose by 25 percent, resulting in an EBITDA margin of 24 percent (21). The EBITDA improvement is explained by revenue growth and lowered costs following the cost-efficiency program launched in 2009, somewhat mitigated by increased investments during the end of the year.

Key figures, Grand Hôtel

	20	010		2009
Income statement items	Q4	YTD	Q4	YTD

Swedish Orphan Biovitrum is a Swedish based specialty pharmaceutical company with an international market presence. The company is focused on providing and developing orphan and niche specialist pharmaceuticals to patients with high medical needs.

Investor's view of Swedish Orphan Biovitrum

Swedish Orphan Biovitrum needs to focus on strengthening its short to medium term growth momentum, which means expanding sales of key products such as Kineret, Orfadin and Kepivance in addition to scaling up sales of newly launched products (Wilfact, Ruconest, Multiferon). We are highly appreciative of the strong industrial logic and growth potential in the new entity and look forward to contributing to making it a leading international specialty pharmaceuticals company.

Following consolidation of Mölnlycke Health Care as a subsidiary in December, 2010, income statement items and balance sheet items have been restated and are no longer reported with one month's delay.
 The preliminary purchase price allocation, performed in conjunction with the acquisition of the majority in Mölnlycke Health Care allocates EUR 50 m. to inventory. This value will be consumed during December 2010 and 2011 and impacts EBITDA negatively.
 The total impact up until year-end 2011 is currently estimated at EUR -50 m.

 Income and balance sheet items are reported with one month's delay.
 Income and balance sheet items have been restated due to a change of accounting principles.

Income and balance sheet items have been restated due to a change of accounting principles.
 Income and balance sheet items have been restated due to a change of accounting principles.
 Including amortization of surplus value of EUR -3 m. for Q4 2010, EUR -7 m. for 2010, EUR -7 m. for Q4 2009 and EUR -27 m. for 2009.
 EBITDA=EBITDA after portfolio depreciation.
 The acquisition of Aleris was finalized in August, 2010.
 EBITDA for 3 Scandinavia is defined as EBITDA after deducting all customer acquisition and retention costs.

Private Equity Investments

The Private Equity Investments business area contributed to net asset value with SEK 1,294 m. in 2010 (664), of which SEK 1,731 m. in the fourth quarter (1,815).

Read more at www. investorab.com under "Our Investments" >>

The Private Equity business area consists of the wholly owned Investor Growth Capital and the investments in the independent EQT funds.

Investor Growth Capital provides venture capital financing to growth companies in the healthcare and technology sectors in the U.S., Europe and Asia.

The EQT funds are active in buy-outs, equity-related growth financing and infrastructure. Investor is the largest investor and the sponsor of all EQT funds. As a sponsor, Investor receives a relatively higher share of the economics. The funds are fully independent from Investor, with their own investment processes.

Investments and divestments

Cash flow (divestments less investments) from the Private Equity business was SEK 503 m. for the year (-2,358), of which SEK -67 m. in the fourth quarter (-560).

A total of SEK 3,308 m. was invested in 2010 (2,921), of which SEK 299 m. in the fourth quarter (860). Investments during the year comprised of SEK 2,197 m. in new investments (1,087) and SEK 1,111 m. in add-on investments (1,834).

Sales of investments totaled SEK 3,811 m. during the period (563), of which SEK 232 m. during the fourth quarter (300).

Private Equity Investments valuation multiples

=				
	Share of	Percentage of	Average EV/EBITDA	Average EV/EBITDA
	listed holdings	portfolio valued with multiples	multiple	multiple
		2010	2010	2009
Investor Growth Capital	15%	6.3% ¹⁾	9.7x	8.2x
EQT	0%	63.9%	8.9x	9.6x

¹⁾ The low percentage (6.3%) of investments in Investor Growth Capital that are valued with EV/EBITDA multiples reflects the general development stage of the companies. In many cases, the holdings are in a growth stage and have not yet reached profitability. Thus, a change in any one company valued on multiples has a big impact on the average multiple reported.

Investor Growth Capital

Read more at: www.investorgrowthcapital.com >>

In the fourth quarter, the venture capital market remained at a solid level of activity for both new investments and divestments. Some evidence of higher prices for new investments started to emerge towards year-end, particularly within the technology sector and for Chinese companies. Rising stock markets and strong M&A activity are the key drivers of this trend, but a general increase in confidence levels about a building economic recovery is also contributing to more demand for private company investments. IPO pipelines continue to build as well, but market receptivity to new issues still remains mixed.

Investor Growth Capital has several companies that are sufficiently developed for either IPOs or strategic exits. In addition, we actively work to identify and develop additional companies in attractive emerging sectors. Strategic acquisition activity in the technology sector continues at a solid pace supported by a rebound in tech spending and cash-rich balance sheets among the major industry players. Health care market activity is softer as many companies are adopting a conservative posture due to the tighter regulatory environment and aggressive price control by customers.

Activities during the quarter

No new investments were made during the quarter.

ChinaCache, being priced for IPO in the third quarter, was listed on NASDAQ.

Add-on investments were made in Mpex Pharmaceuticals and SciBase. An add-on investment was also made in conjunction with the new rights issue in Aerocrine.

The holding in Jazz Pharmaceuticals was fully divested and the holding in ISTA Pharmaceuticals was partly divested.

The remaining value in AirPlusTV was written off.

Activities occurring earlier during the year

New investments were made in Agile Therapeutics (U.S), BlueArc (U.S), ClairMail (U.S.), Healthline Networks (U.S.), Jazz Pharmaceuticals (U.S.), KyLinTV (China), Retail Solutions (U.S), Revision Therapeutics (U.S.), Rocket Lawyer (U.S.), TearScience (U.S.), Telepo (Sweden), Trilliant (U.S) and Visible Technologies (U.S.).

Add-on investments were made in Aerocrine, AirPlusTV, Axiomed Spine Corporation, Biolex, Cameron, Cayenne Medical, ChinaCache, China Greens, CMA Microdialysis, ePAC, FOI, Jazz Pharmaceuticals, Neoventa, Neuronova, Synosia, Tobii and Zephyr and another tranche of the initially committed investment in OnePhone was paid.

The investment in Vårdapoteket i Norden AB was finalized.

China ITS was listed on the Hong Kong Stock Exchange.

Swedish Orphan International was divested to Biovitrum.

CHF Solutions was divested to Gambro.

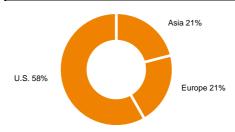

The holding in Achillion was partly divested, and the holdings in Ception Therapeutics, eBis Company, Heartscape Technologies, SamSari, Santarus, Siperian, Sirion Holdings, Solstice NeuroSciences and Spiration were fully divested.

The holding in FOI Corporation was written off.

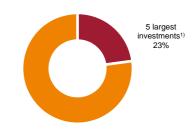

Financial performance 2010

Investor Growth Capital had a value increase of 4 percent in 2010. In local currencies however, the value increased by 8 percent. The value increase was mainly a result of improving operating performance in several holdings as well as rising share prices for listed holdings.

Brief facts, Investor Growth Capital

Investor's wholly-owned subsidiary Investor Growth Capital makes expansion stage venture capital investments in promising growth companies in the U.S., Northern Europe and Asia. These companies are often generating revenue or soon will be. Typically, these holdings have no or very low financial leverage. Returns are generated through divestments. Typical exits include initial public offerings or trade sales to industrial or financial players, normally after a three to seven year holding period.

The valuations are reviewed quarterly and are often based on the latest externally priced financing round. Where applicable, peer group multiples are used. Liquidity discounts are applied as well.

Activities during the quarter

EQT closed the EQT Credit fund, in which Investor is a sponsor and has committed EUR 32 m. The EQT Credit fund will focus on investing in the debt of operationally sound but over-leveraged mid-sized European companies.

EQT V signed an agreement to acquire Hafslund Fibernett AS (Norway). Funds were released through a partial syndication in Springer Science+Business Media. An add-on investment was made in Blizoo and SAG (Germany).

EQT Greater China II invested in Modern Metal & Precision Holdings (China) and Qinyuan Bakery (China).

EQT Infrastructure made an agreement to acquire Koole Tanktransport B.V. (the Netherlands).

Activities occurring earlier during the year

EQT III divested Aleris to Investor and made an add-on investment in Leybold (Germany) and received proceeds from the divestment of Duni (Sweden).

EQT IV made an add-on investment in SSP (U.K.) and divested Sanitec (Finland).

EQT V invested in sports retail chain XXL Sport & Villmark (Norway) and AcadeMedia, acquired Springer Science+Business Media (Germany) and made add-on investment in Bulgarian Blizoo (former CableTel) and Scandic (Sweden).

EQT Opportunity made an add-on investment in TitanX (Sweden).

EQT Expansion Capital II invested in Roeser Group (Germany), divested Cinterion Wireless Modules (Germany) and made an add-on investment in Skykon (Denmark).

EQT Greater China II acquired Japan Home Centre and divested LBX.

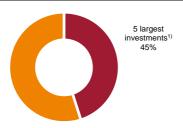

EQT Infrastructure acquired Kommunekemi (Denmark) and Swedegas and divested Midland Cogeneration Venture (U.S.)

Financial performance 2010

The value of Investor's holdings in EQT funds reported a value increase of 13 percent during the period. In local currencies, the value appreciation amounted to 28 percent. The value appreciation was mainly explained by improving operating metrics in several holdings.

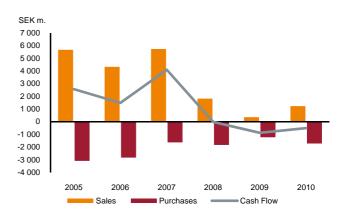

Investor's total outstanding commitments to EQT funds amounted to SEK 3.5 bn. at year-end (5.8).

Value distribution, Investor's holdings in EQT funds, 12/31 2010

As of December 31, 2010, the five largest investments were (in alphabetical order):, CBR (Germany), Dako (Denmark), ISS (Denmark), Kabel Baden Württemberg (Germany) and Securitas Direct (Sweden).

* Fully invested

) Also includes capital invested in holdings that have already been sold.

 Gambro Holding valued according to the same principles used for Investor's direct ownership.

 The following rates were used to translate to SEK: DKK = 1.21 (EQT Denmark), EUR = 9.00 (EQT Finland, EQT III, IV,V, EQT Expansion Capital I, II, EQT Opportunity, EQT Infrastructure), USD = 6.80 (EQT Asia, EQT Greater China II).

Brief facts, EQT

EQT is independent from Investor, although Investor is a minority owner of the management company, as well as the sponsor and largest investor in all of the funds.

EQT's funds invest in companies in Northern and Eastern Europe, Asia and the U.S., in which EQT can act as a catalyst to transform and grow operations. EQT has raised 13 funds active in buy-outs, equity-related growth financing and infrastructure.

Within EQT, valuation is to a large extent based on multiples, as holdings are typically mature and relevant peers are often available.

Financial Investments

The business area's contribution to net asset value was SEK 1,044 m. in 2010 (1,276), of which SEK 524 m. was in the fourth quarter (218).

Read more at www.investorab.com under "Our Investments">>>

Active Portfolio Management (APM) contributed with an operating income of SEK 230 m. in 2010 (464), of which SEK 115 m. during the fourth quarter (0). Risks are closely monitored and the portfolio is marked-to-market on a daily basis. APM invests in listed equity and equity-related instruments such as equity derivatives.

Within Financial Investments, the entire holding in Elekta was divested during the quarter for about SEK 1.6 bn., generating a capital gain, including dividends received, of approximately SEK 1 bn.

The holding of 9 m. shares in NASDAQ OMX, reported as a financial investment in this quarterly report, will be transferred to Operating Investments upon completion of the acquisition of the additional 8 m. shares announced in December, 2010.

Group

Net debt

The net debt position totaled SEK 11,472 m. on December 31, 2010 (588) and does not include the announced acquisition of shares in NASDAQ OMX. Investor's net debt includes items relating to the investing activities within Investor. Debt financing of the holdings within Operating Investments, including the majority-owned holdings, is arranged on an independent ring-fenced basis and hence not included in Investor's net debt. Investor guarantees SEK 4.2 bn. of 3 Scandinavia's external debt, which is not included in Investor's net debt.

- 1) Aleris, Grand Hôtel and Mölnlycke Health Care.
- 2) Included in cash and readily available placements
- Included in gross debt.

Cash and readily available placements amounted to SEK 12,123 m. on December 31, 2010 compared to SEK 20,938 m. at year-end 2009. The Group's short-term investments are invested conservatively, taking into account the risk-adjusted return profile. Gross debt for the group amounted to SEK 23,596 m. (21,526) at year-end.

Net debt

Net investments totaled SEK -10,262 m. in 2010 (-7,246). Dividends received from Core Investments amounted to SEK 3,203 m. during the year (2,358). Dividend paid out to shareholders during the second quarter amounted to SEK 3,050 m. (3,059).

Net financial items for the reporting period amounted to SEK -1,186 m. (-597), of which SEK -839 m. (-182) is attributable to consolidated Operating Investments. Net financial items include interest income of SEK 153 m. (350) and interest expenses totaling SEK -930 m. (-716). The unrealized result from revaluation of loans and swaps amounted to SEK 130

m. (39). Investor uses swaps when managing the interest rate tenor. The remaining effects consist primarily of unrealized currency translation differences from shareholder loans to Lindorff and Mölnlycke Health Care.

The average maturity of the debt portfolio was 12.1 years on December 31, 2010 (13.5), excluding the debt in Aleris, Mölnlycke and Grand Hôtel.

Cost of investing activities

Cost of investing activities varies between the different business areas. Private Equity Investments is Investor's most staff intensive business area. For the period, costs for Core Investments, Operating Investments and Private Equity Investments amounted to SEK 72 m. (91), SEK 102 (124) m. and SEK 225 m. (226) respectively. Including group wide costs, cost of investing activities totaled SEK 585 m. during the period (595), representing 0.3 percent of our period-end total assets on an annual basis (0.4). Costs per business area are shown in the Operating Segment overview on page 33.

The calculation of the cost for the employee stock option programs and share programs resulted in additional costs of SEK 37 m. during the year (39). Investor uses hedges to minimize effects on equity from the programs that arise in connection with changes in Investor's share price.

Parent Company

Share capital

Investor's share capital amounted to SEK 4,795 m. on December 31, 2010 (4,795).

Share structure

Class of share	Number of shares	Number of votes	% of capital	% of votes
A 1 vote	311 690 844	311 690 844	40.6	87.2
B 1/10 vote	455 484 186	45 548 418	59.4	12.8
Total	767 175 030	357 239 262	100.0	100.0

Investor did not repurchase any of its own shares, during the fourth quarter. On December 31, 2010, Investor owned a total of 6,683,800 of its own shares (4,683,800).

Results and investments

The Parent Company's result after financial items was SEK 34,194 m. for the year (32,154). In accordance with IFRS and the changes in the Swedish Annual Accounts Act, listed associated companies are reported at fair value as of 2010. Comparative figures have been restated accordingly. For further information, see section New and changed accounting policies in 2010. Value changes of equity-related holdings reported at fair value amounted to SEK 23,970 m. (29,593). Results from participations in Group companies amounted to SEK 7,178 m. mainly relating to the liquidation of a subsidiary and write-downs of participations in Group companies (20).

During the year, the Parent Company invested SEK 12,482 m. in financial assets (12,520), of which SEK 9,199 m. was in Group companies (7,607) and purchases in Core Investments of SEK 1,693 m (3,825).

Total debt increased by SEK 778 m. since the beginning of the year. Shareholders' equity totaled SEK 163,164 m. on December 31, 2010, compared to SEK 132,284 m. on December 31, 2009.

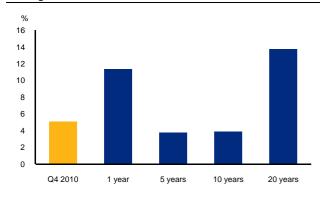

The Investor share

Read more at investorab.com under "Investors & Media" >>

The total return (sum of share price changes and dividend added back) was 11 percent in 2010 (18) and 5 percent during the fourth quarter (4).

The average annualized total return on Investor shares was 4 percent over the past five-, and ten-year periods repectively and 14 percent over the past 20-year period.

Average Total Return

The price of the Investor A-share and B-share was SEK 139 and SEK 143.90 respectively on December 31, 2010, compared to SEK 131.80 and SEK 132.90 on December 31, 2009.

Total market capitalization of Investor, adjusted for repurchased shares, was SEK 107,907 m. as of December 31, 2010 (100,992).

Risks and Risk management

The main risks that the Group and the Parent Company are exposed to are related to the value depreciations of the listed assets due to market price fluctuations. The development of the global economy is an important uncertainty factor in assessment of near-term market fluctuations. The uncertain market situation also affects the Operating Investments' and Private Equity Investments' opportunities for new investments and divestments. The development of the markets reflects the uncertainty about how the various proposed or implemented governmental and international regulations, economic and political intentions to reduce imbalances will affect the economic situation at both macro and micro levels. With a strong balance sheet, the financing and liquidity risks will probably stay at the current low levels. In order to keep credit risks at low levels, credit risk exposures will only be permitted if the counterparties have high credit worthiness. Whatever the economic situation is in the world, operational risk management requires continued high level of awareness in unity with the stated policies and instructions.

Investor AB's risks and uncertainties are described in detail in the Annual Report for 2009, see the corporate governance report and note 29. Any significant changes have not been added subsequently.

Other

Proposed dividends

The Board of Directors and the President propose a dividend to shareholders of SEK 5.00 per share for fiscal 2010 (4.00). The dividend level proposed is based on the stated dividend policy. Investor AB's dividend policy is to declare dividends attributable to a high percentage of dividends received from Core Investments, as well as to make a distribution from other net assets corresponding to a yield in line with the equity market. Investor AB's goal is also to generate a steadily rising annual dividend.

Repurchase of own shares

As it has during the past eleven years, Investor's Board of Directors has decided to propose to the 2011 Annual General Meeting that it should extend the authorization of the Board to decide on the repurchase of the company's shares. Under such a mandate, the Board would be given the opportunity until the next Annual General Meeting provided it deems it appropriate - to decide on the repurchase of the company's shares. In accordance with current legislation, repurchases can total up to 10 percent of the total shares outstanding in Investor. Any repurchases may be effected over the stock exchange or through offerings to shareholders. It is also proposed that the Board's mandate include the possibility to transfer repurchased shares including transfers to participants in Investor's Long-term variable remuneration program. See also "Long-term variable remuneration program" below.

Annual General Meeting

Investor AB's Annual General Meeting will be held at 3:00 p.m. on Tuesday, April 12, 2011, at the Stockholm Waterfront Congress Centre. The registration commence at 1:00 p.m. Investor will present the interim report for the first quarter 2011 at 1:30 p.m. Shareholders are invited to the presentation.

Notification of participation in the Annual General Meeting can be given starting Monday, March 7, 2011 until Wednesday, April 6, 2011. Notification can be given on Investor's website, (www.investorab.com), or by phoning +46 8 611 2910.

Additional information about Investor's Annual General Meeting is available on Investor's website.

Investor's audited Annual Report in Swedish will be made available at the company's headquarters, at Arsenalsgatan 8C in Stockholm, no later than March 22, 2011.

Long-term variable remuneration program

As in the previous five years, the Board of Directors will propose a share-based, long-term variable remuneration program for Investor's employees at the 2011 Annual General Meeting.

The program will in principle be identical to the program for 2010. It is proposed that the long-term variable remuneration program be hedged as before through the repurchase of the company's shares, or through total return swaps. The Board's final proposal will be announced in the Notice of the 2011 Annual General Meeting.

Accounting policies

For the Group, this interim report was prepared in accordance with IAS 34 Interim Financial Reporting and applicable regulations in the Swedish Annual Accounts Act, and for the Parent Company in accordance with Sweden's Annual Accounts Act, chapter 9 Interim report. Unless otherwise specified below, the accounting policies that have been applied for the Group and Parent Company are in agreement with the accounting policies used in the preparation of the company's most recent annual report.

New and changed accounting policies in 2010

The Group

As of 2010 the Group applies the revised IFRS 3, Business Combinations and the amended IAS 27, Consolidated and Separate Financial Statements for reporting acquisitions and divestments of businesses. Among other things, the new rules imply that;

- the definition of business has changed,
- costs associated with a business combination (IFRS 3) are expensed,
- contingent consideration is recognized and measured at fair value at the acquisition date. In subsequent periods the liability is revalued and the effects of the revaluation are recognized in profit/loss for the period,
- in a business combination achieved in stages, the acquirer adjusts its previously held equity interest in the acquired company at its fair value and recognizes the resulting gain/loss in the income statement,
- subsequent acquisitions, without changes in control, are accounted for as equity transactions in the statement of changes in equity,
- there are two alternative methods for reporting noncontrolling interest and goodwill: the full goodwill method and the proportionate share (of the acquired net assets) method. The choice between the two methods is made on an individual basis for each acquisition.

The changes of IFRS 3 and IAS 27 that are relevant for Investor have been applied prospectively from the beginning of 2010. The changes have not lead to any adjustments of amounts reported in previous or current periods.

Parent Company

In addition to, or unlike the changes in accounting principles that were mentioned above for the Group, the changes below have an effect on the Parent Company.

RFR 2 Reporting for Legal Entities, which must be applied as of 1 January 2010, stipulates, among other things, that;

- revised IAS 1, Presentation of Financial Statements, must also be applied for the Parent Company, with some exceptions,
- costs associated with a business combination (IFRS 3) shall continue to be included in the cost of acquisition of the legal entity,
- due to a change in the Swedish Annual Accounts Act, participations in subsidiaries, associates and joint ventures can be valued at fair value in accordance with IAS 27, IAS 28 and IAS 31.

As a result of the revised IAS 1, the presentation of the Parent Company in the interim reports has been supplemented with a Statement of Comprehensive Income and a Statement of Changes in Equity. Because it is possible to apply IAS 27 in its entirety, the Parent

Company's listed associated companies are reported at fair value, with changes in value reported in the income statement, in accordance with IAS 39 and IAS 28 p.1, which corresponds to how holdings have been reported for the Group. The change is presented as a change in accounting policy and it has increased the Parent Company's opening equity for 2009 by SEK 10.6 bn., as well as impacted profit for the financial year of 2009 by SEK 15.4 bn. of which 3.2 bn. during the fourth quarter.

Other new or revised IFRSs have had no material effect on the profit/loss, financial position or disclosures for the Group or Parent company.

Presentation

As a result of having acquired the controlling interest in Aleris and Mölnlycke Health Care, changes have been made to the layout of the financial statements. The activities within the Investor Group are viewed upon as either Investing activities or Operating activities, where Operating activities relate to the business operations in subsidiaries within Operating Investments (Aleris, Grand Hôtel and Mölnlycke Health Care). All other activities are Investing activities. In the consolidated income statement, Operating profit/loss

In the consolidated income statement, Operating profit/loss for Operating activities are presented on the following line items;

- Net sales
- Cost of goods and services sold
- Distribution costs
- Administrative costs
- Research and development and other operating costs

Other line items included in Operating profit/loss relate to the investing activities. From September 2010 the previous label "Operating costs" has been renamed to "Cost of investing activities".

Acquisitions (business combinations)

During the second half of 2010, the acquisitions of Aleris and Mölnlycke Health Care were closed. In connection with each acquisition an allocation of the purchase price has been performed. These purchase price allocations are preliminary and may be adjusted during 2011.

Acquisition of controlling interest in Mölnlycke

On August 26 it was announced that Investor had signed an agreement with Morgan Stanley Principal Investments ("MSPI") and a number of related parties to acquire their 34 percent share together with MSPI's part of shareholder loans (including the 4 percent share that was communicated in Investor's interim report for the second quarter) in Mölnlycke Health Care. The consideration amounted SEK 4.672 m., of which SEK 2.016 m. is attributable to the acquisition of shares and SEK 2,656 m. to shareholder loans. After the completion of the transaction, Investor Group owns 96 percent of the company (including shareholder loans). The remaining part is owned by the Management and the Board of Mölnlycke. The transaction was finalized at December 1, after receiving approval from the competition authorities. Through the transaction, Investor achieved controlling interest in Mölnlycke.

During December, the first month after the acquisition, Mölnlycke contributed to the Investor Group consolidated net sales with SEK 790 m. and to profit with SEK -56 m., excluding effects from the purchase price allocation amounting to SEK -77 m. If the acquisition would have taken

place on January 1, 2010, the Management estimates that the Investor group consolidated net sales for the year would have increased by SEK 8,262 m. and profit for the year would have increased by SEK 183 m. excluding effects from the purchase price allocation of SEK -847 m. As an effect of this acquisition, treated as a business combination achieved in stages, the prior holding equivalent to SEK 1,347 m. has been revalued by SEK 2,399 m. The revaluation has been recognized in the consolidated income statement as value change. While establishing these amounts, the Management has assumed that the preliminary adjustments to fair value that occurred at the time of the acquisition would have been the same if the acquisition had been carried out at January 1, 2010.

Identifiable assets acquired and liabilities assumed (SEK m.)

Consideration	2 016
Consolidated goodwill	19 780
Fair value of non-controlling interest	-529
Fair value of previously held share	-3 746
Net identifiable assets and liabilities	-13 489
Current liabilities	<u>-3 154</u>
Deferred tax liabilities	-2 962
Non-current liabilities and provisions	-22 743
Cash and cash equivalents	842
Other current assets	329
Accounts receivables	1 111
Inventory	1 508
Other non-current assets	56
Deferred tax receivables	190
Property, plant and equipment	1 054
Intangible assets, primarily customer contracts	10 280

The fair value of acquired net assets has been preliminary assessed due to the pending completion of the final purchase price allocation.

The goodwill recognized for the acquisition corresponds to the company's profitability level which is based, among other things, on the company's customer offering, proven performance and market position. The goodwill recognized is not expected to be deductible for income tax purposes.

The value attributable to non-controlling interest is based on the fair value according to the transaction.

Transaction related costs amounted to SEK 19 m. and derives from external legal fees and due diligence expenses. The costs have been included under value change in the consolidated income statement.

Assets pledged as Securities and Contingent liabilities

In relation to Mölnlycke Group's syndicated credit facility of EUR 1,877 m. (1,995) a floating charge has been granted and shares and assets in group companies have been pledged as security to lenders. The credit facility is subject to financial covenants.

In connection with a third-party sale and lease-back agreement Mölnlycke Health Care has provided a mortgage of EUR 17 m. (17).

Within the Mölnlycke Group, companies at different levels have local facilities, which might constitute a liability to pay. In cases when these liabilities are not shown in the balance sheet they are considered as contingent liabilities. At December 31, 2010 these contingent liabilities amounted to

EUR 17 m. (13). There are also funds, pledged to banks, as security for factoring arrangements, and these amounted to EUR 4 m. (0).

Acquisition of controlling interest in Aleris

On July 2, Investor announced its acquisition of 99 percent of the votes in Aleris for an enterprise value of SEK 4.4 bn. The transaction was closed on August 9, after clearance by the competition authorities. Aleris has a strong market position and solid development potential in an industry that fits well into Investors ownership model.

The consideration from Investor amounted to SEK 2,620 m. and includes an earn-out of SEK 11 m. In the preliminary purchase price allocation, goodwill amounts to SEK 3,787 m. The goodwill recognized for the acquisition corresponds to the company's profitability level which is based, among other things, on the company's customer offering, proven performance and market position. The goodwill recognized is not expected to be deductible for income tax purposes.

Identifiable assets acquired and liabilities assumed (SEK m.)

Intangible assets, primarily customer contracts	614
Property, plant and equipment	360
Financial assets	6
Accounts receivables	288
Other current assets	100
Cash and cash equivalents	106
Non-current liabilities and provisions	-1 528
Deferred tax liability	-104
Current liabilities	-727
Net identifiable assets and liabilities	-885
Non-controlling interest	-282
Consolidated goodwill	3 787
Consideration	2 620

The fair value of acquired customer contracts and tax has been preliminary set pending completion of the final purchase price allocation.

The value attributable to non-controlling interest is their proportionate share of the fair value according to the transaction.

Investor has agreed to pay the seller an earn-out in the range of SEK 0-125 m. (undiscounted). The fair value of the earn-out at the acquisition date is estimated to be SEK 11 m. based on a discount rate of 7.5 percent. The estimate has not changed as of December 31, 2010.

Acquisition costs amount to SEK 61 m. and relate to external legal fees and due diligence costs. The costs have been included in value change in the Group's consolidated income statement

For the five month period from the acquisition date until December 31, Aleris contributed net sales of SEK 1,757 m. and profit of SEK 3 m. to the Group's result, excluding costs of SEK 37 m. relating to the purchase price allocation. If the acquisition had occurred on January 1, 2010, management estimates that consolidated net sales for the Investor Group would have increased by SEK 2,363 m. and consolidated profit for the period would have decreased by SEK 56 m. excluding costs relating to the purchase price allocation of SEK -52 m. In determining these amounts, management has assumed that the fair value adjustments, determined provisionally that arose on the date of acquisition would

have been the same if the acquisition had occurred on January 1, 2010.

Assets pledged as Securities and Contingent liabilities
Aleris Group has pledged shares in subsidiaries in relation to
the Group's loan facility of SEK 2,600 m. The loan facility is
subject to financial covenants. A real estate mortgage is
pledged at a value of NOK 37 m. and the Aleris Group has
provided two bank guarantees at a value of NOK 0.3 m. and
of DKK 2 m.

Review Report

Introduction

We have reviewed the Year-End Report (interim report) of Investor AB as per December 31, 2010 and the 12-month reporting period then ended. The Board of Directors and the President are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Focus and scope of the review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review consists of making inquiries, primarily of persons responsible for financial and accounting matters and applying analytical and other review procedures. A review has a different focus and is substantially less in scope than an audit conducted in accordance with Standards on Auditing in Sweden RS and other generally accepted auditing practices in Sweden.

The procedures performed in a review do not enable us to obtain assurance that we would become aware of all

significant matters that might be identified in an audit. Accordingly, the conclusion expressed on the basis of a review does not give the same level of assurance as a conclusion expressed on the basis of an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, for the Group in accordance with IAS 34 and the Annual Accounts Act, and for the Parent Company, in accordance with the Annual Accounts Act.
