

2022

ANNUAL REPORT

2022

ACHIEVEMENTS

FINANCIAL

- Record free cash flow before working capital of \$13.6 B¹
- Record net income² of \$12.5 B
- Retired more than \$10.5 B of debt
- Completed \$3.0 B share repurchase program

OPERATIONAL

- Proved reserves increased by ~300 MMboe to ~3,800 MMboe³
- Record operational milestones in U.S. Onshore, Gulf of Mexico and International oil & gas businesses
- Record Delaware Basin well productivity
- Record OxyChem pre-tax earnings

HEALTH, SAFETY & ENVIRONMENTAL

- Board approved Occidental's updated HSE and Sustainability Principles
- U.S. oil & gas operations achieved Zero Routine Flaring in advance of the World Bank's 2030 target
- Commenced construction of our first Direct Air Capture plant
- Secured over 400 square miles of pore space and land for Gulf Coast sequestration hubs

ABOUT US

Oxy is an international energy company with assets primarily in the United States, the Middle East and North Africa. We are one of the largest oil producers in the U.S., including a leading producer in the Permian and DJ basins, and offshore Gulf of Mexico. Our midstream and marketing segment provides flow assurance and maximizes the value of our oil and gas. Our chemical subsidiary OxyChem manufactures the building blocks for life-enhancing products. Our Oxy Low Carbon Ventures subsidiary is advancing leading-edge technologies and business solutions that economically grow our business while reducing emissions. We are committed to using our global leadership in carbon management to advance a lower-carbon world.

¹ For a reconciliation to the most comparable GAAP financial measure of operating cash flow from continuing operations, see the inside back cover.

² Net income attributable to common shareholders.

³ Million barrels of oil equivalent.

LETTER

FROM CEO

Through exceptional execution across our world-class asset base, Oxy delivered on our commitment to return capital to shareholders in 2022 with the triple benefit of a growing and sustainable common dividend, a strengthened financial position and completion of our \$3 billion share repurchase program.

Oxy's high-return assets are the engine of our success, generating efficient production and a robust drilling inventory. Our proved reserves growth far outpaced our production, and we exited 2022 with proved reserves of over 3.8 billion barrels of oil equivalent (Boe), an increase of more than 300 million Boe from 2021. In the Gulf of Mexico, we completed new tie-backs to our existing platforms, contributing to several production milestones. We set numerous records in onshore operations in 2022, including record well productivity in the Delaware Basin. We also achieved record lateral lengths in the Delaware Basin, DJ Basin, Oman, and most notably in the Midland Basin, where our well Lulu 3641DP exceeded 18,000 feet to become our longest lateral on record. Remarkably, this well was drilled in slightly over 12 days. Milestones like these showcase our teams' focus on safely and efficiently expanding the boundaries of drilling technology. Our teams in Algeria, Oman and the UAE are also creating tremendous value with our government partners. The Al Hosn project, for example, is already achieving production milestones from its ongoing gas plant expansion, which will be completed in 2023.

OxyChem's workforce had another banner year in 2022, with record pre-tax earnings. In May, the U.S. Department of Energy selected OxyChem as a Better Practice Award winner for innovations in energy efficiency. In August, we announced the planned modernization and expansion of OxyChem's Battleground chlor-alkali plant in Houston, with completion expected in 2026.

These projects are not only integral to efficient development and production; they help us advance Oxy's HSE and Sustainability Principles and further integrate our worldwide framework for safe, reliable and sustainable operations. In 2020, Oxy was the first U.S. oil and gas company to endorse the World Bank's Zero Routine Flaring by 2030 initiative, and I'm pleased that our U.S. oil and gas operations achieved this milestone in 2022, eight years ahead of the World Bank's target, with our international operations on track to end routine flaring before 2030. We are implementing additional measures to rapidly detect, repair and prevent methane emissions as a member of the UN-sponsored Oil and Gas Methane Partnership 2.0, the Methane Guiding Principles and the Oil and Gas Climate Initiative's Aiming for Zero Methane Emissions pledge. To further electrify our operations, we reached an agreement in November for NET Power, LLC to build its first utility-scale natural gas power plant with near-zero emissions in the Permian Basin, targeted to be online by 2026.

¹ For a reconciliation to the most comparable GAAP financial measure of operating cash flow from continuing operations, see the inside back cover of this report.

We also made significant progress in our low-carbon ventures that leverage our carbon management and major projects expertise, infrastructure, key partnerships and innovative technologies to advance our pathway to net-zero emissions and help others do the same. In September 2022, our subsidiary 1PointFive began construction on our first Direct Air Capture (DAC) plant in Ector County, Texas. With a planned capacity of 500,000 metric tons, this DAC plant will be the world's largest of its kind and is expected to begin commercial operations in 2025. 1PointFive has executed agreements to sell carbon dioxide (CO₂) removal credits from our DAC plant to prospective purchasers in diverse industry sectors. As of March 2023, 1PointFive has also secured substantial pore space and land in multiple locations along the U.S. Gulf Coast and in the Permian Basin for carbon sequestration hubs to store captured CO₂ from DAC and industrial facilities.

Oxy generated record net income attributable to common shareholders of \$12.5 billion and record free cash flow before working capital of \$13.6 billion,¹ driven by our operational records and strong commodity prices. These results enabled us to retire more than \$10.5 billion of debt, surpassing our 2022 target and strengthening our balance sheet, with estimated savings of more than \$400 million per year in interest and financing costs. In March 2023, Moody's Investors Service upgraded Oxy's senior unsecured credit rating to investment grade. As an outgrowth of our strong shareholder returns, we expect redemptions of our preferred equity beginning in 2023 will further rebalance our enterprise value in favor of common shareholders.

We were honored to be recognized by Fortune once again as one of the World's Most Admired Companies in 2023, ranking No. 1 in the Mining, Crude-Oil Production category. Oxy has made Fortune's list in this category every reported year since 2008, including the No. 1 ranking 12 times. To help our employees sustain their exceptional performance from 2022, we are continuing to build on our Diversity, Inclusion and Belonging, Workforce Development, and Strategic Technical Excellence programs.

In closing, I want to thank our Board of Directors for their strategic oversight and our employees for their dedication to maximize value for our shareholders in 2023 and over the long term, as we deliver the energy, products and solutions needed by our customers, communities and society at large.

Commission File Number 1-9210

Occidental Petroleum Corporation

(Exact name of registrant as specified in its charter)

State or other jurisdiction of incorporation or organization	Delaware
I.R.S. Employer Identification No.	95-4035997
Address of principal executive offices	5 Greenway Plaza, Suite 110 Houston, Texas
Zip Code	77046
Registrant's telephone number, including area code	(713) 215-7000

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol	Name of Each Exchange on Which Registered
Common Stock, \$0.20 par value	OXY	New York Stock Exchange
Warrants to Purchase Common Stock, \$0.20 par value	OXY WS	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer	<input checked="" type="checkbox"/>	Accelerated Filer	<input type="checkbox"/>	Emerging Growth Company	<input type="checkbox"/>
Non-Accelerated Filer	<input type="checkbox"/>	Smaller Reporting Company	<input type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes ☐ No ☒

The aggregate market value of the registrant's Common Stock held by nonaffiliates of the registrant was approximately \$53.0 billion computed by reference to the closing price on the New York Stock Exchange of \$58.88 per share of Common Stock on June 30, 2022.

As of January 31, 2023, there were 900,072,447 shares of Common Stock outstanding, par value \$0.20 per share.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement, relating to its 2022 Annual Meeting of Stockholders, are incorporated by reference into Part III of this Form 10-K.

2022 Form 10-K	Occidental's Annual Report on Form 10-K for the year ended December 31, 2022

**Part I****ITEMS 1 AND 2. BUSINESS AND PROPERTIES**

In this Form 10-K, “Occidental”, “we”, “our” and “the Company” refers to Occidental Petroleum Corporation, a Delaware corporation incorporated in 1986, or Occidental and one or more entities in which it owns a controlling interest (subsidiaries). Occidental conducts its operations through its various subsidiaries and affiliates. Occidental’s executive offices are located at 5 Greenway Plaza, Suite 110, Houston, Texas 77046; telephone (713) 215-7000.

GENERAL

Occidental’s principal businesses consist of three reporting segments: oil and gas, chemical and midstream and marketing. The oil and gas segment explores for, develops and produces oil (which includes condensate), NGL and natural gas. The chemical segment primarily manufactures and markets basic chemicals and vinyls. The midstream and marketing segment purchases, markets, gathers, processes, transports and stores oil, NGL, natural gas, CO₂ and power. It also optimizes its transportation and storage capacity, and invests in entities that conduct similar activities, such as WES.

The midstream and marketing segment also includes OLCV. OLCV seeks to leverage Occidental’s legacy of carbon management expertise to develop CCUS projects, including the commercialization of DAC technology, and invests in other low-carbon technologies intended to reduce GHG emissions from its operations and strategically partner with other industries to help reduce their emissions.

HUMAN CAPITAL RESOURCES

Occidental’s culture is built upon the following core values:

- Lead with Passion
- Outperform Expectations
- Deliver Results Responsibly
- Unleash Opportunities
- Commit to Good

Occidental’s human capital resources and programs are managed by its Human Resources department, with support from business leaders across the company. Occidental’s senior management team plays a key role in setting and monitoring Occidental’s culture, values and broader human capital management practices, with oversight by Occidental’s Board of Directors, the Sustainability and Shareholder Engagement Committee of the Board and the Environmental, Health & Safety Committee of the Board. The Sustainability and Shareholder Engagement Committee periodically receives briefings on Occidental’s human capital strategy and the Environmental, Health & Safety Committee receives briefings on employee and contractor health and safety statistics and related matters, including workforce health and safety initiatives. Senior management and the Board also engage regularly on workforce-related topics.

To enhance senior leadership’s engagement with employees, Occidental hosts quarterly executive virtual conversations where Occidental’s President and CEO, Vicki Hollub, and other executive officers review recent financial and operational performance as well as topics pertinent to employees. Occidental’s CEO also answers employee questions during these conversations. The quarterly executive virtual conversations form one piece of Occidental’s employee outreach and engagement, which consists of newsletters, focus groups and employee resource groups, among other channels and tools.

DIVERSITY, INCLUSION AND BELONGING

The intent of Occidental’s DIB culture is to create an environment where employees’ differences are appreciated, celebrated and encouraged. Occidental conducted a robust survey across the organization, the results of which were reviewed by the Board and became a basis for Occidental’s core values.

The Company’s human capital resources extend across several regions. Occidental has attracted, and continues to recruit, a diverse workforce of exceptional talent, including employees from many nations. This diversity enriches Occidental’s culture, its employees’ experiences on the job and contributes to an innovative and effective business model that encourages local communities to thrive. DIB powers Occidental’s innovation and spirit of excellence, as well as its knowledge and results. Embedding DIB into Occidental’s culture enhances collaboration, performance and growth and helps uphold its organizational values.

The DIB Advisory Board, which is chaired by Occidental’s President and CEO and includes members of senior leadership, provides DIB governance and oversight to ensure that Occidental’s integrated DIB strategy is executed and aligns with the Company’s mission, vision and strategic objectives. The DIB Ambassador Committee, which is chaired by Occidental’s Vice President of Diversity and Inclusion, consists of a diverse group of employee representatives from all

business segments, domestic and international. This committee leads company-wide initiatives to raise DIB awareness through educational resources and programs. Educational sessions are available to the entire workforce for continued growth and development on topics such as inclusive leadership, diversity advocacy, recognizing and addressing micro aggressions, overcoming unconscious bias and psychological safety at work.

Occidental's senior management, together with the support of Occidental's DIB Advisory Board and the DIB Ambassador Committee, works to leverage employees' varied backgrounds, unique experiences and points of view to spark innovation, empower growth, outperform expectations and maximize results.

In October 2022, as part of Occidental's integrated DIB strategy, the Human Resources department launched eight new Employee Resource Groups. An ERG is a group of employees who actively engage in communicating or gathering around a central purpose, mission, background or activity. ERGs can help advance inclusion and a sense of belonging of employees with a common set of interests and/or goals. The mission and goals of ERGs are fully aligned with Occidental's expectation to be an employer, partner, and neighbor of choice. Each ERG is inclusive of all employees—everyone can benefit from and participate in an ERG, either as a member or an ally. Occidental's ERGs are as follows:

- Allyship
- Black Employee Network
- Early Career Network
- FRIEND (Friends, Relatives and Individuals Empowering Neurodiversity)
- Hispanic Network
- Mental Health Matters
- Mosaic (Multicultural) Network
- Out (LGBT+) Network
- Veterans Network
- Women of Oxy Network

TALENT ATTRACTION AND RETENTION

Occidental recruits candidates through job fairs, professional societies and campus recruiting, including expanded recruiting at historically black colleges and universities.

In 2022, Occidental began to return to in-person interviews, and the university relations team worked with universities and their staff to ensure that any in-person interviews and events were conducted safely. In addition, all college internships were in-person with appropriate health and safety precautions as senior leadership continued to monitor federal, state and local guidance and public health data.

In response to employee feedback received by the Human Resources department, to attract and retain talent, Occidental implemented the Balanced Workplace Program in 2022 under which eligible office-based employees may opt to work three days in the office and two days at home each week. The program affords employees more flexibility and promotes increased balance. The Human Resources department solicited feedback from employees participating in the Balanced Workplace Program regarding their experience and to gauge interest in other work arrangements. Following review of such feedback, in June 2022, the Human Resources department began conducting a fully remote pilot program for employees in certain functions.

In 2021, Occidental implemented its global Strategic Technical Excellence Program to recruit, develop and retain highly skilled and valued geoscientists, engineers, scientists and other petrotechnical professionals who will collectively drive innovation, advance performance and inspire the future of energy. STEP is a highly valued program for technical contributors to focus and advance on a technical, non-managerial career path and provides a competitive advantage for Occidental through the optimum application of technology. The Chief Petrotechnical Officer leads all aspects of STEP and reports directly to Occidental's President and CEO.

Occidental also offers employees development opportunities, competitive compensation and attractive benefits, as discussed further below.

DEVELOPMENT AND TRAINING

Occidental employees have access to extensive development and training opportunities and programs to expand their personal and professional skills and knowledge. Occidental's approach to education includes:

- Leadership/management training to develop leadership skills at all levels;
- Self-directed learning and development, including web-based and instructor-led training;
- An employee development library;
- Mentoring programs;
- Employee resource groups; and
- Educational assistance to support employees' continuing education.

In January 2022, Occidental expanded its development and training opportunities and programs from 94 on-demand professional development classes to over 3,000 on-demand classes with over 26,000 types of learning materials (videos, audio books, etc.).

In May 2022, Occidental launched its new domestic mentoring program, EMPower. The purpose of this program is to provide an avenue for enhancing critical business skills, broadening employee networks, and engaging our employees. This program is available for all domestic employees. EMPower is intended to help employees reach their potential through training and empowerment, allowing employees to advance in their careers and develop critical skills.

EMPLOYEE COMPENSATION AND BENEFITS

In addition to prioritizing employee engagement and development, Occidental's compensation and benefits program is designed to attract and retain the talent necessary to achieve its business strategy. The compensation and benefits program recognizes and rewards strong company and individual performance with competitive base salaries, an annual bonus program, recognition awards, long-term performance incentives and advancement opportunities. In 2022, Occidental awarded a one-time special bonus to recognize the innovative and dedicated work of the company's employees and resulting strong operational and financial performance. The Company's compensation and benefits program is routinely reviewed and benchmarked to ensure competitiveness and to provide the benefits that matter most to current and future employees.

Occidental strives to give employees the tools and resources they need to succeed both professionally and personally and to foster a safe and collaborative work environment. To that end, Occidental offers, and regularly evaluates, its comprehensive health, welfare and retirement and savings benefits plans, professional memberships and work/life balance benefits. It also provides programs to enhance and support employees' overall well-being, including their physical, mental, social and financial health.

In January 2022, Occidental introduced a new benefit service provider that provides a health care concierge service to help families manage and navigate medical, in-home care, housing, and social/emotional support, for their own or their families' complex care needs. Furthermore, to make the most of employees' benefits, it is important employees are aware of all that the company has to offer to help employees live well and work well. In the fall of 2022, members of the company's Employee Benefits department presented a Total Rewards Roadshow and traveled to numerous Occidental sites to connect with employees, answer questions and share valuable information about benefits.

MENTAL HEALTH

Addressing well-being is imperative to ensure that Occidental's employees stay resilient, healthy and productive. In 2021, Occidental launched the global well-being campaign "Commit to You" to educate employees and leaders about how its benefits can support them under the four pillars of well-being: mental, physical, social and financial.

In 2022, Occidental prioritized the importance of mental health and well-being through manager and employee programs and events. One program, sponsored by OxyHealth and the Mental Health Matters ERG, was a "Talk Saves Lives" conversation with the American Foundation for Suicide Prevention to learn about common risk factors, how to spot warning signs in others, and how to keep employees, loved ones, and those in the community safe. Most recently, on January 1, 2023, the company launched an enhanced mental health benefit through Lyra Health. Lyra Health provides mental and emotional healthcare that is effective, convenient and personalized to all employees globally.

Occidental continues to be a member of One Mind at Work, an employer coalition dedicated to implementing a gold standard for workplace mental health by combating stigma, improving access to treatment and prevention services and fostering a psychologically safe culture. In 2022, Occidental's CEO and the Chairman of One Mind at Work participated in a video broadcast for employees about breaking down the stigma around mental health challenges at work and what Occidental employees can expect as we transition into an organization where mental health is an accepted and visible part of its well-being.

HEALTH AND SAFETY

The health and safety of Occidental's workforce and communities is a top priority. In 2022, the Board approved updates to the company's longstanding Health, Safety and Environmental Principles (as revised, the HSE and Sustainability Principles) that management recommended based on engagement with shareholders, employees and other stakeholders. The HSE and Sustainability Principles reinforce the alignment among Occidental's core values, goals and strategies, underpin the operational management system, and help to guide Occidentals global workforce. Occidental endeavors to apply these principles to improve workplace and contractor safety, prevent and mitigate incidents, and safeguard people and the environment in the communities where it operates. In addition to complying with applicable HSE laws, regulations, policies and procedures, employees and contractors are empowered and expected to stop any job or activity if they observe conditions that may give rise to a safety or environmental incident, and they are often recognized for doing so.

WORKFORCE COMPOSITION

The below table approximates regional distribution of Occidental's employees as of December 31, 2022:

	North America	Middle East	Latin America	Other ^(a)	Total ^(b)
Union	416	800	50	—	1,266
Non-Union	7,842	2,624	121	120	10,707
Total	8,258	3,424	171	120	11,973

^(a) Other headcount included North Africa, Europe and Asia.

^(b) Included approximately 2,800 employees in OxyChem.

The below table approximates the self-reported gender and ethnicity, excluding non-specified ethnicities, of Occidental's domestic leadership and other employees as of December 31, 2022. Executive and senior officials and managers are considered top leadership while first- and mid-level officials and managers are considered junior leadership. Individual contributors are excluded from the leadership categories but included in all employee percentages.

	Male	Female	White	non-White
All employees	78 %	22 %	66 %	34 %
All leadership	78 %	22 %	75 %	25 %
Top leadership	83 %	17 %	85 %	15 %
Junior leadership	78 %	22 %	75 %	25 %

We have also publicly disclosed the Consolidated EEO-1 Report that Occidental submitted in 2022 to the U.S. Equal Employment Opportunity Commission for the 2021 fiscal year, which can be found on the sustainability section of our website.

ENVIRONMENTAL REGULATION

For environmental regulation information, including associated costs, see the information under Environmental Liabilities and Expenditures in the Management's Discussion and Analysis of Financial Condition and Results of Operations section under Part II, Item 7 of this Form 10-K, Risk Factors under Part I, Item 1A of this Form 10K and in Note 12 - Environmental Liabilities and Expenditures and Note 13 - Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

AVAILABLE INFORMATION

Occidental's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports are available free of charge on its website, www.oxy.com, as soon as reasonably practicable after Occidental electronically files the material with, or furnishes it to, the SEC. In addition, copies of Occidental's annual report will be made available, free of charge, upon written request.

From time to time, Occidental has made and expects in the future to use its website as a channel of distribution of material information regarding the Company. Financial and other material information regarding the Company is routinely posted on Occidental's website and accessible at www.oxy.com/investors/.

Information contained on Occidental's website is not part of or incorporated into this Form 10-K or any other filings with the SEC.

OIL AND GAS OPERATIONS

GENERAL

Occidental primarily conducts its ongoing exploration and production activities in the United States, the Middle East and North Africa. Within the United States, Occidental has operations primarily in Texas, New Mexico and Colorado, as well as offshore in the Gulf of Mexico. Internationally, Occidental primarily conducts operations in the UAE, Oman and Algeria. Refer to the Oil and Gas Acreage section in Supplemental Oil and Gas Information under Item 8 of this Form 10-K for further disclosure of Occidental's holdings of developed and undeveloped oil and gas acreage.

COMPETITION

As a producer of oil, NGL and natural gas, Occidental competes with numerous other domestic and international public, private and government producers. Oil, NGL and natural gas are sensitive to prevailing global and local market conditions, as well as anticipated market conditions. Occidental's competitive strategy relies on producing hydrocarbons in a capital efficient manner through developing conventional and unconventional fields, and utilizing primary, secondary (waterflood) and tertiary (CO₂ and steam flood) recovery techniques in areas where Occidental has a competitive advantage as a result of its successful operations or investments in shared infrastructure. Occidental also competes to develop and produce its worldwide oil and gas reserves safely, sustainably and cost-effectively, maintain a skilled workforce and use high quality service providers. Occidental believes that its core competencies in CO₂ separation, transportation, use, recycling and storage in EOR provide a competitive advantage over its peers as the world transitions to a less carbon-intensive economy and seeks to remove CO₂ from the atmosphere.

PROVED RESERVES AND SALES VOLUMES

The table below shows Occidental's year-end oil, NGL and natural gas proved reserves. See the information under Oil and Gas Segment in the Management's Discussion and Analysis section under Part II, Item 7, of this Form 10-K for details regarding Occidental's proved reserves, the reserves estimation process, sales and production volumes, production costs and other reserves-related data.

COMPARATIVE OIL AND GAS PROVED RESERVES AND SALES VOLUMES

Oil and NGL is in MMbbl; natural gas is in Bcf.

	2022				2021				2020			
	Oil	NGL	Gas	Boe ^(a)	Oil	NGL	Gas	Boe ^(a)	Oil	NGL	Gas	Boe ^(a)
Proved Reserves ^(b)												
United States	1,639	654	4,073	2,972	1,466	564	3,419	2,600	1,144	384	2,446	1,936
International	274	192	2,277	845	305	202	2,431	912	331	215	2,573	975
Total	1,913	846	6,350	3,817	1,771	766	5,850	3,512	1,475	599	5,019	2,911
Sales Volumes												
United States	185	83	445	342	182	79	477	341	205	81	561	380
International	41	12	164	81	44	12	172	85	59	13	195	104
Total	226	95	609	423	226	91	649	426	264	94	756	484

^(a) Natural gas volumes are converted to Boe at six Mcf of gas per one barrel of oil. Conversion to Boe does not necessarily result in price equivalency.

^(b) Excluded reserves and sales volumes related to Occidental's discontinued operations.

CHEMICAL OPERATIONS

GENERAL

OxyChem owns and operates manufacturing plants at 21 domestic sites in Alabama, Georgia, Illinois, Kansas, Louisiana, Michigan, New Jersey, Ohio, Tennessee and Texas and at two international sites in Canada and Chile.

COMPETITION

OxyChem competes with numerous other domestic and international chemical producers. OxyChem's market position was first or second in the United States in 2022 for the principal basic chemical products it manufactured and marketed as well as for VCM. OxyChem ranks in the top three producers of PVC in the United States. OxyChem's competitive strategy is to be a low-cost producer of its products in order to compete on price.

OxyChem produced the following products:

Principal Products	Major Uses	Annual Capacity
Basic Chemicals		
Chlorine	Raw material for EDC, water treatment and pharmaceuticals	3.2 million tons
Caustic soda	Pulp, paper and aluminum production	3.3 million tons
Chlorinated organics	Refrigerants ^(a) , silicones and pharmaceuticals	1 billion pounds
Potassium chemicals	Fertilizers, batteries, soaps, detergents and specialty glass	0.4 million tons
EDC	Raw material for VCM	2.1 billion pounds
Chlorinated isocyanurates	Swimming pool sanitation and disinfecting products	150 million pounds
Sodium silicates	Catalysts, soaps, detergents and paint pigments	0.6 million tons
Calcium chloride	Ice melting, dust control, road stabilization and oil field services	0.7 million tons
Vinyls		
VCM	Precursor for PVC	6.2 billion pounds
PVC	Piping, building materials and automotive and medical products	3.7 billion pounds
Ethylene	Raw material for VCM	1.3 billion pounds ^(b)

^(a) Included 4CPe, a raw material used in making next generation refrigerants with low global warming and zero ozone depletion potential.

^(b) Amount is gross production capacity for 50/50 joint venture with Orbia.

MIDSTREAM AND MARKETING OPERATIONS

GENERAL

Occidental's midstream and marketing operations primarily support and enhance its oil and gas and chemical businesses. The midstream and marketing segment strives to optimize the use of its gathering, processing, transportation, storage and terminal commitments and to provide access to domestic and international markets. To generate returns, the segment evaluates opportunities across the value chain to provide services to Occidental subsidiaries, as well as third parties. The midstream and marketing segment operates or contracts for services on gathering systems, gas plants, co-generation facilities and storage facilities and invests in entities that conduct similar activities, such as WES and DEL, which are accounted for as equity method investments. WES owns gathering systems, plants and pipelines and earns revenue from fee-based and service-based contracts with Occidental and third parties. DEL owns and operates a pipeline that connects its gas processing and compression plant in Qatar and its receiving facilities in the UAE, and uses its network of DEL-owned and other existing leased pipelines to supply natural gas across the UAE and to Oman. The midstream segment includes Al Hosn Gas, a processing facility in the UAE that removes sulfur from natural gas and processes the natural gas and sulfur for sale. The midstream and marketing segment also includes OLCV businesses.

LOW-CARBON BUSINESS

Leveraging Occidental's carbon management expertise, OLCV primarily focuses on advancing carbon removal and CCUS projects, including developing and commercializing DAC technology. OLCV also invests in third-party entities that are developing technologies that advance other low-carbon initiatives, including NET Power, a clean energy technology company.

COMPETITION

Occidental's midstream and marketing businesses operate in competitive and highly regulated markets. Occidental competes for capacity and infrastructure for the gathering, processing, transportation, storage and delivery of its products, which are sold at current market prices or on a forward basis to refiners, end users and other market participants. Occidental's marketing business competes with other market participants on exchange platforms and through other bilateral transactions with direct counterparties. OLCV and its businesses and investees also face a broad range of competitors including state-owned enterprises; multinational companies in the energy, infrastructure, manufacturing, transportation, technology and financial sectors; and startup companies, with nascent markets for low-carbon products and CO₂ removal credits that are subject to rapidly changing laws, regulations, policies and reporting and verification mechanisms that can significantly impact the financing, construction and operation of projects and the development of markets.

Occidental's midstream and marketing operations are conducted in the locations described below as of December 31, 2022:

Location	Description	Capacity ^(a)
Gas Plants		
Texas, New Mexico and Colorado	Occidental and third-party-operated natural gas/CO ₂ gathering, compression and processing systems	2.2 Bcf/d
Texas, Rocky Mountains and Other	Equity investment in WES - gas processing facilities	5.0 Bcf/d
UAE	Natural gas processing facilities for Al Hosn Gas	1.3 Bcf/d
Pipelines and Gathering Systems		
Texas, New Mexico and Colorado	CO ₂ fields and pipeline systems transporting CO ₂ to oil and gas producing locations	2.8 Bcf/d
Qatar, UAE and Oman	Equity investment in the DEL natural gas pipeline	3.2 Bcf/d
United States	Equity investment in WES involved in gathering and transportation	14,712 miles of pipeline
Power Generation		
Texas and Louisiana	Occidental-operated power and steam generation facilities	1,218 megawatts of electricity and 1.6 million pounds of steam per hour
OLCV		
Texas	Occidental-owned solar generation facility	16.8 megawatts of electricity
Texas	Equity investment in a zero-emission natural gas generation demonstration facility	up to 50 megawatts of electricity
Canada	Equity investment in developing DAC technology, which captures CO ₂ directly from the atmosphere	N/A

^(a) Amounts are gross, including interests held by third parties. Gas capacities are expressed in Bcf/d.

ITEM 1A. RISK FACTORS

Risks related to government regulations and the environment

Governmental actions and political instability may adversely affect Occidental's businesses and results of operations.

Occidental's businesses are subject to, and may be adversely affected by, the actions and decisions of many federal, state, local and international governments and political interests. As a result, Occidental faces risks of:

- New or amended laws and regulations, or new or different applications or interpretations of existing laws and regulations, including those related to drilling, manufacturing or production processes (including flaring and well stimulation techniques such as hydraulic fracturing and acidization), pipelines, labor and employment, taxes, royalty rates, permitted production rates, entitlements, import, export and use of raw materials, equipment or products, use or increased use of land, water and other natural resources, air emissions (including restrictions, taxes or fees on emissions of methane, CO₂, or other substances), water recycling and disposal, waste minimization and disposal, public and occupational health and safety, the manufacturing of chemicals, asset integrity management, the marketing or export of commodities, security, environmental protection, and climate change-related and sustainability initiatives, all of which may restrict or prohibit activities of Occidental or its contractors or customers, increase Occidental's costs or reduce demand for Occidental's products.
- Violation of certain governmental laws and regulations, which may result in strict, joint and several liability and the imposition of significant administrative, civil or criminal fines and penalties and may also result in liability for remedial actions or assessments. Litigation, orders or other proceedings asserting strict, joint and several liability under such laws and regulations may seek to impose significant administrative, civil or criminal fines and penalties, damages or remedial actions or to require significant changes to, or even closure of, facilities or operations;
- Refusal of, or delay in, the extension or grant of exploration, development or production contracts; and
- Development delays and cost overruns due to approval delays for, or denial of, drilling, construction, environmental and other regulatory approvals, permits and authorizations

In November 2021, Congress passed and President Biden signed the Infrastructure Investment and Jobs Act. The Infrastructure Investment and Jobs Act reinstated the federal Superfund excise taxes on various chemicals that OxyChem manufactures. These excise taxes could lead to higher costs and impact margins. The Infrastructure Investment and Jobs Act also authorized the U.S. government to award grants for CCUS research, development and demonstration; carbon transport and storage infrastructure and permitting; carbon utilization and market development; and carbon removal. These grant programs were developed during 2022 and the awarding of grants in 2023 or future years could affect the selection and deployment of competing low-carbon technologies and the financing and market acceptance of proposed projects.

In August 2022, Congress passed and President Biden signed the Inflation Reduction Act, which expanded policy support and incentives for deployment of DAC, CCUS, hydrogen and other low-carbon projects, including several enhancements to federal tax credits. The Inflation Reduction Act also established an escalating methane emissions fee that the EPA will impose on certain upstream and midstream oil and gas operations per metric ton of methane emissions above certain thresholds commencing in 2024. The impact of this fee on Occidental will depend on implementing regulations that are expected to be issued in 2023.

In November 2021, the U.S. Department of the Interior released its Report on the Federal Oil and Gas Leasing Program, recommending increasing royalty rates and rents for drilling programs on federal public lands and in federal offshore waters, in addition to prioritizing leasing in areas with known resource potential and in proximity to existing oil and gas infrastructure and avoiding leasing in areas with competing uses such as recreation, wildlife habitat, conservation and historical and cultural resources. If the U.S. Department of the Interior were to issue regulations implementing these recommendations, Occidental's subsidiaries could incur increased federal royalties and face restrictions on future potential drilling sites or infrastructure on federal lands.

In January 2022, the U.S. District Court for the District of Columbia invalidated the results of the BOEM oil and gas lease sale 257 in the Gulf of Mexico, in which an Occidental subsidiary was the high bidder on 30 additional new blocks located nearby to its existing host platforms, ruling that the BOEM's environmental analysis of GHG emissions was inadequate under NEPA. The U.S. Department of the Interior, which oversees federal oil and gas development, is currently reviewing the decision. In August 2022, Congress reinstated the lease sale in the IRA, and the Occidental subsidiary received the leases in October 2022. Motions to dismiss are pending in the legal challenge to the lease sale. The BOEM's authorization to hold lease sales expired in July 2022. The Bureau of Ocean Energy Management has issued a proposed 2023-2028 Five-Year Program which is subject to environmental review and public comment, and must be approved before future lease sales can occur.

In June 2022, advocacy groups filed a petition in the U.S. District Court for the District of Columbia against the BLM seeking to invalidate numerous drilling permits for oil and gas wells on federal lands in New Mexico and Wyoming, and potentially other states, that were approved by the BLM during the Biden Administration, including certain permits obtained by Occidental subsidiaries. The plaintiffs allege that the BLM failed to comply with various statutes, including NEPA, the Endangered Species Act and the Federal Land Policy and Management Act, by not adequately addressing GHG emissions

and climate change in the environmental documents underlying the approvals. Occidental, other producers and multiple trade associations have intervened and the BLM is preparing an administrative record. Similar cases challenge permits issued to other operators with respect to the BLM's consideration of GHG and other air emissions under NEPA and other statutes.

In January 2023, the White House Council on Environmental Quality issued interim guidance to federal agencies for evaluating GHG emissions under NEPA that applies to certain federal actions such as oil and gas leasing and permitting on federal lands. The interim guidance, which is subject to public comment until March 2023, recommends that agencies quantify a project's reasonably foreseeable direct and indirect GHG emissions and assign a monetary impact of the GHGs by applying a social cost of carbon selected by the government.

Although the foregoing BOEM proposed Five-Year Program for offshore leasing, the White House Council on Environmental Quality guidance and lawsuits do not affect Occidental's existing production or planned 2023 drilling and completions activity, restrictions or uncertainty regarding federal lease sales and permits and associated royalty and regulatory requirements could impact the future ability to develop resources efficiently on federal lands and in federal waters.

Significant areas of the Permian Basin in West Texas and Southeast New Mexico are subject to current or proposed land use restrictions under the Endangered Species Act. In August 2022, in response to a lawsuit by advocacy groups, the U.S. Fish and Wildlife Service agreed to decide before the end of June 2023 whether to add the Dunes Sagebrush Lizard to the list of threatened and endangered species. In November 2022, the U.S. Fish and Wildlife Service published a final rule listing the Lesser Prairie Chicken as endangered. Although Occidental has entered into voluntary conservation agreements with respect to these and other species and their associated habitat in the Permian Basin, listing of such species may impose significant operational requirements and costs and increase the potential for litigation and enforcement actions.

In January 2021, the COGCC adopted new regulations that impose siting requirements or "setbacks" on certain oil and gas drilling locations based on the distance of a proposed well pad to occupied structures. Pursuant to the regulations, well pads cannot be located within 500 feet of an occupied structure without the consent of the property owner. As part of the permitting process, the COGCC will consider a series of siting requirements for all drilling locations located between 500 feet and 2,000 feet of an occupied structure. Alternatively, the operator may seek a waiver from each owner and tenant within the designated distance. Occidental has a dedicated, multidisciplinary stakeholder relations team that conducts regulatory and community outreach with respect to its permit applications and operations in Colorado. Under these new regulations and through thoughtful surface location planning, Occidental has obtained COGCC approval for five Oil and Gas Development Plans, inclusive of 12 well pad and facility locations and approximately 150 wells. In addition to the approximately 150 wells approved through the Oil and Gas Development Plan process, during the third quarter of 2022, Occidental became the first oil and gas operator in Colorado to obtain COGCC approval for the first Comprehensive Area Plan under the new COGCC rules. This comprehensive plan will support nine well pads and approximately 140 new wells and will provide for substantial future development in a geographically remote area on Colorado's eastern plains. Oil and Gas Development Plans associated with the Comprehensive Area Plan will be submitted in 2023. While, as of December 31, 2022, Occidental is permitted, or had permit applications submitted to applicable regulatory agencies, for nearly all planned 2023 drilling and completions activity in the DJ Basin, any significant delays could result in changes to our development program in the DJ Basin and our ability to establish new proved undeveloped locations by meeting the SEC's "reasonably certain" threshold for adding PUD reserves.

Texas and New Mexico have experienced an increase in seismic activity, with events measuring magnitude 3 or greater in each state. In the fourth quarter of 2021, both states issued new guidelines for operators to prevent or mitigate seismic activity, focused on produced water disposal wells. These guidelines also require operators to implement response plans for activities within agency-designated seismic response areas. These states have curtailed water disposal and suspended permits in seismic response areas, particularly in deep disposal wells. Occidental does not operate deep disposal wells in the seismic response areas established by the state agencies to date, and its shallow disposal wells have been authorized to operate at agency-approved volume limits. Occidental also has central water treatment and recycling facilities that reduce the need for disposal of produced water. While Occidental's ability to drill and complete wells or to dispose of surplus produced water has not been impacted by these seismic guidelines to date, increased seismicity, or regulatory responses to seismic events, could impact the location, timing and cost of Occidental's development program and existing operations in seismic response areas.

In 2016, the Toxic Substances Control Act (TSCA) was amended to expand the EPA's authority to evaluate and regulate new and existing chemicals. The EPA is currently evaluating, or developing regulations with respect to, certain chemicals that OxyChem produces or uses in its chemical manufacturing operations. In April 2022, the EPA issued a proposed rule with respect to one chemical used in OxyChem's manufacturing operations, but the EPA has not issued final regulations under the 2016 TSCA amendments with respect to any of these chemicals to date. Depending on the scope of any such final regulations, or of future TSCA regulations, OxyChem's ability to use certain chemicals or to manufacture or sell certain of its products could be restricted and its costs could increase.

In addition, Occidental has experienced and may continue to experience adverse consequences, such as risk of loss or production limitations, because certain of its international operations are located in countries affected by political instability, nationalizations, corruption, armed conflict, terrorism, insurgency, civil unrest, security problems, labor unrest, OPEC production restrictions, equipment import restrictions and sanctions. Exposure to such risks may increase if a greater percentage of Occidental's future oil and gas production or revenue comes from international sources.

Climate change and further regulation of GHG and other air emissions may adversely affect Occidental's businesses and results of operations.

Continuing political, social and industry attention to climate change has resulted in both existing and pending international agreements and national, regional and local legislation and regulatory programs to reduce GHG emissions. The Biden Administration has identified climate change as a priority and has described a variety of avenues to prohibit or restrict oil and gas development activities in certain areas. In addition to the governmental actions described above, in February 2021, the Biden Administration established an Interagency Working Group to assign a price to the impact of each metric ton of GHG emissions that federal agencies could use to assess the benefits of more stringent GHG regulations and policy support for low-carbon projects. The Interagency Working Group set an interim value of \$51 per metric ton of CO₂ emissions at a 3% discount rate, and is expected to issue an updated value in April 2023.

In June 2021, Congress and President Biden reinstated the methane provisions of EPA's 2012 and 2016 regulations, an action that Occidental supported. In November 2021, the White House Office of Domestic Climate Policy issued a U.S. Methane Emissions Reduction Action Plan that solicited public comment on the EPA's proposed framework to expand federal regulation of methane and volatile organic compound emissions from a broader set of new upstream and midstream oil and gas operations, as well as various existing operations.

In November 2022, the EPA issued a supplemental proposal that would, through a combination of direct EPA regulation and state implementation plans, expand leak detection and repair programs, require rapid reporting and correction of larger emission sources, require emission controls for new and existing wells and facilities and certain types of activities, require replacement or conversion of certain emitting equipment such as pneumatic controllers, and encourage the use of advanced technologies to detect and measure methane emissions. Provisions applicable to emission sources built or modified after November 2021 would apply upon publication of the final rule, expected in 2023, provisions applicable to existing sources would take effect in 2028, and state plans to implement the rule would be due in 2025. The EPA has also requested public comments on the implementation of the IRA's methane fee, and on the future expansion of the methane and volatile organic compound regulations to cover additional potential emission sources from abandoned but unplugged wells and certain pipeline and trucking activities. In November 2022, the BLM also proposed regulations to restrict venting and flaring from oil and gas operations on federal lands which are expected to be issued in 2023.

In June 2022, the EPA proposed to amend its GHG Reporting Rule to incorporate additional oil and gas sources and equipment, revise existing emissions estimation methodologies and calculations, and increase data collection, particularly for new or modified emissions sources. The EPA has proposed the amendments to apply to 2023 emissions that must be reported in the first quarter of 2024. These proposed amendments could increase Occidental's reported estimated emissions from certain sources or types of equipment in its U.S. oil and gas operations. The EPA also proposed changes to the reporting that Occidental submits as a CO₂ supplier and for the injection of CO₂, as well as a new reporting category for sequestration of CO₂ associated with enhanced oil recovery. The IRA also directed the EPA to update its GHG Reporting Rule to require greater use of measurements or empirical data, instead of emissions factors, by the third quarter of 2024.

Several state governments have also established rules aimed at reducing GHG emissions, some including GHG cap and trade programs and others directly regulating equipment that emits GHGs, including methane, and other compounds. Most of these cap and trade programs work by requiring major sources of emissions, such as electric power plants, or major producers of fuels, including refineries and natural gas processing plants, to acquire and surrender emission allowances. Other U.S. states where Occidental operates, including Colorado, New Mexico and Texas, adopted or proposed new regulations, policies or strategies in 2021 and 2022 that increase inspection, recordkeeping, reporting, enforcement and controls on flaring, venting and equipment that emit methane and other compounds at oil and gas facilities. In certain instances, these states anticipate tying the processing and active status of oil and gas permits, including drilling permits, to air emissions and compliance. For example, Colorado has established GHG intensity targets for DJ Basin operators in 2025, 2027 and 2030, which Occidental currently meets.

These and other governmental actions relating to GHG and other air emissions are expected to require Occidental to incur increased operating and maintenance costs including higher rates charged by service providers and costs to purchase, operate and maintain emissions control systems, acquire emission allowances, pay taxes or fees for methane or carbon emissions and comply with new regulatory or reporting requirements; and they could prevent Occidental from conducting oil and gas development activities in certain areas. They could also promote the use of alternative sources of energy and thereby decrease demand for oil, NGL and natural gas and other products that Occidental's businesses produce, and could also materially impact OLCV's current or future operations and strategy. Any such legislation or regulatory programs could also increase the cost of consuming, and thereby reduce demand for, oil, NGL, natural gas or other products produced by Occidental's businesses and lower the value of its reserves. Consequently, governmental actions designed to reduce GHG emissions could have an adverse effect on Occidental's businesses, financial condition, results of operations, cash flows and reserves.

It is difficult to predict the timing, certainty and scope of such government actions and their ultimate effect on Occidental, which could depend on, among other things, the type and extent of GHG emissions reductions required, the availability and price of emission allowances or credits, the availability and price of alternative fuel sources, the energy sectors covered and

Occidental's ability to recover the costs incurred through its operating agreements or the pricing of its oil, NGL, natural gas and other products and whether service providers are able to pass increased costs through to Occidental.

There also have been efforts in the investment community, including investment advisers, financial institutions and certain sovereign wealth, pension and endowment funds, as well as political actors and other stakeholders, promoting divestment of fossil fuel equities, reducing access to capital markets and pressuring lenders to limit funding or increase the cost of lending to companies engaged in the extraction of fossil fuel reserves. Additionally, institutional lenders who provide financing to oil and gas companies have become more attentive to sustainable lending practices, and some of them may substantially reduce, or elect not to provide, funding for oil and gas companies. Such environmental initiatives aimed at limiting climate change and reducing air emissions could adversely affect Occidental's business activities, operations and ability to access capital, cause the market value of its securities to decrease or its cost of capital to increase, and adversely affect its reputation. Finally, increasing attention to climate change risks has resulted in an increased possibility of governmental investigations and additional private litigation against Occidental without regard to causation or its contribution to the asserted damage, which could increase its costs or otherwise adversely affect our businesses.

Compliance costs and liabilities associated with health, safety and environmental laws and regulations could have a material adverse effect on Occidental's or its subsidiaries' businesses, financial condition and results of operations.

Occidental and its subsidiaries and their respective operations are subject to numerous laws and regulations relating to public and occupational health, safety and environmental protection, including those governing air and GHG emissions, water use and discharges, waste management and protection of wildlife and ecosystems. The requirements of these laws and regulations are becoming increasingly complex, stringent and expensive to implement. Costs of compliance with these laws and regulations are significant and can be unpredictable. These laws sometimes provide for strict liability for events that pose an impact or threat to public health and safety or to the environment, including for funding or performance of remediation and, in some cases, compensation for alleged personal injury, property damage, natural resource damages, punitive damages, civil penalties, injunctive relief and government oversight costs. Strict liability can render Occidental or its subsidiaries liable for damages without regard to their degree of care or fault. Some environmental laws provide for joint and several strict liability for remediation of spills and releases of hazardous substances or materials, and, as a result, Occidental or its subsidiaries could be liable for the actions of others.

Occidental and its subsidiaries use and generate hazardous substances or materials in their respective operations. In addition, many of their current and former properties are, or have been, used for industrial purposes. Accordingly, Occidental or its subsidiaries have been, and could become, subject to significant liabilities relating to the investigation, assessment and remediation of potentially contaminated properties and to claims alleging personal injury or property damage as a result of exposures to, or releases of, hazardous substances or materials. As of the date of this filing, Occidental believes its range of reasonably possibly additional losses of its subsidiaries beyond those amounts currently recorded for environmental remediation could be up to \$2.7 billion on a consolidated basis. For additional discussion of some of these matters, see Note 12 – Environmental Liabilities and Expenditures and Note 13 – Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

In addition, stricter enforcement or changing interpretations of existing laws and regulations, the enactment of new laws and regulations, the discovery of previously unknown contamination or the imposition of new or increased requirements could require Occidental or its subsidiaries to incur costs or become the basis for new or increased liabilities that could have a material adverse effect on their respective businesses, financial condition and results of operations.

Occidental's businesses may experience catastrophic events.

The occurrence of severe weather events such as hurricanes, floods, freezes and heat waves, droughts, earthquakes or other acts of nature, pandemics, well blowouts, fires, explosions, pipeline ruptures, chemical releases, oil releases, including maritime releases, releases into navigable waters and groundwater contamination, material or mechanical failure, power outages, industrial accidents, physical or cyber attacks, abnormally pressured or structured formations and other events that cause operations to cease or be curtailed may negatively affect Occidental's businesses and the communities in which it operates. Coastal operations are particularly susceptible to disruption from severe weather events. Any of these risks could adversely affect Occidental's ability to conduct operations or result in substantial losses as a result of:

- Damage to and destruction of property and equipment, including property and equipment owned by third-parties which its operations rely upon;
- Damage to natural resources;
- Pollution and other environmental damage, including spillage or mishandling of recovered chemicals or fluids;
- Regulatory investigations, fines and penalties;
- Loss of well location, acreage, expected production and related reserves;
- Suspension or delay of its operations;
- Substantial liability claims; and
- Significant repair and remediation costs that increase its break-even economics.

Third-party insurance may not provide adequate coverage or Occidental or its subsidiaries may be self-insured with respect to the related losses. In addition, under certain circumstances, Occidental or its subsidiaries may be liable for environmental conditions on properties that they currently own, lease or operate that were caused by previous owners or operators of those properties. As a result, Occidental or its subsidiaries may incur substantial liabilities to third parties or governmental entities for environmental matters for which they do not have insurance coverage, which could reduce or eliminate funds available for exploration, development, acquisitions or other investments in their respective businesses, or cause them to incur losses.

The COVID-19 pandemic and resulting adverse economic conditions have had, and may continue to have, an adverse effect on Occidental's businesses and operations and financial condition.

The COVID-19 pandemic caused, and any resurgence of the pandemic could again cause, disrupted global supply chains and significant volatility in the financial markets. Current crude oil, NGL and natural gas demand and prices could be negatively impacted by a resurgence of COVID-19 cases, slow vaccine distribution in certain large international economies or the recurrence or tightening of travel restrictions and stay-at-home orders. If reduced demand for and lower prices of crude oil, NGL and natural gas persist for a prolonged period, Occidental's operations, financial condition, cash flows, level of expenditures and the quantity of estimated proved reserves that may be attributed to its properties may be materially and adversely affected. Occidental has not experienced any significant disruptions as a result of any new COVID-19 variants, and it continues to monitor national, state and local government directives where we have operations or offices. The extent to which the COVID-19 pandemic adversely affects Occidental's businesses, results of operations and financial condition will depend on future developments, many of which are outside of its control. To the extent the COVID-19 pandemic may continue to adversely affect Occidental's businesses, results of operations and financial condition, it may also have the effect of heightening the other risks described herein.

Risks related to Occidental's businesses and operations

Volatile global and local commodity pricing strongly affect Occidental's results of operations.

Occidental's financial results correlate closely to the prices it obtains for its products, particularly oil and, to a lesser extent, NGL, natural gas and its chemical products.

Prices for oil, NGL and natural gas fluctuate widely. Historically, the markets for oil, NGL and natural gas have been volatile and may continue to be volatile in the future. If the prices of oil, NGL or natural gas continue to be volatile or decline, Occidental's operations, financial condition, cash flows, level of expenditures and the quantity of estimated proved reserves that may be attributed to its properties may be materially and adversely affected. Prices are set by global and local market forces which are not in Occidental's control. These factors include, among others:

- Worldwide and domestic supplies of, and demand for, oil, NGL, natural gas and refined products;
- The cost of exploring for, developing, producing, refining and marketing oil, NGL, natural gas and refined products;
- Operational impacts such as production disruptions, technological advances and regional market conditions, including available transportation capacity and infrastructure constraints in producing areas;
- Changes in weather patterns and climate;
- The impacts of the members of OPEC and other non-OPEC member-producing nations that may agree to and maintain production levels;
- The ongoing global impact of the Russia-Ukraine war;
- The worldwide military and political environment, including uncertainty or instability resulting from an escalation or outbreak of armed hostilities or acts of terrorism in the United States or elsewhere;
- The price and availability of and demand for alternative and competing fuels and emissions reducing technology;
- Technological advances affecting energy consumption and supply;
- Government policies and support and market demand for low-carbon technologies;
- Domestic and international governmental regulations and taxes, including those that restrict the export of hydrocarbons;
- Shareholder activism or activities by non-governmental organizations to restrict the exploration, development and production of oil, NGL and natural gas;
- Additional or increased nationalization and expropriation activities by international governments;
- The impact and uncertainty of world health events, including the COVID-19 pandemic and the spread of new variants;
- The effect of releases from the U.S. Strategic Petroleum Reserve;
- Volatility in commodity markets;
- The effect of energy conservation efforts; and
- Global inventory levels and general economic conditions.

The long-term effects of these and other conditions on the prices of oil, NGL, natural gas and chemical products are uncertain and there can be no assurance that the demand or pricing for Occidental's products will follow historic patterns in

the near term. Prolonged or substantial decline, or sustained market uncertainty, in these commodity prices may have the following effects on Occidental's business:

- Adversely affect Occidental's financial condition, results of operations, liquidity, ability to reduce debt, access to and cost of capital, and ability to finance planned capital expenditures, pay dividends and repurchase shares;
- Reduce the amount of oil, NGL and natural gas that Occidental can produce economically;
- Cause Occidental to delay or postpone some of its capital projects;
- Reduce Occidental's revenues, operating income or cash flows;
- Reduce the amounts of Occidental's estimated proved oil, NGL and natural gas reserves;
- Reduce the carrying value of Occidental's oil and natural gas properties due to recognizing impairments of proved properties, unproved properties and exploration assets;
- Reduce the standardized measure of discounted future net cash flows relating to oil, NGL and natural gas reserves; and
- Adversely affect the ability of Occidental's partners to fund their working interest capital requirements.

Generally, Occidental's historical practice has been to remain exposed to the market prices of commodities. As of December 31, 2022, there were no active commodity hedges in place. Management may choose to put hedges in place in the future for oil, NGL and natural gas commodities. Commodity price risk management activities may prevent Occidental from fully benefiting from price increases and may expose it to regulatory, counterparty credit and other risks.

The prices obtained for Occidental's chemical products correlate to the strength of the United States and global economies, as well as chemical industry expansion and contraction cycles. Occidental also depends on feedstocks and energy to produce chemicals, which are commodities subject to significant price fluctuations.

Occidental may experience delays, cost overruns, losses or other unrealized expectations in development efforts and exploration activities.

Oil, NGL and natural gas exploration and production activities are subject to numerous risks beyond Occidental's control, including the risk that drilling will not result in commercially viable oil, NGL and natural gas production. In its development and exploration activities, Occidental bears the risks of:

- Equipment failures;
- Construction delays;
- Escalating costs or competition for services, materials, supplies or labor;
- Increasing prices as a result of broad inflation
- Property or border disputes;
- Disappointing drilling results or reservoir performance;
- Title problems and other associated risks that may affect its ability to profitably grow production, replace reserves and achieve its targeted returns;
- Actions by third-party operators of its properties;
- Permit delays and costs of drilling wells on lands subject to complex development terms and circumstances; and
- Oil, NGL and natural gas gathering, transportation and processing availability, restrictions or limitations.

Exploration is inherently risky and is subject to delays, misinterpretation of geologic or engineering data, unexpected geologic conditions or finding reserves of disappointing quality or quantity, which may result in significant losses.

Claims, litigation, government investigations and other proceedings may adversely affect Occidental's business, consolidated financial position, results of operations and cash flows.

Occidental is subject to actual and threatened claims, litigation, reviews, investigations, and other proceedings, including proceedings by governments and regulatory authorities, involving a wide range of issues, including regarding our drilling, manufacturing or production processes, commercial disputes, environmental compliance, public health and safety and taxes. The outcomes of these matters are inherently unpredictable and subject to significant uncertainties. Determining legal reserves or possible losses from such matters involves judgment and may not reflect the full range of uncertainties and unpredictable outcomes. Until the final resolution of such matters, Occidental may be exposed to losses in excess of the amount recorded, and such amounts could be material. Should any of our estimates and assumptions change or prove to have been incorrect, it could have a material adverse effect on Occidental's business, consolidated financial position, results of operations and cash flows.

For additional discussion of some of these matters, see Note 12 – Environmental Liabilities and Expenditures and Note 13 - Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

Disruptions in the political, regulatory, economic, and social environments of the countries in which Occidental operates could adversely affect its reputation, financial condition, results of operations and cash flows.

Occidental's non-US operations accounted for approximately 15% of its consolidated revenue in 2022, 16% in 2021 and 19% in 2020. Instability and unforeseen changes in any of the markets in which Occidental operates could result in business disruptions or operational challenges that may adversely affect the demand for Occidental's products and services, or its reputation, financial condition, results of operations or cash flows. These factors include, but are not limited to, the following:

- Uncertain or volatile political, social, and economic conditions;
- Social unrest, acts of terrorism, war, or other armed conflict;
- Public health crises and other catastrophic events, such as the COVID-19 pandemic;
- Confiscatory taxation or other adverse tax policies;
- Theft of, or lack of sufficient legal protection for, proprietary technology and other intellectual property;
- Unexpected changes in legal and regulatory requirements, including changes in interpretation or enforcement of existing laws;
- Restrictions on the repatriation of income or capital;
- Currency exchange controls;
- Inflation; and
- Currency exchange, rate fluctuations and devaluations.

Occidental's oil and gas business operates in highly competitive environments, which affect, among other things, its ability to source production and replace reserves.

Results of operations, reserves replacement and the level of oil and gas production depend, in part, on Occidental's ability to profitably acquire additional reserves. Occidental has many competitors (including national oil companies), some of which: (i) are larger and better funded; (ii) may be willing to accept greater risks; (iii) have greater access to capital; (iv) have substantially larger staffs; or (v) have special competencies. Competition for access to reserves may make it more difficult to find attractive investment opportunities or require delay of reserve replacement efforts. Further, during periods of low product prices, any cash conservation efforts may delay production growth and reserve replacement efforts. Also, there is substantial competition for capital available for investment in the oil and natural gas industry. Occidental's failure to acquire properties, potentially grow production, replace reserves and attract and retain qualified personnel could have a material adverse effect on its cash flows and results of operations.

In addition, Occidental's acquisition activities carry risks that it may: (i) not fully realize anticipated benefits due to less-than-expected reserves or production or changed circumstances, such as declines in oil, NGL and natural gas prices; (ii) bear unexpected integration costs or experience other integration difficulties; (iii) experience share price declines based on the market's evaluation of the activity; or (iv) be subject to liabilities that are greater than anticipated.

Occidental's oil and gas reserves are estimates based on professional judgments and may be subject to revision.

Reported oil and gas reserves are an estimate based on periodic review of reservoir characteristics and recoverability, including production decline rates, operating performance and economic feasibility at the prescribed weighted average commodity prices, future operating costs and capital expenditures, workover and remedial costs, assumed effects of regulation by governmental agencies, the quantity, quality and interpretation of relevant data, taxes and availability of funds. The procedures and methods for estimating the reserves by Occidental's internal engineers were reviewed by independent petroleum consultants; however, there are inherent uncertainties in estimating reserves. Actual production, revenues, expenditures, oil, NGL and natural gas prices and taxes with respect to Occidental's reserves may vary from estimates and the variance may be material. Additional regulation around GHG emissions and future costs related to a less carbon-intensive economy could result in a shortened oil and gas reservoir reserve life as the underlying reserves become uneconomical. If Occidental were required to make significant negative reserve revisions, its results of operations and stock price could be adversely affected.

In addition, the discounted cash flows included in this Form 10-K should not be construed as the fair value of the reserves attributable to Occidental's properties. The estimated discounted future net cash flows from proved reserves are based on an unweighted arithmetic average of the first-day-of-the-month price for each month within the year in accordance with SEC regulations. Actual future prices and costs may differ materially from SEC regulation-compliant prices and costs used for purposes of estimating future discounted net cash flows from proved reserves. Also, actual future net cash flows may differ from these discounted net cash flows due to the amount and timing of actual production, availability of financing for capital expenditures necessary to develop Occidental's undeveloped reserves, supply and demand for oil, NGL and natural gas, increases or decreases in consumption of oil, NGL and natural gas and changes in governmental regulations or taxation.

***Occidental's future results could be adversely affected if it is unable to execute new business strategies effectively.***

Occidental's results of operations depend on the extent to which it can execute new business strategies effectively relative to both the societal transition to a less carbon-intensive economy and laws, regulations and governmental and private actions regarding the environment and climate change. Occidental's strategies seek to advance its goals of achieving net-zero emissions (i) from its operations and energy use before 2040, with an ambition to do so before 2035, and (ii) from its total carbon inventory, including the use of its sold products, with an ambition to do so before 2050. Occidental's strategies and goals are subject to business, economic and competitive uncertainties and contingencies, many of which are beyond its control. Additionally, Occidental may be forced to develop or implement new technologies at substantial costs to achieve its strategies. Effective execution of these goals may require substantial new capital, which might not be available to Occidental in the amounts or at the times expected. In addition, raising such capital may increase its leverage or overall costs of doing business. These uncertainties and costs could cause Occidental to not be able to fully implement or realize the anticipated results and benefits of its business strategies.

Certain of Occidental's emissions goals are dependent upon the successful implementation of new and existing technologies on an industrial scale. These technologies are in various stages of development or implementation and may require more capital, or take longer to develop, than currently expected. Further, these carbon management technologies are in competition with technologies being developed by other companies. The carbon management solutions are not well established and, while Occidental believes it has access to the technologies and the expertise necessary to develop these solutions on an industrial scale, Occidental may not ultimately succeed in achieving its GHG emissions reduction and net-zero goals.

Occidental's strategy to include carbon management in its product line is also dependent upon demand for carbon sequestration and related CO₂ removal credits, offsets or other attributes. If this market does not develop, or if the regulatory environment does not support carbon management activities, Occidental may not be successful in entering this industry.

Occidental's aspirations, goals and initiatives related to carbon management and overall sustainability expose it to numerous risks.

Occidental continues to develop new technologies and strategies to position it to meet its emissions reduction and net-zero goals. Occidental's efforts to research, establish, accomplish and accurately report on our emissions goals, targets and strategies expose it to numerous operational, reputational, financial, legal and other risks. Occidental's ability to reach our target emissions is subject to a multitude of factors and conditions, many of which are out of its control. Examples of such factors include evolving government regulation and voluntary protocols for reporting or verification of emissions, capture or sequestration, the pace of changes in technology, the successful development and deployment of existing or new technologies and business solutions on a commercial scale, the availability, timing and cost of equipment, manufactured goods and services, and the availability of requisite financing and federal and state incentive programs.

In addition, historical, current and forward-looking sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve and assumptions that are subject to change in the future. There are multiple proposed or recently adopted changes to various GHG reporting regulations and protocols, including from the EPA, as noted earlier, as well as the SEC, the GHG Protocol and certain countries and states, as well as for additional controls, fees or taxes on emissions. In March 2022, for example, the SEC proposed climate disclosure rules that would require public companies to significantly increase disclosure of GHG emissions and strategies, targets, costs and risks associated with climate change and the energy transition. While Occidental has reported voluntarily on its net-zero pathway and associated goals and targets, as well as GHG emissions estimates, the proposed rules would require both significant additional disclosure and integration of such disclosure directly into financial reporting processes. Occidental and numerous other stakeholders submitted comments to the SEC on the proposed rules. The SEC is expected to issue final rules in 2023. Given the potential significance of these changes for estimation, reporting and verification of GHG emissions, establishing and reporting on goals targets, and estimating and disclosing costs of emissions reduction and the energy transition, Occidental may be required or elect to modify or update reported emissions and its current set of GHG goals and targets to reflect such new or changed regulations and protocols, although we currently expect to retain our overarching net-zero goals and to continue to implement emissions reduction plans that we believe will complement our investments in DAC, CCUS and other low-carbon technologies and infrastructure.

Occidental may face increased scrutiny from the investment community, customers, other stakeholders and the media related to its emissions reduction and net-zero goals and strategies. If Occidental's emissions goals and strategies to achieve them do not meet evolving investor or other stakeholder expectations or standards, Occidental's reputation, ability to attract and retain employees and attractiveness as an investment, business partner, supplier or acquirer could be negatively impacted. Similarly, Occidental's failure or perceived failure to fulfill its emissions goals and targets, to comply with ethical, health, safety, environmental, social, governance or other standards, regulations, or expectations, or to satisfy various reporting standards with respect to these matters effectively could have the same negative impacts and further expose Occidental to government enforcement actions and private litigation. Even if Occidental achieves its goals, targets and objectives, it may not realize all of the benefits that it expected at the time the goals were established.

Occidental has previously recorded impairments of its proved and unproved oil and gas properties and will continue to assess further impairments in the future.

Occidental has recorded impairments of its proved and unproved oil and gas properties resulting from prolonged declines in oil and gas prices and may record such impairments in the future. Past impairments included pre-tax impairment and related charges to both proved and unproved oil and gas properties and a lower of cost or net realizable value adjustment for crude inventory. If there is an adverse downturn of the macroeconomic conditions and if such downturn is expected to or does persist for a prolonged period of time, Occidental's oil and gas properties may be subject to further testing for impairment, which could result in additional non-cash asset impairments. Such impairments could be material to the financial statements.

Future costs associated with reducing emissions and carbon impacts, as well as impacts resulting from other risk factors described herein, could lead to impairments in the future, if such costs significantly increase Occidental's breakeven economics.

Occidental uses CO₂ for its EOR operations. Occidental's production from these operations may decline if Occidental is not able to obtain sufficient amounts of CO₂.

Occidental's CO₂ EOR operations are critical to Occidental's long-term strategy. Oil production from Occidental's CO₂ EOR projects depends largely on having access to sufficient amounts of naturally occurring or anthropogenic (human-made) CO₂. Occidental's ability to produce oil from its CO₂ EOR projects would be hindered if the supply of CO₂ was limited due to, among other things, problems with current CO₂ producing wells and facilities, including compression equipment, catastrophic pipeline failure or the ability to economically purchase naturally occurring or anthropogenic CO₂. This could have a material adverse effect on Occidental's financial condition, results of operations or cash flows. Future oil production from its CO₂ EOR operations is dependent on the timing, volumes and location of CO₂ injection and, in particular, Occidental's ability to obtain sufficient volumes of CO₂. Market conditions may cause the delay or cancellation of the development of naturally occurring CO₂ sources or construction of plants that produce anthropogenic CO₂ as a byproduct that can be purchased, thus limiting the amount of CO₂ available for use in Occidental's CO₂ EOR operations.

Occidental is exposed to cyber-related risks.

The oil and gas industry is increasingly dependent on digital and industrial control technologies to conduct certain exploration, development and production activities. Occidental relies on digital and industrial control systems, related infrastructure, technologies and networks to run its business and to control and manage its oil and gas, chemicals, marketing and pipeline operations. Use of the internet, cloud services, mobile communication systems and other public networks exposes Occidental's business and that of other third parties with whom Occidental does business to cyber attacks. Cyber attacks on businesses have escalated in recent years.

Information and industrial control technology system failures, network disruptions and breaches of data security could disrupt our operations by causing delays, impeding processing of transactions and reporting financial results, leading to the unintentional disclosure of company, partner, customer or employee information or could damage our reputation. A cyber attack involving our information or industrial control systems and related infrastructure, or that of our business associates, could negatively impact our operations in a variety of ways, including, but not limited to, the following:

- Unauthorized access to seismic data, reserves information, strategic information or other sensitive or proprietary information could have a negative impact on Occidental's ability to compete for oil and natural gas resources;
- Data corruption, communication or systems interruption or other operational disruption during drilling activities could result in delays and failure to reach the intended target or cause a drilling incident;
- Data corruption, communication or systems interruption or operational disruptions of production-related infrastructure could result in a loss of production or accidental discharge;
- A cyber attack on OxyChem's operations could result in a disruption of the manufacturing and marketing of its products or a potential HSE hazard;
- A cyber attack on a vendor or service provider could result in supply chain disruptions, which could delay or halt our construction and development projects;
- A cyber attack on third-party gathering, pipeline, processing, terminal or other infrastructure systems could delay or prevent Occidental from producing, transporting, processing and marketing its production;
- A cyber attack involving commodities exchanges or financial institutions could slow or halt commodities trading, thus preventing Occidental from marketing its production or engaging in hedging activities;
- A cyber attack that halts activities at a power generation facility or refinery using natural gas as feedstock could have a significant impact on the natural gas market;
- A cyber attack on a communications network or power grid could cause operational disruption;
- A cyber attack on Occidental's automated and surveillance systems could cause a loss in production and potential HSE hazards;
- A deliberate corruption of Occidental's financial or operating data could result in events of non-compliance which could then lead to regulatory fines or penalties; and
- A cyber attack resulting in the loss or disclosure of, or damage to, Occidental's or any of its customer's or supplier's data or confidential information could harm its business by damaging its reputation, subjecting Occidental to

potential financial or legal liability and requiring it to incur significant costs, including costs to repair or restore its systems and data or to take other remedial steps.

Although Occidental has implemented controls and multiple layers of security that it believes are reasonable to mitigate the risks of a cyber attack, there can be no assurance that such cyber security measures will be sufficient to prevent security breaches of its systems from occurring, and if a breach occurs, it may remain undetected for an extended period of time. Further, Occidental has no control over the comparable systems of the third parties with whom it does business. While Occidental has experienced cyber attacks in the past, Occidental has not suffered any material losses. However, if in the future Occidental's cyber security measures are compromised or prove insufficient, the potential consequences to Occidental's businesses and the communities in which it operates could be significant. As cyber attacks continue to evolve in magnitude and sophistication, Occidental may be required to expend additional resources in order to continue to enhance its cyber security measures and to investigate and remediate any digital and operational systems, related infrastructure, technologies and network security vulnerabilities, which would increase its costs. A system failure or data security breach, or a series of such failures or breaches, could have a material adverse effect on Occidental's financial condition, results of operations or cash flows.

Occidental's oil and gas reserve additions may not continue at the same rate and a failure to replace reserves may negatively affect Occidental's business.

Producing oil and natural gas reservoirs generally are characterized by declining production rates that vary depending upon reservoir characteristics and other factors. Unless Occidental conducts successful exploration or development activities, acquires properties containing proved reserves, or both, proved reserves will generally decline and negatively impact our business. The value of Occidental's securities and its ability to raise capital will be adversely impacted if it is not able to replace reserves that are depleted by production or replace our declining production with new production by successfully allocating annual capital to maintain our reserves and production base. Occidental expects infill development projects, extensions, discoveries and improved recovery to continue as main sources for reserve additions but factors such as geology, government regulations and permits, the effectiveness of development plans and the ability to make the necessary capital investments or acquire capital are partially or fully outside management's control and could cause results to differ materially from expectations.

Occidental's operations and financial results could be significantly negatively impacted by its offshore operations.

Occidental is vulnerable to risks associated with offshore operations that could negatively impact its operations and financial results. Certain Occidental subsidiaries conduct offshore operations primarily in the Gulf of Mexico and their operations and financial results are vulnerable to certain unique risks associated with operating offshore, including conditions relating to the following:

- Hurricanes and other adverse weather conditions;
- Geological complexities and water depths associated with such operations;
- Limited number of partners available to participate in projects;
- Oilfield service costs and availability;
- Compliance with HSE and other laws and regulations;
- Terrorist attacks or piracy;
- Remediation and other costs and regulatory changes resulting from oil spills, emissions or releases of hazardous substances or materials;
- Failure of equipment or facilities; and
- Response capabilities for personnel, equipment or environmental incidents.

In addition, certain Occidental subsidiaries conduct some of their exploration in deep waters (greater than 1,000 feet) where operations, support services and decommissioning activities are more difficult and costly than in shallower waters. The deep waters in the Gulf of Mexico, as well as international deep-water locations, lack the physical and oilfield service infrastructure present in shallower waters. As a result, deep-water operations may require significant time between a discovery and the time that Occidental can market its production, thereby increasing the risk involved with these operations.

Anadarko's Tronox settlement may not be deductible for income tax purposes; Occidental may be required to repay the tax refund Anadarko received in 2016 related to the deduction of the Tronox settlement payment, which may have a material adverse effect on Occidental's results of operations, liquidity and financial condition.

In April 2014, Anadarko and Kerr-McGee entered into a settlement agreement for \$5.2 billion, resolving, among other things, all claims that were or could have been asserted in connection with the May 2009 lawsuit filed by Tronox against Anadarko and Kerr-McGee in the U.S. Bankruptcy Court for the Southern District of New York. After the settlement became effective in January 2015, Anadarko paid \$5.2 billion and deducted this payment on its 2015 federal income tax return. Due

to the deduction, Anadarko had a net operating loss carryback for 2015, which resulted in a tentative tax refund of \$881 million in 2016.

The IRS audited Anadarko's tax position regarding the deductibility of the payment and in September 2018 issued a statutory notice of deficiency rejecting Anadarko's refund claim. Anadarko disagreed and filed a petition with the U.S. Tax Court to dispute the disallowance in November 2018. In December 2022, the parties filed competing motions for partial summary judgment. The motions are not fully briefed. Trial is set for May 2023. Occidental expects to continue pursuing resolution. In accordance with Accounting Standards Codification (ASC) Topic 740's guidance on the accounting for uncertain tax positions, as of December 31, 2022, Occidental had recorded no tax benefit on the tentative cash tax refund. If the payment is ultimately determined not to be deductible, Occidental would be required to repay the tentative refund received plus interest totaling approximately \$1.8 billion as of December 31, 2022, which could have a material adverse effect on our liquidity and consolidated balance sheets. Occidental's Consolidated Financial Statements include an uncertain tax position for the approximate repayment of \$1.4 billion (\$1.4 billion federal and \$28 million in state taxes) plus accrued interest of approximately \$415 million. This amount is not covered by insurance. For additional information on income taxes, see Note 10 - Income Taxes in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

Occidental's indebtedness may make it more vulnerable to economic downturns and adverse developments in its businesses. Downgrades in Occidental's credit ratings or future increases in interest rates may negatively impact Occidental's cost of capital, and ability to access capital markets.

Occidental's level of indebtedness could increase its vulnerability to adverse changes in general economic and industry conditions, economic downturns and adverse developments in its businesses or limit Occidental's flexibility in planning for or reacting to changes in its business and the industries in which it operates. From time to time, Occidental has relied on access to capital markets for funding. Occidental's ability to obtain additional financing or refinancing will be subject to a number of factors, including general economic and market conditions, Occidental's performance, investor sentiment and its ability to meet existing debt compliance requirements. If Occidental is unable to generate sufficient funds from its operations to satisfy its capital requirements, including its existing debt obligations, or to raise additional capital on acceptable terms, Occidental's business could be adversely affected. As of the date of this filing, Occidental's long-term debt was rated BB+ by Fitch Ratings, Ba1 by Moody's Investors Service and BB+ by Standard and Poor's.

One of Occidental's subsidiaries acts as the general partner of WES, a publicly traded master limited partnership, which may involve potential legal liability.

One of Occidental's subsidiaries acts as the general partner of WES, a publicly traded master limited partnership. Its general partner interest in WES may increase the possibility that it could be subject to claims of breach of duties owed to WES, including claims of conflict of interest. Any such claims could increase Occidental's costs and any liability resulting from such claims could have a material adverse effect on Occidental's financial condition, operating results or cash flows.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 3. LEGAL PROCEEDINGS

Occidental has elected to use a \$1 million threshold for disclosing certain proceedings arising under federal, state or local environmental laws when a governmental authority is a party and potential monetary sanctions are involved. Occidental believes proceedings under this threshold are not material to Occidental's business and financial condition. In January 2023, the U.S. District Court for the District of New Mexico entered a consent decree under which two Occidental subsidiaries settled a previously-reported citizen suit alleging violations of certain federal air quality regulations, which the subsidiaries deny, by paying a civil penalty of \$500,000 to the U.S. Department of the Treasury and depositing an additional \$500,000 with the U.S. District Court for the District of New Mexico to fund a supplemental environmental project in lieu of penalties, among other terms. For information regarding other legal proceedings, see the information under Lawsuits, Claims, Commitments and Contingencies in the Management's Discussion and Analysis section of this Form 10-K and in Note 13 - Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

INFORMATION ABOUT EXECUTIVE OFFICERS

Each executive officer holds his or her office from the date of election by the Board of Directors until the first board meeting held after the next Annual Meeting of Stockholders or until his or her removal or departure or a successor is duly elected, if earlier.

The following table sets forth the executive officers of Occidental as of February 27, 2023:

Name Current Title	Age as of February 27, 2023	Positions with Occidental and Employment History
Peter J. Bennett Vice President	55	President, Commercial Development U.S. Onshore Resources and Carbon Management since October 2020; President and General Manager of Permian Resources and the Rockies, 2020; Senior Vice President, Permian Resources, 2018-2020; President and General Manager - Permian Resources New Mexico, 2017-2018; Chief Transformation Officer, 2016-2017.
Christopher O. Champion Vice President, Chief Accounting Officer and Controller	53	Vice President, Chief Accounting Officer and Controller since August 2019; Anadarko Petroleum Corporation: Senior Vice President, Chief Accounting Officer and Controller, 2017-2019, Vice President, Chief Accounting Officer and Controller, 2015-2017.
Kenneth Dillon Senior Vice President	63	Senior Vice President since December 2016; President – International Oil and Gas Operations since June 2016.
Vicki Hollub President and Chief Executive Officer	63	President, Chief Executive Officer and Director since April 2016.
Richard A. Jackson Senior Vice President	47	President Operations U.S. Onshore Resources and Carbon Management since October 2020; President and General Manager, EOR and Oxy Low Carbon Ventures, LLC, 2020; President Low Carbon Ventures, 2019-2020; Senior Vice President, Operation Support, 2018-2019; Vice President, Investor Relations, 2017-2018; President and General Manager Permian Resources Delaware Basin, 2014-2017.
Sylvia J. Kerrigan Senior Vice President and Chief Legal Officer	57	Senior Vice President and Chief Legal Officer since October 2022; Executive Director of the Kay Bailey Hutchison Energy Center for Business, Law and Policy at The University of Texas, 2017-2022; Executive Vice President, General Counsel and Corporate Secretary of Marathon Oil Corporation, 2009-2017.
Robert L. Peterson Senior Vice President and Chief Financial Officer	52	Senior Vice President and Chief Financial Officer since April 2020; Senior Vice President, Permian EOR, 2019-2020; Vice President Permian Strategy, 2018-2019; Director Permian Business Area, 2017-2018; President OxyChem, 2014-2017.

Part II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET INFORMATION, HOLDERS AND DIVIDEND POLICY

Occidental's common stock is listed and traded on the NYSE under the ticker symbol "OXY." The common stock was held by approximately 24,400 stockholders of record as of January 31, 2023, which does not include beneficial owners for whom Cede and Co. or others act as nominees.

Occidental declared dividends of \$0.52 per share for the year ended December 31, 2022. In February 2023, the Board of Directors declared a regular quarterly dividend of \$0.18 per share on common stock, an increase of five cents from the previous quarter, payable in April 2023. The declaration of future dividends is a business decision made by the Board of Directors from time to time and will depend on Occidental's financial condition and other factors deemed relevant by the Board of Directors.

SHARE REPURCHASE ACTIVITIES

Occidental's share repurchase activities for the year ended December 31, 2022, were as follows:

Period	Total Number of Shares Purchased ^(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Value of Shares that May Yet Be Purchased Under the Plans or Programs ^(b)
First Quarter 2022	730,746	\$ 50.05	—	\$ 3,000
Second Quarter 2022	11,679,732	58.38	11,190,640	2,350
Third Quarter 2022	28,571,576	63.02	28,409,099	562
October 1 - 31, 2022	2,330,221	67.35	2,205,352	414
November 1 - 30, 2022	5,993,013	70.68	5,859,478	—
December 1 - 31, 2022	—	—	—	—
Fourth Quarter 2022	8,323,234	69.75	8,064,830	—
Total 2022	49,305,288	62.86	47,664,569	—

^(a) Included purchases of 1,640,719 shares from the trustee of Occidental's defined contribution savings plan that are not part of publicly announced plans or programs.

^(b) Represented the value remaining in Occidental's share repurchase plan. In February 2022, Occidental announced an authorization to repurchase up to \$3.0 billion of Occidental's shares of common stock. The plan was completed in the fourth quarter of 2022. In February 2023, the Board authorized a new share repurchase program of up to \$3.0 billion of Occidental's shares of common stock.

PERFORMANCE GRAPH

The following graph compares the yearly percentage change in Occidental's cumulative total return on its common stock with the cumulative total return of the S&P 500, which includes Occidental, with that of Occidental's peer group over the five-year period ended December 31, 2022. The graph assumes that \$100 was invested at the beginning of the five-year period shown in the graph below and that all dividends were reinvested in: (i) Occidental common stock, (ii) the stock of the companies in the S&P 500 and (iii) each of the peer group companies' common stock weighted by their relative market capitalization within the peer group.

Occidental's peer group consists of BP p.l.c., Chevron Corporation, ConocoPhillips, EOG Resources, Inc., ExxonMobil Corporation, Shell, and TotalEnergies.

Fiscal Year Ended December 31,	2017	2018	2019	2020	2021	2022
Occidental	\$ 100	\$ 87	\$ 62	\$ 29	\$ 49	\$ 107
Peer Group	\$ 100	\$ 92	\$ 98	\$ 65	\$ 96	\$ 149
S&P 500	\$ 100	\$ 96	\$ 126	\$ 149	\$ 191	\$ 157

The information provided in this Performance Graph shall not be deemed "soliciting material" or "filed" with the SEC or subject to Regulation 14A or 14C under the Exchange Act, other than as provided in Item 201 to Regulation S-K under the Exchange Act, or subject to the liabilities of Section 18 of the Exchange Act and shall not be deemed incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act except to the extent Occidental specifically requests that it be treated as soliciting material or specifically incorporates it by reference.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read together with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements, which are included in this Form 10-K in Item 8 and the information set forth in Risk Factors under Part 1, Item 1A. The following sections include a discussion of results for fiscal 2022 compared to fiscal 2021 as well as certain 2020 results. The comparative results for fiscal 2021 with fiscal 2020 generally have not been included in this Form 10-K, but may be found in "Part II - Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" of the Company's Annual Report on Form 10-K for the year ended December 31, 2021.

CURRENT BUSINESS OUTLOOK AND STRATEGY

GENERAL

Occidental's operations, financial condition, cash flows and levels of expenditures are highly dependent on oil prices and, to a lesser extent, NGL and natural gas prices, the Midland-to-Gulf-Coast oil spreads, chemical product prices and inflationary pressures in the macro-economic environment. In 2022, as compared to 2021, the average annual price per barrel of WTI crude increased to \$94.23 from \$67.91 and the average annual Brent price per barrel increased to \$98.83 from \$70.78. The return of oil demand to its pre-pandemic levels, the ongoing global impact of the Russia-Ukraine war and the limited increase in supply in 2022 have resulted in an increase in benchmark oil prices year-over-year. Occidental does not operate or own assets in either Russia or Ukraine. It is expected that the price of oil will be volatile for the foreseeable future given the current geopolitical risks, the ongoing global impact of the Russia-Ukraine war, and uncertainty around the global economy, oil demand in China as it emerges from its zero-COVID policy, production levels in OPEC and non-OPEC oil producing countries and further releases from or additions to the US Strategic Petroleum Reserve.

Occidental works to manage inflation impacts by capitalizing on operational efficiencies, locking in pricing on longer term contracts and working closely with vendors to secure the supply of critical materials. As of December 31, 2022, substantially all of Occidental's outstanding debt is fixed rate.

STRATEGY

Occidental is focused on delivering a unique shareholder value proposition with its portfolio of oil and gas, chemicals and midstream and marketing assets and its ongoing development of carbon management and storage solutions and GHG emissions reduction efforts. Occidental conducts its operations with a priority on HSE, sustainability and social responsibility. Occidental aims to maximize shareholder returns through a combination of:

- Returning capital to shareholders, while redeeming a portion of preferred equity to continue improving Occidental's financial position;
- Enhancing its existing asset base with new investments in its core cash-generative oil and gas and chemical businesses as well as emerging low-carbon businesses with a focus on its net-zero pathway;
- Advancing technologies and business solutions to help drive a sustainable low-carbon future; and
- Further reducing long-term financial leverage.

OPERATIONAL EXCELLENCE AND CAPITAL EFFICIENCY

Occidental's operational priorities for 2022 were to maximize operational efficiencies by investing \$4.5 billion in high return assets to generate long-term sustainable free cash flow that will provide cash flow stability throughout the commodity cycle. Occidental set new operational records and efficiency benchmarks in the Permian, Rockies, Gulf of Mexico, Oman and UAE. OxyChem generated record earnings, beating its previous record set in 2021. With the increase in commodity prices and Occidental's focus on its operational efficiencies, Occidental's higher cash flow allowed it to reduce its leverage and advance its shareholder return framework.

DEBT AND INTEREST RATE SWAPS

Strong cash flow in 2022 allowed Occidental to continue its deleveraging efforts. In 2022, Occidental reduced its debt principal by more than \$10.5 billion, leaving less than \$18.0 billion outstanding as of December 31, 2022, and meeting its near-term debt reduction goal. As of December 31, 2022, Occidental had debt maturities of approximately \$22 million in 2023, \$1.1 billion in 2024 and \$1.2 billion in 2025. The current maturity of \$22 million was paid in January 2023, leaving no debt maturing in 2023.

Occidental's \$673 million Zero Coupons can be put to Occidental in October of each year, in whole or in part, for the then accreted value of the outstanding Zero Coupons. The Zero Coupons can next be put to Occidental in October 2023, which, if put in whole, would require a payment of approximately \$344 million at such date. Occidental currently has the intent and ability to meet this obligation, including, if necessary, using amounts available under the RCF should the put right be exercised.

In the year ended December 31, 2022, Occidental settled all outstanding interest rate swaps with \$255 million in cash and the application of \$144 million collateral, leaving none outstanding as of December 31, 2022.

DEBT RATINGS

As of the date of this filing, Occidental's long-term debt was rated BB+ by Fitch Ratings, Ba1 by Moody's Investors Service and BB+ by Standard and Poor's. Occidental believes the deleveraging performed to date may lead to future ratings upgrades, but cannot determine the timing of any potential ratings change. Any downgrade in credit ratings could impact Occidental's ability to access capital markets and increase its cost of capital. Occidental's non-investment grade debt rating may require Occidental or its subsidiaries to provide financial assurance in the form of cash, letters of credit, surety bonds or other acceptable support under certain contractual arrangements.

SHAREHOLDER RETURN FRAMEWORK

Capital is returned to shareholders through Occidental's dividend and share repurchases. Occidental's current dividend is \$0.18 per share per quarter, or \$0.72 on an annualized basis. During the fourth quarter of 2022, Occidental completed its \$3.0 billion share repurchase program. In February 2023, the Board authorized a new share repurchase program of up to \$3.0 billion of Occidental's shares of common stock. Occidental anticipates that a higher percentage of excess free cash flow is expected to be allocated to shareholder returns in 2023 with the intention to begin redeeming the preferred stock. Occidental's preferred stock includes a mandatory redemption provision that obligates Occidental to redeem the preferred at 110% of the par value on a dollar-for-dollar basis for every dollar distributed to common shareholders above \$4.00 per share, on a trailing 12-month basis.

SUSTAINABILITY AND ENVIRONMENTAL STEWARDSHIP STRATEGY

In 2020, Occidental was the first U.S. oil and gas company to announce goals to achieve net-zero GHG emissions for its total emissions inventory including use of sold products. These goals include achieving net-zero GHG emissions (i) from its operations and energy use before 2040, with an ambition to do so before 2035, and (ii) from its total carbon inventory, including the use of its sold products, with an ambition to do so before 2050. In 2020, Occidental also set various interim targets, including 2025 carbon and methane intensity targets, and Occidental was the first U.S. oil and gas company to endorse the World Bank's initiative for zero routine flaring by 2030. In 2022, the Board of Directors adopted Occidental's updated HSE and Sustainability Principles, based on engagement with shareholders, employees and other stakeholders. The Principles reinforce the alignment among Occidental's core values, goals and strategies, underpin our operational management system, and help to guide our workforce across our businesses.

Occidental seeks to meet its sustainability and environmental goals through its development and commercialization of technologies that lower both GHG emissions from industrial processes and existing atmospheric concentrations of CO₂. Occidental believes that carbon removal technologies, including DAC and CCUS, can, with incentives necessary for their development and deployment, provide essential CO₂ reductions to assist the world's transition to a less carbon-intensive economy. During 2022, Occidental undertook the following actions, among others, toward advancing its low-carbon strategy:

- Achieved zero routine flaring of gas across its U.S. oil and gas operations, 8 years ahead of the World Bank's 2030 target;
- Reduced estimated methane emissions by 33% from the 2020 baseline;
- Began construction activities for DAC 1 in the Permian;
- Acquired interests in approximately 265,000 net acres of pore space access along the U.S. Gulf Coast; and
- Invested approximately \$530 million in low-carbon businesses, technologies, and net-zero pathway advancements, including the aforementioned pore space.

The future costs associated with emissions reduction, carbon removal and CCUS to meet its long-term net-zero GHG goals may be substantial and execution of its plans and net-zero pathway depends on securing third-party capital investments. Occidental is pursuing multiple pathways to fund these projects including project financing, long-term carbon removal or CCUS agreements, and identifying business opportunities with stakeholders in carbon-intensive industries

KEY PERFORMANCE INDICATORS

Occidental seeks to meet its strategic goals by continually measuring its success against key performance indicators that drive total stockholder return. In addition to efficient capital allocation and deployment discussed below in the section titled Oil and Gas Segment - Business Strategy, Occidental believes its most significant performance indicators are:

OPERATIONAL

- Total spend per barrel - In 2023, Occidental will continue to focus on controlling total costs from a per-barrel perspective. Total spend per barrel is the sum of capital spending, general and administrative expenses, other operating and non-operating expenses and oil and gas lease operating costs divided by global oil, NGL and natural gas sales volumes.
- Daily production - Occidental seeks to maximize field operability and minimize production down-time.

FINANCIAL

- CROCE - CROCE is calculated as (i) the cash flows from operating activities, before changes in working capital, plus distributions from WES classified as investing cash flows, divided by (ii) the average of the opening and closing balances of total equity plus total debt.
- Maintain and improve financial leverage to a level consistent with investment grade credit metrics.

SUSTAINABILITY AND ENVIRONMENTAL

- Specific interim emissions reduction and emissions intensity targets to advance our goal of net-zero operational and energy use emissions before 2040, with an ambition to achieve before 2035.
- Milestones in specific carbon removal and CCUS projects that advance our net-zero total emissions inventory, including use of sold products, with an ambition to achieve before 2050.
- Facilitate deployment of carbon removal, CCUS and other solutions to advance total carbon impact past 2050.

OIL AND GAS SEGMENT

BUSINESS STRATEGY

Occidental's oil and gas segment focuses on long-term value creation and leadership in sustainability, health, safety and the environment. In each core operating area, Occidental's operations benefit from scale, technical expertise, decades of high-margin inventory, environmental and safety leadership and commercial and governmental collaboration. These attributes allow Occidental to bring additional production quickly to market, extend the life of older fields at lower costs and provide low-cost returns-driven growth opportunities with advanced technology.

Occidental is one of the largest U.S. producers of liquids, which includes oil and NGL, allowing Occidental to maximize cash margins on a per barrel basis. The advantages that Occidental's portfolio provides, coupled with its advanced subsurface characterization ability and the proven ability to execute, position Occidental for full-cycle success in the years ahead. The oil and gas segment maximizes efficiencies to deliver lower breakeven costs and generate excess free cash flow. The oil and gas segment strives to achieve low development and operating costs to maximize full-cycle value of the assets.

The oil and gas business implements Occidental's strategy primarily by:

- Operating and developing areas where reserves are known to exist and optimizing capital intensity in core areas, primarily in the Permian Basin, DJ Basin, Gulf of Mexico, UAE, Oman and Algeria;
- Maintaining a disciplined and prudent approach to capital expenditures with a focus on high-return, short and mid-cycle, cash-flow-generating opportunities and an emphasis on creating value and further enhancing Occidental's existing positions;
- Focusing Occidental's subsurface characterization and technical activities on unconventional opportunities, primarily in the Permian Basin and Rockies;
- Using secondary and tertiary recovery techniques in mature fields; and
- Focusing on cost-reduction efficiencies and innovative technologies to reduce carbon emissions.

In 2022, oil and gas capital expenditures were approximately \$3.8 billion and primarily focused on Occidental's assets in the Permian Basin, DJ Basin, Gulf of Mexico and Oman. In 2023, Occidental plans to spend \$4.3 billion to \$4.7 billion to develop its oil and gas assets.

OIL AND GAS PRICE ENVIRONMENT

Oil and gas prices are the major variables that drive the industry's financial performance. The following table presents the average daily WTI and Brent prices for oil and NYMEX natural gas prices for 2022 and 2021:

	2022	2021	% Change
WTI Oil (\$/Bbl)	\$ 94.23	\$ 67.91	39 %
Brent Oil (\$/Bbl)	\$ 98.83	\$ 70.78	40 %
NYMEX Natural Gas (\$/Mcf)	\$ 6.35	\$ 3.61	76 %

The following table presents Occidental's average realized prices for continuing operations as a percentage of WTI, Brent and NYMEX for 2022 and 2021:

	2022	2021
Worldwide oil as a percentage of average WTI	100 %	97 %
Worldwide oil as a percentage of average Brent	95 %	93 %
Worldwide NGL as a percentage of average WTI	38 %	44 %
Worldwide NGL as a percentage of average Brent	36 %	42 %
Domestic natural gas as a percentage of NYMEX	86 %	91 %

Prices and differentials can vary significantly, even on a short-term basis, making it difficult to predict realized prices with a reliable degree of certainty.

DOMESTIC INTERESTS

BUSINESS REVIEW

Occidental conducts its domestic operations through land leases, subsurface mineral rights it owns, or a combination of both. Occidental's domestic oil and gas leases have a primary term ranging from one to 10 years, which is extended through the end of production once it commences. Occidental has leasehold and mineral interests in 9.5 million net acres, of which approximately 52% is leased, 47% is owned subsurface mineral rights and 1% is owned land with mineral rights. Approximately \$3.6 billion to \$4.0 billion of Occidental's worldwide capital budget is expected to be allocated to its domestic operations in 2023.

DOMESTIC ASSETS ^(a)

^(a) Map represents geographic outlines of the respective basins.

The Permian Basin

The Permian Basin extends throughout West Texas and Southeast New Mexico and is one of the largest and most active oil basins in the United States, accounting for more than 43% of total United States oil production in 2022. Overall in 2022, Occidental's production in the Permian Basin was approximately 513 Mboe/d.

Occidental manages its Permian Basin operations through two businesses: Permian Resources, which includes unconventional opportunities, and Permian EOR, which utilizes secondary and tertiary recovery techniques. Occidental had a leading position in the Permian Basin, producing approximately 8% of the total oil in the basin in 2022. By exploiting the natural synergies between Permian Resources and Permian EOR, Occidental is able to deliver unique short- and long-term advantages, efficiencies and expertise across its Permian Basin operations.

The Permian Resources unconventional business is focused on developing and producing unconventional reservoir targets using horizontal drilling technology. The development programs are designed to create long-term value from primary development by maximizing the recovery of oil, utilizing sustainable practices and providing strong financial returns. Occidental's unconventional oil and gas operations in Permian Resources include approximately 1.4 million net acres. In 2022, our activities were focused in the core development areas with emphasis on maintaining the industry leading capital intensity through optimized surface infrastructure and customized well designs. Overall, in 2022, Permian Resources produced from approximately 3,300 gross wells and added 387 MMboe to Occidental's proved reserves through development and extensions of proved areas.

The Permian Basin's concentration of large conventional reservoirs, strong CO₂ flooding performance and the expansive CO₂ transportation and processing infrastructure has resulted in decades of high-value enhanced oil production. With 34 active CO₂ floods and over 50 years of experience, Occidental is the industry leader in Permian Basin CO₂ flooding, which can increase ultimate oil recovery by 10% to 25%. Technology improvements, such as the recent trend toward vertical

expansion of the CO₂ flooded interval into residual oil zone targets, continue to yield more recovery from existing projects, and Permian EOR produced from approximately 13,000 gross wells in 2022.

Significant opportunities also remain to gain additional recovery by expanding Occidental's existing CO₂ projects into new portions of reservoirs that have only been waterflooded. Permian EOR has a large inventory of future CO₂ projects, which could be developed over the next 20 years or accelerated, depending on market conditions.

In 2022, Occidental spent approximately \$2.3 billion of capital in the Permian Basin, of which approximately 93% was spent on Permian Resources assets.

Rockies and Other Domestic

In 2022, Occidental produced approximately 277 Mboe/d net in the Rockies and Other Domestic locations. Production in the DJ Basin is derived from 2,000 operated vertical wells and 2,400 operated horizontal wells primarily focused in the Niobrara and Codell formations. The DJ Basin, including the North DJ Basin, comprises approximately 800,000 total net acres and provides competitive economics, low breakeven costs and free cash flow generation through Occidental's contiguous acreage position and royalty uplift.

In the DJ Basin, horizontal drilling results in the field continue to be strong, with improved operational efficiencies in drilling and completions. In 2022, Occidental drilled 68 operated horizontal wells and completed 54 operated horizontal wells.

Occidental is focusing on obtaining the necessary state, local and federal permits required to construct facilities and drill and complete wells in the DJ Basin. In January 2021, the COGCC adopted new regulations that impose siting requirements, or "setbacks," on certain oil and gas drilling locations based on the distance of a proposed well pad to occupied structures. Under these new regulations and through thoughtful surface location planning, Occidental obtained COGCC approval for five Oil and Gas Development Plans, inclusive of 12 well pad and facility locations and approximately 150 wells. In addition to the approximately 150 wells approved through the Oil and Gas Development Plan process, during the third quarter of 2022, Occidental became the first oil and gas operator in Colorado to obtain COGCC approval for the first Comprehensive Area Plan under the new COGCC rules. This comprehensive plan will support nine well pads and approximately 140 new wells and will provide for substantial future development in a geographically remote area on Colorado's eastern plains. Oil and Gas Development Plans associated with the Comprehensive Area Plan will be submitted in 2023.

As of December 31, 2022, Occidental is permitted, or had permit applications submitted to applicable regulatory agencies, for nearly all planned 2023 drilling and completions activity in the DJ Basin. In 2023, Occidental plans to submit state and local permits with the goal of building operational inventory and maintaining its social license to operate in Colorado. Occidental has a dedicated stakeholder relations team that conducts regulatory and community outreach with respect to its permit applications and operations in Colorado with a focus on building trust and fostering open communication with those that live and work near our operations.

Occidental has gained efficiencies in the permitting process and will continue to look for additional opportunities to do so. As discussed above, Occidental does not anticipate significant near-term changes to our development program in the DJ Basin based on these regulations. However, if Occidental is unable to obtain new drilling permits to develop a significant portion of the company's undeveloped acreage in the DJ Basin, the company's DJ Basin assets may be subject to testing for impairment, and if deemed to be impaired, such impairment could be material to our financial statements.

Occidental has interest in over 300,000 net acres in the Powder River Basin, mainly located in Converse County and Campbell County, Wyoming. The field contains the Turner, Niobrara, Mowry and Parkman formations that hold both liquids and natural gas. In 2022, Occidental drilled 19 operated horizontal wells and completed 14 horizontal wells in the Powder River Basin. The company plans to run one continuous operated drilling rig in 2023 with targeted completion activity throughout the year.

Occidental holds approximately 4.6 million net acres in other domestic locations, which consist of legacy acreage and fee minerals outside of Occidental's core operated areas including parts of Arkansas, Colorado, Louisiana, Texas, West Virginia and Wyoming.

OFFSHORE DOMESTIC ASSETS

Gulf of Mexico

Occidental is the fourth-largest oil and gas producer in the deep-water Gulf of Mexico, operating 10 strategically located deep-water floating platforms, the highest number among all the deep water operators, and producing from 18 active fields while owning a working interest across 252 blocks, including approximately 1.0 million net acres. Occidental's position is one of the largest portfolios in the Gulf of Mexico.

Occidental further operates two marine shore-bases in Galveston, Texas, and Port Fourchon, Louisiana, as well as two helicopter bases in Louisiana that all provide back up and redundancy to each other to support the Gulf operations. A central logistics base with an integrated training center is located in Broussard, Louisiana, and the Gulf of Mexico operations and development are managed and supported with engineering and technical staff from The Woodlands, Texas, office tower.

In 2022, Occidental increased net production to 147 Mboe/d from approximately 88 gross wells, investing over \$450 million in capital, including exploration capital, primarily directed towards drilling activity in its new Horn Mountain West subsea development, Lucius and Holstein facilities, drilling five wells using one floating drill ship, one platform rig and several service rigs. Occidental successfully and safely initiated first production from its new Horn Mountain West field and tied back to the Horn Mountain facility, increasing production at the platform by over 34 Mboe/d from three subsea oil wells,

on budget and three months ahead of schedule. In the fourth quarter of 2022, the new Caesar-Tonga Subsea Expansion project was also started several months ahead of schedule, debottlenecking the prolific giant Caesar-Tonga field and thus enabling future field expansion projects. Major subsea-pumping projects supporting the Marco Polo/K2 field and the Marlin/King field were progressed as well as extensive 4D seismic shoots in the Holstein field and elsewhere, setting up a runway of future development opportunities.

Operational excellence and efficiency continued as the prime objective in 2022 and gathered further momentum, reducing overall base production decline rates through the implementation of several successful well stimulations and artificial lift projects. Platform operating efficiencies were significantly improved and machinery uptimes were increased all through subordinated focus and condition monitoring initiatives as well as multiple upgrade projects. Continued optimum sequencing of annual platform turn-arounds provided further operational efficiencies, avoiding around two hundred days per year of shut-ins.

During 2022, all necessary regulatory permits for new wells and existing operations were obtained timely without any operational delays. Occidental was further awarded 30 new leases from BOEM's Lease Sale 257 and was the second most successful bidder.

Occidental's Gulf of Mexico assets continued to be among the lowest carbon emissions operations in the industry with zero routine flaring and zero cold venting.

The following table shows key areas of ongoing development in the Gulf of Mexico, along with the corresponding working interest in those areas.

	Working Interest
Horn Mountain	100 %
Holstein	100 %
Marlin	100 %
Lucius	67 %
K2 Complex	42 %
Caesar Tonga	34 %
Constellation	33 %

In 2023, Occidental expects to continue development and expansion of its existing assets across the Gulf of Mexico, to safely deliver high-margin production while continuing to add to its drill well inventory on existing leases through expansion and infrastructure led exploration opportunities around existing infrastructure. Occidental plans to conduct development and exploration activities in 2023 using one to two floating drill ships, one platform rig and several other well service vessels and continue to optimize its extensive portfolio of lease working interests.

INTERNATIONAL INTERESTS

BUSINESS REVIEW

Occidental conducts its ongoing international operations in two sub-regions: the Middle East and North Africa. Its activities include oil, NGL and natural gas production through direct working-interests, PSAs and PSCs. Under the PSCs, Occidental records a share of production and reserves to recover certain development and production costs and an additional share for profit. These contracts do not transfer any right of ownership to Occidental and reserves reported from these arrangements are based on Occidental's economic interest as defined in the contracts. Occidental's share of production and reserves from these contracts decreases when product prices rise and increases when prices decline. Overall, Occidental's net economic benefit from these contracts is greater when product prices are higher. Approximately \$0.5 billion of Occidental's worldwide capital budget is expected to be allocated to its international operations in 2023.

MIDDLE EAST / NORTH AFRICA ASSETS

1. Algeria
2. Oman
3. Qatar
4. UAE

Algeria

Occidental's interest in Algeria involves development and production rights in 18 fields within Blocks 404a and 208, which are located in the Berkine Basin in Algeria's Sahara Desert and are governed by an agreement amongst Occidental, Sonatrach and other partners. Occidental is responsible for 24.5% of the development and production costs. The El Merk central processing facility in Block 208 processes produced oil, NGL and natural gas, while the Hassi Berkine South and Ourhoud central processing facilities in Block 404a process produced oil. The rights to produce from the Block 404a fields expire between May 2023 and 2036, and the rights to produce from the Block 208 fields expire in 2032.

In 2022, net production in Algeria was 45 Mbbbl/d, two gross development wells were drilled and annual net capital expenditures were \$25 million.

In July 2022, Occidental signed a new PSC with Sonatrach and other partners which, upon approval by the Algerian government, will be for a new 25-year term for all of the fields under the current hydrocarbon agreement. With respect to the new PSC, Occidental is responsible for 35% of the development and production costs, and government approval is expected in the first half of 2023.

Oman

In Oman, Occidental is the operator of Block 9, Block 27, Block 53 (Mukhaizna Field), Block 62 and Block 65 and has additional interests in Blocks 30, 51 and 72, which are under the Exploration phase. The working interest and contract expiration year for each of the respective blocks are shown in the table below. Occidental holds 6.0 million gross acres and has 10,000 potential well inventory locations. In 2022, Occidental's share of production was 65 Mboe/d.

	Working Interest	Block Expiration (Year)
Block 9	50 %	2030
Block 27	65 %	2035
Block 53	47 %	2035
Block 62	100 %	2028
Block 65	51 %	2037
Blocks 30, 51 and 72	100 %	Exploration Phase

Occidental has produced over 754 million gross barrels from Block 9 since the beginning of its operation through successful exploration, continuous drilling improvements and EOR projects. The Mukhaizna Field in Block 53 is a major pattern steam flood project for EOR that utilizes some of the largest mechanical vapor compressors ever built. Since assuming operations in the Mukhaizna Field in 2005, Occidental has drilled close to 3,580 new wells and has produced over 575 million gross barrels. In 2022, Occidental declared commerciality for Block 65 and invested capital of \$362 million across all of the Oman blocks to drill 92 wells and execute facilities projects to support development and EOR activities.

In 2023, Occidental will continue to enhance production by adding extended and dual laterals, stimulating wells with the OXY JETTING™ wellbore stimulation system, and expanding thermal conformance. Occidental will also continue to execute projects in Oman targeting emissions reductions.

Qatar

In Qatar, Occidental partners in the Dolphin Energy Project, an investment that is comprised of two separate economic interests. Occidental has a 24.5% interest in the upstream operations (Dolphin) to develop and produce NGL, natural gas and condensate from Qatar's North Field through mid-2032. Occidental also has a 24.5% interest in DEL, which operates a pipeline and is discussed further in the midstream and marketing segment section in this Form 10-K under Pipeline. In 2022, Occidental's net share of production from Dolphin was 37 Mboe/d.

UAE

In 2011, Occidental acquired a 40% participating interest in the Shah gas field (Al Hosn Gas), joining with the Abu Dhabi National Oil Company, which expires in 2041. In 2022, Occidental's net share of production from Al Hosn Gas was 227 million cubic feet per day (MMcf/d) of natural gas and 35 Mbbbl/d of NGL and condensate. Al Hosn Gas includes gas processing facilities which are discussed further in the midstream and marketing segment section in this Form 10-K under Gas Processing, Gathering and CO₂.

In 2019 and 2020, Occidental acquired 9-year exploration concessions and, subject to a declaration of commerciality, 35-year production concessions for Onshore Block 3 and Block 5, which cover an area approximately 1.5 million acres and 1.0 million acres, respectively, and are adjacent to Al Hosn Gas. In 2022 and 2021, Occidental announced multi-zone oil and gas discoveries in Onshore Block 3.

In 2023, Occidental plans to complete an expansion project that commenced in 2022 to increase the production capacity of the Al Hosn Gas processing facilities from 1.28 Bcf/d to 1.45 Bcf/d and continue further exploration and appraisal activities in Onshore Block 3 and Block 5.

**PROVED RESERVES**

Proved oil, NGL and natural gas reserves were estimated using the unweighted arithmetic average of the first-day-of-the-month price for each month within the year, unless prices were defined by contractual arrangements. Oil, NGL and natural gas prices used for this purpose were based on posted benchmark prices and adjusted for price differentials including gravity, quality and transportation costs.

The following table shows the 2022, 2021 and 2020 calculated first-day-of-the-month average prices for both WTI and Brent oil prices, as well as the Henry Hub gas prices measured in MMBtu:

	2022	2021	2020
WTI Oil (\$/Bbl)	\$ 93.67	\$ 66.56	\$ 39.57
Brent Oil (\$/Bbl)	\$ 97.77	\$ 69.24	\$ 43.41
Henry Hub Natural Gas (\$/MMbtu)	\$ 6.36	\$ 3.60	\$ 1.98
Mt. Belvieu NGL (\$/Bbl)	\$ 47.81	\$ 44.22	\$ 18.74

Occidental had proved reserves from continuing operations at year-end 2022 of 3,817 MMboe, compared to the year-end 2021 amount of 3,512 MMboe. Proved developed reserves represented approximately 71% and 75% of Occidental's total proved reserves at year-end 2022 and 2021, respectively. The following table shows the breakout of Occidental's proved reserves from continuing operations by commodity as a percentage of total proved reserves:

	2022	2021
Oil	50 %	50 %
NGL	22 %	22 %
Natural gas	28 %	28 %

Occidental does not have any reserves from non-traditional sources. For further information regarding Occidental's proved reserves, see the Supplemental Oil and Gas Information section in Item 8 of this Form 10-K.

CHANGES IN PROVED RESERVES

Changes in Occidental's 2022 reserves were as follows:

MMboe	2022
Revisions of previous estimates	474
Improved recovery	89
Extensions and discoveries	176
Purchases	10
Sales	(21)
Production	(423)
Total	305

Occidental's ability to add reserves, other than through purchases, depends on the success of infill development, extension, discovery and improved recovery projects, each of which depends on reservoir characteristics, technology improvements and oil and natural gas prices, as well as capital and operating costs. Many of these factors are outside management's control and may negatively or positively affect Occidental's reserves.

Revisions of Previous Estimates

Revisions can include upward or downward changes to previous proved reserve estimates for existing fields due to the evaluation or interpretation of geologic, production decline or operating performance data. In addition, product price changes affect proved reserves recorded by Occidental. For example, lower prices may decrease the economically recoverable reserves, particularly for domestic properties, because the reduced margin limits the expected life of the operations. Offsetting this effect, lower prices increase Occidental's share of proved reserves under PSCs because more oil is required to recover costs. Conversely, when prices rise, Occidental's share of proved reserves decreases for PSCs and economically recoverable reserves may increase for other operations. Reserve estimation rules require that estimated ultimate recoveries be much more likely to increase or remain constant than to decrease, as changes are made due to increased availability of technical data.

In 2022, Occidental's revisions of previous estimates of proved reserves were positive 474 MMboe. These revisions were primarily due to 335 MMboe of positive revisions related to additions associated with infill development projects, mainly in the Permian Basin (232 MMboe) and the DJ Basin (94 MMboe). An additional 136 MMboe of positive revisions were related price revisions. The positive price revisions were primarily associated with the Permian Basin (147 MMboe), the Gulf of Mexico (8 MMboe) and the DJ Basin (4 MMboe), which were partially offset by negative price revisions of 29 MMboe on international PSCs.

Further positive revisions of 93 MMboe were associated with updates based on reservoir performance and 5 MMboe were associated with management changes in development plans. The positive revisions were offset by negative revisions associated with various other cost and interest related revisions (95 MMboe).

Improved Recovery

In 2022, Occidental added proved reserves of 89 MMboe related to improved recovery, primarily in the Permian EOR, which accounted for 87% of the improved recovery reserve additions. These properties comprise conventional projects, which are characterized by the deployment of EOR development methods, largely employing application of CO₂ flood, waterflood or steam flood. These types of conventional EOR development methods can be applied through existing wells, though additional drilling is frequently required to fully optimize the development configuration. Waterflooding is the technique of injecting water into the formation to displace the oil to the offsetting oil production wells. The use of either CO₂ or steam flooding depends on the geology of the formation, the evaluation of engineering data, availability and cost of either CO₂ or steam and other economic factors. Both techniques work similarly to lower viscosity causing the oil to move more easily to the producing wells. The remaining improved recovery additions were due to secondary and tertiary projects for certain international assets.

Extensions and Discoveries

Occidental also added proved reserves from extensions and discoveries, which are dependent on successful exploration and exploitation programs. In 2022, extensions and discoveries added 176 MMboe primarily related to the recognition of proved reserves in the Permian Basin (155 MMboe) and Powder River Basin (7 MMboe).

Purchases of Proved Reserves

In 2022, Occidental purchased proved reserves of 10 MMboe primarily consisting of proved reserves in the Permian Basin.

Sales of Proved Reserves

In 2022, Occidental sold 21 MMboe in proved reserves related to the divestitures of certain non-strategic assets in the Permian Basin.

Proved Undeveloped Reserves

Occidental had PUD reserves at year-end 2022 of 1,119 MMboe, compared to the year-end 2021 amount of 865 MMboe.

Changes in PUD reserves were as follows:

<i>MMboe</i>	2022
Revisions of previous estimates	270
Improved recovery	49
Extensions and discoveries	107
Purchases	1
Sales	(10)
Transfer to proved developed reserves	(163)
Total	254

Revisions of previous estimates were a positive 270 MMboe. Approximately 263 MMboe of the positive revisions were related to additions associated with infill development projects in the Permian Basin (170 MMboe) and the DJ Basin (93 MMboe). Additionally, the revisions included positive price revisions of 24 MMboe. The positive price revisions were primarily associated with the Permian Basin. The remaining positive revisions were associated with various updates based on reservoir performance. The positive revisions were offset by negative revisions associated with various other cost and interest related revisions (21 MMboe).

Extensions and discoveries added 107 MMboe primarily related to the recognition of proved reserves in the Permian Basin (100 MMboe). Total improved recovery additions of 49 MMboe were primarily the result of conventional projects in the Permian EOR (44 MMboe) and secondary and tertiary projects in international assets (5 MMboe). The 2022 additions to

PUD reserves were partially offset by transfers to proved developed reserves of 163 MMboe. The transfers were primarily associated with the Permian Basin (89 MMboe), the DJ Basin (40 MMboe) and Gulf of Mexico (21 MMboe).

In 2022, Occidental incurred approximately \$1.2 billion to convert PUD reserves to proved developed reserves, and in 2022 Occidental converted approximately 19% of its PUD reserves to proved developed, when adjusted for revisions and sales. As of December 31, 2022, Occidental had 1,119 MMboe of PUD reserves of which 73% were associated with domestic onshore, 4% with Gulf of Mexico and 23% with international assets. Occidental's most active development areas are located in the Permian Basin, which represented 54% of the PUD reserves as of December 31, 2022. Occidental's total planned 2023 capital expenditures are between \$5.4 billion and \$6.2 billion. Overall, Occidental plans to spend approximately \$4.6 billion over the next five years to develop its PUD reserves in the Permian Basin.

PUD reserves are supported by a five-year detailed field-level development plan, which includes the timing, location and capital commitment of the wells to be drilled. Only PUD reserves which are reasonably certain to be drilled within five years of booking and are supported by a final investment decision to drill them are included in the development plan. A portion of the PUD reserves are expected to be developed beyond the five years and are tied to approved long-term development projects.

As of December 31, 2022, Occidental had 241 MMboe of pre-2018 PUD reserves that remained undeveloped. These PUD reserves relate to approved long-term development plans, 175 MMboe of which are primarily associated with international development projects with physical limitations in existing gas processing capacity and 66 MMboe of which are related to approved long-term development plans for Permian EOR projects, also with physical limitations in existing gas processing capacity. Occidental remains committed to these projects and continues to actively progress the development of these volumes. In addition to the above, Occidental has 57 MMboe of PUD reserves that are scheduled to be developed more than five years from their initial date of booking. These PUD reserves are related to approved long-term development plans, 41 MMboe of which are associated with international development projects and 16 MMboe with the Gulf of Mexico projects.

RESERVES EVALUATION AND REVIEW PROCESS

Occidental's estimates of proved reserves and associated future net cash flows as of December 31, 2022, were made by Occidental's technical personnel and are the responsibility of management. The estimation of proved reserves is based on the requirement of reasonable certainty of economic producibility and funding commitments by Occidental to develop the reserves. This process involves reservoir engineers, geoscientists, planning engineers and financial analysts. As part of the proved reserves estimation process, all reserve volumes are estimated by a forecast of production rates, operating costs and capital expenditures. Price differentials between benchmark prices (the unweighted arithmetic average of the first-day-of-the-month price for each month within the year) and realized prices and specifics of each operating agreement are then used to estimate the net reserves. Production rate forecasts are derived by a number of methods, including estimates from decline curve analysis, type well profile analysis, computer simulation of the reservoir performance, volumetric analysis and material balance calculations that take into account the volumes of substances replacing the volumes produced and associated reservoir pressure changes supported by various technologies including seismic analysis. These reliable field-tested technologies have demonstrated reasonably certain results with consistency and repeatability in the formation being evaluated or in an analogous formation. Operating and capital costs are forecast using the current cost environment applied to expectations of future operating and development activities.

Net proved developed reserves are those volumes that are expected to be recovered through existing wells with existing equipment and operating methods for which the incremental cost of any additional required investment is relatively minor.

Net PUD reserves are those volumes that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. PUD reserves are supported by a five-year, detailed, field-level development plan, which includes the timing, location and capital commitment of the wells to be drilled. The development plan is reviewed and approved annually by senior management and technical personnel. Annually, a detailed review is performed by Occidental's Corporate Reserves Group and its technical personnel on a lease-by-lease basis to assess whether PUD reserves are being converted on a timely basis within five years from the initial disclosure date. Any leases not showing timely transfers from PUD reserves to proved developed reserves are reviewed by senior management to determine if the remaining reserves will be developed in a timely manner and have sufficient capital committed in the development plan. Only PUD reserves that are reasonably certain to be drilled within five years of booking and are supported by a final investment decision to drill them are included in the development plan. A portion of the PUD reserves associated with international operations are expected to be developed beyond the five years and are tied to approved long-term development plans.

The current Senior Vice President, Reserves for Oxy Oil and Gas is responsible for overseeing the preparation of reserve estimates, in compliance with SEC rules and regulations, including the internal audit and review of Occidental's oil and gas reserves data. He has over 40 years of experience in the upstream sector of the exploration and production business and has held various assignments in North America, Asia and Europe. He is a three-time past Chair of the Society of Petroleum Engineers Oil and Gas Reserves Committee. He is an AAPG Certified Petroleum Geologist and currently serves on the AAPG Committee on Resource Evaluation. He is a member of the Society of Petroleum Evaluation Engineers, the Colorado School of Mines Potential Gas Committee and the United Nations Economic Commission for Europe Expert

Group on Resource Management. He has Bachelor of Science and Master of Science degrees in geology from Emory University in Atlanta.

Occidental has a Reserves Committee, consisting of senior corporate officers, to review and approve Occidental's oil and gas reserves. The Reserves Committee reports to the Audit Committee of Occidental's Board of Directors during the year. Since 2003, Occidental has retained Ryder Scott, independent petroleum engineering consultants, to review its annual oil and gas reserve estimation processes. For additional reserves information, see Supplemental Oil and Gas Information under Item 8 of this Form 10-K.

In 2022, Ryder Scott conducted a process review of the methods and analytical procedures utilized by Occidental's engineering and geological staff for estimating the proved reserves volumes, preparing the economic evaluations and determining the reserves classifications as of December 31, 2022, in accordance with SEC regulatory standards. Ryder Scott reviewed the specific application of such methods and procedures for selected oil and gas properties considered to be a valid representation of Occidental's 2022 year-end total proved reserves portfolio. In 2022, Ryder Scott reviewed approximately 42% of Occidental's proved oil and gas reserves. Since being engaged in 2003, Ryder Scott has reviewed the specific application of Occidental's reserve estimation methods and procedures for approximately 92% of Occidental's existing proved oil and gas reserves.

Management retained Ryder Scott to provide objective third-party input on its methods and procedures and to gather industry information applicable to Occidental's reserve estimation and reporting process. Ryder Scott has not been engaged to render an opinion as to the reasonableness of reserves quantities reported by Occidental. Occidental has filed Ryder Scott's independent report as an exhibit to this Form 10-K.

Based on its reviews, including the data, technical processes and interpretations presented by Occidental, Ryder Scott has concluded that the overall procedures and methodologies Occidental utilized in estimating the proved reserves volumes, preparing the economic evaluations and determining the reserves classifications for the reviewed properties are appropriate for the purpose thereof and comply with current SEC regulations.

INDUSTRY OUTLOOK

The oil and gas exploration and production industry is highly competitive, is subject to significant volatility due to various market conditions and operations are highly dependent on oil prices and, to a lesser extent, NGL and natural gas prices. Oil prices increased significantly in 2022. During 2022, as compared to 2021, the average annual \$/Bbl of WTI crude increased to \$94.23 from \$67.91 and the average annual Brent price per barrel increased to \$98.83 from \$70.78.

Oil prices will continue to be affected by: (i) global supply and demand, which are generally a function of global economic conditions, inventory levels, production or supply chain disruptions, technological advances, regional market conditions and the actions of OPEC, other significant producers and governments; (ii) transportation capacity, infrastructure constraints, and costs in producing areas; (iii) currency exchange rates and inflation rates; and (iv) the effect of changes in these variables on market perceptions. The ongoing global impact of the Russia-Ukraine war and whether the oil industry will be able to sustain a continued supply response have resulted in an increase in benchmark oil prices year-over-year. Occidental does not operate or own assets in either Russia or Ukraine. It is expected that the price of oil will be volatile for the foreseeable future given the current geopolitical risks, the ongoing global impact of the Russia-Ukraine war, the evolving macro-economic environment and supply activity (as a result of COVID-19) from OPEC and non-OPEC oil producing countries and the Biden Administration's releases from the US Strategic Petroleum Reserve.

NGL prices are related to the supply and demand for the components of products making up these liquids. Some of them more typically correlate to the price of oil while others are affected by natural gas prices as well as the demand for certain chemical products for which they are used as feedstock. In addition, infrastructure constraints magnify the pricing volatility from region to region.

Domestic natural gas prices and local differentials are strongly affected by local supply and demand fundamentals, as well as government regulations, global LNG demand and availability of transportation capacity from producing areas.

We expect that oil prices in the near term will continue to be influenced by the duration and severity of the COVID-19 pandemic and its resulting impact on oil and gas supply and demand.

These and other factors make it difficult to predict the future direction of oil, NGL and domestic gas prices reliably. For purposes of the current capital plan, Occidental will continue to focus on allocating capital to high return assets with the flexibility to adjust based on fluctuations in commodity prices. International gas prices are generally fixed under long-term contracts. Occidental continues to adjust capital expenditures in line with current economic conditions, such as supply chain constraints, rising interest rates, global logistics and high inflation, which has continued to disrupt global supply and demand balances, with the goal of keeping returns well above its cost of capital.

The timing, process and ultimate cost to transition to a less carbon-intensive economy remains largely unknown; various industry forecasts indicate a growing demand for hydrocarbons for the remainder of the current decade. Occidental believes its operational flexibility to achieve low development and operating costs to maximize full-cycle value of its assets and its knowledge and experience in CO₂ separation, transportation, use, recycling and storage position its oil and gas segment to support Occidental's transition to net zero as well as create opportunities in a low-carbon future.

CHEMICAL SEGMENT

BUSINESS STRATEGY

OxyChem concentrates on the chlorovinyls chain, beginning with the co-production of caustic soda and chlorine. Caustic soda and chlorine are marketed to external customers. In addition, chlorine, together with ethylene, is converted through a series of intermediate products into PVC. OxyChem seeks to be a low-cost producer in order to generate cash flow in excess of its normal capital expenditure requirements and achieve above-cost-of-capital returns. OxyChem's focus on chlorovinyls allows it to maximize the benefits of integration and take advantage of economies of scale. Capital is employed to sustain production capacity and to focus on projects and developments designed to improve the competitiveness of segment assets. Acquisitions and plant development opportunities may be pursued when they are expected to enhance the existing core chlor-alkali and PVC businesses or take advantage of other specific opportunities. The conversion of the Battleground chlor-alkali plant to membrane technology is expected to commence in 2023 with completion expected in 2026. In 2022, capital expenditures for OxyChem totaled \$322 million.

BUSINESS ENVIRONMENT

Although the United States economic growth lagged significantly behind that of 2021, demand for domestically produced products remained high, including liquid caustic soda and PVC. Lockdowns in China, along with Russia's invasion of Ukraine increased the demand for U.S. produced products in 2022, as ethylene and energy costs remained advantaged over global pricing. Caustic soda prices were significantly higher in 2022 and PVC pricing trended downward during the second half of 2022, as supply chain constraints, rising interest rates, global logistics and high inflation continued to disrupt global supply and demand balances.

BUSINESS REVIEW

BASIC CHEMICALS

Despite the slower U.S. economic growth in 2022, chlor-alkali operating rates increased compared to 2021 as the U.S. maintained its competitive advantage in energy and feedstock costs. Pricing and margins for most products were higher in 2022 due to strong demand in most market segments, and weather events and other supply disruptions restricted supply.

VINYLS

PVC demand softened in 2022 from record highs in 2021 resulting in a 7% decrease in domestic PVC demand. Export demand strengthened in 2022 by 46% compared to 2021. Year over year operating rates were flat in 2022 due to a softening PVC market during the second half of 2022 that was offset by the weather-related events experienced in early 2021. Higher interest rates, lower housing starts, and inflation contributed to the lower domestic PVC demand and US producers shifted available volumes to the export markets. PVC exports represented 27% of total North American production in 2022 compared to 19% in 2021.

INDUSTRY OUTLOOK

Industry performance will depend on the health of the global economy. Response to inflation will continue to control the housing and construction sectors during 2023. Automotive markets are expected to improve as semiconductor supply normalizes and demand responds. Product margins will depend on market supply and demand balances, feedstock and energy prices, supply chain interruptions, labor constraints and rising inflation rates. Further recovery in the petroleum industry should strengthen the demand and margins for some of Occidental's products that are consumed by industry participants. U.S. commodity export markets could be impacted by the relative strength of the U.S. dollar.

BASIC CHEMICALS

Demand for basic chemicals is expected to decline from the robust levels of 2022. Demand in most market segments is expected to follow the trend of the general economy throughout 2023. Demand for chlorine and derivatives should gradually improve across the year as international growth returns and the domestic housing, general construction and automotive markets begin to stabilize. Demand for alkali products, particularly caustic soda, may decline moderately with lower demand in the pulp and paper, industrial and alumina markets. Chlor-alkali operating rates should remain relatively flat overall in comparison with 2022 due to continued globally advantaged energy and raw material pricing as compared to global feedstock costs.

VINYLS

Domestic PVC demand is expected to remain neutral to lower in 2023. Residential construction spending is expected to be lower in 2023, while new domestic infrastructure projects and recovering global demand is expected to offset the domestic decline. New domestic PVC capacity came online in 2022 but is not expected to have a material impact on PVC production rates.

MIDSTREAM AND MARKETING SEGMENT

BUSINESS STRATEGY

The midstream and marketing segment strives to maximize value by optimizing the use of its gathering, processing, transportation, storage and terminal commitments and by providing the oil and gas segment access to domestic and international markets. To generate returns, the segment evaluates opportunities across the value chain and uses its assets to provide services to Occidental's subsidiaries, as well as third parties. The midstream and marketing segment operates or contracts for services on gathering systems, gas plants, co-generation facilities and storage facilities and invests in entities that conduct similar activities.

This segment also seeks to minimize the costs of gas and power used in Occidental's various businesses. Capital is employed to sustain or expand assets to improve the competitiveness of Occidental's businesses. In 2022, capital expenditures related to the midstream and marketing segment totaled \$268 million.

Also included in the midstream and marketing segment is OLCV. OLCV seeks to leverage Occidental's carbon management expertise through the development of CCUS projects, and invests in emerging low-carbon technologies that are expected to reduce our carbon footprint and enable others to do the same.

BUSINESS ENVIRONMENT

Midstream and marketing segment earnings are affected by the performance of its various businesses, including its marketing, gathering and transportation, gas processing and power-generation assets. The marketing business aggregates, markets and stores Occidental and third-party volumes. Marketing performance is affected primarily by commodity price changes and margins in oil and gas transportation and storage programs. The marketing business results can experience significant volatility depending on commodity prices and the Midland-to-Gulf-Coast oil spreads. The Midland-to-Gulf-Coast oil spreads have decreased from an average of \$0.48 per barrel in 2021 to \$0.36 per barrel for the year ended December 31, 2022. A \$0.25 change in the Midland-to-Gulf-Coast oil spreads impacts total year operating cash flows by approximately \$65 million. Gas gathering, processing and transportation results are affected by fluctuations in commodity prices and the volumes that are processed and transported through the segment's plants, as well as the margins obtained on related services from investments in which Occidental has an equity interest.

BUSINESS REVIEW

MARKETING

The marketing group markets substantially all of Occidental's oil, NGL and natural gas production and optimizes its transportation and storage capacity. Occidental's third-party marketing activities focus on purchasing oil, NGL and natural gas for resale from parties whose oil and gas supply is located near its transportation and storage capacity. These purchases allow Occidental to aggregate volumes to better utilize and optimize its assets. In 2022, compared to the prior year, marketing results were impacted by the timing of crude oil sales, partially offset by higher gas marketing margin from transportation capacity optimization.

DELIVERY AND TRANSPORTATION COMMITMENTS

Occidental has made long-term commitments to certain refineries and other buyers to deliver oil, NGL and natural gas. The total amount contracted to be delivered is approximately 80 MMbbl of oil through 2025, 567 MMbbl of NGL through 2029 and 845 Bcf of gas through 2029. The price for these deliveries is set at the time of delivery of the product.

Occidental has crude pipeline take-or-pay capacity of approximately 850 Mbbl/d to the Gulf Coast, leased crude storage capacity of approximately 10 MMbbl and capacity at the crude terminal of approximately 525 Mbbl/d. Certain of Occidental's crude pipeline take-or-pay agreements expire in 2025 and take-or-pay commitments will reduce by two thirds by 2027.

PIPELINE

Occidental's pipeline business mainly consists of its 24.5% ownership interest in DEL. DEL owns and operates a 230-mile-long, 48-inch-diameter natural gas pipeline, known as the Dolphin Pipeline, which transports dry natural gas from Qatar to the UAE and Oman. The Dolphin Pipeline has capacity to transport up to 3.2 Bcf/d and currently transports approximately 2.0 Bcf/d and up to 2.2 Bcf/d in the summer months.

GAS PROCESSING, GATHERING AND CO₂

Occidental processes its own and third-party domestic wet gas to extract NGL and other gas byproducts, including CO₂ and delivers dry gas to pipelines. Margins primarily result from the difference between inlet costs of wet gas and market prices for NGL.

As of December 31, 2022, Occidental owned all of the 2.3% non-voting general partner interest and 49.5% of the limited partner units in WES. On a combined basis, with its 2% non-voting limited partner interest in WES Operating, Occidental's total effective economic interest in WES and its subsidiaries was 51.7%. See [Note 1 - Summary of Significant Accounting Policies](#) in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for more information regarding

Occidental's equity method investment in WES. WES owns gathering systems, plants and pipelines and earns revenue from fee-based and service-based contracts with Occidental and third parties.

Occidental's 40% participating interest in Al Hosn Gas also includes sour gas processing facilities that are designed to process 1.33 Bcf/d of natural gas and separate it into salable gas, condensate, NGL and sulfur. In 2022, the project produced 568 MMcf/d of natural gas, 88 Mbbbl/d of NGL and condensate, and 10,700 tons/d of sulfur, of which Occidental's net share was 227 MMcf/d of natural gas, 35 Mbbbl/d of NGL and condensate and 4,280 tons/d of sulfur.

In 2022, compared to the prior year, gas processing, gathering and CO₂ results increased primarily due to higher sulfur and NGL prices.

POWER GENERATION FACILITIES

Earnings from power and steam generation facilities are derived from sales to affiliates and third parties.

LOW-CARBON VENTURES

OLCV was formed to execute on Occidental's vision to reduce global emissions and provide a more sustainable future through the development of low-carbon energy and products. OLCV capitalizes on Occidental's extensive experience in utilizing CO₂ in its development of CCUS projects and providing services to third parties to facilitate the implementation of their CCUS projects. Moreover, OLCV is fostering emerging technologies, including DAC and low-carbon power sources, and other business models with the potential to position Occidental as a leader in the production of low-carbon energy and products.

Occidental has developed standards and protocols recognized by the EPA for monitoring, reporting and verifying the amount, safety and permanence of CO₂ stored through secure geologic sequestration. Occidental holds the nation's first two EPA-approved monitoring, reporting and verification plans for geologic sequestration through EOR production and obtained a third monitoring, reporting and verification plan in 2021. In 2022, OLCV acquired approximately three hundred thousand acres of pore space. In 2022, Occidental also commenced EPA Class 6 permitting with the intention of developing five sequestration hubs.

OLCV commenced construction on the world's largest DAC facility in 2022, which is expected to be online in 2025. OLCV is also currently conducting front-end engineering design work and feasibility studies on a number of projects to capture and sequester CO₂, either from the atmosphere or from industrial point sources. In 2023, OLCV plans to invest between \$100 million and \$500 million, dependent upon potential partner participation, to pursue various projects.

The profitability of sequestration projects is dependent upon the costs of developing, building and operating sequestration infrastructure, demand for sequestration services from emitters and the availability of certain tax attributes and credits generated from the capture and storage of CO₂.

In August 2022, Congress passed the Inflation Reduction Act that contains, among other provisions, certain tax incentives related to climate change and clean energy. These incentives may attract more third-party investment of OLCV's projects which may help accelerate certain projects. The ultimate impact of the Inflation Reduction Act on Occidental's emerging low-carbon businesses and net-zero pathway will depend on a number of factors, interpretations and assumptions as well as additional regulatory guidance.

INDUSTRY OUTLOOK

Midstream and marketing segment results can experience volatility depending on commodity price changes, demand impacting export sales and the Midland-to-Gulf-Coast oil spreads. Gas gathering, processing and transportation results are affected by fluctuations in commodity prices and the volumes that are processed and transported through the segment's plants, as well as the margins obtained on related services from investments in which Occidental has an equity interest.

Throughout 2022, the U.S. experienced economy-wide cost increases, which could increase the cost of sequestration projects. Occidental saw increased interest from third parties in providing sequestration services during the year. Additionally, grants, credits and other tax-advantaged low-carbon attributes continue to be actively discussed at both state and federal levels. These trends are expected to continue, which Occidental believes will enhance the economics of sequestration projects.

SEGMENT RESULTS OF OPERATIONS AND ITEMS AFFECTING COMPARABILITY

SEGMENT RESULTS OF OPERATIONS

Segment earnings exclude income taxes, interest income, interest expense, environmental remediation expenses, unallocated corporate expenses and discontinued operations, but include gains and losses from divestitures of segment assets and income from the segments' equity investments. Seasonality is not a primary driver of changes in Occidental's consolidated quarterly earnings during the year.

The following table sets forth the sales and earnings of each operating segment and corporate items for the years ended December 31:

<i>millions, except per share amounts</i>	2022	2021	2020
NET SALES ^(a)

Asset sale gains (losses), net - international ^(c)	\$ 55	\$ 43	\$ (353)
Asset impairments and related items - domestic ^(d)	\$ —	\$ (282)	\$ (5,904)
Asset impairments and related items - international ^(e)	\$ —	\$ —	\$ (1,195)
Oil, natural gas and CO ₂ mark-to-market gains (losses)	\$ —	\$ (280)	\$ 1,090
Rig terminations and other - domestic	\$ —	\$ —	\$ (59)
Rig terminations and other - international	\$ —	\$ —	\$ (13)

^(a) Results included significant items affecting comparability discussed in the footnotes below.

^(b) The 2022 amount included \$148 million of gains, primarily related to the sale of certain non-strategic assets in the Permian Basin. The 2021 amount included \$27 million in post-closing consideration earned from 2020 asset sales as a result of certain production and pricing targets being met. The 2020 amount included a \$440 million loss on the sale of Occidental's mineral and fee surface acres in Wyoming, Colorado and Utah and losses of \$820 million related to the sale of non-core, largely non-operated acreage in the Permian Basin.

^(c) The 2022 amount included \$55 million related to post-closing consideration earned from 2020 asset sales as a result of certain production and pricing targets being met as well as the closing of the sale of certain assets that were negotiated with the 2020 Colombia divestiture. The 2021 amount primarily included \$55 million in post-closing consideration earned from 2020 asset sales as a result of certain production and pricing targets being met. The 2020 amount included a loss on the sale of Occidental's Colombia assets of \$353 million.

^(d) The 2021 amount included \$282 million of asset impairments primarily related to undeveloped leases that either expired or were set to expire in the near term where Occidental had no plans to pursue exploration activities. The 2020 amount included pre-tax impairments of \$4.5 billion primarily related to domestic onshore unproved acreage as well as \$1.3 billion primarily related to other domestic onshore assets and the Gulf of Mexico.

^(e) The 2020 amount included \$1.2 billion of impairment and related charges associated with Occidental's proved properties in Algeria and Oman.

**Average Realized Prices**

The following table sets forth the average realized prices for oil, NGL and natural gas from ongoing operations for each of the three years in the period ended December 31, 2022, and includes a year-over-year change calculation:

	2022	Year over Year Change	2021	Year over Year Change	2020
Average Realized Prices					
Oil (\$/Bbl)					
United States	\$ 94.12	42 %	\$ 66.39	82 %	\$ 36.39
International	\$ 95.46	47 %	\$ 65.08	57 %	\$ 41.50
Total worldwide	\$ 94.36	43 %	\$ 66.14	77 %	\$ 37.34
NGL (\$/Bbl)					
United States	\$ 35.69	17 %	\$ 30.62	156 %	\$ 11.98
International	\$ 34.09	30 %	\$ 26.13	61 %	\$ 16.22
Total worldwide	\$ 35.48	18 %	\$ 30.01	139 %	\$ 12.58
Natural Gas (\$/Mcf)					
United States	\$ 5.48	66 %	\$ 3.30	180 %	\$ 1.18
International	\$ 1.89	12 %	\$ 1.69	1 %	\$ 1.67
Total worldwide	\$ 4.51	57 %	\$ 2.87	119 %	\$ 1.31

Domestic oil and gas results, excluding significant items affecting comparability, increased in 2022 compared to 2021 primarily due to higher realized oil, NGL and natural gas prices and lower DD&A rates, partially offset by higher lease operating costs.

International oil and gas results, excluding significant items affecting comparability, increased in 2022 compared to 2021 primarily due to higher oil prices.

Realized Price and Sales Volume Variance

The following table presents an analysis of the impacts of changes in average realized prices and sales volumes with regard to Occidental's domestic and international oil and gas revenue:

millions	Increase (Decrease) Related to					
	Year Ended December 31, 2021 ^(a)	Price Realizations	Net Sales Volumes	Year Ended December 31, 2022 ^(a)		
United States Revenue						
Oil	\$ 12,072	\$ 5,118	\$ 231	\$ 17,421		
NGL	2,203	332	96	2,631		
Natural gas	1,524	969	(71)	2,422		
Total	\$ 15,799	\$ 6,419	\$ 256	\$ 22,474		
International Revenue						
Oil ^(b)	\$ 2,844	\$ 902	\$ 189	\$ 3,935		
NGL	325	85	11	421		
Natural gas	291	23	(3)	311		
Total	\$ 3,460	\$ 1,010	\$ 197	\$ 4,667		

^(a) Excludes "other" oil and gas revenue. See [Note 2 - Revenue](#) in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for additional information regarding other revenue.

^(b) Includes the impact of international production sharing contracts.

**Production**

The following table sets forth the production volumes of oil, NGL and natural gas per day from ongoing operations for each of the three years in the period ended December 31, 2022, and includes a year-over-year change calculation:

Production per Day, Ongoing Operations (Mboe/d)	2022	Year over Year Change	2021	Year over Year Change	2020
United States					
Permian	513	5 %	487	(15)%	575
Rockies & Other Domestic	277	(8)%	302	(9)%	332
Gulf of Mexico	147	2 %	144	11 %	130
Total	937	0 %	933	(10)%	1,037
International					
Algeria & Other International	47	7 %	44	(2)%	45
Al Hosn Gas	73	(4)%	76	(3)%	78
Dolphin	37	(8)%	40	(9)%	44
Oman	65	(12)%	74	(13)%	85
Total	222	(5)%	234	(7)%	252
Total Production from Ongoing Operations	1,159	(1)%	1,167	(9)%	1,289
Operations exited ^(a)	—	(100)%	16	(72)%	58
Total Production (Mboe/d) ^(b)	1,159	(2)%	1,183	(12)%	1,347

^(a) Operations exited include the Ghana assets (sold in October 2021) and the Colombia onshore assets (sold in December 2020).

^(b) Natural gas volumes have been converted to Boe based on energy content of six Mcf of gas to one barrel of oil. Boe equivalent does not necessarily result in price equivalency. Please refer to the Supplemental Oil and Gas Information (unaudited) section of this Form 10-K for additional information on oil and gas production and sales.

Average daily production volumes from ongoing operations remained materially consistent in 2022 as compared to 2021. Production increased in the Permian Basin due to increased development activity, which was partially offset by a decrease in production, especially natural gas, in the DJ Basin reflecting reduced capital investment and the impact of rising commodity prices that reduce Occidental's share of production under international production sharing contracts.

Lease Operating Expense

The following table sets forth the average lease operating expense per Boe from ongoing operations for each of the three years in the period ended December 31, 2022:

	2022	2021	2020
Average lease operating expense per Boe	\$ 9.52	\$ 7.58	\$ 6.38

Average lease operating expense per Boe increased in 2022 compared to 2021 primarily as a result of inflationary pressures which led to higher workover, support and maintenance costs in the Permian Basin, Rockies and Other and Gulf of Mexico, as well as higher purchase injectant costs in the Permian Basin.

**CHEMICAL SEGMENT**

<i>millions</i>	2022	2021	2020
Segment Sales	\$ 6,757	\$ 5,246	\$ 3,733
Segment Results	\$ 2,508	\$ 1,544	\$ 664

Chemical segment results increased in 2022 compared to 2021 due to improved demand and stronger realized prices across most product lines, including caustic soda, partially offset by higher raw material costs, primarily energy costs.

MIDSTREAM AND MARKETING SEGMENT

<i>millions</i>	2022	2021	2020
Segment Sales	\$ 4,136	\$ 2,863	\$ 1,768
Segment Results ^(a)	\$ 273	\$ 257	\$ (4,175)
Items affecting comparability			
Asset sales gains (losses) and others, net ^(b)	\$ 98	\$ 124	\$ (46)
Derivative gains (losses), net	\$ (259)	\$ (252)	\$ 97
Goodwill impairments and other charges ^(c)	\$ —	\$ (21)	\$ (4,194)

^(a) Results included significant items affecting comparability discussed in the footnotes below.

^(b) The 2022 amount included \$62 million relating to a gain on the sale of 10 million limited partner units in WES and a \$36 million gain on the sale of a joint venture. The 2021 amount included a \$102 million gain from the sale of 11.5 million limited partner units in WES. The 2020 amount represented a loss on the exchange of WES common units to retire a \$260 million note.

^(c) The 2020 amount included a \$2.7 billion other-than-temporary impairment of the equity investment in WES and \$1.4 billion of impairments related to the write-off of goodwill and a loss from an equity investment related to WES' write-off of its goodwill.

Midstream and marketing segment results, excluding items affecting comparability, increased in 2022 compared to 2021, primarily due to higher equity income from WES, improved gas marketing margin from transportation capacity optimization and improved sulfur prices at Al Hosn Gas, partially offset by the timing impact of crude oil sales in the marketing business.

CORPORATE

Significant corporate items include the following:

<i>millions</i>	2022	2021	2020
Items Affecting Comparability			
Anadarko acquisition-related costs	\$ (89)	\$ (153)	\$ (339)
Interest rate swap gains (losses), net ^(a)	\$ 317	\$ 122	\$ (428)
Maxus environmental reserve adjustment	\$ (22)	\$ —	\$ —
Early debt extinguishment	\$ 149	\$ (118)	\$ —
Acquisition-related pension & termination benefits	\$ —	\$ —	\$ 114
Warrants gains, net ^(a)	\$ —	\$ —	\$ 5

^(a) See Note 8 - Derivatives in the Notes to the Consolidated Financial Statements in Part II Item 8 of this Form 10-K for more information.

INCOME TAXES

Total deferred tax assets, after valuation allowance, were \$2.2 billion and \$3.5 billion as of December 31, 2022 and 2021, respectively. Occidental expects to realize the recorded deferred tax assets, net of any allowances, through future operating income and reversal of temporary differences. The total deferred tax liabilities were \$7.7 billion and \$10.5 billion as of December 31, 2022 and 2021, respectively. The decrease in net deferred tax liability in 2022 compared to 2021 was primarily driven by the legal entity reorganization that Occidental undertook in the first quarter of 2022. See more discussion below.

WORLDWIDE EFFECTIVE TAX RATE

The following table sets forth the calculation of the worldwide effective tax rate for income from continuing operations:

<i>millions</i>	2022	2021	2020
SEGMENT RESULTS			
Oil and gas	\$ 12,803	\$ 4,145	\$ (9,632)
Chemical	2,508	1,544	664
Midstream and marketing	273	257	(4,175)
Unallocated corporate items	(1,467)	(2,241)	(2,562)
Income (loss) from continuing operations before taxes	\$ 14,117	\$ 3,705	\$ (15,705)
Income tax benefit (expense)			
Federal and state	248	(247)	2,607
Foreign	(1,061)	(668)	(435)
Total income tax benefit (expense)	(813)	(915)	2,172
Income (loss) from continuing operations	\$ 13,304	\$ 2,790	\$ (13,533)
Worldwide effective tax rate	6%	25 %	14%

In 2022, Occidental's worldwide effective tax rate was 6%, which was impacted by a tax benefit associated with Occidental's legal entity reorganization, as further described below.

In 2021, Occidental's worldwide effective tax rate was 25%, which was higher than the U.S. statutory rate of 21% due to higher tax rates in the foreign jurisdictions in which Occidental operates, partially offset by the tax impact of business credits, state tax revaluations and other domestic tax benefits.

In 2020, Occidental's worldwide effective tax rate was 14%, which was largely a result of the impairment of the WES goodwill and certain international assets for which Occidental received no tax benefit and higher-taxed international operations which generally caused Occidental's tax rate to vary significantly from the U.S. corporate tax rate.

LEGAL ENTITY REORGANIZATION

To align Occidental's legal entity structure with the nature of its business activities after completing the Anadarko Acquisition and subsequent large scale post-acquisition divestiture program, management undertook a legal entity reorganization that was completed in the first quarter of 2022.

As a result of this legal entity reorganization, management made an adjustment to the tax basis in a portion of its operating assets, thus reducing Occidental's deferred tax liabilities. Accordingly, in 2022, Occidental recorded a tax benefit of \$2.7 billion in connection with this reorganization. The timing of any reduction in Occidental's future cash taxes as a result of this legal entity reorganization will be dependent on a number of factors, including prevailing commodity prices, capital activity level and production mix. The legal entity reorganization transaction is currently under IRS review as part of the Company's 2022 federal tax audit.

INFLATION REDUCTION ACT

In August 2022, Congress passed the Inflation Reduction Act that contains, among other provisions, a corporate book minimum tax on financial statement income, an excise tax on stock buybacks, a methane emissions fee and certain tax incentives related to climate change and clean energy. Occidental is currently evaluating the provisions of this act. The ultimate impact of the act is yet to be determined and will depend on additional regulatory guidance and interpretations.

CONSOLIDATED RESULTS OF OPERATIONS

REVENUE AND OTHER INCOME ITEMS

<i>millions</i>	2022	2021	2020
Net sales	\$ 36,634	\$ 25,956	\$ 17,809
Interest, dividends and other income	\$ 153	\$ 166	\$ 118
Gains (losses) on sale of assets, net	\$ 308	\$ 192	\$ (1,666)

NET SALES

Price and volume changes generally represent the majority of the change in the oil and gas and chemical segments sales. Midstream and marketing sales generally represent the margins earned by the marketing business as it strives to optimize the use of its transportation, storage and terminal commitments to provide access to domestic and international markets and, to a lesser extent, NGL and sulfur revenues from the gas processing business.

The increase in net sales in 2022 compared to 2021 was primarily due to higher realized commodity prices in the oil and gas segment. Chemical sales increased primarily due to higher prices and volumes across all product lines. The increase in midstream and marketing sales was due to higher crude oil prices impacting the marketing businesses.

EXPENSE ITEMS

<i>millions</i>	2022	2021	2020
Oil and gas operating expense	\$ 4,028	\$ 3,160	\$ 3,065
Transportation and gathering expense	\$ 1,475	\$ 1,419	\$ 1,600
Chemical and midstream cost of sales	\$ 3,273	\$ 2,772	\$ 2,408
Purchased commodities	\$ 3,287	\$ 2,308	\$ 1,395
Selling, general and administrative	\$ 945	\$ 863	\$ 864
Other operating and non-operating expense	\$ 1,271	\$ 1,065	\$ 884
Taxes other than on income	\$ 1,548	\$ 1,005	\$ 622
Depreciation, depletion and amortization	\$ 6,926	\$ 8,447	\$ 8,097
Asset impairments and other charges	\$ —	\$ 304	\$ 11,083
Anadarko Acquisition-related costs	\$ 89	\$ 153	\$ 339
Exploration expense	\$ 216	\$ 252	\$ 132
Interest and debt expense, net	\$ 1,030	\$ 1,614	\$ 1,424

OIL AND GAS OPERATING EXPENSE

Oil and gas operating expense increased in 2022 from the prior year, primarily as a result of higher workovers, supports and maintenance costs in the Permian Basin, Rockies and Other and Gulf of Mexico, as well as higher purchase injectant costs in the Permian Basin.

CHEMICAL AND MIDSTREAM COST OF SALES

Chemical and midstream cost of sales increased in 2022 from the prior year, primarily due to higher raw material costs in the chemical segment, primarily energy costs, and increased power generation costs in the midstream and marketing segment.

PURCHASED COMMODITIES

Purchased commodities increased in 2022 from the prior year, largely as a result of higher prices on third-party crude purchases related to the midstream and marketing segment.

OTHER OPERATING AND NON-OPERATING EXPENSE

Other operating and non-operating expense increased in 2022 from the prior year, primarily due to increases in employee related costs and environmental remediation expenses.

DEPRECIATION, DEPLETION AND AMORTIZATION

DD&A expense decreased in 2022 from the prior year, primarily as a result of lower per Boe DD&A rates due to higher proved reserves as a result of positive program adds during 2021.

**ASSET IMPAIRMENTS AND OTHER CHARGES**

There were no asset impairments in 2022. In 2021, asset impairments and other charges of \$304 million were mainly comprised of the impairment of undeveloped leases that either expired or were set to expire in the near term where Occidental had no plans to pursue exploration activities.

TAXES OTHER THAN ON INCOME

Taxes other than on income in 2022 increased from the prior year, primarily due to higher production taxes, which are directly tied to revenues, and higher ad valorem taxes.

INTEREST AND DEBT EXPENSE, NET

Interest and debt expense decreased in 2022 from the prior year, due to lower outstanding debt as a result of debt repayments.

OTHER ITEMS

Income (expense) <i>millions</i>	2022	2021	2020
Gains (losses) on interest rate swaps and warrants	\$ 317	\$ 122	\$ (423)
Income from equity investments	\$ 793	\$ 631	\$ 370
Income tax benefit (expense)	\$ (813)	\$ (915)	\$ 2,172
Loss from discontinued operations, net	\$ —	\$ (468)	\$ (1,298)

LOSS FROM DISCONTINUED OPERATIONS, NET

There were no discontinued operations in 2022. In 2021, discontinued operations, net primarily included a \$437 million after-tax loss contingency associated with Occidental's former operations in Ecuador, see Note - 13 Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for more information. In addition, discontinued operations, net was associated with operations in Ghana which were sold in October 2021.

LIQUIDITY AND CAPITAL RESOURCES

CASH ON HAND

As of December 31, 2022, Occidental had approximately \$1.0 billion in cash and cash equivalents. A substantial majority of this cash is held and available for use in the United States.

SOURCES AND USES OF CASH

Occidental currently expects its operational cash flows and cash on hand to be sufficient to meet its current debt maturities and other obligations for the next 12 months from the date of this filing. Should commodity prices return to their 2020 lows, Occidental's \$4.0 billion RCF, receivables securitization facility and access to capital markets are available to meet its ongoing capital needs, purchase obligations, near-term debt maturities and other liabilities and financial obligations, if required.

Occidental's planned 2023 capital expenditures are between \$5.4 billion and \$6.2 billion, of which only a small percentage is allocated to non-cancellable commitments.

As of December 31, 2022, Occidental had \$22 million in current maturities of long-term debt which were paid in January 2023, and an additional \$1.1 billion in long-term obligations due in 2024.

As of December 31, 2022, Occidental had \$433 million in non-cancelable lease payments due in 2023, and an additional \$335 million in non-cancelable lease payments due in 2024.

Dividends paid to common and preferred shareholders were \$1.2 billion for the year ended December 31, 2022.

Occidental is party to various purchase agreements that are not accounted for as leases or otherwise accrued as liabilities as of December 31, 2022. These agreements consist primarily of obligations to secure terminal, pipeline and processing capacity, purchase services used in the normal course of business including transporting and disposing of produced water, purchase goods used in the production of finished goods including certain chemical raw materials and power and agreements relating to equipment maintenance and service. The amounts that will be paid for such outstanding off-balance sheet purchase obligations as of December 31, 2022 are \$3.0 billion in 2023, \$4.2 billion in 2024 and 2025, \$2.5 billion in 2026 and 2027 and \$2.2 billion in 2028 and thereafter.

SHARE REPURCHASE PROGRAM

Under the \$3.0 billion share repurchase program announced and completed in 2022, Occidental purchased approximately 47.7 million shares. In February 2023, the Board authorized a new share repurchase program of up to \$3.0 billion of Occidental's shares of common stock.

CONTRACTUAL OBLIGATIONS

The following table summarizes and cross-references Occidental's contractual obligations and indicates on- and off-balance sheet obligations as of December 31, 2022. Commitments related to held for sale assets are excluded.

		Payments Due by Year			
<i>millions</i>	Total	2023	2024 and 2025	2026 and 2027	2028 and thereafter
On-Balance Sheet					
Current portion of long-term debt (Note 6) ^(a)	\$ 22	\$ 22	\$ —	\$ —	\$ —
Long-term debt (Note 6) ^(a)	17,936	—	2,264	2,351	13,321
Expected interest payments on long-term debt	11,400	1,060	2,042	1,754	6,544
Leases (Note 7) ^(b)	1,818	433	538	320	527
Asset retirement obligations (Note 1)	3,805	169	1,124	961	1,551
Other long-term liabilities ^(c)	2,594	11	851	253	1,479
Off-Balance Sheet					
Purchase obligations ^(d)	11,963	2,983	4,246	2,510	2,224
Total	\$ 49,538	\$ 4,678	\$ 11,065	\$ 8,149	\$ 25,646

(a) Excluded unamortized debt discount and interest.

(b) Occidental is the lessee under various agreements for real estate, equipment, plants and facilities.

(c) Included long-term obligations and current portions of long-term obligations under postretirement benefits, accrued transportation commitments, ad valorem taxes and other accrued liabilities.

(d) Amounts included payments which will become due under long-term agreements to purchase goods and services used in the normal course of business to secure terminal, pipeline and processing capacity, CO₂, electrical power, steam and certain chemical raw materials including but not limited to capital commitments. Amounts excluded certain product purchase obligations related to marketing activities for which there are no minimum purchase requirements or the amounts are not fixed or determinable. Long-term purchase contracts were discounted at a 5.03% discount rate.

DEBT ACTIVITY

For the twelve months ended December 31, 2022, Occidental repaid debt with a face value of more than \$10.5 billion, reducing the face value of Occidental's debt to less than \$18.0 billion. The net book value of the full year repayments was \$9.8 billion, which resulted in a gain of \$149 million.

See Note 6 - Long-Term Debt in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for more information related to Occidental's debt issuance and repayments.

GUARANTEES

Occidental has entered into various guarantees, indemnities and commitments provided by Occidental to third parties, mainly to provide assurance that Occidental or its consolidated subsidiaries or affiliates will meet their various obligations.

As of the date of this filing, Occidental has provided required financial assurance through a combination of cash, letters of credit and surety bonds. Occidental has not issued any letters of credit under the RCF or other committed facilities. For additional information, see Risk Factors in Part I, Item 1A of this Form 10-K.

CASH FLOW ANALYSIS

CASH PROVIDED BY OPERATING ACTIVITIES

<i>millions</i>	2022	2021	2020
Operating cash flow from continuing operations	\$ 16,810	\$ 10,253	\$ 3,842
Operating cash flow from discontinued operations, net of taxes	—	181	113
Net cash provided by operating activities	\$ 16,810	\$ 10,434	\$ 3,955

Cash provided by operating activities increased in 2022 compared to 2021, primarily due to higher commodity prices, as average WTI and Brent prices increased by 39% and 40%, respectively and NYMEX natural gas prices increased by 76%. The chemical segment also generated substantial operating cash flows largely due to higher prices for most chemical products, especially caustic soda, compared to 2021.

**CASH USED BY INVESTING ACTIVITIES**

<i>millions</i>	2022	2021	2020
Capital expenditures			
Oil and gas	\$ (3,844)	\$ (2,409)	\$ (2,208)
Chemical	(322)	(308)	(255)
Midstream and marketing	(268)	(106)	(50)
Corporate	(63)	(47)	(22)
Total	\$ (4,497)	\$ (2,870)	\$ (2,535)
Changes in capital accrual	147	97	(519)
Purchase of businesses, assets and equity investments, net	(990)	(431)	(114)
Proceeds from sale of assets and equity investments, net	584	1,624	2,281
Other investing activities, net	(116)	406	109
Investing cash flows from continuing operations	\$ (4,872)	\$ (1,174)	\$ (778)
Investing cash flows from discontinued operations	—	(79)	(41)
Net cash used by investing activities	\$ (4,872)	\$ (1,253)	\$ (819)

Cash flows used by investing activities increased by \$3.6 billion in 2022 compared to 2021. In 2022, Occidental increased capital spending as a result of increased activity in the Permian. Occidental acquired additional primarily producing assets in the Permian Basin for approximately \$400 million and additional interests in emerging low-carbon businesses and net-zero pathway for approximately \$350 million. Occidental sold certain strategic assets in the Permian Basin for approximately \$190 million. See Note 5 - Acquisitions, Divestitures and Other Transactions in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for a listing of assets and equity investments acquired and sold in 2022, 2021 and 2020. In addition in 2022, Occidental sold 10 million limited partner units of WES for proceeds of approximately \$250 million.

CASH USED BY FINANCING ACTIVITIES

<i>millions</i>	2022	2021	2020
Financing cash flows from continuing operations	\$ (13,715)	\$ (8,564)	\$ (4,508)
Financing cash flows from discontinued operations	—	(8)	(8)
Net cash used by financing activities	\$ (13,715)	\$ (8,572)	\$ (4,516)

Cash used by financing activities increased by \$5.1 billion compared to 2021 primarily due to the 2022 debt tenders and repayments and treasury share repurchase activity. See Note 6 - Long-Term Debt in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for more information related to Occidental's debt repayments and see Item 5 Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities in Part II of this Form 10-K and Note 14 - Stockholders' Equity in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for additional information related to Occidental's share repurchases. In addition, cash used by financing activities reflected cash dividend payments of \$1.2 billion on preferred and common stock and \$111 million, related to net interest rate swap settlements and collateral activity.

LAWSUITS, CLAIMS, COMMITMENTS AND CONTINGENCIES**LEGAL MATTERS**

For information on Occidental's Lawsuits, Claims, Commitments and Contingencies, see the information in Note 13 - Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

ENVIRONMENTAL LIABILITIES AND EXPENDITURES

ENVIRONMENTAL COSTS

Environmental costs relate to the prevention, monitoring, control, treatment or abatement of waste, emissions or releases to air, water or land from operations of Occidental's subsidiaries. These activities are generally integrated with ongoing operations or development projects, so the costs in this table include estimates. The environmental costs in the table do not include litigation-related costs, including fines, penalties or settlements, or Occidental's investments in low-carbon ventures. Occidental's environmental costs are presented below for each segment for each of the years ended December 31:

<i>millions</i>	2022	2021	2020
Operating Expenses			
Oil and gas	\$ 304	\$ 267	\$ 176
Chemical	115	88	73
Midstream and marketing	6	6	4
Total	\$ 425	\$ 361	\$ 253
Capital Expenditures			
Oil and gas	\$ 110	\$ 87	\$ 74
Chemical	53	66	40
Midstream and marketing	5	1	1
Total	\$ 168	\$ 154	\$ 115
Remediation Expenses			
Corporate	\$ 65	\$ 28	\$ 36

Operating expenses are incurred on a continual basis. Capital expenditures relate to longer-lived improvements in properties currently operated by Occidental. Remediation expenses relate to existing conditions from past operations of Occidental or its subsidiaries.

For additional information on Occidental's Environmental Liabilities and Expenditures, see the information in [Note 12 - Environmental Liabilities and Expenditures](#) in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

GLOBAL INVESTMENTS

A portion of Occidental's assets are located outside North America. The following table shows the geographic distribution of Occidental's assets as of December 31, 2022, at both the segment and consolidated level related to Occidental's ongoing operations:

<i>millions</i>	Oil and gas	Chemical	Midstream and marketing	Corporate and other	Total Consolidated
North America					
United States	\$ 49,786	\$ 4,323	\$ 8,701	\$ 1,917	\$ 64,727
Canada	—	111	104	—	215
Middle East	3,602	—	3,133	—	6,735
North Africa and Other	670	124	138	—	932
Consolidated	\$ 54,058	\$ 4,558	\$ 12,076	\$ 1,917	\$ 72,609

For the year ended December 31, 2022, net sales outside North America totaled \$5.5 billion, or approximately 15% of total net sales.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The process of preparing financial statements in accordance with United States GAAP requires Occidental's management to make informed estimates and judgments regarding certain items and transactions. Changes in facts and circumstances or discovery of new information may result in revised estimates and judgments and actual results may differ from these estimates upon settlement but generally not by material amounts. The selection and development of these policies and estimates have been discussed with the Audit Committee of the Board of Directors. Occidental considers the following to be its most critical accounting policies and estimates that involve management's judgment.

OIL AND GAS PROPERTIES

The carrying value of Occidental's PP&E represents the cost incurred to acquire or develop the asset, including any AROs and capitalized interest, net of DD&A and any impairment charges. For assets acquired in a business combination, PP&E cost is based on fair values at the acquisition date. AROs and interest costs incurred in connection with qualifying capital expenditures are capitalized and amortized over the useful lives of the related assets.

Occidental uses the successful efforts method to account for its oil and gas properties. Under this method, Occidental capitalizes costs of acquiring properties, costs of drilling successful exploration wells and development costs. The costs of exploratory wells are initially capitalized pending a determination of whether proved reserves have been found. If proved reserves have been found, the costs of exploratory wells remain capitalized. For exploratory wells that find reserves that cannot be classified as proved when drilling is completed, costs continue to be capitalized as suspended exploratory drilling costs if there have been sufficient reserves found to justify completion as a producing well and sufficient progress is being made in assessing the economic and operating viability of the project. At the end of each quarter, management reviews the status of all suspended exploratory drilling costs in light of ongoing exploration activities and in particular, whether Occidental is making sufficient progress in its ongoing exploration and appraisal efforts or, in the case of discoveries requiring government sanctioning, analyzing whether development negotiations are underway and proceeding as planned. If management determines that future appraisal drilling or development activities are unlikely to occur, associated suspended exploratory well costs are expensed.

Occidental expenses annual lease rentals, the costs of injectants used in production and geological and geophysical costs as incurred for exploration activities.

Occidental determines depreciation and depletion of oil and gas producing properties by the unit-of-production method. It amortizes leasehold acquisition costs over total proved reserves and capitalized development and successful exploration costs over proved developed reserves.

Proved oil and gas reserves are those quantities of oil and gas which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations—prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation.

Several factors could change Occidental's proved oil and gas reserves. For example, Occidental receives a share of production from PSCs to recover its costs and generally an additional share for profit. Occidental's share of production and reserves from these contracts decreases when product prices rise and increases when prices decline. Generally, Occidental's net economic benefit from these contracts is greater at higher product prices. In other cases, particularly with long-lived properties, lower product prices may lead to a situation where production of a portion of proved reserves becomes uneconomical. For such properties, higher product prices typically result in additional reserves becoming economical. Estimation of future production and development costs is also subject to change partially due to factors beyond Occidental's control, such as energy costs and inflation or deflation of oil field service costs. These factors, in turn, could lead to changes in the quantity of proved reserves. Additional factors that could result in a change of proved reserves include production decline rates and operating performance differing from those estimated when the proved reserves were initially recorded. Changes in the political and regulatory climate could lead to decreases in proved reserves as development horizons may be extended into the future.

Occidental performs impairment tests with respect to its proved properties whenever events or circumstances indicate that the carrying value of property may not be recoverable. If there is an indication the carrying amount of the asset may not be recovered due to significant and prolonged declines in current and forward prices, significant changes in reserve estimates, changes in management's plans or other significant events, management will evaluate the property for impairment. Under the successful efforts method, if the sum of the undiscounted cash flows is less than the carrying value of the proved property, the carrying value is reduced to estimated fair value and reported as an impairment charge in the period. Individual proved properties are grouped for impairment purposes at the lowest level for which there are identifiable cash flows unless observable and comparable transactions are available. The fair value of impaired assets is typically determined based on the present value of expected future cash flows using discount rates believed to be consistent with those used by market participants. The impairment test incorporates a number of assumptions involving expectations of future cash flows which can change significantly over time. These assumptions include estimates of future production, product prices, contractual prices, estimates of risk-adjusted oil and gas proved and unproved reserves and estimates of

future operating and development costs. It is reasonably possible that prolonged declines in commodity prices, reduced capital spending in response to lower prices or increases in operating costs could result in impairments.

For impairment testing, unless prices are contractually fixed, Occidental uses observable forward strip prices for oil and natural gas prices when projecting future cash flows. Future operating and development costs are estimated using the current cost environment applied to expectations of future operating and development activities to develop and produce oil and gas reserves. Market prices for oil, NGL and natural gas have been volatile and may continue to be volatile in the future. Changes in global supply and demand, transportation capacity, currency exchange rates, applicable laws and regulations and the effect of changes in these variables on market perceptions could impact current forecasts. Future fluctuations in commodity prices could result in estimates of future cash flows to vary significantly.

Net capitalized costs attributable to unproved properties were \$12.6 billion as of December 31, 2022, and \$14.8 billion as of December 31, 2021. The unproved amounts are not subject to DD&A until they are classified as proved properties. Individually insignificant unproved properties are combined and amortized on a group basis based on factors such as lease terms, success rates and other factors to provide for full amortization upon lease expiration or abandonment.

Significant unproved properties, primarily as a result of the Anadarko Acquisition, are assessed individually for impairment and when events or circumstances indicate that the carrying value of property may not be recovered a valuation allowance is provided if an impairment is indicated. Occidental periodically reviews significant unproved properties for impairments; numerous factors are considered, including but not limited to, availability of funds for future exploration and development activities, current exploration and development plans, favorable or unfavorable exploration activity on the property or the adjacent property, geologists' evaluation of the property, the current and projected political and regulatory climate, contractual conditions and the remaining lease term for the properties. If an impairment is indicated, Occidental will first determine whether a comparable transaction for similar properties or implied acreage valuation derived from domestic onshore market participants is available and will adjust the carrying amount of the unproved property to its fair value using the market approach. In situations where the market approach is not observable and unproved reserves are available, undiscounted future net cash flows used in the impairment analysis are determined based on managements' risk adjusted estimates of unproved reserves, future commodity prices and future costs to produce the reserves. If undiscounted future net cash flows are less than the carrying value of the property, the future net cash flows are discounted and compared to the carrying value for determining the amount of the impairment loss to record. Occidental utilizes the same assumptions and methodology discussed above for cash flows associated with proved properties.

PROVED RESERVES

Occidental estimates its proved oil and gas reserves according to the definition of proved reserves provided by the SEC's Rule 4-10 (a) of Regulation S-X and Financial Accounting Standards Board. Proved oil and gas reserves are those quantities of oil and gas which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations—prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. Prices include consideration of price changes provided only by contractual arrangements and do not include adjustments based on expected future conditions. For reserves information, see the Supplemental Information on Oil and Gas Exploration and Production Activities under Item 8 of this Form 10-K.

Engineering estimates of the quantities of proved reserves are inherently imprecise and represent only approximate amounts because of the judgments involved in developing such information. Occidental's estimates of proved reserves are made using available geological and reservoir data as well as production performance data. The reliability of these estimates at any point in time depends on both the quality and quantity of the technical and economic data and the efficiency of extracting and processing the hydrocarbons. These estimates are reviewed annually by internal reservoir engineers and revised, either upward or downward, as warranted by additional data. Revisions are necessary due to changes in, among other things, development plans, reservoir performance, prices, economic conditions and governmental restrictions as well as changes in the expected recovery associated with infill drilling. Decreases in prices, for example, may cause a reduction in some proved reserves due to reaching economic limits at an earlier projected date. A material adverse change in the estimated volume of proved reserves could have a negative impact on DD&A and could result in property impairments.

The most significant ongoing financial statement effect from a change in Occidental's oil and gas reserves or impairment of its proved properties would be to the DD&A rate. For example, a 5% increase or decrease in the amount of oil and gas reserves would change the DD&A rate by approximately \$0.60/Bbl, which would increase or decrease pre-tax income by approximately \$270 million annually at current production rates.

FAIR VALUES

Occidental estimates fair-value of long-lived assets for impairment testing, assets and liabilities acquired in a business combination or exchanged in non-monetary transactions, pension plan assets and initial measurements of AROs.

Accounting for the acquisition of a business requires the allocation of the purchase price to the various assets and liabilities of the acquired business and recording deferred taxes for any differences between the allocated values and tax basis of assets and liabilities. Any excess of the purchase price over the amounts assigned to assets and liabilities is

recorded as goodwill. The purchase price allocation is accomplished by recording each asset and liability at its estimated fair value, which may be determined using different methods of fair value measurements, largely based on the availability and quality of market information. Occidental primarily applies the market approach for recurring fair value measurements, maximizes its use of observable inputs and minimizes its use of unobservable inputs.

FINANCIAL ASSETS AND LIABILITIES

Occidental utilizes published prices or counterparty statements for valuing the majority of its financial assets and liabilities measured and reported at fair value. In addition to using market data, Occidental makes assumptions in valuing its assets and liabilities, including assumptions about the risks inherent in the inputs to the valuation technique. For financial assets and liabilities carried at fair value, Occidental measures fair value using the following methods:

- Occidental values exchange-cleared commodity derivatives using closing prices provided by the exchange as of the balance sheet date. These derivatives are classified as using quoted prices in active markets for the assets or liabilities (Level 1).
- OTC bilateral financial commodity contracts, international exchange contracts, options and physical commodity forward purchase and sale contracts are generally classified as using observable inputs other than quoted prices for the assets or liabilities (Level 2) and are generally valued using quotations provided by brokers or industry-standard models that consider various inputs, including quoted forward prices for commodities, time value, volatility factors, credit risk and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace throughout the full term of the instrument and can be derived from observable data or are supported by observable prices at which transactions are executed in the marketplace.
- Occidental values commodity derivatives based on a market approach that considers various assumptions, including quoted forward commodity prices and market yield curves. The assumptions used include inputs that are generally unobservable in the marketplace or are observable but have been adjusted based upon various assumptions and the fair value is designated as using unobservable inputs (Level 3) within the valuation hierarchy.
- Occidental values debt using market-observable information for debt instruments that are traded on secondary markets. For debt instruments that are not traded, the fair value is determined by interpolating the value based on debt with similar terms and credit risk.

NON-FINANCIAL ASSETS

Occidental uses market-observable prices for assets when comparable transactions can be identified that are similar to the asset being valued. When Occidental is required to measure fair value and there is not a market-observable price for the asset or for a similar asset then the cost or income approach is used depending on the quality of information available to support management's assumptions. The cost approach is based on management's best estimate of the current asset replacement cost. The income approach is based on management's best assumptions regarding expectations of future net cash flows and the expected cash flows are discounted using a commensurate risk-adjusted discount rate. Such evaluations involve significant judgment. The results are based on expected future events or conditions such as sales prices, estimates of future oil and gas production or throughput, development and operating costs and the timing thereof, economic and regulatory climates and other factors, most of which are often outside of management's control. However, assumptions used reflect a market participant's view of long-term prices, costs and other factors and are consistent with assumptions used in Occidental's business plans and investment decisions.

ENVIRONMENTAL LIABILITIES AND EXPENDITURES

Certain subsidiaries of Occidental incur environmental liabilities and expenditures that relate to current operations and are expensed or capitalized by such subsidiaries as appropriate. Certain subsidiaries also incur environmental liabilities and expenditures with respect to remediation of existing conditions from alleged past practices at Third-Party, Currently Operated, and Closed or Non-operated Sites. Those environmental liabilities and related charges and expenses for estimated remediation costs from past operations are recorded when environmental remediation efforts are probable and the costs can be reasonably estimated. Occidental discloses such remediation liabilities on a consolidated basis. In determining the environmental remediation liability and the range of reasonably possible additional losses, Occidental refers to currently available information, including relevant past experience, remedial objectives, available technologies, applicable laws and regulations and cost-sharing arrangements. These environmental remediation liabilities are based on management's estimate of the most likely cost to be incurred, using the most cost-effective technology reasonably expected to achieve the remedial objective. Occidental periodically reviews these environmental remediation liabilities and adjusts them as new information becomes available. Occidental's subsidiaries generally record reimbursements or recoveries of environmental remediation costs in income when received, or when receipt of recovery is highly probable.

Many factors could affect future remediation costs incurred by Occidental's subsidiaries and result in adjustments to environmental remediation liabilities and the range of reasonably possible additional losses. The most significant are: (1) cost estimates for remedial activities may vary from the initial estimate; (2) the length of time, type or amount of remediation necessary to achieve the remedial objective may change due to factors such as site conditions, the ability to identify and

control contaminant sources or the discovery of additional contamination; (3) a regulatory agency may ultimately reject or modify proposed remedial plans; (4) improved or alternative remediation technologies may change remediation costs; (5) laws and regulations may change remediation requirements or affect cost sharing or allocation of liability; and (6) changes in allocation or cost-sharing arrangements may occur.

Certain sites involve multiple parties with various cost-sharing arrangements, which generally fall into the following three categories: (1) environmental proceedings that result in a negotiated or prescribed allocation of remediation costs among the affected Occidental's subsidiary and other alleged potentially responsible parties; (2) oil and gas ventures in which each participant pays its proportionate share of remediation costs reflecting its working interest; or (3) contractual arrangements, typically relating to purchases and sales of properties, in which the parties to the transaction agree to methods of allocating remediation costs. In these circumstances, the affected subsidiary evaluates the financial viability of other parties with whom it is alleged to be jointly liable, the degree of their commitment to participate and the consequences to such subsidiary of their failure to participate when estimating its ultimate share of liability. Occidental subsidiaries record environmental remediation liabilities at their expected net cost of remedial activities. Based on these factors, except as otherwise disclosed in Note 12 - Environmental Liabilities and Expenditures in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K, Occidental's subsidiaries believe that they will not be required to assume a share of liability of such other potentially responsible parties in an amount materially above amounts reserved.

In addition to the costs of investigations and clean-up measures, which often take in excess of 10 years at CERCLA NPL sites, Occidental subsidiaries' environmental remediation liabilities include estimates of the costs to operate and maintain remedial systems. If remedial systems are modified over time in response to significant changes in site-specific data, laws, regulations, technologies or engineering estimates, Occidental's subsidiaries review and adjust their environmental remediation liabilities accordingly.

If Occidental or its subsidiaries were to adjust the balance of their environmental remediation liabilities based on the factors described above, the amount of the increase or decrease would be recognized in earnings. For example, if the balance were reduced by 10%, Occidental would record a pre-tax increase to income of \$105 million. If the balance were increased by 10%, Occidental would record an additional remediation expense of \$105 million.

INCOME TAXES

Occidental and its subsidiaries file various U.S. federal, state and foreign income tax returns. The impact of changes in tax regulations are reflected when enacted. In general, deferred federal, state and foreign income taxes are provided on temporary differences between the financial statement carrying amounts of assets and liabilities and their respective tax basis. Occidental routinely assesses the realizability of its deferred tax assets. If Occidental concludes that it is more likely than not that some of the deferred tax assets will not be realized, the tax asset is reduced by a valuation allowance. Occidental recognizes a tax benefit from an uncertain tax position when it is more likely than not that the position will be sustained upon examination, based on the technical merits of the position. The tax benefit recorded is equal to the largest amount that is greater than 50% likely to be realized through final settlement with a taxing authority. Interest and penalties related to unrecognized tax benefits are recognized in income tax expense (benefit). See Note 10 - Income Taxes in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K.

LOSS CONTINGENCIES

Occidental or certain of its subsidiaries are involved, in the normal course of business, in lawsuits, claims and other legal proceedings and audits. Occidental or its affected subsidiaries, as appropriate, accrues reserves for these matters when it is probable that a liability has been incurred and the liability can be reasonably estimated. In addition, Occidental discloses, in aggregate on a consolidated basis, exposure to loss in excess of the amount recorded on the balance sheet for these matters if it is reasonably possible that an additional material loss may be incurred. Occidental reviews such loss contingencies on an ongoing basis.

Loss contingencies are based on judgments made by management with respect to the likely outcome of these matters and are adjusted as appropriate. Management's judgments could change based on new information, changes in, or interpretations of, laws or regulations, changes in management's plans or intentions, opinions regarding the outcome of legal proceedings or other factors. See Note 13 - Lawsuits, Claims, Commitments and Contingencies in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K for additional information.

SAFE HARBOR DISCUSSION REGARDING OUTLOOK AND OTHER FORWARD-LOOKING DATA

Portions of this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical fact are "forward-looking statements" for purposes of federal and state securities laws, and they include, but are not limited to: any projections of earnings, revenue or other financial items or future financial position or sources of financing; any statements of the plans, strategies and objectives of management for future operations, business strategy or financial position; any statements regarding future economic conditions or performance; any statements of belief; and any statements of assumptions underlying any of the foregoing. Words such as "estimate," "project," "predict," "will," "would," "should," "could," "may," "might," "anticipate," "plan," "intend," "believe," "expect," "aim," "goal," "target," "objective," "commit," "advance," "likely" or similar expressions that convey the prospective nature of events or outcomes are generally indicative of forward-looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Occidental does not undertake any obligation to update, modify or withdraw any forward-looking statements as a result of new information, future events or otherwise.

Although Occidental believes that the expectations reflected in any of its forward-looking statements are reasonable, actual results may differ from anticipated results, sometimes materially. In addition, historical, current and forward-looking sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve and assumptions that are subject to change in the future. Factors that could cause results to differ from those projected or assumed in any forward-looking statement include, but are not limited to: general economic conditions, including slowdowns and recessions, domestically or internationally; Occidental's indebtedness and other payment obligations, including the need to generate sufficient cash flows to fund operations; Occidental's ability to successfully monetize select assets and repay or refinance debt and the impact of changes in Occidental's credit ratings; the scope and duration of the global or regional health pandemics or epidemics, including the COVID-19 pandemic and ongoing actions taken by governmental authorities and other third parties in response to the pandemic; assumptions about energy markets; global and local commodity and commodity-futures pricing fluctuations and volatility; supply and demand considerations for, and the prices of, Occidental's products and services; actions by OPEC and non-OPEC oil producing countries; results from operations and competitive conditions; future impairments of Occidental's proved and unproved oil and gas properties or equity investments, or write-downs of productive assets, causing charges to earnings; unexpected changes in costs; inflation, its impact on markets and economic activity and related monetary policy actions by governments in response to inflation; availability of capital resources, levels of capital expenditures and contractual obligations; the regulatory approval environment, including Occidental's ability to timely obtain or maintain permits or other governmental approvals, including those necessary for drilling and/or development projects; Occidental's ability to successfully complete, or any material delay of, field developments, expansion projects, capital expenditures, efficiency projects, acquisitions or dispositions; risks associated with acquisitions, mergers and joint ventures, such as difficulties integrating businesses, uncertainty associated with financial projections, projected synergies, restructuring, increased costs and adverse tax consequences; uncertainties and liabilities associated with acquired and divested properties and businesses; uncertainties about the estimated quantities of oil, NGL and natural gas reserves; lower-than-expected production from development projects or acquisitions; Occidental's ability to realize the anticipated benefits from prior or future streamlining actions to reduce fixed costs, simplify or improve processes and improve Occidental's competitiveness; exploration, drilling and other operational risks; disruptions to, capacity constraints in, or other limitations on the pipeline systems that deliver Occidental's oil and natural gas and other processing and transportation considerations; volatility in the securities, capital or credit markets; governmental actions, war (including the Russia-Ukraine war) and political conditions and events; environmental risks and liability under federal, regional, state, provincial, tribal, local and international environmental laws, and regulations, and litigation (including the potential liability for remedial actions or assessments under existing or future laws, regulations and litigation); legislative or regulatory changes, including changes relating to hydraulic fracturing or other oil and natural gas operations, retroactive royalty or production tax regimes, deep-water and onshore drilling and permitting regulations and environmental regulations (including regulations related to climate change); Occidental's ability to recognize intended benefits from its business strategies and initiatives, such as Occidental's low carbon ventures businesses or announced greenhouse gas emissions reduction targets or net-zero goals; potential liability resulting from pending or future litigation; disruption or interruption of production or manufacturing or facility damage due to accidents, chemical releases, labor unrest, weather, power outages, natural disasters, cyber-attacks, terrorist acts or insurgent activity; the creditworthiness and performance of Occidental's counterparties, including financial institutions, operating partners and other parties; failure of risk management; Occidental's ability to retain and hire key personnel; supply, transportation, and labor constraints; reorganization or restructuring of Occidental's operations; changes in state, federal or international tax rates; and actions by third parties that are beyond Occidental's control.

Additional information concerning these and other factors that may cause Occidental's results of operations and financial position to differ from expectations can be found in Item 1A, "Risk Factors" and elsewhere in this Form 10-K, as well as in Occidental's other filings with the SEC, including Occidental's Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****COMMODITY PRICE RISK****GENERAL**

Occidental's results are sensitive to fluctuations in oil, NGL and natural gas prices. Price changes at current global prices and levels of production affect Occidental's budgeted 2023 pre-tax annual income by approximately \$200 million for a \$1 per barrel change in oil prices and approximately \$30 million for a \$1 per barrel change in NGL prices. If domestic natural gas prices varied by \$0.10 per Mcf, it would have an estimated annual effect on Occidental's budgeted 2023 pre-tax income of approximately \$30 million. These price-change sensitivities include the impact of PSC and similar contract volume changes on income. If production levels change in the future, the sensitivity of Occidental's results to prices also will change. Marketing results are sensitive to price changes of oil, natural gas and, to a lesser degree, other commodities. A \$0.25 change in the Midland-to-Gulf-Coast oil spreads impacts budgeted 2023 operating cash flows by approximately \$65 million.

Occidental's results are also sensitive to fluctuations in chemical prices. A variation in chlorine and caustic soda prices of \$10 per ton would have a pre-tax annual effect on income of approximately \$10 million and \$30 million, respectively. A variation in PVC prices of \$0.01 per lb. would have a pre-tax annual effect on income of approximately \$30 million. Historically, over time, product price changes have tracked raw material and feedstock product price changes, somewhat mitigating the effect of price changes on margins.

RISK MANAGEMENT

Occidental conducts its risk management activities for marketing and trading under the controls and governance of its risk control policies. The controls under these policies are implemented and enforced by a risk management group which monitors risk by providing an independent and separate evaluation and check. Members of the risk management group report to the Corporate Vice President and Treasurer. Controls for these activities include limits on value at risk, limits on credit, limits on total notional trade value, segregation of duties, delegation of authority, daily price verifications, reporting to senior management on various risk measures and a number of other policy and procedural controls.

FAIR VALUE OF MARKETING DERIVATIVE CONTRACTS

Occidental carries derivative contracts it enters into in connection with its marketing activities at fair value. Fair values for these contracts are derived from Level 1 and Level 2 sources. The fair values in future maturity periods are insignificant.

The following table shows the fair value of Occidental's derivatives (excluding collateral), segregated by maturity periods and by methodology of fair value estimation:

Source of Fair Value Assets (Liabilities) <i>millions</i>	Maturity Periods				Total
	2023	2024 and 2025	2026 and 2027	2028 and thereafter	
Prices actively quoted	\$ (18)	\$ —	\$ —	\$ —	\$ (18)
Prices provided by other external sources	31	1	—	—	32
Total	\$ 13	\$ 1	\$ —	\$ —	\$ 14

QUANTITATIVE INFORMATION

Occidental uses value at risk to estimate the potential effects of changes in fair values of commodity contracts used in trading activities. This measure determines the maximum potential negative one day change in fair value with a 95% level of confidence. Additionally, Occidental uses complementary trading limits including position and tenor limits and maintains liquid positions as a result of which market risk typically can be neutralized or mitigated on short notice. As a result of these controls, Occidental believes that the market risk of its trading activities is not reasonably likely to have a material adverse effect on its performance.

INTEREST RATE RISK

GENERAL

As of December 31, 2022, Occidental had fixed rate debt with a fair value of \$17.5 billion outstanding. A 25-basis point change in Treasury rates would change the fair value of the fixed rate debt approximately \$295 million.

The table below provides information about Occidental's long-term debt obligations. Debt amounts represent principal payments by maturity date.

<i>millions except percentages</i>	U.S. Dollar		U.S. Dollar	Total ^(a)	
	Fixed-Rate Debt		Variable-Rate Debt		
2023	\$ 22	\$	—	\$	22
2024	1,056		—		1,056
2025	1,208		—		1,208
2026	1,448		—		1,448
2027	903		—		903
Thereafter	13,253		68		13,321
Total	\$ 17,890	\$	68	\$	17,958
Weighted-average interest rate	5.92%		5.32%		5.91%
Fair Value	\$ 17,508	\$	68	\$	17,576

^(a) Excluded net unamortized debt premiums of \$1.3 billion and debt issuance costs of \$73 million.

FOREIGN CURRENCY RISK

Occidental's international operations have limited currency risk. Occidental manages its exposure primarily by balancing monetary assets and liabilities and limiting cash positions in foreign currencies to levels necessary for operating purposes. A vast majority of international oil sales are denominated in United States dollars. Additionally, all of Occidental's consolidated international oil and gas subsidiaries have the United States dollar as the functional currency. The effect of exchange rates on transactions in foreign currencies is included in periodic income.

CREDIT RISK

The majority of Occidental's counterparty credit risk is related to the physical delivery of energy commodities to its customers and any inability of these customers to meet their settlement commitments. Occidental manages credit risk by selecting counterparties that it believes to be financially strong, by entering into netting arrangements with counterparties and by requiring collateral or other credit risk mitigants, as appropriate. Occidental actively evaluates the creditworthiness of its counterparties, assigns appropriate credit limits and monitors credit exposures against those assigned limits. Occidental also enters into futures contracts through regulated exchanges with select clearinghouses and brokers, which are subject to minimal credit risk, if any.

As of December 31, 2022, the substantial majority of the credit exposures were with investment grade counterparties. Occidental believes its exposure to credit-related losses as of December 31, 2022, was not material and losses associated with credit risk have been insignificant for all years presented.

**Report of Independent Registered Public Accounting Firm**

To the Stockholders and Board of Directors
Occidental Petroleum Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Occidental Petroleum Corporation and subsidiaries (the Company) as of December 31, 2022 and 2021, the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2022, and the related notes and financial statement schedule II - valuation and qualifying accounts (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2022, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2023 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Assessment of the estimated proved oil and gas reserves on the determination of depreciation and depletion expense for proved oil and gas properties.

As discussed in Note 1 to the consolidated financial statements, the Company determines depreciation and depletion of oil and gas producing properties by the unit-of-production method. Under this method, capitalized costs are amortized over estimated proved reserves. For the year ended December 31, 2022, the Company recorded depreciation and depletion expense related to proved oil and gas properties of \$6.2 billion.

We identified the assessment of the estimated proved oil and gas reserves on the determination of depreciation and depletion expense related to proved oil and gas properties as a critical audit matter. Complex auditor judgment was required to assess the Company's estimate of proved oil and gas reserves, which is a key input for the determination of depreciation and depletion expense. Estimating proved oil and gas reserves requires the expertise of professional petroleum reservoir engineers. The key assumptions included (1) estimated future production quantities, and (2) estimated operating and capital costs.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's depreciation and depletion process, including the estimation of proved oil and gas reserves. We analyzed and assessed the determination of depreciation and depletion expense for compliance with industry and regulatory standards. We

assessed compliance of the methodology used by the Company's engineering and technical staff to estimate proved oil and gas reserves with industry and regulatory standards. We read the findings of the independent reservoir engineering specialist's review of the methods and procedures used by the Company in estimating the proved reserves for compliance with industry and regulatory standards. To assess the Company's ability to accurately estimate future production quantities, we compared the future production quantity assumptions used by the Company in prior periods to the actual production amounts. We compared the estimated future production quantities used by the Company in the current period to historical production rates. We evaluated the operating and capital cost assumptions used by the Company's engineering and technical staff by comparing them to historical costs. We evaluated the professional qualifications and the knowledge, skills, and ability of the Company's internal reserve engineers and the independent reservoir engineering specialists engaged by the Company.

Evaluation of the environmental liability associated with the lower 8.3 miles of the Lower Passaic River site.

As discussed in Notes 1 and 12 to the consolidated financial statements, the Company accrues a liability for estimated environmental remedial activities when it is probable a liability has been incurred and the amount of remediation costs can be estimated. The Company accrued a liability related to its estimated allocable share of the costs to perform the remedial activities required for the lower 8.3 miles of the Lower Passaic River site. As of December 31, 2022, the Company's total estimated environmental liabilities were \$1 billion, which includes the estimated environmental liability for the lower 8.3 miles of the Lower Passaic River Site.

We identified the evaluation of the environmental liability associated with the lower 8.3 miles of the Lower Passaic River site as a critical audit matter. There was a high degree of subjective auditor judgment in applying and evaluating the results of our procedures due to possible changes to the Company's estimated allocable share of the remediation costs.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's environmental liability process to estimate the Company's allocable share of the remediation costs associated with the lower 8.3 miles of the Lower Passaic River site. We assessed the Company's assumption for its allocable share of the remediation costs and analyzed publicly available data sources for information that might be contrary to the information used by the Company. We involved an environmental analysis professional with specialized skills and knowledge who assisted in the evaluation of information used by management, including publicly available data sources.

Determination of tax impact of the legal entity reorganization

As discussed in Note 10 to the consolidated financial statements, the Company completed a legal entity reorganization in the first quarter of 2022 that resulted in an adjustment to the tax basis in a portion of its operating assets that reduced its deferred tax liabilities. As a result of the legal entity reorganization, the Company recorded a tax benefit of \$2.7 billion.

We identified the evaluation of the tax impact due to the legal entity reorganization as a critical audit matter. Evaluating the application of the United States tax laws and regulations, which can be complex, and the tax impact required a high degree of auditor effort and specialized skills and knowledge.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's process of determining the tax impact due to the legal entity reorganization including the application of United States tax laws and regulations. We evaluated the information, including third party opinions, United States tax laws and regulations, and other relevant evidence used by management to support its position regarding the tax impact of the transaction; and evaluated the legal entity reorganization related tax impact. We involved income tax professionals with specialized skills and knowledge who assisted in the evaluation of:

- the tax impact of the legal entity reorganization
- certain facts, representations and assumptions from management
- the application of relevant United States tax laws and regulations.

/s/ KPMG LLP

We have served as the Company's auditor since 2002.

Houston, Texas

**Report of Independent Registered Public Accounting Firm**

To the Stockholders and Board of Directors
Occidental Petroleum Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited Occidental Petroleum Corporation and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2022 and 2021, the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2022, and the related notes and financial statement schedule II - valuation and qualifying accounts (collectively, the consolidated financial statements), and our report dated February 27, 2023 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Assessment of and Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NATURE OF OPERATIONS

Occidental conducts its operations through various subsidiaries and affiliates. Occidental's principal businesses consist of three reporting segments: oil and gas, chemical and midstream and marketing. The oil and gas segment explores for, develops and produces oil (which includes condensate), NGL and natural gas. OxyChem primarily manufactures and markets basic chemicals and vinyls. The midstream and marketing segment purchases, markets, gathers, processes, transports and stores oil (which includes condensate), NGL, natural gas, CO₂ and power. It also optimizes its transportation and storage capacity, and invests in entities that conduct similar activities, such as WES.

The midstream and marketing segment also includes OLCV. OLCV seeks to leverage Occidental's legacy of carbon management expertise to develop CCUS projects, including the commercialization of DAC technology, and invests in other low-carbon technologies intended to reduce GHG emissions from our operations and strategically partner with other industries to help reduce their emissions.

PRINCIPLES OF CONSOLIDATION

The Consolidated Financial Statements have been prepared in conformity with GAAP and include the accounts of Occidental, its subsidiaries, its undivided interests in oil and gas exploration and production ventures and, previously, variable interest entities, for which Occidental was the primary beneficiary. Occidental accounts for its share of oil and gas exploration and production ventures, in which it has a direct working interest, by reporting its proportionate share of assets, liabilities, revenues, costs and cash flows within the relevant lines on the balance sheets, statements of operations and statements of cash flows. Certain prior period amounts have been reclassified to conform to the current presentation.

INVESTMENTS IN UNCONSOLIDATED ENTITIES

Occidental's percentage interest in the underlying net assets of affiliates for which it exercises significant influence without having a controlling interest (excluding oil and gas ventures in which Occidental holds an undivided interest) are accounted for under the equity method. Occidental reviews equity-method investments for impairment whenever events or changes in circumstances indicate that an other-than-temporary decline in value may have occurred. The amount of impairment, if any, is based on quoted market prices, when available, or other valuation techniques, including discounted cash flows. Occidental evaluates the facts and circumstances of any distributions in excess of its carrying amount in the investment to determine the appropriate accounting, including the source of the proceeds and any implicit or explicit commitments to fund the affiliate. If there is no implicit or explicit commitment the distribution is treated as a gain. If an implicit or explicit commitment exists to possibly fund the affiliate at a future date the distribution is recorded against the equity-method investment. See Note 4 - Investments and Related-Party Transactions for further discussion regarding investments in unconsolidated entities.

WES INVESTMENT

WES is a publicly traded limited partnership with its common units traded on the NYSE under the ticker symbol "WES." WES owns the entire non-economic general partner interest and a 98% limited partner interest in WES Operating.

In July 2022, Occidental sold 10.0 million limited partner units of WES for proceeds of approximately \$250 million, resulting in a gain of \$62 million.

As of December 31, 2022, Occidental owned all of the 2.3% non-voting general partner interest and 49.5% of the limited partner units in WES. On a combined basis, with its 2% non-voting limited partner interest in WES Operating, Occidental's total effective economic interest in WES and its subsidiaries was 51.7% and Occidental's carrying value of WES was approximately \$2.0 billion, which exceeds Occidental's pro-rata interest in the net assets of WES by \$390 million. This basis difference is primarily associated with WES' PP&E and equity investments and is subject to amortization over their estimated average lives. See Note 4 - Investment and Related-Party Transactions for further information.

BERKSHIRE HATHAWAY OWNERSHIP

Berkshire Hathaway is a related party of Occidental due to its level of ownership of Occidental's common stock. During the third quarter of 2022, Berkshire Hathaway increased its ownership in Occidental to approximately 194 million shares of common stock. Occidental has, from time to time, contracted with Berkshire Hathaway for the provision of electricity, rail and insurance. In addition, certain Berkshire Hathaway subsidiaries purchase various chemicals from our chemical segment.

DISCONTINUED OPERATIONS

Unless otherwise indicated, information presented in the Notes to Consolidated Financial Statements relates only to Occidental's continuing operations. Information related to discontinued operations is included in Note 5 - Acquisitions, Divestitures and Other Transactions and in some instances, where appropriate, is included as a separate disclosure within the individual Notes to Consolidated Financial Statements.

RISKS AND UNCERTAINTIES

The process of preparing Consolidated Financial Statements in conformity with GAAP requires Occidental's management to make informed estimates and judgments regarding certain types of financial statement balances and disclosures. Such estimates primarily relate to unsettled transactions and events as of the date of the Consolidated Financial Statements and judgments on expected outcomes as well as the materiality of transactions and balances. Changes in facts and circumstances or discovery of new information relating to such transactions and events may result in revised estimates and judgments and actual results may differ from estimates upon settlement. Management believes that these estimates and judgments provide a reasonable basis for the fair presentation of Occidental's financial statements. Occidental establishes a valuation allowance against net operating losses and other deferred tax assets to the extent it believes the future benefit from these assets will not be realized in the statutory carryforward periods. Realization of deferred tax assets is dependent upon Occidental generating sufficient future taxable income and reversal of temporary differences in jurisdictions where such assets originate.

The accompanying Consolidated Financial Statements include assets of approximately \$7.7 billion as of December 31, 2022 and net sales of approximately \$5.5 billion for the year ended December 31, 2022, relating to Occidental's operations in countries outside North America. Occidental has experienced and may continue to experience adverse consequences, such as risk of loss or production limitations, because certain of its international operations are located in countries affected by political instability, nationalizations, corruption, armed conflict, terrorism, insurgency, civil unrest, security problems, labor unrest, OPEC production restrictions, equipment import restrictions and sanctions. Exposure to such risks may increase if a greater percentage of Occidental's future oil and gas production or revenue comes from international sources. Occidental attempts to conduct its affairs so as to mitigate its exposure to such risks and would seek compensation in the event of nationalization.

Because Occidental's major products are commodities, significant changes in the prices of oil, NGL, natural gas and chemical products may have a significant impact on Occidental's results of operations. Also, see Property, Plant and Equipment section below.

RECEIVABLES AND OTHER CURRENT ASSETS

Trade receivables, net of \$4.3 billion and \$4.2 billion as of December 31, 2022 and 2021, respectively, represent rights to payment for which Occidental had satisfied its obligations under a contract with a customer and its right to payment was conditioned only on the passage of time.

Other current assets includes amounts receivable from working interest partners in Occidental's oil and gas operations, derivative assets and taxes receivable.

INVENTORIES

Materials and supplies are valued at weighted-average cost and are reviewed periodically for obsolescence. Oil, NGL and natural gas inventories are valued at the lower of cost or market.

For the chemical segment, Occidental's finished goods inventories are valued at the lower of cost or market. For most of its domestic inventories, other than materials and supplies, the chemical segment uses the LIFO method as it better matches current costs and current revenue. For other countries, Occidental uses the first-in, first-out method (if the costs of goods are specifically identifiable) or the average-cost method (if the costs of goods are not specifically identifiable).

PROPERTY, PLANT AND EQUIPMENT

OIL AND GAS

The carrying value of Occidental's PP&E represents the cost incurred to acquire or develop the asset, including any AROs and capitalized interest, net of accumulated DD&A and any impairment charges. For assets acquired, PP&E cost is based on fair values at the acquisition date. AROs and interest costs incurred in connection with qualifying capital expenditures are capitalized and amortized over the lives of the related assets.

Occidental uses the successful efforts method to account for its oil and gas properties. Under this method, Occidental capitalizes costs of acquiring properties, costs of drilling successful exploration wells and development costs. The costs of exploratory wells are initially capitalized pending a determination of whether proved reserves have been found. If proved reserves have been found, the costs of exploratory wells remain capitalized. For exploratory wells that find reserves that cannot be classified as proved when drilling is completed, costs continue to be capitalized as suspended exploratory drilling costs if there have been sufficient reserves found to justify completion as a producing well and sufficient progress is being made in assessing the reserves and the economic and operating viability of the project. At the end of each quarter, management reviews the status of all suspended exploratory drilling costs in light of ongoing exploration activities, in

particular, whether Occidental is making sufficient progress in its ongoing exploration and appraisal efforts or, in the case of discoveries requiring government sanctioning, analyzing whether development negotiations are underway and proceeding as planned. If management determines that future appraisal drilling or development activities are unlikely to occur, associated suspended exploratory well costs are expensed.

The following table summarizes the activity of capitalized exploratory well costs for continuing operations for the years ended December 31:

<i>millions</i>	2022	2021	2020
Balance — beginning of year	\$ 213	\$ 211	\$ 424
Additions to capitalized exploratory well costs pending the determination of proved reserves	323	163	122
Reclassifications to property, plant and equipment based on the determination of proved reserves	(183)	(67)	(309)
Capitalized exploratory well costs charged to expense	(77)	(94)	(26)
Balance — end of year	\$ 276	\$ 213	\$ 211

Occidental expenses annual lease rentals, the costs of injectants used in production and geological and geophysical costs as incurred.

Occidental determines depreciation and depletion of oil and gas producing properties by the unit-of-production method. It amortizes leasehold costs over total proved reserves and capitalized development and successful exploration costs over proved developed reserves.

Proved oil and gas reserves are those quantities of oil and gas which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward, from known reservoirs and under existing economic conditions, operating methods and government regulations prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. Proved reserves include PUD reserves. PUD reserves are supported by a management-approved, detailed, field-level development plan where sufficient capital has been committed to develop those reserves. Only PUD reserves which are reasonably certain to be drilled within five years of booking and are supported by a final investment decision to drill them are included in the development plan. A portion of the PUD reserves associated with international operations are expected to be developed beyond the five years and are tied to approved long-term development projects.

Occidental performs impairment tests with respect to its proved properties whenever events or circumstances indicate that the carrying value of property may not be recoverable. If there is an indication the carrying amount of the asset may not be recovered due to significant and prolonged declines in current and forward prices, significant changes in reserve estimates, changes in management's plans, or other significant events, management will evaluate the property for impairment. Under the successful efforts method, if the sum of the undiscounted cash flows is less than the carrying value of the proved property, the carrying value is reduced to estimated fair value and reported as an impairment charge in the period. Individual proved properties are grouped for impairment purposes at the lowest level for which there are identifiable cash flows unless observable and comparable transactions are available. The fair value of impaired assets is typically determined based on the present value of expected future cash flows using discount rates believed to be consistent with those used by market participants. The impairment test incorporates a number of assumptions involving expectations of future cash flows which can change significantly over time. These assumptions include estimates of future production, product prices, contractual prices, estimates of risk-adjusted oil and gas proved and unproved reserves and estimates of future operating and development costs. It is reasonably possible that prolonged declines in commodity prices, reduced capital spending in response to lower prices or increases in operating costs could result in additional impairments. See [Note 9 - Fair Value Measurements](#) and below for further discussion of asset impairments.

Net capitalized costs attributable to unproved properties were \$12.6 billion as of December 31, 2022 and \$14.8 billion as of December 31, 2021. The unproved amounts are not subject to DD&A until they are classified as proved properties. Individually insignificant unproved properties are combined and amortized on a group basis based on factors such as lease terms, success rates and other factors to provide for full amortization upon lease expiration or abandonment.

Significant unproved properties, primarily as a result of the Anadarko Acquisition, are assessed individually for impairment and when events or circumstances indicate that the carrying value of property may not be recovered a valuation allowance is provided if an impairment is indicated. Occidental periodically reviews significant unproved properties for impairments; numerous factors are considered, including but not limited to, availability of funds for future exploration and development activities, current exploration and development plans, favorable or unfavorable exploration activity on the property or the adjacent property, geologists' evaluation of the property, the current and projected political and regulatory climate, contractual conditions and the remaining lease term for the properties. If an impairment is indicated, Occidental will first determine whether a comparable transaction for similar properties or implied acreage valuation derived from domestic onshore market participants is available and will adjust the carrying amount of the unproved property to its fair value using the market approach. In situations where the market approach is not observable and unproved reserves are available,

undiscounted future net cash flows used in the impairment analysis are determined based on managements' risk adjusted estimates of unproved reserves, future commodity prices and future costs to produce the reserves. If undiscounted future net cash flows are less than the carrying value of the property, the future net cash flows are discounted and compared to the carrying value for determining the amount of the impairment loss to record. Occidental utilizes the same assumptions and methodology discussed above for cash flows associated with proved properties.

CHEMICAL

Occidental's chemical assets are depreciated using either the unit-of-production or the straight-line method, based upon the estimated useful lives of the facilities. The estimated useful lives of Occidental's chemical assets, which range from three years to 50 years, are also used for impairment tests. The estimated useful lives for the chemical facilities are based on the assumption that Occidental will provide an appropriate level of annual expenditures to ensure productive capacity is sustained. Such expenditures consist of ongoing routine repairs and maintenance, as well as planned major maintenance activities. Ongoing routine repairs and maintenance expenditures are expensed as incurred. Planned major maintenance activities costs are capitalized and amortized over the period until the next planned overhaul. Additionally, Occidental incurs capital expenditures that extend the remaining useful lives of existing assets, increase their capacity or operating efficiency beyond the original specification or add value through modification for a different use. These capital expenditures are not considered in the initial determination of the useful lives of these assets at the time they are placed into service. The resulting revision, if any, of the asset's estimated useful life is measured and accounted for prospectively.

Without these continued expenditures, the useful lives of these assets could decrease significantly. Other factors that could change the estimated useful lives of Occidental's chemical assets include sustained higher or lower product prices, which are affected by domestic and international competition, demand, feedstock costs, energy prices, environmental regulations and technological changes.

Occidental performs impairment tests on its chemical assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

MIDSTREAM AND MARKETING

Occidental's midstream and marketing PP&E is depreciated over the estimated useful lives of the assets, using either the unit-of-production or straight-line method.

Occidental performs impairment tests on its midstream and marketing assets whenever events or changes in circumstances lead to a reduction in the estimated useful lives or estimated future cash flows that would indicate that the carrying amount may not be recoverable, or when management's plans change with respect to those assets. Any impairment loss would be calculated as the excess of the asset's net book value over its estimated fair value.

IMPAIRMENTS AND OTHER CHARGES

During 2021, Occidental's oil and gas segment recognized pre-tax impairment and related charges of \$282 million primarily related to undeveloped leases that either expired or were set to expire in the near-term, where Occidental had no plans to pursue exploration activities and, to a lesser extent, impairments of oil and gas materials and supplies inventories.

During 2020, Occidental's oil and gas segment recognized pre-tax impairment and related charges of \$7.0 billion related to proved and unproved properties. An additional pre-tax impairment of \$2.2 billion related to Ghana was included in discontinued operations.

During 2020, Occidental's midstream and marketing segment recognized pre-tax impairment and related charges of \$1.2 billion related to goodwill associated with Occidental's ownership in WES. Significant declines in the market value of WES' publicly traded units resulted in management's determination that, more likely than not, the fair value of the reporting unit was significantly less than its carrying value and the entire balance was fully impaired. The market value of WES' publicly traded units is considered a Level 1 input.

Prolonged declines in commodity prices, reduced capital spending in response to lower prices or increases in operating costs could result in additional impairments.

FAIR VALUE MEASUREMENTS

Occidental has categorized its assets and liabilities that are measured at fair value in a three-level fair value hierarchy, based on the inputs to the valuation techniques: Level 1 – using quoted prices in active markets for the assets or liabilities; Level 2 – using observable inputs other than quoted prices for the assets or liabilities; and Level 3 – using unobservable inputs. Transfers between levels, if any, are reported at the end of each reporting period.

FAIR VALUES - RECURRING

Occidental primarily applies the market approach for recurring fair value measurements, maximizes its use of observable inputs and minimizes its use of unobservable inputs. Occidental utilizes the mid-point between bid and ask prices for valuing the majority of its assets and liabilities measured and reported at fair value. In addition to using market data, Occidental makes assumptions in valuing its assets and liabilities, including assumptions about the risks inherent in the inputs to the valuation technique. For assets and liabilities carried at fair value, Occidental measures fair value using the following methods:

- Occidental values exchange-cleared commodity derivatives using closing prices provided by the exchange as of the balance sheet date. These derivatives are classified as Level 1.
- OTC bilateral financial commodity contracts, foreign exchange contracts, interest rate swaps, warrants, options and physical commodity forward purchase and sale contracts are generally classified as Level 2 and are generally valued using quotations provided by brokers or industry-standard models that consider various inputs, including quoted forward prices for commodities, time value, volatility factors, credit risk and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace throughout the full term of the instrument, and can be derived from observable data or are supported by observable prices at which transactions are executed in the marketplace.
- Occidental values commodity derivatives based on a market approach that considers various assumptions, including quoted forward commodity prices and market yield curves. The assumptions used include inputs that are generally unobservable in the marketplace or are observable but have been adjusted based upon various assumptions and the fair value is designated as Level 3 within the valuation hierarchy.
- Occidental values debt using market-observable information for debt instruments that are traded on secondary markets. For debt instruments that are not traded, the fair value is determined by interpolating the value based on debt with similar terms and credit risk.

NON-FINANCIAL ASSETS

Occidental uses market-observable prices for assets when comparable transactions can be identified that are similar to the asset being valued. When Occidental is required to measure fair value and there is not a market-observable price for the asset or for a similar asset then the cost or income approach is used depending on the quality of information available to support management's assumptions. The cost approach is based on management's best estimate of the current asset replacement cost. The income approach is based on management's best assumptions regarding expectations of future net cash flows. The expected cash flows are discounted using a commensurate risk-adjusted discount rate. Such evaluations involve significant judgment, and the results are based on expected future events or conditions such as sales prices, estimates of future oil and gas production or throughput, development and operating costs and the timing thereof, economic and regulatory climates and other factors, most of which are often outside of management's control. However, assumptions used reflect a market participant's view of long-term prices, costs and other factors and are consistent with assumptions used in Occidental's business plans and investment decisions.

ACCRUED LIABILITIES - CURRENT

Accrued liabilities - current included accrued payroll, commissions and related expenses of \$582 million and \$677 million as of December 31, 2022 and 2021, respectively, and taxes other than on income of \$544 million and \$445 million as of December 31, 2022 and 2021, respectively. Dividends payable, also included in accrued liabilities - current, were \$289 million and \$188 million as of December 31, 2022, and 2021, respectively.

ENVIRONMENTAL LIABILITIES AND EXPENDITURES

Certain subsidiaries of Occidental incur environmental liabilities and expenditures that relate to current operations and are expensed or capitalized by such subsidiaries as appropriate. Certain subsidiaries also incur environmental liabilities and expenditures with respect to remediation of existing conditions from alleged past practices at Currently Operated, Closed or Non-Operated, and Third-Party Sites, which categories may include NPL sites. Those environmental liabilities and related charges and expenses for estimated remediation costs from past operations are recorded when environmental remediation efforts are probable and the costs can be reasonably estimated. Occidental discloses such remediation liabilities on a consolidated basis. In determining the environmental remediation liability and the range of reasonably possible additional losses, Occidental refers to currently available information, including relevant past experience, remedial objectives, available technologies, applicable laws and regulations and cost-sharing arrangements. These environmental remediation liabilities are based on management's estimate of the most likely cost to be incurred, using the most cost-effective technology reasonably expected to achieve the remedial objective. Occidental periodically reviews these environmental remediation liabilities and adjusts them as new information becomes available. Occidental's subsidiaries generally record reimbursements or recoveries of environmental remediation costs in income when received, or when receipt of recovery is highly probable.

Many factors could affect future remediation costs incurred by Occidental's subsidiaries and result in adjustments to environmental remediation liabilities and the range of reasonably possible additional losses. The most significant are: (1)

cost estimates for remedial activities may vary from the initial estimate; (2) the length of time, type or amount of remediation necessary to achieve the remedial objective may change due to factors such as site conditions, the ability to identify and control contaminant sources or the discovery of additional contamination; (3) a regulatory agency may ultimately reject or modify Occidental's proposed remedial plan; (4) improved or alternative remediation technologies may change remediation costs; (5) laws and regulations may change remediation requirements or affect cost sharing or allocation of liability; and (6) changes in allocation or cost-sharing arrangements may occur.

Certain sites involve multiple parties with various cost-sharing arrangements, which fall into the following three categories: (1) environmental proceedings that result in a negotiated or prescribed allocation of remediation costs among the affected Occidental subsidiary and other alleged potentially responsible parties; (2) oil and gas ventures in which each participant pays its proportionate share of remediation costs reflecting its working interest; or (3) contractual arrangements, typically relating to purchases and sales of properties, in which the parties to the transaction agree to methods of allocating remediation costs. In these circumstances, the affected subsidiary evaluates the financial viability of other parties with whom it is alleged to be jointly liable, the degree of their commitment to participate and the consequences to such subsidiary of their failure to participate when estimating its ultimate share of liability. Occidental records its environmental remediation liabilities at its expected net cost of remedial activities and, based on these factors, believes that it will not be required to assume a share of liability of such other potentially responsible parties in an amount materially above amounts reserved.

In addition to the costs of investigations and clean-up measures, which often take in excess of 10 years at CERCLA NPL sites, Occidental's environmental remediation liabilities include management's estimates of the costs to operate and maintain remedial systems. If remedial systems are modified over time in response to significant changes in site-specific data, laws, regulations, technologies or engineering estimates, Occidental reviews and adjusts its environmental remediation liabilities accordingly.

ASSET RETIREMENT OBLIGATIONS

Occidental recognizes the fair value of AROs in the period in which a determination is made that a legal obligation exists to dismantle an asset and reclaim or remediate the property at the end of its useful life and the cost of the obligation can be reasonably estimated. The liability amounts are based on future retirement cost estimates and incorporate many assumptions such as time to abandonment, future inflation rates and the risk-adjusted discount rate. When the liability is initially recorded, Occidental capitalizes the cost by increasing the related PP&E balances. If the estimated future cost of the AROs changes, Occidental records an adjustment to both the AROs and PP&E. Over time, the liability is increased, expense is recognized for accretion and the capitalized cost is depreciated over the useful life of the asset.

The majority of Occidental's AROs relate to the plugging of wells and the related abandonment of oil and gas properties.

At a certain number of its facilities, Occidental has identified conditional AROs that are related mainly to plant decommissioning. Occidental does not know or cannot estimate when it may settle these obligations. Therefore, Occidental cannot reasonably estimate the fair value of these liabilities. Occidental will recognize these conditional AROs in the periods in which sufficient information becomes available to reasonably estimate their fair values.

The following table summarizes the activity of AROs for the years ended December 31:

<i>millions</i>	2022	2021
Beginning balance	\$ 4,026	\$ 4,130
Liabilities incurred – capitalized to PP&E	55	27
Liabilities settled and paid	(342)	(174)
Accretion expense	145	205
Acquisitions, divestitures and other, net	(54)	(53)
Revisions to previous estimates	(25)	(109)
Ending balance ^(a)	\$ 3,805	\$ 4,026

^(a) The ending balance included \$169 million and \$339 million related to the current balance of AROs that are presented in accrued liabilities on the Consolidated Balance Sheets as of December 31, 2022 and 2021, respectively.

DERIVATIVE INSTRUMENTS

Derivatives are carried at fair value and on a net basis when a legal right of offset exists with the same counterparty. Occidental applies hedge accounting when transactions meet specified criteria for cash flow hedge treatment and management elects and documents such treatment. Otherwise, any fair value gains or losses are recognized in earnings in the current period. For cash flow hedges, the gain or loss on the effective portion of the derivative is reported as a component of OCI with an offsetting adjustment to the carrying value of the item being hedged. Realized gains or losses from cash flow hedges, and any ineffective portion, are recorded as a component of net sales in the Consolidated Statements of Operations. Ineffectiveness is primarily created by a lack of correlation between the hedged item and the hedging instrument due to location, quality, grade or changes in the expected quantity of the hedged item. Gains and losses

from derivative instruments are reported net in the Consolidated Statements of Operations. There were no fair value hedges as of and during the years ended December 31, 2022, 2021 and 2020.

STOCK-BASED INCENTIVE PLANS

Occidental has established the Plan that is more fully described in Note 15 - Stock-Based Incentive Plans. A summary of Occidental's accounting policy for awards issued under the Plan is as follows.

For cash- and stock-settled RSUs and CROCEI awards, compensation value is initially measured on the grant date using the quoted market price of Occidental's common stock and the estimated payout on the grant date. The fair value of stock options is estimated using a Black Scholes model. For TSRI awards, compensation value is initially measured on the grant date using the fair value derived from a Monte Carlo valuation model. Compensation expense for all awards is recognized on a straight-line basis over the requisite service periods, which is generally over the awards' respective vesting or performance periods. The stock-settled awards are expensed using the initially measured compensation value. The liability resulting from cash settled awards and accrued dividends are remeasured at each reporting period. Dividends accrued on unvested awards are adjusted quarterly for any changes in the number of share equivalents expected to be paid based on the relevant performance and market criteria, if applicable.

RETIREMENT AND POSTRETIREMENT BENEFIT PLANS

Occidental recognizes the overfunded or underfunded amounts of its defined benefit pension and postretirement plans, which are more fully described in Note 11 - Retirement and Postretirement Benefit Plans, in its financial statements using a December 31 measurement date.

Occidental's defined benefit pension and postretirement benefit plan obligations are actuarially determined based on various assumptions and discount rates. The discount rate assumptions used are meant to reflect the interest rate at which the obligations could effectively be settled on the measurement date. Occidental estimates the rate of return on assets with regard to current market factors but within the context of historical returns. Occidental funds and expenses negotiated pension increases for domestic union employees over the terms of the applicable collective bargaining agreements.

Pension and any postretirement plan assets are measured at fair value. Common stock, preferred stock, publicly registered mutual funds, U.S. government securities and corporate bonds are valued using quoted market prices in active markets when available. When quoted market prices are not available, these investments are valued using pricing models with observable inputs from both active and non-active markets. Common and collective trusts are valued at the fund units' NAV provided by the issuer, which represents the quoted price in a non-active market. Short-term investment funds are valued at the fund units' NAV provided by the issuer.

SUPPLEMENTAL CASH FLOW INFORMATION

The following table represents U.S. federal, domestic state and international income taxes paid, tax refunds received and interest paid related to continuing operations during the year ended December 31, 2022, 2021 and 2020, respectively:

<i>millions</i>		2022		2021		2020
Income tax payments	\$	2,184	\$	763	\$	498
Income tax refunds received	\$	89	\$	70	\$	223
Production, property and other tax payments	\$	1,093	\$	790	\$	629
Interest paid ^(a)	\$	1,425	\$	1,685	\$	1,521

^(a) Net of capitalized interest of \$69 million, \$61 million and \$84 million, for the years 2022, 2021 and 2020, respectively.

Occidental swapped oil and gas acreage with a fair value of \$340 million in non-monetary exchange transactions during the year ended December 31, 2022.

CASH EQUIVALENTS AND RESTRICTED CASH EQUIVALENTS

Occidental considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents or restricted cash equivalents. The cash equivalents and restricted cash equivalents balance as of December 31, 2022, included investments in government money market funds in which the carrying value approximates fair value.

The following table provides a reconciliation of cash, cash equivalents, restricted cash and restricted cash equivalents as reported at the end of the period in the Consolidated Statements of Cash Flows for the year ended December 31, 2022 and 2021:

<i>millions</i>		2022		2021
Cash and cash equivalents	\$	984	\$	2,764
Restricted cash and restricted cash equivalents		26		24
Restricted cash and restricted cash equivalents included in long-term receivables and other assets, net		16		15
Cash, cash equivalents, restricted cash and restricted cash equivalents	\$	1,026	\$	2,803

FOREIGN CURRENCY TRANSACTIONS

The functional currency applicable to all of Occidental's international oil and gas operations is the U.S. dollar since cash flows are denominated principally in U.S. dollars. In Occidental's other operations, Occidental's use of non-United States dollar functional currencies was not material for all years presented. The effect of exchange rates on transactions in foreign currencies is included in periodic income. Occidental reports the exchange rate differences arising from translating foreign-currency-denominated balance sheet accounts to the United States dollar as of the reporting date in OCI. Exchange-rate gains and losses for continuing operations were not material for all years presented.

INCOME TAXES

Occidental files various U.S. federal, state and foreign income tax returns. The impact of changes in tax regulations are reflected when enacted. In general, deferred federal, state and foreign income taxes are provided on temporary differences between the financial statement carrying amounts of assets and liabilities and their respective tax basis. Occidental routinely assesses the realizability of its deferred tax assets. If Occidental concludes that it is more likely than not that some of the deferred tax assets will not be realized, the tax asset is reduced by a valuation allowance. Occidental recognizes a tax benefit from an uncertain tax position when it is more likely than not that the position will be sustained upon examination, based on the technical merits of the position. The tax benefit recorded is equal to the largest amount that is greater than 50% likely to be realized through final settlement with a taxing authority. Interest and penalties related to unrecognized tax benefits are recognized in income tax expense (benefit). See [Note 10 - Income Taxes](#) for more information.

LOSS CONTINGENCIES

Occidental or certain of its subsidiaries are involved, in the normal course of business, in lawsuits, claims and other legal proceedings that seek, among other things, compensation for alleged personal injury, breach of contract, property damage or other losses, punitive damages, civil penalties, or injunctive or declaratory relief. Occidental or certain of its subsidiaries also are involved in proceedings under CERCLA and similar federal, state, local and international environmental laws. These environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties and injunctive relief. Usually Occidental or such subsidiaries are among many companies in these environmental proceedings and have to date been successful in sharing response costs with other financially sound companies. Further, some lawsuits, claims and legal proceedings involve acquired or disposed assets with respect to which a third party or Occidental or its subsidiaries retains liability or indemnifies the other party for conditions that existed prior to the transaction.

In accordance with applicable accounting guidance, Occidental accrues reserves for outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. In [Note 12 - Environmental Liabilities and Expenditures](#), Occidental has disclosed its reserve balances for environmental remediation matters that satisfy this criteria. See [Note 13 - Lawsuits, Claims, Commitments and Contingencies](#).

NOTE 2 - REVENUE

Revenue from customers is recognized when obligations under the terms of a contract are satisfied; this generally occurs with the delivery of oil, NGL, gas, chemicals or services such as transportation. Revenue from customers is measured as the amount of consideration Occidental expects to receive in exchange for the delivery of goods or services. Contracts may last from one month to one year or more and may have renewal terms that extend indefinitely at the option of either party. Price is typically based on market indexes. Volumes fluctuate due to production and, in certain cases, customer demand and transportation availability. Occidental records revenue net of certain taxes, such as sales taxes, that are assessed by governmental authorities on Occidental's customers.

Occidental does not incur significant costs to obtain contracts. Incidental items that are immaterial in the context of the contract are recognized as expenses. Sales of hydrocarbons and chemicals to customers are invoiced and settled on a monthly basis. Occidental is not usually subject to obligations for warranties, rebates, returns or refunds except in the case of customer incentive payments as discussed for the chemical segment below. Occidental does not typically receive payment in advance of satisfying its obligations under the terms of its sales contracts with customers; therefore, liabilities related to such payment are immaterial to Occidental. Occidental does not disclose consideration for remaining performance obligations with an original expected duration of one year or less or for variable consideration related to unsatisfied performance obligations.

OIL AND GAS SEGMENT

Revenue from oil and gas production is recognized when production is delivered and control passes to the customer. Revenues from the production of oil and gas properties in which Occidental has an interest with other producers are recognized on the basis of Occidental's net revenue interest.

CHEMICAL SEGMENT

Revenue from chemical product sales is recognized when control passes to the customer. Certain incentive programs may provide for payments or credits to be made to customers based on the volume of product purchased over a defined period. Customer incentives are estimated and recorded as a reduction to revenue ratably over the contract period. Such estimates are evaluated and revised as warranted. Revenue from exchange contracts is excluded from revenue from customers.

MIDSTREAM AND MARKETING SEGMENT

Revenue from pipeline and gas processing is recognized upon the completion of the transportation or processing service. Revenue from power sales is recognized upon delivery. Net marketing revenue is recognized upon completion of contract terms that are a prerequisite to payment and upon title transfer for physical deliveries. Unless the normal purchases and sales exception has been elected, net marketing revenue is classified as a derivative, reported on a net basis, recorded at fair value. Changes in fair value are reflected in net sales and excluded from revenue from customers in the table below.

DISAGGREGATION OF REVENUE FROM CONTRACTS WITH CUSTOMERS

The following table reconciles revenue from customers to total net sales for the years ended December 31:

<i>millions</i>	2022	2021	2020
Revenue from customers	\$ 36,234	\$ 25,959	\$ 17,130
All other revenues ^(a)	400	(3)	679
Net sales	\$ 36,634	\$ 25,956	\$ 17,809

^(a) Included net marketing derivatives, oil collars and calls and chemical exchange contracts.

The table below presents Occidental's revenue from customers by segment, product and geographical area. The oil and gas segment typically sells its oil, NGL and natural gas at the lease or concession area. Chemical segment revenues are shown by geographic area based on the location of the sale. Excluding net marketing revenue, midstream and marketing segment revenues are shown by the location of sale.

millions	United States	International	Eliminations	Total

NOTE 3 - INVENTORIES

Finished goods primarily represents oil, which is carried at the lower of weighted-average cost or net realizable value, and caustic soda and chlorine, which are valued under the LIFO method. Inventories consisted of the following as of December 31:

<i>millions</i>	2022	2021
Raw materials	\$ 120	\$ 96
Materials and supplies	913	783
Commodity inventory and finished goods	1,147	1,066
	2,180	1,945
Revaluation to LIFO	(121)	(99)
Total	\$ 2,059	\$ 1,846

NOTE 4 - INVESTMENTS AND RELATED-PARTY TRANSACTIONS

EQUITY INVESTMENTS

Occidental's significant equity investments are presented in investments in unconsolidated entities and in deferred credits and other liabilities - other. As of December 31, 2022 and 2021, investments in unconsolidated entities were \$3.2 billion and \$2.9 billion, respectively. Occidental's equity investments presented in investments in unconsolidated entities primarily consist of the following:

<i>millions</i>	% Economic Interest	Carrying amount
WES ^(a)	51.7 %	\$ 2,006
OxyChem Ingleside Facility	50.0 %	566
OLCV - related	various	416
Other	various	188
Total Investments in unconsolidated entities ^(b)		\$ 3,176

^(a) In July 2022, Occidental sold 10.0 million limited partner units of WES for proceeds of approximately \$250 million, resulting in a gain of \$62 million. In 2021, Occidental sold 14.0 million limited partner units of WES for proceeds of \$250 million, resulting in a gain of \$102 million. In the first quarter of 2020, Occidental recorded an impairment of \$1.2 billion in goodwill related to its ownership in WES and in the third quarter of 2020, recorded an other than temporary impairment of \$2.7 billion related to the WES equity method investment. See [Note 9 - Fair Value Measurements](#) for more information on the impairments.

^(b) Not presented in investments in unconsolidated entities is Occidental's 24.5% ownership in DEL, which had a carrying value of \$213 million and is presented in deferred credits and other liabilities - other. Refer to the discussion below regarding the presentation of Occidental's equity investment in DEL.

As of December 31, 2022 and 2021, Occidental's significant equity investments consisted of investments in WES, OxyChem Ingleside Facility, Net Power and DEL.

As a result of a refinancing transaction at DEL in November 2021, Occidental received cash distributions comprised of \$110 million in dividends and \$450 million in excess distributions. Since Occidental may be requested to provide financial support to DEL in the future, the excess distributions were recorded against the carrying amount of the equity investment and in deferred credits and other liabilities - other. The \$110 million in dividends were recorded as a return on investment in cash flow from operations and the \$450 million excess distribution was recorded as a return of investment in cash flow from investing.

Equity investments in certain oil and gas properties and gathering and processing assets and associated notes payable were presented net on the Consolidated Balance Sheets. The notes payable were net settled in 2022. The carrying value of the investment and note payable were \$2.9 billion as of December 31, 2021.

Dividends received from equity investments were \$643 million, \$652 million and \$678 million to Occidental in 2022, 2021 and 2020, respectively. As of December 31, 2022 and 2021, cumulative undistributed earnings of equity-method investees since they were acquired was \$475 million and \$242 million, respectively. As of December 31, 2022, Occidental's investments in equity investees exceeded the underlying equity in net assets by approximately \$640 million, of which,

\$373 million represented PP&E and equity investments with the remainder comprised of intangibles, both are subject to amortization over their estimated average lives.

The following table presents the summarized financial information of its equity-method investments combined for the years ended and as of December 31:

<i>millions</i>	2022	2021	2020
Summarized Results of Operations			
Revenues and other income	\$ 6,342	\$ 6,252	\$ 5,455
Costs and expenses	4,514	4,569	5,455
Net income	\$ 1,828	\$ 1,683	\$ —
Summarized Balance Sheet			
Current assets	\$ 3,482	\$ 3,387	\$ 1,419
Non-current assets	\$ 15,282	\$ 19,341	\$ 18,693
Current liabilities	\$ 1,342	\$ 1,976	\$ 1,549
Long-term debt	\$ 9,512	\$ 9,464	\$ 7,860
Other non-current liabilities	\$ 1,289	\$ 1,187	\$ 866
Stockholders' equity	\$ 6,621	\$ 10,101	\$ 9,837

RELATED-PARTY TRANSACTIONS

Occidental sells oil, NGL, natural gas, chemicals, power and steam to and purchases oil, NGL and chemicals from its equity method investees and other related parties. Occidental is charged service fees primarily related to gathering, processing, oil, NGL and natural gas treatment by certain of its equity investees and other related parties. Berkshire Hathaway is a related party of Occidental due to its ownership of Occidental's common stock. Occidental has, from time to time, contracted with Berkshire Hathaway for the provision of electricity, rail and insurance. In addition, certain Berkshire Hathaway subsidiaries purchase various chemicals from our chemical segment. During 2022, 2021 and 2020, Occidental entered into the following related-party transactions and had the following amounts due from or to its related parties for the years ended December 31:

<i>millions</i>	2022	2021	2020
Sales ^(a)	\$ 337	\$ 261	\$ 301
Purchases ^(b)	\$ 948	\$ 773	\$ 1,112
Services ^(c)	\$ 1,006	\$ 942	\$ 1,101
Advances and amounts due from related parties	\$ 40	\$ 57	\$ 62
Amounts due to related parties	\$ 306	\$ 280	\$ 296

^(a) In 2022 and 2021 and 2020 sales of Occidental-produced oil and NGL to WES accounted for 42% and 58% and 70% of these totals, respectively.

^(b) In 2022 and 2021 and 2020, purchases of gas and NGL marketed on behalf of WES accounted for 24% and 27% and 59% of related party purchases, respectively, while purchases of ethylene from the OxyChem Ingleside Facility accounted for 64% and 70% in 2022 and 2021 respectively, and, in 2020, for 41% of related party purchases.

^(c) In 2022 and 2021 and 2020, services primarily related to fees charged by WES to gather, process and treat Occidental produced oil, NGL and natural gas. Excluded charges to WES for shared corporate services.

NOTE 5 - ACQUISITIONS, DIVESTITURES AND OTHER TRANSACTIONS

ACQUISITIONS, DIVESTITURES AND OTHER TRANSACTIONS

2022

Throughout 2022, Occidental entered into non-monetary exchange agreements, primarily in the Permian Basin. These exchanges were recorded as acquisitions and divestitures at a total combined fair value of \$340 million.

In 2022, Occidental acquired additional interests in emerging low-carbon businesses to advance net-zero pathway for a combined net purchase price of approximately \$350 million.

In November 2022 and December 2022, Occidental acquired additional primarily producing assets in the Permian Basin for a combined net purchase price of approximately \$400 million.

In November 2021, Occidental entered into an agreement to sell certain non-strategic assets in the Permian Basin. The transaction closed in January 2022 for net cash proceeds of approximately \$190 million. The difference in the proved assets' net book value and adjusted purchase price was treated as a normal retirement, which resulted in no gain or loss being recognized. The difference in the unproved assets' net book value and adjusted purchase price resulted in a gain on sale of approximately \$123 million. The gain has been presented within gains on sales of assets and equity investments, net in the Consolidated Statements of Operations.

In 2022, Occidental sold 14.0 million limited partner units of WES for proceeds of \$250 million, resulting in a gain of \$102 million, see [Note 4 - Investments and Related-Party Transactions](#).

2021

In November 2021, Occidental acquired additional working interests in certain assets in the Permian EOR business for a net purchase price of approximately \$285 million.

In October 2021, Occidental closed the sale of its Ghana assets. See below discussion on Discontinued Operations for additional information. This divestiture completed Occidental's large-scale asset divestiture program.

In June 2021, Occidental entered into an agreement to sell certain non-strategic assets in the Permian Basin. The transaction closed in July 2021 for net cash proceeds of approximately \$475 million. The difference in the assets' net book value and adjusted purchase price was treated as a recovery of cost and normal retirement, which resulted in no gain or loss being recognized.

In March 2021, Occidental completed the sale of certain non-operated assets in the DJ Basin for net cash proceeds of approximately \$280 million. The difference in the assets' net book value and adjusted purchase price was treated as a recovery of cost and normal retirement, which resulted in no gain or loss being recognized.

In 2021, Occidental sold 14 million limited partner units of WES for proceeds of approximately \$250 million, see [Note 4 - Investments and Related-Party Transactions](#).

2020

In November 2020 and December 2020, Occidental divested of certain non-core, largely non-operated proved and unproved acreage in the Permian for a loss of approximately \$820 million. The losses have been presented within gains (losses) on sale of assets, net in the Consolidated Statement of Operations.

In October 2020, Occidental entered into an agreement to sell its onshore oil and gas Colombia assets. The transaction closed in December 2020, and Occidental recorded a loss on sale of approximately \$353 million. The loss has been presented within gains (losses) on sale of assets, net in the Consolidated Statement of Operations.

In August 2020, Occidental entered into an agreement to sell approximately 4.5 million mineral acres and 1 million fee surface acres located in Wyoming, Colorado and Utah for approximately \$1.33 billion. The transaction closed in October 2020 for net cash proceeds of approximately \$1.0 billion, after satisfying \$329 million of liabilities associated with the sale of future royalties. Occidental recorded a loss on sale of \$440 million. The loss has been presented within gains (losses) on sale of assets, net in the Consolidated Statement of Operations.

DISCONTINUED OPERATIONS

In 2021, Occidental recorded a \$437 million after-tax loss contingency in discontinued operations associated with its former operations in Ecuador, see [Note 13 - Lawsuits, Claims, Commitments and Contingencies](#).

In October 2021, Occidental closed the sale of its Ghana assets for \$750 million and net proceeds of \$555 million, after closing adjustments to reflect an April 1, 2021 effective date. In addition, Occidental settled certain tax claims related to historical operations in Ghana for \$170 million. Prior to the sale, 2021 operations in Ghana resulted in an after-tax loss of \$31 million.

The following table presents the amounts reported in discontinued operations, net of income taxes, related to the Ghana assets for the years ended December 31, 2021 and 2020:

<i>millions</i>	2021	2020
Revenues and other income		
Net sales	\$ 458	\$ 419
Costs and other deductions		
Oil and gas lease operating expense	71	117
Fair value adjustment on assets held for sale ^(a)	409	2,263
Other	24	48
Total costs and other deductions	\$ 504	\$ 2,428
Income (loss) before income taxes	\$ (46)	\$ (2,009)
Income tax benefit (expense)	15	711
Discontinued operations, net of tax	\$ (31)	\$ (1,298)

^(a) For 2021, included effective date to close date adjustments as well as settlements of certain tax claims.

**NOTE 6 - LONG-TERM DEBT**

As of December 31, 2022 and 2021, Occidental's debt consisted of the following:

<i>millions</i>	2022	2021
2.600% senior notes due 2022	—	101

Long-term debt, net	\$ 19,670	\$ 29,431

^(a) The 8.750% senior notes due 2023 were repaid in January 2023.

DEBT MATURITIES

As of December 31, 2022, future principal payments on debt were less than \$18.0 billion, of which, \$22 million is due in 2023, \$1.1 billion is due in 2024, \$1.2 billion is due in 2025, \$1.4 billion is due in 2026, and \$14.2 billion is due in 2027 and thereafter.

ZERO COUPONS

The Zero Coupons have an aggregate principal amount due at the 2036 maturity of approximately \$673 million. The Zero Coupons can be put to Occidental in October of each year, in whole or in part, for the then-accreted value of the outstanding Zero Coupons. The Zero Coupons can next be put to Occidental in October 2023, which, if put in whole, would be \$344 million at such date. Occidental currently has the ability to meet this obligation and may use available capacity under the RCF to satisfy the put should it be exercised.

FAIR VALUE OF DEBT

Occidental estimates the fair value of fixed-rate debt based on the quoted market prices for those instruments or on quoted market yields for similarly rated debt instruments, taking into account such instruments' maturities. The estimated fair values of Occidental's debt as of December 31, 2022, and 2021, the majority of which were classified as Level 1, were approximately \$17.6 billion and \$31.1 billion, respectively. Occidental's exposure to changes in interest rates relates primarily to its variable-rate, long-term debt obligations, and is not material. As of December 31, 2022 and 2021, variable-rate debt constituted approximately 0.4% and 0.2% of Occidental's total debt, respectively.

DEBT RATINGS

As of December 31, 2022, Occidental's long-term debt was rated BB+ by Fitch Ratings, Ba1 by Moody's Investors Service and BB+ by Standard and Poor's. Any downgrade in credit ratings could impact Occidental's ability to access capital markets and increase its cost of capital. In addition, given that Occidental's current debt ratings are non-investment grade, Occidental may be requested, and in some cases required, to provide collateral in the form of cash, letters of credit, surety bonds or other acceptable support as financial assurance of its performance and payment obligations under certain contractual arrangements such as pipeline transportation contracts, environmental remediation obligations, oil and gas purchase contracts and certain derivative instruments.

As of the date of this filing, Occidental had provided required financial assurances through a combination of cash, letters of credit and surety bonds and had not issued any letters of credit under the RCF or other committed facilities. For additional information, see Risk Factors in Part I, Item 1A of this Form 10-K.

**DEBT ACTIVITY**

For the twelve months ended December 31, 2022, Occidental repaid debt with a face value of more than \$10.5 billion, reducing the face value of Occidental's debt to less than \$18.0 billion. The net book value of the full year repayments was \$9.8 billion, which resulted in a gain of \$149 million.

For the twelve months ended December 31, 2021, Occidental repaid debt with a face value of \$6.7 billion, reducing the face value of Occidental's debt to \$28.5 billion. The net book value of the full year repayments was \$6.8 billion which resulted in a loss of \$118 million.

DEBT ACTIVITY - 2022

The following table summarizes Occidental's debt activity for the year ended December 31, 2022:

REVOLVING CREDIT FACILITY

In December 2021, Occidental entered into the Second Amended and Restated Credit Agreement in which the total committed borrowing capacity of \$4.0 billion is based on a SOFR benchmark. The interest rate margin and the facility fee rates are subject to adjustments based on Occidental's performance on specified sustainability target thresholds with respect to absolute reductions in GHG emissions from its worldwide operated assets. The RCF maturity date is June 30, 2025.

Borrowings under the RCF bear interest at SOFR benchmark rates, plus a margin based on Occidental's senior debt ratings. The facility has similar terms to other debt agreements and does not contain material adverse change clauses or debt ratings triggers that could restrict Occidental's ability to borrow, or that would permit lenders to terminate their commitments or accelerate debt repayment. The facility provides for the termination of loan commitments and requires immediate repayment of any outstanding amounts if certain events of default occur. As of the date of this filing, Occidental had no drawn amounts under the RCF. In 2022, Occidental paid average annual facility fees of 0.302% on the total commitment amount.

RECEIVABLES SECURITIZATION FACILITY

In December 2021, Occidental amended and extended its existing receivables securitization facility to December 2024. As of December 31, 2022, the facility had \$400 million of available borrowing capacity and no drawn amounts. Subsequent to December 31, 2022, but before the date of this filing, Occidental amended the facility to expand its available borrowing capacity to \$600 million. The amended facility includes adjustments based on the same specified sustainability target thresholds as contained in the RCF.

**NOTE 7 - LEASE COMMITMENTS**

Occidental identifies leases through its accounts payable and contract monitoring processes. Lease assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. Lease assets include the lease liability, upfront payments and costs incurred to execute the lease and are amortized on a straight-line basis over the lease term. Occidental assesses the likelihood of exercising renewal, termination and purchase options to determine the lease term. Occidental uses its incremental borrowing rate at commencement date to determine the present value of lease payments. The incremental borrowing rate is the rate of interest that Occidental would pay to borrow an amount equal to the lease payments over a similar term on a collateralized basis in a similar economic environment. Certain leases include variable lease payments based on the underlying asset's operations that are not included in the lease asset and liability.

Occidental has operating leases for oil and gas exploration and development equipment, including office space of \$352 million, offshore and onshore drilling rigs of \$169 million, compressors of \$113 million and \$60 million consisting of storage facilities and other field equipment. Operating lease terms generally range from one to eight years. Operating leases also include pipelines, rail cars, easements, aircraft and real estate of \$236 million. These operating leases have contract expiration terms ranging from one to 10 years.

Occidental's finance leases include compressors of \$378 million, real estate offices of \$266 million and \$45 million consisting of drilling rigs, vehicles and aircraft leases.

The following table presents lease balances and their classification on the Consolidated Balance Sheets as of December 31:

<i>millions</i>	Balance sheet classification	2022	2021
Assets:			
Operating	Operating lease assets	\$ 903	\$ 726
Finance	Property, plant and equipment	686	581
Total lease assets		\$ 1,589	\$ 1,307
Liabilities:			
Current			
Operating	Current operating lease liabilities	\$ 273	\$ 186
Finance	Current maturities of long-term debt	143	85
Non-current			
Operating	Deferred credits and other liabilities - Operating lease liabilities	657	585
Finance	Long-term debt, net	546	504
Total lease liabilities		\$ 1,619	\$ 1,360

As of December 31, 2022, Occidental's outstanding lease payments, excluding variable component, consisted of the following:

<i>millions</i>	Operating Leases ^(a)	Finance Leases ^(b)	Total
2023	\$ 287	\$ 146	\$ 433
2024	226	109	335
2025	108	95	203
2026	89	84	173
2027	81	66	147
Thereafter	250	277	527
Total lease payments	1,041	777	1,818
Less: Interest	(111)	(88)	(199)
Total lease liabilities	\$ 930	\$ 689	\$ 1,619

^(a) The weighted-average remaining lease term is 5.4 years and the weighted-average discount rate is 3.84%.

^(b) The weighted-average remaining lease term is 7.7 years and the weighted-average discount rate is 3.05%.

The following tables present Occidental's total lease cost classifications for operating and finance lease liabilities for the years ended December 31:

<i>millions</i>			
Lease cost classification ^(a)		2022	2021
Operating lease costs ^(b)			
Property, plant and equipment, net	\$	246	\$ 222
Operating expense and cost of sales		234	487
Selling, general and administrative expenses		78	109
Finance lease cost			
Amortization of ROU assets		83	39
Interest on lease liabilities		20	13
Total lease cost	\$	661	\$ 870

^(a) Amounts reflected are gross before joint-interest recoveries. Lease payments are reduced by joint-interest recoveries on the income statement through the joint-interest billing process.

^(b) Included short-term lease cost of \$184 million and \$238 million and variable lease cost of \$101 million and \$120 million for the years ended December 31, 2022 and 2021, respectively.

The following tables present Occidental's total cash paid for operating and finance lease liabilities for the years ended December 31:

<i>millions</i>			
		2022	2021
Operating cash flows	\$	211	\$ 401
Investing cash flows	\$	81	\$ 73
Financing cash flows	\$	83	\$ 39

NOTE 8 - DERIVATIVES

OBJECTIVE AND STRATEGY

Occidental uses a variety of derivative financial instruments and physical contracts to manage its exposure to commodity price fluctuations, transportation commitments and to fix margins on the future sale of stored commodity volumes. Occidental also enters into derivative financial instruments for trading purposes. Derivatives are carried at fair value and on a net basis when a legal right of offset exists with the same counterparty.

Occidental may elect normal purchases and normal sales exclusions when physically delivered commodities are purchased or sold to a customer. Occidental occasionally applies cash flow hedge accounting treatment to derivative financial instruments to lock in margins on the forecasted sales of its natural gas storage volumes. The value of cash flow hedges was insignificant for all periods presented. See [Note 1 - Summary of Significant Accounting Policies](#) for Occidental's accounting policy on derivatives.

DERIVATIVES NOT DESIGNATED AS HEDGING INSTRUMENTS

As of December 31, 2022, Occidental's derivatives not designated as hedges consisted of marketing derivatives. All interest rate swaps were settled prior to December 31, 2022.

Derivative instruments that are not designated as hedging instruments are required to be recorded on the balance sheet at fair value. Changes in fair value will impact Occidental's earnings through mark-to-market adjustments until the physical commodity is delivered or the financial instrument is settled.

MARKETING DERIVATIVES

Occidental's marketing derivative instruments not designated as hedges are short-duration physical and financial forward contracts. A substantial majority of Occidental's physically settled derivative contracts are index-based and carry no mark-to-market valuation in earnings. As of December 31, 2022, the weighted-average settlement price of these forward contracts was \$81.37/Bbl and \$7.89/Mcf for crude oil and natural gas, respectively. The weighted-average settlement price was \$74.85/Bbl and \$4.61/Mcf for crude oil and natural gas, respectively, as of December 31, 2021. Net gains and losses associated with marketing derivative instruments not designated as hedging instruments are recognized currently in net sales.

The following table summarizes net short volumes associated with the outstanding marketing commodity derivatives not designated as hedging instruments as of December 31:

	2022	2021
Oil commodity contracts		
Volume (MMbbl)	(33)	(28)
Natural gas commodity contracts		
Volume (Bcf)	(112)	(136)

INTEREST RATE SWAPS

Occidental retired all remaining outstanding interest rate swaps in the twelve months ended December 31, 2022. Occidental's interest rate swap contracts locked in a fixed interest rate in exchange for a floating interest rate indexed to the three-month LIBOR throughout the reference period. Net gains and losses associated with interest rate swaps and warrants, were recognized currently in gains (losses) on interest rate swaps, net in the Consolidated Statements of Operations.

Interest rate swaps and collateralization are classified as cash flows from financing activities. For the twelve months ended December 31, 2022, the interest rate swaps were terminated through the application of \$144 million of collateral and cash payments of \$255 million. Prior to termination, Occidental paid \$35 million of periodic settlements and \$179 million of collateral was returned.

FAIR VALUE OF DERIVATIVES

Occidental has categorized its assets and liabilities that are measured at fair value in a three-level fair value hierarchy, based on the inputs to the valuation techniques: Level 1 – using quoted prices in active markets for the assets or liabilities; Level 2 – using observable inputs other than quoted prices for the assets or liabilities; and Level 3 – using unobservable inputs. Transfers between levels, if any, are reported at the end of each reporting period. The following table presents the fair values of Occidental's outstanding derivatives. Fair values are presented at gross amounts below, including when derivatives are subject to netting arrangements, and are presented on a net basis in the Consolidated Balance Sheets.

<i>millions</i>	Fair Value Measurements Using				Netting ^(a)	Total Fair Value
Balance Sheet Classification	Level 1	Level 2	Level 3			
December 31, 2022						
Marketing Derivatives						
Other current assets	\$ 920	\$ 127	\$ —	\$ (980)	\$ 67	
Long-term receivables and other assets, net	1	2	—	(1)	2	
Accrued liabilities	(938)	(96)	—	980	(54)	
Deferred credits and other liabilities - other	(1)	(1)	—	2	—	
December 31, 2021						
Marketing Derivatives						
Other current assets	\$ 1,516	\$ 173	\$ —	\$ (1,645)	\$ 44	
Long-term receivables and other assets, net	4	1	—	(4)	1	
Accrued liabilities	(1,608)	(196)	—	1,645	(159)	
Deferred credits and other liabilities - other	(4)	—	—	4	—	
Interest Rate Swaps						
Accrued liabilities	—	(315)	—	—	(315)	
Deferred credits and other liabilities - other	—	(436)	—	—	(436)	

^(a) These amounts do not include collateral. As of December 31, 2021, \$323 million of collateral related to interest rate swaps had been netted against derivative liabilities. Occidental netted \$15 million and \$110 million of collateral deposited with brokers against derivative liabilities related to marketing derivatives as of December 31, 2022, and December 31, 2021, respectively.

GAINS AND LOSSES ON DERIVATIVES

The following table presents gains and (losses) related to Occidental's derivative instruments in the Consolidated Statements of Operations for the years ended December 31:

<i>millions</i>		2022	2021	2020
Income Statement Classification				
Collars and Calls ^(a)				
Net sales		\$ —	\$ (344)	\$ 1,064
Marketing Derivatives				
Net sales ^(b)		381	338	(393)
Interest Rate Swaps				
Gains (losses) on interest rate swaps and warrants, net		317	122	(428)

^(a) All of Occidental's collars and calls expired on or before December 31, 2021.

^(b) Includes derivative and non-derivative marketing activity.

CREDIT RISK

The majority of Occidental's counterparty credit risk is related to the physical delivery of energy commodities to its customers and their inability to meet their settlement commitments. Occidental manages credit risk by selecting counterparties that it believes to be financially strong, by entering into netting arrangements with counterparties and by requiring collateral or other credit risk mitigants, as appropriate. Occidental actively evaluates the creditworthiness of its counterparties, assigns appropriate credit limits and monitors credit exposures against those assigned limits. Occidental also enters into futures contracts through regulated exchanges with select clearinghouses and brokers, which are subject to minimal credit risk, if any.

Certain of Occidental's OTC derivative instruments contain credit-risk-contingent features, primarily tied to credit ratings for Occidental or its counterparties, which may affect the amount of collateral that each party would need to post. The aggregate fair value of derivative instruments with credit-risk-contingent features for which a net liability position existed as of December 31, 2022 was \$18 million. The aggregate fair value of derivative instruments with credit-risk-contingent features for which a net liability position existed as of December 31, 2021 was \$107 million (net of \$323 million of collateral), which was primarily related to interest rate swaps.

NOTE 9 - FAIR VALUE MEASUREMENTS

FAIR VALUES – NONRECURRING

There were no significant non-recurring fair value measurements during the year ended December 31, 2022.

For the year ended December 31, 2021, Occidental recorded pre-tax impairments of \$276 million related to undeveloped leases that either expired or were set to expire in the near-term, where Occidental had no plans to pursue exploration activities.

The table below summarizes the significant impairments and other charges incurred to measure assets to their fair value on a nonrecurring basis throughout the year ended December 31, 2020:

<i>millions</i>		Total Fair Value
Asset impairments and other charges		
Goodwill	\$	1,153
Oil and gas properties - proved	\$	2,436
Oil and gas properties - unproved	\$	4,591
Oil and gas properties - discontinued operations	\$	2,191
WES equity investment	\$	2,673

GOODWILL

In the first quarter of 2020, Occidental impaired \$1.2 billion in goodwill related to Occidental's ownership in WES, which was previously included in long-term receivables and other assets, net. The market value of WES' publicly traded units is considered a Level 1 input.

OIL AND GAS PROPERTIES

In the second quarter of 2020, as a result of the expected prolonged period of lower commodity prices brought on by the COVID-19 pandemic's impact on oil demand, Occidental tested substantially all of its oil and gas assets for impairment. Occidental recognized total pre-tax impairments to its oil and gas proved and unproved properties of \$8.6 billion, of which \$6.4 billion was included in oil and gas segment results and \$2.2 billion (\$1.4 billion net of tax) related to Ghana was included in discontinued operations.

In the second quarter of 2020, Occidental recorded proved property pre-tax impairments of \$1.2 billion primarily related to certain assets for its domestic onshore and Gulf of Mexico assets and \$0.9 billion to adjust the Algeria oil and gas proved properties to their fair value. The fair value of the proved properties was measured based on the income approach.

Unproved property pre-tax impairments of \$4.3 billion were primarily related to domestic onshore unproved acreage. The fair value of this acreage was measured based on a market approach using an implied acreage valuation derived from domestic onshore market participants excluding the fair value assigned to proved properties.

Income approaches are considered Level 3 fair value estimates and include significant assumptions of future production and timing of production, commodity price assumptions and operating and capital cost estimates, discounted using a 10 percent weighted average cost of capital. Taxes were based on current statutory rates. Future production and timing of production is based on internal reserves estimates and internal economic models for a specific oil and gas asset. Internal reserve estimates consist of proved reserves and unproved reserves, the latter adjusted for uncertainty based on reserve category. Price assumptions were based on a combination of market information and published industry resources adjusted for historical differentials. Price assumptions ranged from approximately \$40 per barrel of oil in 2020 increasing to approximately \$70 per barrel of oil in 2034, with an unweighted arithmetic average price of \$59.17 and \$62.42 for WTI and Brent indexed assets for the 15 year period, respectively. Natural gas prices ranged from approximately \$2.00 per Mcf in 2020 to approximately \$3.60 per Mcf in 2034, with an unweighted arithmetic average price of \$3.13 for NYMEX based assets for the 15 year period. Both oil and natural gas commodity prices were held flat after 2034 and were adjusted for location and quality differentials. Operating and capital cost estimates were based on current observable costs and were further escalated 1 percent in every period where commodity prices exceeded \$50 per barrel and 2 percent in every period where commodity prices exceeded \$60 per barrel. The weighted average cost of capital is calculated based on industry peers and best approximates the cost of capital an external market participant would expect to obtain.

In the first quarter of 2020, Occidental's oil and gas segment recognized pre-tax impairment and related charges of \$581 million primarily related to both proved and unproved oil and gas properties and a lower of cost or net realizable value adjustment for crude inventory. Occidental recorded proved property impairments of \$293 million related to certain international assets and the Gulf of Mexico. Occidental recorded unproved property impairments, of approximately \$241 million, primarily related to domestic onshore undeveloped leases and offshore Gulf of Mexico where Occidental no

longer intends to pursue exploration, appraisal or development activities primarily due to the reduction in near-term capital plans.

If there is an adverse downturn of the macroeconomic conditions and if such downturn is expected to or does persist for a prolonged period of time, Occidental's oil and gas properties may be subject to further testing for impairment, which could result in additional non-cash asset impairments. Such impairments could be material to the financial statements.

WES EQUITY INVESTMENT

At the end of the third quarter of 2020, Occidental recorded an other-than-temporary impairment of \$2.7 billion, as the fair value of Occidental's investment in WES had remained significantly lower than its book value for the majority of the nine months ended September 30, 2020. Occidental concluded that the difference between the fair value and book value of WES was not temporary, primarily given both the magnitude and the duration that the fair value was below its book value. This other-than-temporary impairment was calculated based on the closing market price of WES as of September 30, 2020. The market value of WES' publicly traded common units is considered a Level 1 input.

FINANCIAL INSTRUMENTS FAIR VALUE

The carrying amounts of cash, cash equivalents, restricted cash, restricted cash equivalents and other on-balance sheet financial instruments, other than fixed-rate debt, approximate fair value. See [Note 6 - Long-Term Debt](#) for the fair value of long-term debt.

NOTE 10 - INCOME TAXES

LEGAL ENTITY REORGANIZATION

To align Occidental's legal entity structure with the nature of its business activities after completing the acquisition of Anadarko and subsequent large scale post-acquisition divestiture program, management undertook a legal entity reorganization that was completed in the first quarter of 2022.

As a result of this legal entity reorganization, management made an adjustment to the tax basis in a portion of its operating assets, thus reducing Occidental's deferred tax liabilities. Accordingly, in 2022, Occidental recorded a tax benefit of \$2.7 billion in connection with this reorganization. The timing of any reduction in Occidental's future cash taxes as a result of this legal entity reorganization will be dependent on a number of factors, including prevailing commodity prices, capital activity level and production mix. The legal entity reorganization transaction is currently under IRS review as part of the Company's 2022 federal tax audit.

INFLATION REDUCTION ACT

In August 2022, Congress passed the Inflation Reduction Act that contains, among other provisions, a corporate book minimum tax on financial statement income, an excise tax on stock buybacks, a methane emissions fee and certain tax incentives related to climate change and clean energy. Occidental is currently evaluating the provisions of this act. The ultimate impact of the Inflation Reduction Act to Occidental will depend on a number of factors including future commodity prices, interpretations and assumptions as well as additional regulatory guidance.

The following summarizes domestic and foreign components of income (loss) from continuing operations before domestic and foreign income taxes for the years ended December 31:

<i>millions</i>	2022	2021	2020
Domestic	\$ 11,314	\$ 1,966	\$ (15,322)
Foreign	2,803	1,739	(383)
Total	\$ 14,117	\$ 3,705	\$ (15,705)

The following summarizes components of income tax expense (benefit) on continuing operations for the years ended December 31:

<i>millions</i>	2022	2021	2020
Current			
Federal	\$ 1,272	\$ 173	\$ (126)
State and local	105	36	6
Foreign	1,080	660	465
Total current tax expense	\$ 2,457	\$ 869	\$ 345
Deferred			
Federal	(1,569)	191	(2,384)
State and local	(57)	(153)	(103)
Foreign	(18)	8	(30)
Total deferred tax expense (benefit)	\$ (1,644)	\$ 46	\$ (2,517)
Total income tax expense (benefit)	\$ 813	\$ 915	\$ (2,172)

The following reconciliation of the U.S federal statutory income tax rate to Occidental's worldwide effective tax rate on income from continuing operations for the years ended December 31 is stated as a percentage of income (loss) from continuing operations before income taxes:

	2022	2021	2020
U.S. federal statutory tax rate	21 %	21 %	21 %
Legal entity reorganization	(18)	—	—
Enhanced oil recovery credit and other general business credits	—	(3)	—
Goodwill impairment	—	—	(3)
Capital loss	—	(2)	—
Tax impact from foreign operations	3	8	(4)
State income taxes, net of federal benefit	—	(2)	—
Other	—	3	—
Worldwide effective tax rate	6 %	25 %	14 %

In 2022, Occidental's worldwide effective tax rate was 6%, which was lower than the U.S. statutory rate of 21% and primarily driven by a tax benefit associated with Occidental's legal entity reorganization, as described above, partially offset by higher tax rates in the foreign jurisdictions in which Occidental operates.

In 2021, Occidental's worldwide effective tax rate was 25%, which was higher than the U.S. statutory rate of 21% due to higher tax rates in the foreign jurisdictions in which Occidental operates, partially offset by the tax impact of business credits, state tax revaluations and other domestic tax benefits.

The tax effects of temporary differences resulting in deferred income taxes as of December 31:

<i>millions</i>	2022	2021
Deferred tax liabilities		
Property, plant and equipment differences	\$ (7,218)	\$ (9,905)
Equity investments, partnerships and international subsidiaries	(441)	(571)
Gross long-term deferred tax liabilities	(7,659)	(10,476)
Deferred tax assets		
Environmental reserves	229	242
Postretirement benefit accruals	235	285
Deferred compensation and benefits	207	286
Asset retirement obligations	799	850
Foreign tax credit carryforwards	3,622	3,904
General business credit carryforwards	30	698
Net operating loss carryforward	1,058	1,628
Interest expense carryforward	11	28
All other	771	689
Gross long-term deferred tax assets	6,962	8,610
Valuation allowance	(4,785)	(5,136)
Net long-term deferred tax assets	\$ 2,177	\$ 3,474
Total deferred income tax liability, net	\$ (5,482)	\$ (7,002)
Less: foreign deferred tax asset in long-term receivables and other assets, net	(30)	(37)
Total deferred income tax liability, gross	\$ (5,512)	\$ (7,039)

Total deferred tax assets, after valuation allowances, were \$2.2 billion and \$3.5 billion as of December 31, 2022 and 2021, respectively. Occidental expects to realize the recorded deferred tax assets, net of any allowances, through future operating income and reversal of temporary differences. The total deferred tax liabilities were \$7.7 billion and \$10.5 billion as of December 31, 2022 and 2021, respectively. The decrease in the net deferred tax liability in 2022 compared to 2021 was primarily driven by a tax benefit associated with Occidental's legal entity reorganization, as described above, partially offset by the utilization of net operating losses and other tax attributes.

As of December 31, 2022, Occidental had foreign tax credit carryforwards of \$3.6 billion and state tax credit carryforwards of \$30 million. Occidental had recorded a valuation allowance for \$3.6 billion of the foreign tax credit carryforwards and \$27 million of the state tax credit carryforwards.

As of December 31, 2022, Occidental had tax-effected federal net operating loss carryforwards of \$3 million, foreign net operating loss carryforwards of \$841 million and state net operating loss carryforwards of \$214 million. The carryforward balances have varying carryforward periods through 2042, excluding certain attributes for which there is an indefinite carryforward period. A valuation allowance was recorded for \$184 million of the tax-effected state net operating loss carryforwards and \$801 million of the tax-effected foreign net operating loss carryforwards. Occidental had an additional valuation allowance of \$145 million against other foreign deferred tax assets.

Occidental had no tax-effected federal interest expense carryforward and tax-effected state interest expense carryforward of \$11 million as of December 31, 2022. Occidental recorded a valuation allowance for \$9 million of the state interest expense carryforward.

A deferred tax liability had not been recognized for temporary differences related to unremitted earnings of certain consolidated international subsidiaries aggregating approximately \$924 million as of December 31, 2022, as it is Occidental's intention to reinvest such earnings indefinitely. If the earnings of these international subsidiaries were not indefinitely reinvested, an additional deferred tax liability of approximately \$221 million would be required.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

<i>millions</i>	2022	2021	2020
Balance as of January 1	\$ 2,026	\$ 2,045	\$ 2,173
Increases related to prior-year positions	2	75	14
Settlements	—	(80)	(42)
Reductions for tax positions of prior years	(18)	(14)	(100)
Balance as of December 31	\$ 2,010	\$ 2,026	\$ 2,045

The December 31, 2022 balance of unrecognized tax benefits of \$2.0 billion included potential benefits of \$2.0 billion of which, if recognized, \$1.5 billion would affect the effective tax rate on income. Also included were benefits of \$45 million related to tax positions for which the ultimate deductibility is highly certain, but the timing of such deductibility is uncertain. Unrecognized tax benefits are included in deferred credits and other liabilities - other. Occidental records estimated potential interest and penalties related to liabilities for unrecognized tax benefits in the provisions for domestic and foreign income taxes. During 2022, Occidental recorded interest related to liabilities for unrecognized tax benefits of \$95 million, for a cumulative accrued interest related to liabilities for unrecognized tax benefits of \$416 million as of December 31, 2022. There were no penalties associated with liabilities for unrecognized tax benefits recorded for the years ended December 31, 2022 and 2021. Over the next 12 months, it is reasonably possible that the total amount of unrecognized tax benefits could decrease by \$50 million to \$60 million due to settlements with taxing authorities or lapses in statutes of limitation.

Occidental recognized \$280 million and \$105 million in federal and state income tax receivables as of December 31, 2022 and 2021, respectively, which was recorded in other current assets. In addition, Occidental recognized \$33 million associated with the December 31, 2021 audit, which was recorded in long-term receivables and other assets, net.

Occidental is subject to audit by various tax authorities in varying periods. See [Note 13 - Lawsuits, Claims, Commitments and Contingencies](#) for a discussion of these matters.

NOTE 11 - RETIREMENT AND POSTRETIREMENT BENEFIT PLANS

Occidental has various defined contribution and defined benefit plans for its salaried, domestic union and nonunion hourly and certain foreign national employees. In addition, Occidental also provides medical and other benefits for certain active, retired and disabled employees and their eligible dependents.

In 2021, Occidental settled a significant portion of retiree liability through an annuity purchase. This annuity purchase applied to participants in certain defined benefit plans. The impact of this settlement transaction was approximately \$109 million and is reflected in the December 31, 2021 projected benefit obligation.

DEFINED CONTRIBUTION PLANS

All domestic employees and certain foreign national employees are eligible to participate in one or more of the defined contribution retirement or savings plans that provide for periodic contributions by Occidental based on plan-specific criteria, such as base pay, level and employee contributions. Certain salaried employees participate in a supplemental retirement plan that restores benefits lost due to governmental limitations on qualified retirement benefits. The accrued liabilities for the supplemental retirement plan were \$288 million and \$249 million as of December 31, 2022 and 2021, respectively. Occidental expensed \$202 million in 2022, \$166 million in 2021 and \$192 million in 2020 under the provisions of these defined contribution and supplemental retirement plans.

DEFINED BENEFIT PLANS

Participation in defined benefit plans is limited. Approximately 400 domestic and 300 foreign national employees, mainly union, nonunion hourly and certain employees that joined Occidental from acquired operations with grandfathered benefits, are currently accruing benefits under these plans.

Pension costs for Occidental's defined benefit pension plans, determined by independent actuarial valuations, are generally funded by payments to trust funds, which are administered by independent trustees.

POSTRETIREMENT AND OTHER BENEFIT PLANS

Occidental provides medical and dental benefits and life insurance coverage for certain active, retired and disabled employees and their eligible dependents. Occidental generally funds the benefits as they are paid during the year. These benefit costs, including the postretirement costs for the years ended December 31, were \$211 million in 2022, \$211 million in 2021 and \$235 million in 2020.

**OBLIGATIONS AND FUNDED STATUS**

The following tables show the amounts recognized in Occidental's Consolidated Balance Sheets related to its pension and postretirement benefit plans as of December 31:

<i>millions</i>	Pension Benefits		Postretirement Benefits	
	2022	2021	2022	2021
Amounts recognized in the Consolidated Balance Sheet:				
Long-term receivables and other assets, net	\$ 102	\$ 192	\$ —	\$ —
Accrued liabilities	(3)	(4)	(62)	(71)
Deferred credits and other liabilities — pension and postretirement obligations	(344)	(391)	(711)	(1,149)
	\$ (245)	\$ (203)	\$ (773)	\$ (1,220)
Accumulated other comprehensive loss included the following after-tax balances:				
Net (gain) loss	\$ 17	\$ (17)	\$ (190)	\$ 163
Prior service credit	—	—	(52)	(50)
	\$ 17	\$ (17)	\$ (242)	\$ 113

The following tables show the funding status, obligations and plan asset fair values of Occidental related to its pension and postretirement benefit plans for the years ended December 31:

<i>millions</i>	Pension Benefits		Postretirement Benefits	
	2022	2021	2022	2021
Changes in the benefit obligation:				
Benefit obligation — beginning of year	\$ 1,273	\$ 1,613	\$ 1,220	\$ 1,259
Service cost — benefits earned during the period	7	8	38	42
Interest cost on projected benefit obligation	36	35	33	33
Actuarial gain	(297)	(55)	(468)	(54)
Benefits paid	(123)	(219)	(58)	(67)
Settlement due to annuity purchase	—	(109)	—	—
Other	(10)	—	8	7
Benefit obligation — end of year	\$ 886	\$ 1,273	\$ 773	\$ 1,220
Changes in plan assets:				
Fair value of plan assets — beginning of year	\$ 1,070	\$ 1,193	\$ —	\$ —
Actual return on plan assets	(304)	44	—	—
Employer contributions	16	162	49	59
Benefits paid	(123)	(219)	(57)	(67)
Payments due to annuity purchase	—	(109)	—	—
Other	(18)	(1)	8	8
Fair value of plan assets — end of year	\$ 641	\$ 1,070	\$ —	\$ —
Unfunded status:	\$ (245)	\$ (203)	\$ (773)	\$ (1,220)

Changes in actuarial gains and losses in the projected benefit obligation are primarily driven by discount rate movement.

The following table sets forth details of the obligations and assets of Occidental's defined benefit pension plans for the years ended December 31:

<i>millions</i>	Accumulated Benefit Obligation in Excess of Plan Assets		Plan Assets in Excess of Accumulated Benefit Obligation	
	2022	2021	2022	2021
Projected benefit obligation	\$ 738	\$ 963	\$ 148	\$ 310
Accumulated benefit obligation	\$ 736	\$ 960	\$ 146	\$ 308
Fair value of plan assets	\$ 458	\$ 656	\$ 183	\$ 414

COMPONENTS OF NET PERIODIC BENEFIT COST

The following table sets forth the components of net periodic benefit costs for the years ended December 31:

<i>millions</i>	Pension Benefits			Postretirement Benefits		
	2022	2021	2020	2022	2021	2020
Net periodic benefit costs:						
Service cost — benefits earned during the period	\$ 7	\$ 8	\$ 37	\$ 38	\$ 42	\$ 39
Interest cost on projected benefit obligation	36	35	52	33	33	37
Expected return on plan assets	(38)	(59)	(73)	—	—	—
Recognized actuarial loss	1	2	5	5	15	11
Recognized prior service credit	—	—	—	(9)	(9)	(8)
(Gain) loss due to curtailment	—	—	(124)	—	—	2
Gain due to settlement	(1)	(19)	(19)	—	—	—
Special termination benefits	—	—	22	—	—	—
Other costs and adjustments	—	—	1	—	—	—
Net periodic benefit cost	\$ 5	\$ (33)	\$ (99)	\$ 67	\$ 81	\$ 81

The service cost component of net periodic benefit cost is included in selling, general and administrative, oil and gas operating expense, chemical and midstream costs and exploration expense on Occidental's Consolidated Statements of Operations. All other components of net periodic benefit cost are included in other operating and non-operating expense.

ADDITIONAL INFORMATION

The following table sets forth the weighted-average assumptions used to determine Occidental's benefit obligation and net periodic benefit cost for domestic plans for the years ended December 31:

	Pension Benefits		Postretirement Benefits	
	2022	2021	2022	2021
Benefit Obligation Assumptions:				
Discount rate	5.27 %	2.67 %	5.43 %	2.94 %
Rate of increase in compensation levels	3.95 %	3.98 %	—	—
Net Periodic Benefit Cost Assumptions:				
Discount rate	2.65 %	2.19 %	2.94 %	3.05 %
Rate of increase in compensation levels	3.98 %	5.07 %	—	—
Assumed long-term rate of return on assets	4.36 %	4.92 %	—	—

For domestic pension plans and postretirement benefit plans, Occidental based the discount rate on a AA-AAA Universe yield curve in 2022 and 2021. The assumed long-term rate of return on assets is estimated with regard to current market factors but within the context of historical returns for the asset mix that exists at year end. Assumed rates of compensation increases for active participants in certain plans and vary by age group.

In 2021, Occidental adopted the Society of Actuaries Pri-2012 Private Retirement Plans Mortality Tables with MP-2021 Mortality Improvement Scale, which updated the mortality assumptions that private defined-benefit plans in the United States use in the actuarial valuations that determine a plan sponsor's pension obligations. The new mortality assumption reflects additional data that the Social Security Administration has released since the previous mortality tables and improvement scales were released.

The postretirement benefit obligation was determined by application of the terms of medical and dental benefits and life insurance coverage, including the effect of established maximums on covered costs, together with relevant actuarial assumptions and health care cost trend rates. Health care cost trend rates for medicare advantaged prescription drug plans of 9.2% starting in 2022, then grading down to 4.5% in 2028 and beyond. Health care cost trend rates used for non-medicare advantaged prescription drug plans are 6.0% to 6.5% in 2022, then grading down to 4.5% in 2028 and beyond.

The actuarial assumptions used could change in the near-term as a result of changes in expected future trends and other factors that, depending on the nature of the changes, could cause increases or decreases in the plan assets and liabilities.

FAIR VALUE OF PENSION PLAN ASSETS

Qualified defined benefit plan assets are monitored by Occidental's Pension and Retirement Trust and Investment Committee in its role as a fiduciary. The Investment Committee selects and employs various external professional investment management firms to manage specific investments across the spectrum of asset classes. The Investment Committee employs a liability driven investment approach that uses a diversified blend of investments (equity securities, fixed-income securities, and alternative investments) along a glide path to optimize the long-term return of plan assets relative to plan liabilities, at a prudent level of risk. Equity investments are diversified across U.S. and non-U.S. stocks, as well as differing styles and market capitalizations. Investment performance is measured and monitored on an ongoing basis through quarterly investment portfolio and manager guideline compliance reviews, annual liability measurements and periodic studies.

The fair values of Occidental's pension plan assets by asset category were as follows:

<i>millions</i>	Level 1	Level 2	Level 3	Total
December 31, 2022				
Asset Class:				
Cash and cash equivalents	\$ 8	\$ —	\$ —	\$ 8
Government securities	29	—	—	29
Corporate bonds ^(a)	—	16	—	16
Equity securities ^(b)	34	—	—	34
Other	—	46	—	46
Investments measured at fair value	\$ 71	\$ 62	\$ —	\$ 133
Investments measured at net asset value ^(c)	—	—	—	509
Total pension plan assets ^(d)	\$ 71	\$ 62	\$ —	\$ 642
December 31, 2021				
Asset Class:				
Cash and cash equivalents	\$ 19	\$ —	\$ —	\$ 19
Government securities	63	—	—	63
Corporate bonds ^(a)	—	36	—	36
Equity securities ^(b)	46	—	—	46
Other	—	76	—	76
Investments measured at fair value	\$ 128	\$ 112	\$ —	\$ 240
Investments measured at net asset value ^(c)	—	—	—	836
Total pension plan assets ^(d)	\$ 128	\$ 112	\$ —	\$ 1,076

^(a) This category represents investment grade bonds of U.S. and non-U.S. issuers from diverse industries.

^(b) This category represents direct investments in mutual funds and common and preferred stocks from diverse U.S. and non-U.S. industries.

^(c) Certain investments measured at fair value using the NAV per share (or its equivalent) have not been categorized in the fair value hierarchy. Amounts presented in this table are intended to reconcile the fair value hierarchy to the pension plan assets.

^(d) Amounts exclude net payables of approximately \$1 million as of December 31, 2022 and \$6 million as of December 31, 2021.

Occidental expects to contribute approximately \$100 million to its defined benefit pensions plans during 2023.

Estimated future benefit payments, which reflect expected future service, as appropriate, are as follows for the years ended December 31:

<i>millions</i>	Pension Benefits	Postretirement Benefits
2023	\$ 75	\$ 64
2024	78	62
2025	70	59
2026	67	57
2027	68	55
2028 - 2032	303	261

NOTE 12 - ENVIRONMENTAL LIABILITIES AND EXPENDITURES

Occidental and its subsidiaries and their respective operations are subject to stringent federal, state, local and international laws and regulations related to improving or maintaining environmental quality. The laws that require or address environmental remediation, including CERCLA and similar federal, state, local and international laws, may apply retroactively and regardless of fault, the legality of the original activities or the current ownership or control of sites. Occidental or certain of its subsidiaries participate in or actively monitor a range of remedial activities and government or private proceedings under these laws with respect to alleged past practices at Third-Party, Currently Operated, and Closed or Non-operated Sites. Remedial activities may include one or more of the following: investigation involving sampling, modeling, risk assessment or monitoring; clean-up measures including removal, treatment or disposal; or operation and maintenance of remedial systems. The environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, natural resource damages, punitive damages, civil penalties, injunctive relief and government oversight costs.

ENVIRONMENTAL REMEDIATION

As of December 31, 2022, certain Occidental subsidiaries participated in or monitored remedial activities or proceedings at 162 sites. The following table presents the current and non-current environmental remediation liabilities of such subsidiaries on a consolidated basis as of December 31, 2022 and 2021, the current portion of which is included in accrued liabilities (\$141 million in 2022 and \$155 million in 2021) and the remainder in deferred credits and other liabilities - environmental remediation liabilities (\$0.9 billion in 2022 and \$0.9 billion in 2021).

These environmental remediation sites are grouped into NPL sites and the following three categories of non-NPL sites — Third-Party Sites, Currently Operated Sites and Closed or Non-operated Sites.

<i>millions, except number of sites</i>	2022		2021	
	Number of Sites	Remediation Balance	Number of Sites	Remediation Balance
NPL sites	30	\$ 445	30	\$ 427
Third-Party Sites	68	238	69	273
Currently Operated Sites	13	106	15	122
Closed or Non-operated Sites	51	257	51	277
Total	162	\$ 1,046	165	\$ 1,099

As of December 31, 2022, environmental remediation liabilities of Occidental subsidiaries exceeded \$10 million each at 17 of the 162 sites described above, and 94 of the sites had liabilities from \$0 to \$1 million each.

The Diamond Alkali Superfund Site (DASS) in Newark, New Jersey accounted for a significant portion of the liabilities associated with the category of NPL sites.

Five of the 68 Third-Party Sites — a chrome site in New Jersey, a former copper mining and smelting operation in Tennessee, a former oil field and a landfill in California and an active refinery in Louisiana where Occidental reimburses the current owner for certain remediation activities — accounted for nearly two-thirds of the liabilities associated with this category.

Three Currently Operated Sites — oil and gas operations in Colorado and chemical plants in Kansas and Louisiana — accounted for approximately two-thirds of the liabilities associated with this category.

Eight Closed or Non-operated Sites — a landfill in Western New York, a former refinery in Oklahoma, former chemical plants in California, Michigan, Ohio, Tennessee and Washington, and a closed coal mine in Pennsylvania — accounted for more than two-thirds of the liabilities associated with this category.

The consolidated estimate of environmental remediation liabilities in the table above varies over time depending on factors such as acquisitions or divestitures, identification of additional sites, remedy selection and implementation and changes in applicable laws or regulations, among other factors. Occidental's subsidiaries recorded environmental remediation expenses of \$65 million, \$28 million and \$36 million for the years ended December 31, 2022, 2021, and 2020, respectively, on a consolidated basis. Environmental remediation expenses primarily relate to changes to existing conditions from past operations. Based on current estimates, Occidental expects its subsidiaries to expend funds corresponding to approximately 40% of the year-end remediation balance over the next three to four years with the remainder over the subsequent 10 or more years.

Occidental believes its range of reasonably possible additional losses of its subsidiaries beyond those amounts currently recorded for environmental remediation for the 162 environmental sites in the table above could be up to \$2.7 billion.

MAXUS ENVIRONMENTAL SITES

A significant portion of aggregate estimates of environmental remediation liabilities and reasonably possible additional losses described above relates to the former Diamond Alkali Chemicals Company (DSCC). When OxyChem acquired DSCC in 1986, Maxus agreed to indemnify OxyChem for a number of environmental sites, including the DASS. In June 2016, Maxus and several affiliated companies filed for Chapter 11 bankruptcy in the U.S. Bankruptcy Court for the District of Delaware. Prior to filing for bankruptcy, Maxus defended and indemnified OxyChem in connection with remediation costs and other liabilities associated with the sites subject to the indemnity. Any additional recovery of indemnified costs would come from the proceeds of litigation brought by the Maxus Liquidating Trust. For additional information on the Maxus Liquidating Trust, see [Note 13 - Lawsuits, Claims, Commitments and Contingencies](#).

DIAMOND ALKALI SUPERFUND SITE

The EPA has organized the DASS into four Operable Units (OUs) for evaluating, selecting and implementing remediation under CERCLA. OxyChem's current activities in each OU are summarized below, many of which are performed on OxyChem's behalf by Glenn Springs Holdings, Inc.

OU1 – The Former Diamond Alkali Plant at 80-120 Lister Avenue in Newark: Maxus and its affiliates implemented an interim remedy of OU1 pursuant to a 1990 Consent Decree, for which OxyChem currently performs maintenance and monitoring. The EPA is conducting a periodic evaluation of the interim remedy for OU1.

OU2 – The Lower 8.3 Miles of the Lower Passaic River: In March 2016, the EPA issued a Record of Decision (ROD) specifying remedial actions required for OU2. During the third quarter of 2016, and following Maxus's bankruptcy filing, OxyChem and the EPA entered into an Administrative Order on Consent (AOC) to complete the design of the remedy selected in the ROD. At that time, the EPA sent notice letters to approximately 100 parties notifying them that they were potentially responsible to pay the costs to implement the remedy in OU2 and announced that it would pursue similar agreements with other potentially responsible parties. In June 2018, OxyChem filed a complaint under CERCLA in Federal District Court in the State of New Jersey against numerous potentially responsible parties seeking contribution and cost recovery of amounts incurred or to be incurred to comply with the AOC and the OU2 ROD, or to perform other remediation activities related to the DASS. That action remains pending and the District Court has not adjudicated OxyChem's relative share of responsibility for those costs. The EPA has estimated the cost to remediate OU2 to be approximately \$1.4 billion.

OU3 – Newark Bay Study Area, including Newark Bay and Portions of the Hackensack River, Arthur Kill, and Kill van Kull: Maxus and its affiliates initiated a remedial investigation and feasibility study of OU3 pursuant to a 2004 AOC which was amended in 2010. OxyChem is currently performing feasibility study activities in OU3.

OU4 – The 17-mile Lower Passaic River Study Area, comprising OU2 and the Upper 9 Miles of the Lower Passaic River: In September 2021, the EPA issued a ROD selecting an interim remedy for the portion of OU4 that excludes OU2, and is located upstream from the Lister Avenue Plant site for which OxyChem inherited legal responsibility. The EPA had estimated the cost to remediate OU4 to be approximately \$440 million. At this time, OxyChem's role or responsibilities under the OU4 ROD, and those of other potentially responsible parties, have not been adjudicated. To provide continued, efficient remediation progress, in January 2022, OxyChem offered to design and implement the interim remedy for OU4 subject to certain conditions, including a condition that the EPA would not seek to bar OxyChem's right to seek contribution or cost recovery from any other parties that are potentially responsible to pay for the OU4 interim remedy. In March 2022, the EPA sent a notice letter to OxyChem and other parties requesting good faith offers to implement the selected remedies at OU2 and OU4. OxyChem submitted a good faith offer in June 2022, reaffirming the offer to design the remedy for OU4 and offering to enter into additional sequential agreements to remediate OU2 and OU4, subject to similar conditions, including that the EPA not seek to bar OxyChem from pursuing contribution or cost recovery from other responsible parties. The EPA did not accept OxyChem's June 2022 offer and, as such, OxyChem believes that the EPA may issue a Unilateral Administrative Order or commence CERCLA litigation against it, and potentially other parties, to require further design and/or implementation activities of the EPA's selected remedies at the DASS.

Ongoing Assessment by Natural Resource Trustees: In addition to the activities of the EPA and OxyChem in the OUs described above, federal and state natural resources trustees are conducting an assessment of natural resources in the Lower Passaic River and Greater Newark Bay to evaluate potential claims for natural resource damages.

ALDEN LEEDS LITIGATION

In December 2022, the EPA and the DOJ filed a proposed Consent Decree in the Alden Leeds litigation seeking court approval to settle with 85 parties for a total of \$150 million and release them from liability for remediation costs in DASS OU2 and OU4, which OxyChem believes is based on a disproportionate allocation of responsibility to OxyChem despite overwhelming evidence regarding the responsibility of others, and, among other infirmities, is contrary to site-specific sampling and other relevant evidence concerning the liability of the settling parties. The EPA and DOJ also seek entry of an order that would bar OxyChem from pursuing contribution against those parties for remediation costs OxyChem had incurred or may incur in the future to design and implement the remedies in OU2 and OU4.

OxyChem intends to challenge the proposed settlement vigorously in the Alden Leeds litigation and to seek contribution and cost recovery from other potentially responsible parties for remediation costs it had incurred or may incur at the DASS. If OxyChem is denied leave to intervene in the Alden Leeds litigation, its anticipated settlement objections are overruled by the Court or in any subsequent appeals, or the proposed settlement is approved by the Court and not overturned on appeal, then, notwithstanding OxyChem's vigorous, good faith effort to contest the settlement proposed in the Alden Leeds litigation, the EPA could attempt to compel OxyChem to bear substantially all of the estimated cost to design and implement the OU2 and OU4 remedies, which would have a material adverse impact on OxyChem and Occidental's consolidated results of operations in the period recorded. While the remedies for OU2 and OU4 are expected to take over ten years to complete, the EPA may seek to require OxyChem to provide financial assurance to secure its performance. The amount of financial assurance is not subject to estimation at this time, as it is uncertain when or to what extent the EPA may take action to compel OxyChem to perform further remediation in OU2 or OU4 or the amount of assurance OxyChem would be required to post if the EPA takes such actions before the proposed settlement at issue in Alden Leeds is resolved. For further information on the Alden Leeds litigation, see Note 13 - Lawsuits, Claims, Commitments and Contingencies.

OTHER INFORMATION

For the DASS, OxyChem has accrued a reserve relating to its estimated allocable share of the costs to perform the maintenance and monitoring required in the OU1 Consent Decree, the design and implementation of remedies selected in the OU2 ROD and AOC and the OU4 ROD, and the remedial investigation and feasibility study required in the OU3.

OxyChem's accrued environmental remediation reserve does not reflect the potential for additional remediation costs or natural resource damages for the DASS that OxyChem believes are not reasonably estimable. OxyChem's ultimate liability at the DASS may be higher or lower than the reserved amount and the reasonably possible additional losses, and is subject to final design plans, further action by the EPA and natural resource trustees, and the resolution of OxyChem's allocable share with other potentially responsible parties, among other factors.

OxyChem continues to evaluate the estimated costs currently recorded for remediation at the DASS and other Maxus-indemnified sites, as well as the range of reasonably possible additional losses beyond those amounts currently recorded. Given the complexity and extent of the remediation efforts, estimates of the remediation costs may increase or decrease over time as new information becomes available.

NOTE 13 - LAWSUITS, CLAIMS, COMMITMENTS AND CONTINGENCIES

LEGAL MATTERS

Occidental or certain of its subsidiaries are involved, in the normal course of business, in lawsuits, claims and other legal proceedings that seek, among other things, compensation for alleged personal injury, breach of contract, property damage or other losses, punitive damages, civil penalties, or injunctive or declaratory relief. Occidental or certain of its subsidiaries also are involved in proceedings under CERCLA and similar federal, regional, state, provincial, tribal, local and international environmental laws. These environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, natural resource damages, punitive damages, civil penalties, injunctive relief and government oversight costs. Usually Occidental or such subsidiaries are among many companies in these environmental proceedings and have to date been successful in sharing remediation costs with other financially sound companies. Further, some lawsuits, claims and legal proceedings involve acquired or disposed assets with respect to which a third party or Occidental or its subsidiary retains liability or indemnifies the other party for conditions that existed prior to the transaction.

In accordance with applicable accounting guidance, Occidental or its subsidiaries accrue reserves for outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. Reserves for matters, other than for the arbitration award (disclosed below), tax matters or environmental remediation, that satisfy these criteria as of December 31, 2022 and 2021, were not material to Occidental's Consolidated Balance Sheets.

If unfavorable outcomes of these matters were to occur, future results of operations or cash flows for any particular quarterly or annual period could be materially adversely affected. Occidental's estimates are based on information known about the legal matters and its experience in contesting, litigating and settling similar matters. Occidental reassesses the probability and estimability of contingent losses as new information becomes available.

ANDES ARBITRATION

In 2016, Occidental received payments from the Republic of Ecuador of approximately \$1.0 billion pursuant to a November 2015 arbitration award for Ecuador's 2006 expropriation of Occidental's Participation Contract for Block 15. The awarded amount represented a recovery of Occidental's 60% of the value of Block 15. In 2017, Andes commenced an arbitration, against OEPC, claiming it is entitled to a 40% share of the judgment amount obtained by Occidental. Occidental contended that Andes is not entitled to any of the amounts paid under the 2015 arbitration award because Occidental's recovery was limited to Occidental's own 60% economic interest in the block. On March 26, 2021, the arbitration tribunal issued an award in favor of Andes and against OEPC in the amount of \$391 million plus interest. In June 2021, OEPC filed a motion to vacate the award due to concerns regarding the validity of the award. In December 2021, the U.S. District Court for the Southern District of New York confirmed the arbitration award, plus prejudgment interest, in the aggregate amount of \$558 million. OEPC has appealed the judgment. Oral argument with respect to OEPC's appeal occurred on February 2, 2023, and a ruling is expected later this year. Andes has filed state court claims in New York and Delaware against OEPC, OPC, and OXY USA to attempt to recover on its judgment against OEPC during the pendency of the appeal. All Occidental entities are vigorously defending against these actions. In addition, OEPC commenced an arbitration against Andes to recover significant additional claims not addressed by the prior arbitration tribunal relating to Andes' 40% share of costs, liabilities, losses and expenses due under the parties' agreements. A hearing on these claims occurred in December 2022. A ruling from the arbitration tribunal is expected in the first half of 2023.

ALDEN LEEDS LITIGATION

In December 2022, the EPA and the DOJ filed a proposed Consent Decree with the Federal District Court in New Jersey in the Alden Leeds litigation seeking court approval of a proposed settlement in which the EPA seeks to release 85 potentially responsible parties from all remediation costs in OU2 and OU4 of the DASS for approximately \$150 million. OxyChem believes the proposed settlement relies, improperly, on an allocation report prepared by an EPA contractor in which the contractor purports to assign a disproportionate share of the responsibility for remediation costs in OU2 and OU4 to OxyChem. In the proposed settlement, the EPA also seeks to bar OxyChem from pursuing contribution claims against the 85 settling parties for remediation costs in OU2 and OU4. The settlement does not address the liability of any party with respect to OU3 or natural resource damages. OxyChem intends to contest the proposed settlement vigorously.

The proposed EPA settlement is subject to a public comment process that closes in March 2023. OxyChem believes the proposed settlement exceeds the EPA's statutory authority and is based on a flawed allocation process. OxyChem also believes that process was unreasonably limited in scope and unreliably based on voluntary reporting by the settling parties, instead of sworn evidence, publicly available sampling results, and historical documents reflecting the operating history and disposal practices of the 85 parties that the EPA proposes to release as part of this settlement. OxyChem expects to show that the EPA's proposed settlement does not fairly and reasonably reflect the settling parties' contribution of hazardous substances to the DASS, and, among other things, incorrectly attributes to OxyChem substances that were contributed by one or more of the 85 settling parties.

OxyChem has sought to intervene in the Alden Leeds proceeding to protect its rights under federal law to challenge the proposed settlement, seek contribution and cost recovery from potentially responsible parties, and obtain a judicial allocation of responsibility under CERCLA. It is unclear when the Court will rule on OxyChem's request to intervene or will address whether the underlying settlement will be approved. In the related CERCLA litigation, OxyChem also intends to defend and prosecute vigorously its right to seek contribution and cost recovery from all potentially responsible parties to pay remediation costs in the DASS. As the Alden Leeds case is in its early stages, OxyChem is unable to estimate the timing of the Court's decision, its outcome, or the outcome of any appeals from the Court's decision.

MAXUS LIQUIDATING TRUST

As described in Note 12 – Environmental Liabilities and Expenditures, Maxus was contractually obligated to indemnify, defend, and hold harmless OxyChem against environmental liabilities arising from the former operations of DSCC. In June 2016, Maxus filed for bankruptcy protection in the U.S. Bankruptcy Court for the District of Delaware. In June 2017, the Bankruptcy Court approved a Plan of Liquidation to liquidate Maxus and create the Trust for the benefit of Maxus' creditors, including OxyChem, to pursue claims against Maxus' current and former parents, YPF and Repsol, certain of their respective subsidiaries and affiliates, and others to satisfy claims by OxyChem and other creditors for past and future remediation and other costs. In July 2017, the court-approved Plan of Liquidation became final and the Trust became effective. Pursuant to the Plan, the Trust is governed by an independent trustee and is not controlled by OxyChem. The Plan authorizes the Trust to distribute any assets it recovers from such litigation claims to the Trust's beneficiaries, which include OxyChem and other creditors, in accordance with the Plan and governing Trust Agreement.

In June 2018, the trust filed its complaint against YPF and Repsol in Delaware Bankruptcy Court asserting claims based upon, among other things, fraudulent transfer and alter ego. During 2019, the Bankruptcy Court denied Repsol's and YPF's motions to dismiss the complaint as well as their motions to move the case to a different court. These rulings were upheld on appeal. The Trust, YPF, and Repsol each filed motions for summary judgment, and the Bankruptcy Court denied all but one motion in the second quarter of 2022. The Bankruptcy Court's summary judgment decision indicated that, at trial, the Trust must establish a causal link between its claimed damages and the alter ego conduct of Repsol and YPF. OxyChem is currently uncertain what amount of recovery it will ultimately obtain from the Trust. Trial is scheduled for March and April 2023.

TAX MATTERS

During the course of its operations, Occidental is subject to audit by tax authorities for varying periods in various federal, state, local and international tax jurisdictions. Tax years through 2020 for U.S. federal income tax purposes have been audited by the IRS pursuant to its Compliance Assurance Program and subsequent taxable years are currently under review. Tax years through 2014 have been audited for state income tax purposes. Significant audit matters in international jurisdictions have been resolved through 2010. During the course of tax audits, disputes have arisen and other disputes may arise as to facts and matters of law.

For Anadarko, its taxable years through 2014 and tax year 2016 for U.S. federal tax purposes have been audited by the IRS. Tax years through 2010 have been audited for state income tax purposes. There is one outstanding significant tax matter in an international jurisdiction related to a discontinued operation. As stated above, during the course of tax audits, disputes have arisen and other disputes may arise as to facts and matters of law.

Other than the matter discussed below, Occidental believes that the resolution of these outstanding tax matters would not have a material adverse effect on its consolidated financial position or results of operations.

Anadarko received an \$881 million tentative refund in 2016 related to its \$5.2 billion Tronox Adversary Proceeding settlement payment in 2015. In September 2018, Anadarko received a statutory notice of deficiency from the IRS disallowing the net operating loss carryback and rejecting Anadarko's refund claim. As a result, Anadarko filed a petition with the U.S. Tax Court to dispute the disallowances in November 2018. In December 2022, the parties filed competing motions for partial summary judgment. The motions are not fully briefed. Trial is set for May 2023. Occidental expects to continue pursuing resolution.

In accordance with ASC 740's guidance on the accounting for uncertain tax positions, Occidental has recorded no tax benefit on the tentative cash tax refund of \$881 million. As a result, should Occidental not ultimately prevail on the issue, there would be no additional tax expense recorded relative to this position for financial statement purposes other than future interest. However, in that event, Occidental would be required to repay approximately \$1.4 billion in federal taxes, \$28 million in state taxes and accrued interest of \$415 million. A liability for this amount plus interest is included in deferred credits and other liabilities - other.

INDEMNITIES TO THIRD PARTIES

Occidental, its subsidiaries, or both, have indemnified various parties against specified liabilities those parties might incur in the future in connection with purchases and other transactions that they have entered into with Occidental or its subsidiaries. These indemnities usually are contingent upon the other party incurring liabilities that reach specified thresholds. As of December 31, 2022, Occidental is not aware of circumstances that it believes would reasonably be expected to lead to indemnity claims that would result in payments materially in excess of reserves.

PURCHASE OBLIGATIONS AND COMMITMENTS

Occidental, its subsidiaries, or both, have entered into agreements providing for future payments, primarily to secure terminal and pipeline capacity, and also for drilling rigs and services, electrical power, steam and certain chemical raw materials. Occidental has certain other commitments under contracts, guarantees and joint ventures, including purchase commitments for goods and services at market-related prices and certain other contingent liabilities. The amounts that will be paid for such outstanding off-balance sheet purchase obligations as of December 31, 2022 are \$3.0 billion in 2023, \$4.2 billion in 2024 and 2025, \$2.5 billion in 2026 and 2027 and \$2.2 billion in 2028 and thereafter.

**NOTE 14 - STOCKHOLDERS' EQUITY**

The following table presents the effects of Occidental's share repurchases as part of the \$3.0 billion stock repurchase plan announced in February 2022, along with other transactions in Occidental's stock:

Period	Exercise of Warrants and Options ^(a)	Other ^(b)	Treasury Stock Purchases ^(c)	Common Stock Outstanding ^(d)
December 31, 2021				934,074,700
First Quarter 2022	1,082,282	2,764,746	(730,746)	937,190,982
Second Quarter 2022	3,409,920	42,342	(11,679,732)	928,963,512
Third Quarter 2022	7,667,545	18,280	(28,571,576)	908,077,761
Fourth Quarter 2022	86,309	18,108	(8,323,234)	899,858,944
Total 2022	12,246,056	2,843,476	(49,305,288)	899,858,944

^(a) Approximately \$280 million of cash was received as a result of the exercise of common stock warrants and options.

^(b) Consisted of issuances for the 2015 long-term incentive plan, the OPC savings plan, dividend reinvestment plan and Anadarko restricted stock awards.

^(c) Included purchases of 1,640,719 shares from the trustee of Occidental's defined contribution savings plan that are not part of publicly announced plans or programs.

^(d) As of December 31, 2022, Occidental had 104 million outstanding warrants with a strike of \$22 per share and 83.9 million of warrants with a strike of \$59.62 per share.

TREASURY STOCK

Under the share repurchase program announced and completed in 2022, Occidental purchased 47.7 million shares for \$3.0 billion. Additionally, Occidental purchased shares from the trustee of its defined contribution savings plan in 2022, 2021 and 2020. As of December 31, 2022, 2021 and 2020, treasury stock shares numbered 198.7 million, 149.3 million and 149.1 million, respectively.

PREFERRED STOCK

In connection with the Anadarko Acquisition, Occidental issued 100,000 shares of series A preferred stock, having a face value of \$100,000 per share and a liquidation preference of \$105,000 per share plus unpaid accrued dividends. The agreement includes a mandatory redemption provision that obligates Occidental to redeem the preferred at 110% of the par value on a dollar-for-dollar basis for every dollar distributed to common shareholders above \$4.00 per share, on a trailing 12-month basis. Occidental cannot voluntarily redeem the preferred shares before August 2029. After August 2029, Occidental can voluntarily redeem the preferred shares at a 5% premium at par. Dividends on the preferred stock will accrue on the face value at a rate per annum of 8%, but will be paid only when, as and if declared by Occidental's Board of Directors. At any time, when such dividends have not been paid in full, the unpaid amounts will accrue dividends, compounded quarterly, at a rate per annum of 9%. Following the payment in full of any accrued but unpaid dividends, the dividend rate will remain at 9% per annum. If preferred dividends are not paid in full, Occidental is prohibited from paying dividends on common stock. Occidental paid \$200 million in preferred stock dividends in each quarter of 2022.

As of December 31, 2022, 2021 and 2020, Occidental had 100,000 shares of preferred stock issued and outstanding.

BERKSHIRE WARRANT

In connection with the preferred stock issuance, Occidental also issued the Berkshire Warrant. The Berkshire Warrant is exercisable at the holder's option, in whole or in part, until the first anniversary of the date on which no shares of preferred stock remain outstanding, at which time the Berkshire Warrant expires. The holder of the Berkshire Warrant and the preferred stock may redeem the preferred stock as payment for the exercise price of the Warrant in lieu of cash payment upon exercise. As of December 31, 2022, the Berkshire warrant would result in the issuance of 83.9 million shares of Occidental common stock, if exercised in full for its current strike price of \$59.624 per share of Occidental common stock.

COMMON STOCK WARRANTS

On June 26, 2020, the Board of Directors declared Common Stock Warrants, at a rate of 0.125 warrants per share of Occidental common stock. Occidental issued approximately 116 million Common Stock Warrants on August 3, 2020 to holders of record of outstanding shares of Occidental's common stock as of the close of business on July 6, 2020, and pursuant to Occidental's outstanding equity-based incentive awards in connection with anti-dilution adjustments resulting from such distribution. The Common Stock Warrants have an exercise price of \$22.00 per share and will expire on August 3, 2027. The Common Stock Warrants are listed on the NYSE and trade under the symbol "OXY WS".

The Common Stock Warrants were measured at fair value on the declaration date using the Black-Scholes option model and were classified as equity in "Additional paid-in capital". The following level 2 inputs were used in the Black-Scholes option model: the expected life of the Common Stock Warrants, a volatility factor and the exercise price. The expected life is based on the estimated term of the Common Stock Warrants, the volatility factor is based on historical volatilities of Occidental common stock and the exercise of \$22.00 per share of Occidental common stock.

EARNINGS PER SHARE

Occidental's instruments containing rights to nonforfeitable dividends granted in stock-based awards are considered participating securities prior to vesting and, therefore, have been deducted from earnings in computing basic and diluted EPS under the two-class method.

Basic EPS was computed by dividing net income attributable to common stock, net of income allocated to participating securities, by the weighted-average number of common shares outstanding during each period, including vested but unissued shares and share units. The computation of diluted EPS reflects the additional dilutive effect of stock options, warrants and unvested stock awards.

The following table presents the calculation of basic and diluted EPS for the years ended December 31:

<i>millions except per share amounts</i>	2022	2021	2020
Income (loss) from continuing operations	\$ 13,304	\$ 2,790	\$ (13,533)
Loss from discontinued operations	—	(468)	(1,298)
Net income (loss)	\$ 13,304	\$ 2,322	\$ (14,831)
Less: Preferred stock dividends	(800)	(800)	(844)
Net income (loss) attributable to common stock	\$ 12,504	\$ 1,522	\$ (15,675)
Less: Net income allocated to participating securities	(83)	(10)	—
Net income (loss), net of participating securities	\$ 12,421	\$ 1,512	\$ (15,675)
Weighted-average number of basic shares	926.2	935.0	918.7
Basic earnings (loss) per common share	\$ 13.41	\$ 1.62	\$ (17.06)
Net income (loss) attributable to common stock	\$ 12,504	\$ 1,522	\$ (15,675)
Less: Net income allocated to participating securities	(77)	(10)	—
Net income (loss), net of participating securities	\$ 12,427	\$ 1,512	\$ (15,675)
Weighted-average number of basic shares	926.2	935.0	918.7
Dilutive securities	75.8	23.8	—
Total diluted weighted-average common shares	1,002.0	958.8	918.7
Diluted earnings (loss) per common share	\$ 12.40	\$ 1.58	\$ (17.06)

As of December 31, 2022, no potentially dilutive shares of Occidental common stock were excluded from the diluted shares. As of December 31, 2021, warrants and options covering 87 million shares of Occidental common stock were excluded from the diluted shares as their effect would have been anti-dilutive.

ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated OCI (loss) consisted of the following after-tax amounts as of December 31:

<i>millions</i>	2022	2021
Foreign currency translation adjustments	\$ (5)	\$ (8)
Derivatives	(25)	(104)
Pension and postretirement adjustments ^(a)	225	(96)
Total	\$ 195	\$ (208)

^(a) See Note 11 - Retirement and Postretirement Benefit Plans for further information.

**NOTE 15 - STOCK-BASED INCENTIVE PLANS**

Occidental issues stock-based awards to employees in accordance with the terms of the Plan, as amended and restated. An aggregate of 133 million shares of Occidental common stock were authorized for issuance and approximately 16.1 million shares had been reserved for issuance for employee awards through December 31, 2022. As of December 31, 2022, approximately 57.0 million shares were available for grants of future awards. The plan requires each share covered by an award (other than options) to be counted as if three shares were issued in determining the number of shares that are available for future awards. Accordingly, the number of shares available for future awards may be less than 57.0 million depending on the type of award granted, and shares available for future awards may increase by the number of shares that are forfeited, canceled, or correspond to the portion of any stock-based awards settled in cash, including awards that were issued under a previous plan that remain outstanding. Current outstanding awards include RSUs, stock options, CROCEI awards and TSRI awards.

During 2022, non-employee directors were granted awards for 33,575 shares of common stock. Compensation expense for these awards was measured using the closing quoted market price of Occidental's common stock on the grant date and was fully recognized at that time.

Occidental incurred expenses of \$258 million, \$287 million and \$202 million related to stock-based incentive plans in the years ended December 31, 2022, 2021, and 2020, respectively. The income tax benefit associated with this expense was \$54 million, \$60 million and \$42 million in the years ended December 31, 2022, 2021, and 2020, respectively.

As of December 31, 2022, unrecognized compensation expense for all unvested stock-based incentive awards was \$236 million. This expense is expected to be recognized over a weighted-average period of 1.8 years. Occidental accounts for forfeitures as they occur.

RESTRICTED STOCK UNITS

Certain employees are awarded the right to receive RSUs, some of which have performance criteria, and are in the form of, or equivalent in value to, actual shares of Occidental common stock. Depending on their terms, RSUs may be settled in stock or may be cash settled liabilities. These awards vest from one to three years following the grant date. For certain RSUs, dividend equivalents are paid during the vesting period.

CASH-SETTLED RSU LIABILITY AWARDS

The weighted-average, grant-date fair values of cash-settled RSUs granted in 2022, 2021 and 2020 were \$47.41, \$25.83 and \$40.86 per share, respectively. Cash-settled RSUs resulted in payments of \$203 million, \$4 million and \$3 million, during the years ended December 31, 2022, 2021 and 2020, respectively.

STOCK-SETTLED RSU EQUITY AWARDS

The weighted-average, grant-date fair values of the stock-settled RSUs granted in 2022, 2021, and 2020 were \$45.14, \$25.45 and \$41.60, respectively. The fair value of RSUs settled in shares during the years ended December 31, 2022, 2021 and 2020 was \$160 million, \$70 million and \$62 million, respectively.

A summary of changes in Occidental's unvested cash- and stock-settled RSUs during the year ended December 31, 2022, is presented below:

	Cash-Settled			Stock-Settled		
			Weighted-Average Grant-Date Fair Value			Weighted-Average Grant-Date Fair Value
<i>thousands, except fair values</i>	RSUs			RSUs		
Unvested as of January 1	5,375	\$	41.44	8,589	\$	33.10
Granted	150	\$	47.41	4,362	\$	45.14
Vested	(5,188)	\$	41.86	(3,654)	\$	38.04
Forfeitures	(39)	\$	35.80	(403)	\$	39.09
Unvested as of December 31	298	\$	37.96	8,894	\$	36.70

TOTAL SHAREHOLDER RETURN INCENTIVE AWARDS

Certain executives are awarded TSRIs that vest at the end of a three-year period following the grant date. Payout is based upon Occidental's absolute total shareholder return and performance relative to its peers. TSRIs have payouts that range from 0% to 200% of the target award and settle in stock once certified. Dividend equivalents for TSRIs are accumulated and paid upon certification of the award. The fair value of TSRIs settled in shares during the years ended December 31, 2022, 2021 and 2020 was zero, \$4 million and \$9 million, respectively.

The fair values of TSRIs are initially determined on the grant date using a Monte Carlo simulation model based on Occidental's assumptions, noted in the following table, and the volatility from corresponding peer group companies. The expected life is based on the Term. The risk-free interest rate is the implied yield available on zero coupon Treasury notes at the time of grant with a remaining term equal to the Term. The dividend yield is the expected annual dividend yield over the Term, expressed as a percentage of the stock price on the grant date. Estimates of fair value may not accurately predict the value ultimately realized by the employees who receive the awards, and the ultimate value may not be indicative of the reasonableness of the original estimates of fair value made by Occidental.

The grant-date assumptions used in the Monte Carlo simulation models for the estimated payout level of TSRIs were as follows:

	TSRIs		
	2022	2021	2020
Assumptions used:			
Risk-free interest rate	1.7%	0.2%	1.4%
Volatility factor	80%	75%	26%
Expected life (years)	2.89	2.88	3.00
Grant-date fair value of underlying Occidental common stock	\$ 42.98	\$ 25.39	\$ 41.60

A summary of changes in Occidental's unvested TSRIs during the year ended December 31, 2022 is presented below:

	TSRIs	
	Awards	Weighted-Average Grant-Date Fair Value of Occidental Stock
<i>thousands, except fair values</i>		
Unvested as of January 1	1,769	\$ 43.12
Granted	403	\$ 42.98
Vested ^(a)	(520)	\$ 67.19
Forfeitures	(9)	\$ 35.43
Unvested as of December 31	1,643	\$ 35.51

^(a) Presented at the target payouts. No payouts occurred in 2022.

STOCK OPTIONS

Certain employees are granted options that vest over three years, expire on the tenth anniversary of the grant date, and settle in stock. Exercise prices of the options were equal to the quoted market value of Occidental's stock on the grant date. The inputs to this and results of this model are presented below:

	Options		
	2022	2021	2020
Assumptions used:			
Risk-free interest rate	1.87%	0.7%	1.4%
Volatility factor	58%	55%	25%
Expected life (years)	6.02	6.00	6.00
Dividend yield	0.09%	0.16%	7.60%
Exercise price	\$ 42.98	\$ 25.39	\$ 41.60
Grant-date fair value of underlying Occidental common stock	\$ 23.39	\$ 12.72	\$ 3.19

A summary of Occidental's outstanding stock options as of December 31, 2022 and changes during the year ended December 31, 2022 is presented below:

	Vested		Unvested	
	Options	Weighted Average Strike Price	Options	Weighted Average Strike Price
<i>thousands, except fair values</i>				
January 1	2,236	\$ 49.13	1,430	\$ 35.52
Granted	—	\$ —	286	\$ 42.98
Vested	641	\$ 36.68	(641)	\$ 36.68
Forfeited	(551)	\$ 76.96	—	\$ —
Exercised	(673)	\$ 39.78	—	\$ —
December 31	1,653	\$ 38.83	1,075	\$ 36.82

The intrinsic value of options exercised in 2022 was \$17 million. No options were exercised during the years ended December 31, 2021 and 2020. As of December 31, 2022, the remaining life of fully vested options was 5.9 years.

CASH RETURN ON CAPITAL EMPLOYED INCENTIVE AWARDS

Certain executives are awarded CROCEI awards that vest at the end of a three-year period if performance targets based on CROCE are met. These awards are settled in stock upon certification of the performance target, with payouts that range from 0% to 200% of the target award. Dividend equivalents are accumulated and paid upon certification of the award. A summary of changes in Occidental's unvested CROCEI during the year ended December 31, 2022 is presented below:

	CROCEI	
	Awards	Weighted-Average Grant-Date Fair Value of Occidental Stock
<i>thousands, except fair values</i>		
Unvested as of January 1	418	\$ 33.03
Granted	156	\$ 42.98
Unvested as of December 31	574	\$ 35.73

NOTE 16 - INDUSTRY SEGMENTS AND GEOGRAPHIC AREAS

Occidental conducts its operations through three segments: (1) oil and gas; (2) chemical; and (3) midstream and marketing. The factors used to identify these segments are based on the nature of the operations that are undertaken in each segment. Income taxes, interest income, interest expense, environmental remediation expenses, Anadarko Acquisition-related costs and unallocated corporate expenses are included under corporate and eliminations. Intersegment sales eliminate upon consolidation and are generally made at prices approximating those that the selling entity would be able to obtain in third-party transactions. Identifiable assets are those assets used in the operations of the segments. Corporate assets consist of cash and restricted cash, certain corporate receivables and PP&E. The chief operating decision maker analyzes each segment's operating results to make decisions about resources to be allocated to the segment and to assess its performance as well as Occidental's overall performance.

^(a) The 2022 amount included \$148 million of gains, primarily related to the sale of certain non-strategic assets in the Permian Basin. The 2022 amount included \$55 million related to post-closing consideration earned from 2020 asset sales as a result of certain production and pricing targets being met as well as the closing of the sale of certain assets that were negotiated with the 2020 Colombia divestiture. The 2021 amount included \$282 million of asset impairments and \$280 million of net oil, gas and CO₂ derivative losses. The 2020 amount included \$7.1 billion related to asset impairments and net asset sale losses of \$1.6 billion, partially offset by a \$1.1 billion gain on the oil and gas collars and calls and a loss on the sale of Occidental's Colombia assets of \$353 million.

^(b) The 2022 amount included \$259 million of net derivative mark-to-market losses, \$62 million relating to a gain on the sale of 10 million limited partner units in WES and a \$36 million gain on the sale of a joint venture. The 2021 amount included \$252 million in derivative mark-to-market losses and \$124 million of gains on sales, primarily from the sale of 11.5 million limited partner units in WES. The 2020 amount included \$2.7 billion of other-than-temporary impairment of WES equity

investment and \$1.4 billion of impairments related to the write-off of goodwill and a \$236 million loss from an equity investment related to WES' write-off of its goodwill.

- (c) The 2022 amount included a tax benefit of \$2.7 billion in connection with Occidental's legal entity reorganization, which is further discussed in the Income Taxes section of the Management's Discussion and Analysis of Financial Condition and Results of Operations section under Part II, Item 7, of this Form 10-K and Note 10 - Income Taxes in the Notes to Consolidated Financial Statements in Part II Item 8 of this Form 10-K, as well as \$317 million of net gains on interest rate swaps, \$149 million of net gains on early debt extinguishment and \$89 million of Anadarko acquisition-related costs. The 2021 amount included \$153 million of Anadarko acquisition-related costs, \$122 million net derivative mark-to-market gains on interest rate swaps and \$118 million of early debt extinguishment expenses. The 2020 amount included \$339 million in expenses related to Anadarko Acquisition-related costs and a \$428 million loss on interest rate swaps.
- (d) Included all foreign and domestic income taxes from continuing operations.
- (e) Included capital expenditures and capitalized interest, but excluded acquisition and disposition of assets.

Supplemental Oil and Gas Information

OIL AND GAS RESERVES

The following tables set forth Occidental's net interests in quantities of proved developed and undeveloped reserves of oil, NGL and natural gas and changes in such quantities. Proved oil, NGL and natural gas reserves were estimated using the unweighted arithmetic average of the first-day-of-the-month price for each month within the year, unless prices were defined by contractual arrangements. Oil, NGL and natural gas prices used for this purpose were based on posted benchmark prices and adjusted for price differentials including gravity, quality and transportation costs. The following table shows the pricing used in the reserve analysis for the periods presented:

	2022	2021	2020
Average WTI Oil (\$/Bbl)	\$ 93.67	\$ 66.56	\$ 39.57
Average Brent Oil (\$/Bbl)	\$ 97.77	\$ 69.24	\$ 43.41
Average Henry Hub Natural Gas (\$/MMbtu)	\$ 6.36	\$ 3.60	\$ 1.98
Average Mt. Belvieu NGL (\$/Bbl)	\$ 47.81	\$ 44.22	\$ 18.74

Reserves are stated net of applicable royalties. Estimated reserves include Occidental's economic interests under PSCs and other similar economic arrangements. In addition, discussions of oil and gas production or volumes, in general, refer to sales volumes unless the context requires or it is indicated otherwise.

Prices for oil, NGL and natural gas fluctuate widely. Historically, the markets for oil, NGL and natural gas and refined products have been volatile and may continue to be volatile in the future. Prolonged declines in oil, NGL and natural gas prices would reduce Occidental's operating results and cash flows and could impact its future rate of growth and the recoverability of the carrying value of its assets.

^(b) Results of operations excluded discontinued operations related to the South Africa (sold 2020) and Ghana (sold 2021) assets.

^(c) Revenues are net of royalty payments.

^(d) U.S. federal income taxes reflect certain expenses related to oil and gas activities allocated for U.S. income tax purposes. These amounts are computed using the statutory rate in effect during the period.

STANDARDIZED MEASURE, INCLUDING YEAR-TO-YEAR CHANGES THEREIN, OF DISCOUNTED FUTURE NET CASH FLOWS

For purposes of the following disclosures, future cash flows were computed by applying to Occidental's proved oil and gas reserves the unweighted arithmetic average of the first-day-of-the-month price for each month within the years ended December 31, 2022, 2021 and 2020, respectively, unless prices were defined by contractual arrangements, and exclude escalations based upon future conditions. The realized prices used to calculate future cash flows vary by producing area and market conditions. Future operating and capital costs were forecast using the current cost environment applied to expectations of future operating and development activities to develop and produce proved reserves at year end.

Future income tax expenses were computed by applying, generally, year-end statutory tax rates (adjusted for permanent differences, tax credits, allowances and foreign income repatriation considerations) to the estimated net future pre-tax cash flows. The discount was computed by application of a 10% discount factor. The calculations assumed the continuation of existing economic, operating and contractual conditions as of December 31, 2022, 2021 and 2020. Such assumptions, which are required by regulation, have not always proven accurate in the past. Other valid assumptions would give rise to substantially different results.

PRODUCTIVE OIL AND GAS WELLS

The following table sets forth, as of December 31, 2022, Occidental's productive oil and gas wells (both producing and capable of production):

	United States		International		Total	
Oil ^(a)						
Gross ^(b)	17,944	(1,009)	2,894	—	20,838	(1,009)
Net ^(c)	15,437	(861)	1,392	—	16,829	(861)
Gas ^(a)						
Gross ^(b)	2,656	(1,453)	162	(2)	2,818	(1,455)
Net ^(c)	2,229	(1,165)	96	(2)	2,325	(1,167)

^(a) The numbers in parentheses indicate the number of wells with multiple completions.

^(b) The total number of wells in which interests are owned.

^(c) The sum of fractional interests.

PARTICIPATION IN WELLS BEING DRILLED OR PENDING COMPLETION

The following table sets forth, as of December 31, 2022, Occidental's participation in exploratory and development wells being drilled:

	United States	International	Total
Exploratory and development wells being drilled			
Gross	27	16	43
Net	22	12	34
Exploratory and development wells pending completion ^(a)			
Gross	107	1	108
Net	79	1	80

^(a) Wells suspended or waiting on completion include exploration and development wells where drilling has occurred, but the wells are awaiting the completion of hydraulic fracturing or other completion activities or the resumption of drilling in the future. There were 42 MMboe of PUD reserves primarily assigned to U.S. onshore development wells suspended or waiting on completion as of December 31, 2022. Occidental expects to convert all of these PUD reserves to developed status within five years of their initial disclosure.

As of December 31, 2022, Occidental was participating in 135 and 37 gross pressure-maintenance projects in the United States and Internationally, respectively. In the United States, these projects primarily consisted of waterfloods and CO₂ floods, and in the Middle East and North Africa, these projects consisted mostly of waterfloods.

OIL AND GAS ACREAGE

The following table sets forth, as of December 31, 2022, Occidental's holdings of developed and undeveloped oil and gas acreage:

<i>thousands</i>	United States	International	Total
Developed ^(a)			
Gross ^(b)	6,190	1,130	7,320
Net ^(c)	3,948	393	4,341
Undeveloped ^(d)			
Gross ^(b)	1,437	8,422	9,859
Net ^(c)	1,016	6,677	7,693
Fee Mineral Ownership ^(e)			
Gross ^(b)	8,040	—	8,040
Net ^(c)	4,567	—	4,567

^(a) Acres spaced or assigned to productive wells.

^(b) Total acres in which interests are held.

^(c) Sum of the fractional interests owned based on working interests, or interests under PSCs and other economic arrangements.

^(d) Acres on which wells have not been drilled or completed to a point that would permit the production of commercial quantities of oil and gas, regardless of whether the acreage contains proved reserves.

^(e) Occidental's fee mineral acreage is primarily undeveloped.

Occidental's investment in developed and undeveloped acreage comprises numerous concessions, blocks and leases. Work programs are designed to ensure that the exploration potential of any property is fully evaluated before the contractual expiration date. In some instances, Occidental may elect to relinquish acreage in advance of the contractual expiration date if the evaluation process is complete and there is not a business basis for extension. In cases where additional time may be required to fully evaluate acreage, Occidental has generally been successful in obtaining extensions. Scheduled lease and concession expirations for undeveloped acreage over the next three years are not expected to have a material adverse impact on Occidental.

OIL, NGL AND NATURAL GAS SALES VOLUMES PER DAY

The following tables set forth the sales volumes from ongoing operations of oil, NGL and natural gas per day for each of the three years in the period ended December 31, 2022. The differences between the sales and production volumes per day are negligible and are generally due to the timing of shipments at Occidental's international locations where product is loaded onto tankers. Natural gas volumes have been converted to Boe based on energy content of six Mcf of gas to one barrel of oil.

Sales per Day from Ongoing Operations (Mboe/d)	2022	2021	2020
United States

Note: The amounts presented represent continuing operations.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Occidental had no changes in, and no disagreements with, Occidental's accountants on accounting and financial disclosure.

ITEM 9A. CONTROLS AND PROCEDURES

MANAGEMENT'S ANNUAL ASSESSMENT OF AND REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Occidental Petroleum Corporation and its subsidiaries is responsible for establishing and maintaining adequate internal control over financial reporting. Occidental's system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Consolidated Financial Statements for external purposes in accordance with GAAP. Occidental's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and divestitures of Occidental's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that Occidental's receipts and expenditures are being made only in accordance with authorizations of Occidental's management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Occidental's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of Occidental's internal control system as of December 31, 2022, based on the criteria for effective internal control over financial reporting described in Internal Control - Integrated Framework issued in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management believes that, as of December 31, 2022, Occidental's system of internal control over financial reporting is effective.

Occidental's independent auditors, KPMG LLP, have issued an audit report on Occidental's internal control over financial reporting.

DISCLOSURE CONTROLS AND PROCEDURES

Occidental's President and Chief Executive Officer and its Senior Vice President and Chief Financial Officer supervised and participated in Occidental's evaluation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, Occidental's President and Chief Executive Officer and Senior Vice President and Chief Financial Officer concluded that Occidental's disclosure controls and procedures were effective as of December 31, 2022.

ITEM 9B. OTHER INFORMATION

None.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

None.

Part III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Occidental's Code of Business Conduct applies to the President and Chief Executive Officer, Senior Vice President and Chief Financial Officer, Vice President, Chief Accounting Officer and Controller and persons performing similar functions. The Code of Business Conduct also applies to Occidental's directors, employees and the employees of entities which it controls. The Code of Business Conduct is posted on our website, www.oxy.com. Occidental will satisfy any disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, any provision of the Code of Business Conduct by disclosing the nature of that amendment or waiver on its website within four business days following the date of the amendment or waiver.

The list of Occidental's executive officers and related information under Information About Our Executive Officers set forth in Part I of this 10-K is incorporated by reference herein. The information required by this Item 10 is incorporated herein by reference from Occidental's definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A within 120 days of December 31, 2022.

ITEM 11. EXECUTIVE COMPENSATION

The information under the caption "Compensation Discussion and Analysis - Compensation Committee Report" shall not be deemed to be "soliciting material," or to be "filed" with the SEC, or subject to Regulation 14A or 14C under the Exchange Act or to the liabilities of Section 18 of the Exchange Act, nor shall it be deemed incorporated by reference into any filing under the Securities Act of 1933. The information required by this Item 11 is incorporated herein by reference from Occidental's definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A within 120 days of December 31, 2022.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

All of Occidental's stock-based compensation plans for its employees and non-employee directors have been approved by the stockholders. The aggregate number of shares of Occidental common stock authorized for issuance under such plans is approximately 133 million, of which approximately 16.1 million had been reserved for issuance through December 31, 2022. The following is a summary of the securities available for issuance under such plans:

a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	b) Weighted-average exercise price of outstanding options, warrants and rights	c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
16,053,787 ⁽¹⁾	38.04 ⁽²⁾	56,980,559 ⁽³⁾

⁽¹⁾ Includes shares reserved to be issued pursuant to RSUs, Options and performance-based awards. Shares for performance-based awards are included assuming maximum payout, but may be paid out at lesser amounts, or not at all, according to achievement of performance goals.

⁽²⁾ Price applies only to the Options included in column (a). Exercise price is not applicable to the other awards included in column (a), nor warrants not issued under equity compensation plans.

⁽³⁾ A plan provision requires each share covered by an award (other than stock appreciation rights and Options) to be counted as if three shares were issued in determining the number of shares that are available for future awards. Accordingly, the number of shares available for future awards may be less than the amount shown depending on the type of award granted. Additionally, under the plan, the amount shown may increase, depending on the award type, by the number of shares currently unvested or forfeitable, or three times that number as applicable, that are forfeited or canceled, or correspond to the portion of any stock-based awards settled in cash.

The information required by this Item 12 is incorporated herein by reference from Occidental's definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A within 120 days of December 31, 2022.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information required by this Item 13 is incorporated herein by reference from Occidental's definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A within 120 days of December 31, 2022.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Our independent registered public accounting firm is KPMG LLP, Houston, TX, Auditor Firm ID: 185.

The information about our principal accountant, KPMG LLP, Houston, Texas (185) required by this Item 14 is incorporated herein by reference from Occidental's definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A within 120 days of December 31, 2022.

Part IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

The agreements included as exhibits to this report are included to provide information about their terms and not to provide any other factual or disclosure information about Occidental or the other parties to the agreements. The agreements contain representations and warranties by each of the parties to the applicable agreement that were made solely for the benefit of the other agreement parties and:

- Should not be treated as categorical statements of fact, but rather as a way of allocating the risk among the parties if those statements prove to be inaccurate;
- Have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- May apply standards of materiality in a way that is different from the way investors may view materiality; and
- Were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

(a) (1) and (2). Financial Statements and Financial Statement Schedule

Reference is made to Item 8 of the Table of Contents of the Form 10-K, where these documents are listed.

(a) (3). Exhibits

- 3.(i) Restated Certificate of Incorporation of Occidental, dated November 12, 1999, and Certificates of Amendment thereto dated May 5, 2006, May 1, 2009, May 2, 2014 and June 3, 2020 (filed as Exhibit 4.1 to the Registration Statement on Form S-8 of Occidental filed on June 17, 2020, File No. 333-239236).
- 3.(i)(a) Certificate of Change of Location of Registered Office and of Registered Agent, dated July 6, 2001 (filed as Exhibit 3.1(i) to the Registration Statement on Form S-3 of Occidental dated February 6, 2002, File No. 333-82246).
- 3.(ii) Amended and Restated By-laws of Occidental Petroleum Corporation as of March 25, 2020 (filed as Exhibit 3.1 to the Current Report on Form 8-K of Occidental filed on March 25, 2020, File No. 1-9210).
- 3.(ii)(a) Certificate of Designations with respect to the Cumulative Perpetual Preferred Stock, Series A (filed as Exhibit 3.1 to the Current Report on Form 8-K of Occidental filed on August 8, 2019, File No. 1-9210).
- 3.(ii)(b) Certificate of Designations with respect to the Junior Participating Preferred Stock, Series B (filed as Exhibit 3.1 to the Current Report on Form 8-K of Occidental filed on March 13, 2020, File No. 1-9210).
- 4.1 Description of Securities of Occidental Petroleum Corporation Registered under Section 12 of the Exchange Act (filed as Exhibit 4.1 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2020, File No. 1-9210).
- 4.2 Indenture, dated as of August 8, 2019, between Occidental Petroleum Corporation and The Bank of New York Mellon Trust Company, N.A. (filed as Exhibit 4.1 to the Current Report on Form 8-K of Occidental filed on August 8, 2019, File No. 1-9210).
- 4.3 First Supplemental Indenture to that certain Indenture, dated as of August 8, 2019, by and between Occidental Petroleum Corporation and The Bank of New York Mellon Trust Company, N.A. (filed as Exhibit 4.7 to the Current Report on Form 8-K of Occidental filed on July 13, 2020, File No. 1-9210).
- 4.4 Second Supplemental Indenture to that certain Indenture, dated as of August 8, 2019, by and between Occidental Petroleum Corporation and The Bank of New York Mellon Trust Company, N.A. (filed as Exhibit 4.6 to the Current Report on Form 8-K of Occidental filed on December 22, 2020, File No. 1-9210).
- 4.5 Third Supplemental Indenture to that certain Indenture, dated as of August 8, 2019, by and between Occidental Petroleum Corporation and The Bank of New York Mellon Trust Company, N.A. (filed as Exhibit 4.2 to the Current Report on Form 8-K of Occidental filed on July 15, 2021, File No. 1-9210).

Other instruments defining the rights of holders of other long-term debt of Occidental and its subsidiaries are not being filed since the total amount of securities authorized under each of such instruments does not exceed 10% of the total assets of Occidental and its subsidiaries on a consolidated basis. Occidental agrees to furnish a copy of any such instrument to the Commission upon request.

All of the exhibits numbered 10.1 to 10.26 are management contracts and compensatory plans required to be identified specifically as responsive to Item 601(b)(10)(iii)(A) of Regulation S-K pursuant to Item 15(b) of Form 10-K.

- 10.1 Occidental Petroleum Corporation Savings Plan (Amended and Restated Effective as of January 1, 2023).
- 10.2 Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Form of Notice of Grant of Restricted Stock Unit Incentive Award (filed as Exhibit 10.2 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2021, File No. 1-9210).
- 10.3 Occidental Petroleum Corporation Modified Deferred Compensation Plan (Effective December 31, 2006 and Amended and Restated Effective January 1, 2021) (filed as Exhibit 10.2 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2020, File No. 1-9210).
- 10.4 Occidental Petroleum Corporation Supplemental Retirement Plan II (Effective as of January 1, 2005 and Amended and Restated as of July 1, 2020) (filed as Exhibit 10.4 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended June 30, 2020, File No. 1-9210).
- 10.5 Occidental Petroleum Corporation Executive Incentive Compensation Plan (As Amended and Restated Effective January 1, 2023).
- 10.6 Form of Indemnification Agreement between Occidental and each of its directors and certain executive officers (filed as Exhibit B to the Proxy Statement of Occidental for its May 21, 1987, Annual Meeting of Stockholders, File No. 1-9210).
- 10.7 Form of Indemnification Agreement between Occidental and each of its directors and certain executive officers (filed as Exhibit 10.9 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2020, File No. 1-9210).
- 10.8 Amended and Restated Occidental Petroleum Corporation 2015 Long-Term Incentive Plan (filed as Exhibit 4.7 to the Registration Statement on Form S-8 of Occidental filed on June 17, 2020, File No. 333-239236).
- 10.9 Description of financial counseling program (filed as Exhibit 10.50 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2003, File No. 1-9210).
- 10.10 Description of group excess liability insurance program (filed as Exhibit 10.16 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2020, File No. 1-9210).
- 10.11 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Common Stock Award For Non-Employee Directors Grant Agreement (filed as Exhibit 10.2 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended June 30, 2015, File No. 1-9210).
- 10.12 Anadarko Retirement Restoration Plan (As Amended and Restated Effective as of December 31, 2021) (filed as Exhibit 10.14 to the Annual Report on Form 10-K of Occidental for the fiscal year ended December 31, 2021, File No. 1-9210).
- 10.13 Anadarko Petroleum Corporation Savings Restoration Plan (As Amended and Restated Effective July 1, 2020) (filed as Exhibit 10.1 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended June 30, 2020, File No. 1-9210).
- 10.14 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Cash Return on Capital Employed Incentive Award (filed as Exhibit 10.1 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.15 Form of 2020 Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Total Shareholder Return Incentive Award (filed as Exhibit 10.2 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.16 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Stock Option Award (filed as Exhibit 10.3 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.17 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Stock Appreciation Right Award (filed as Exhibit 10.4 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.18 Occidental Petroleum Corporation Executive Severance Plan (filed as Exhibit 10.5 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.19 Form of 2020 Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Special Restricted Stock Unit Incentive Award (filed as Exhibit 10.6 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2020, File No. 1-9210).
- 10.20 Occidental Petroleum Corporation Executive Change in Control Severance Plan (filed as Exhibit 10.5 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended June 30, 2020, File No. 1-9210).
- 10.21 Form of Employee Notice, Impact of August 2020 Warrant Distribution on Long-Term Incentive Awards (filed as Exhibit 10.7 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended September 30, 2020, File No. 1-9210).
- 10.22 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Total Shareholder Return Incentive Award (applicable to annual grants made in 2021) (filed as Exhibit 10.1 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended March 31, 2021, File No. 1-9210).
- 10.23 Letter Agreement by and between Occidental Petroleum Corporation and Sylvia J. Kerrigan dated September 14, 2022 (filed as Exhibit 10.1 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended September 30, 2022).
- 10.24 Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Form of Notice of Grant of Restricted Stock Unit Incentive Award (for awards to Chief Legal Officer) (filed as Exhibit 10.2 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended September 30, 2022).
- 10.25 Transition Services and Separation Agreement by and between Occidental Petroleum Corporation and Marcia E. Backus dated September 29, 2022 (filed as Exhibit 10.3 to the Quarterly Report on Form 10-Q of Occidental for the quarterly period ended September 30, 2022).

- 10.26 Form of Occidental Petroleum Corporation 2015 Long-Term Incentive Plan Total Shareholder Return Incentive Award (applicable to annual grants made in 2022).
- 10.27 Warrant Agreement (including Form of Warrant), dated July 24, 2020, between the Company and Equiniti Trust Company, as Warrant Agent (filed as Exhibit 10.1 to the Current Report on Form 8-K of Occidental filed on July 27, 2020, File No. 1-9210).
- 10.28 Second Amended and Restated Credit Agreement, dated as of December 10, 2021, by and among Occidental Petroleum Corporation, the banks party thereto, as lenders, and JPMorgan Chase Bank, N.A., as administrative agent (filed as Exhibit 10.1 to the Current Report on Form 8-K of Occidental filed on December 13, 2021, File No. 1-9210).
- 21 List of subsidiaries of Occidental as of December 31, 2022.

STOCK EXCHANGE LISTING

Oxy's common stock and warrants are listed on the New York Stock Exchange (NYSE). The symbols are OXY and OXY WS, respectively.

DIVIDEND REINVESTMENT PLAN

Oxy stockholders owning at least 25 shares of common stock registered in their name or in their account are eligible to purchase additional shares of common stock under the Dividend Reinvestment Plan by investing dividends on at least the greater of 25 shares or 10 percent of their share balance of common stock and making optional cash investments of not less than \$50, and up to \$10,000, per month. More information may be obtained from EQ Shareowner Services at www.shareowneronline.com.

ANNUAL CERTIFICATIONS

Oxy has filed the certifications of the chief executive officer and chief financial officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2, respectively, to its 2022 Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission. In addition, in 2022, Oxy submitted to the NYSE a certificate of the chief executive officer stating that she is not aware of any violation by the company of the NYSE corporate governance listing standards.

GENERAL INFORMATION AND CURRENT NEWS

Information about Oxy, including news releases, is available at www.oxy.com.

RECONCILIATIONS TO GAAP

(SEE INSIDE FRONT COVER)

	(\$ in millions)
Free Cash Flow (Non-GAAP) (a)	FY 2022
Operating cash flow from continuing operations (GAAP)	\$16,810
Plus: Working capital and other, net	1,325
Operating cash flow from continuing operations before working capital (Non-GAAP)	18,135
Less: Capital Expenditures (GAAP)	(4,497)
Free Cash Flow (Non-GAAP)	\$13,638

(a) Non-GAAP Measures. Operating cash flow before working capital and free cash flow are non-GAAP measures. Oxy defines operating cash flow before working capital as operating cash from continuing operations less working capital and free cash flow as operating cash flow before working capital less capital expenditures. These non-GAAP measures are not meant to disassociate those items from management's performance, but rather are meant to provide useful information to investors interested in comparing Oxy's performance between periods. Reported operating cash flow from continuing operations is considered representative of management's performance over the long term, and operating cash flow before working capital and free cash flow are not considered to be alternatives to reported operating cash flow in accordance with GAAP.
