Sweco wins new contract in Lithuania

Sweco has been chosen to help Lithuania's largest cement producer expand its operations in the north of the country. The contract is worth close to EUR 2.6 million.

"In December Sweco officially become Lithuania's largest consulting engineering company. That gives us greater scope to compete for the large-scale initiatives taking place in the country to modernise its society and industries," says Per Johansson, President of Sweco Central & Eastern Europe.

Akmenès Cementas is the Baltic region's largest producer of cement. The company is now expanding and building a new clinker production line. Sweco has been given responsibility to prepare basic and detail design with focus on structural engineering services. The project is scheduled for completion in 2009.

The assignment will be performed by Sweco's consultants in Lithuania, where Sweco is now the largest consulting company with 340 employees following an acquisition in December 2007. Sweco's Lithuanian unit is specialised in consulting services related to the water and environment, energy, building service systems, infrastructure and structural engineering.

Sweco is the Nordic region's leading provider of consulting services with combined expertise in engineering, environmental technology and architecture. Sweco has 5,300 employees in 10 countries and recorded annual sales of around SEK 4.6 billion in 2007. The company has projects currently underway in some 80 countries worldwide. The Sweco share is quoted on the OMX Nordic Exchange Stockholm.
