# NCC wins order in Turku from University Properties of Finland

**NCC is to build a new combined school, research, and hospital building in Turku for University Properties of Finland. The order is worth SEK 560 million.**

“The new building, Medisiina D, will be a flexible and adaptable educational and work environment of a completely new kind. The premises will easily adapt to the needs of different user groups. In this way, we can ensure that we maintain a high utilization rate,” says Aki Havia, Director of Real-Estate Development at University Properties of Finland.

Medisiina will be used for educational, research and diagnostic purposes. The users of the premises will include the University of Turku, the Hospital District of Southwest Finland, the Turku University of Applied Sciences and the National Institute for Health and Welfare. The building will have a total area of about 26,000 square meters, including the basement.

“We are pleased to have been entrusted to build Medisiina in Turku, which will benefit several different user groups. Building innovative and efficient solutions is in line with NCC’s vision, namely to renew the industry and provide superior sustainable solutions,” says Esa Lehmusvuori Regional Manager at NCC Construction Finland.

Construction starts in October 2015 and will employ about 120 people. The building is scheduled for completion in December 2017. The order will be registered in the fourth quarter of 2015 in the NCC Construction Finland business area.
