# MEDIA RELEASE

## GOLD FIELDS SPONSORS MINING ENGINEERING FACULTIES

**Johannesburg, 19 April 2010:** Gold Fields Limited (Gold Fields) (JSE, NYSE, NASDAQ Dubai: GFI) today announced that it is investing R26m in an effort to address skills shortages in the South African mining industry. The three-year sponsorship deal comprises investments in the mining engineering faculties at the University of Witwatersrand and the University of Johannesburg. The official handover ceremony held at Wits University earlier today was attended by the Department of Minerals and Resources Minister Susan Shabangu.

The sponsorship aims to forge an alliance between Gold Fields and the universities to promote the study of mining engineering, a core skill required to sustain not only the company itself but the local mining industry as a collective.

The announcement comes amid a renewed sense of urgency amongst industry and government to address the lack of high level, scarce skills in the country. Only about 90 mining engineering students graduated country-wide last year from an initial intake of around 200 students four years earlier. These graduates are highly sought after not only by South African miners, but worldwide. The slow supply of graduates is compounded by the departure of established mining engineers due to emigration and retirement. A recent survey by the Landelahn recruitment firm showed that South African mining engineers are in great demand across the globe and that only about 15% of them remain in the local industry for a long-term career.

Accordingly, the Department of Mineral Resources has identified skills development as one of the key issues affecting the mining sector's global competitiveness. The department indicated that it intends to investigate the skills needs of the industry and to establish ways of facilitating skills development and the retention of skills in the industry.

Nick Holland, Chief Executive Officer of Gold Fields, said: *"The industry is currently facing a skills gap crisis which is proving to be a serious challenge for the mining industry. We are pleased to be partnering with Wits University and the University of Johannesburg*

*to help ensure that we create a pipeline of qualified engineers who can benefit Gold Fields and the industry in general.”*

Professor Loyiso Nongxa Vice-Chancellor and Principal of the University of Witwatersrand added: *“We are pleased to partner with Gold Fields on this project and we are confident that this partnership will yield benefits for the development of our country and the continent.”*

In terms of the sponsorship agreements, the universities will receive a once off capital injection of R8m followed by R6m a year for three years. In return Gold Fields is afforded naming right status for the infrastructure that it sponsors as well as participation in advisory committees at the two universities.

Amongst others the funds at Wits will be used for the expansion of the fourth quadrant of the Chamber of Mines Building which houses the Wits Faculty of Engineering; to equip a new 101-seater mining design laboratory; upgrading and new equipment for the Mining School's main design laboratory; and, salaries of full-time senior tutors at the faculty.

The sponsorship is in addition to a range of other educational initiatives undertaken by Gold Fields. Last year the company spent around R165 million on education in South Africa, including its Gold Fields Academy and on-mine training. Gold Fields also awarded 124 university bursaries, 378 technical learnerships and 40 post-graduate assignments in 2009.

Sponsorship of engineering education is not new to Gold Fields. The company funded the National Engineering awards amongst seven universities for years and is a significant contributor to the Mining Education and Training Fund, which supports the salaries of senior academic staff in the field.

Gold Fields has previously supported the engineering departments at both Wits University and the University of Johannesburg directly, as well as other faculties at both universities. These included the Specialised Education unit for Deaf Education, the Institute for Palliative Medicine, the Paediatric HIV Programme and the Centre for Sustainability at Wits, as well as Natural Sciences departments and various outreach programmes at the University of Johannesburg.
