## MEDIA RELEASE

### APPROVAL OF SOUTH DEEP NEW ORDER MINING RIGHT AND GRANTING OF NEW RIGHT TO CONTIGUOUS PROPERTY

**Johannesburg, 10 May 2010:** Gold Fields Limited (Gold Fields) (JSE, NYSE, NASDAQ Dubai: GFI) is pleased to announce that the South African Department of Mineral Resources has approved - in terms of the requirements of the Mineral and Petroleum Resources Development Act 2002 (Act 28 of 2002) (*the Act*) – the conversion of the South Deep old order mining right into a new order mining right.

Included in this approval, as a new right, is an additional portion of ground known as Uncle Harry's, which is contiguous to South Deep. It contains a mineral resource of approximately 14.5 million ounces of gold\*, which is largely above the existing South Deep infrastructure. In addition to gold the new order mining right covers silver, uranium, nickel and pyrite.

Gold Fields Chief Executive Officer, Nick Holland, said: "The cumulative effect of this approval, together with the previous conversions for Driefontein, Kloof and Beatrix granted in 2005, is that all of Gold Fields' South African operations have now been granted their new order mining right."

Recognising that it still has to meet additional Black Economic Empowerment equity ownership requirements by 2014, Gold Fields is in the early stages of developing two further empowerment transactions:

1. A broad-based Black Economic Empowerment transaction for a 9% holding in South Deep, as well as an additional 1% of GFIMSA, the company that owns Gold Fields' South African mines; and
2. An Employee Share Option Plan for Historically Disadvantaged South African employees of GFMSA for ownership of 10% of GFIMSA. This plan requires the approval of organised labour represented at our South African mines.

Holland said: "We believe that these two transactions will meet our commitment to achieving the 2014 target. It's integral to our commitment to expand opportunities for historically disadvantaged persons to enter the South African mineral industry and for them to benefit from the exploitation of the country's mineral resources by promoting employment and the advancement of social and economic welfare for all South Africans. This goes beyond simply ticking boxes."

*\*Approximately 78 million tons at 5.8g/t equating to 14.56 million ounces of gold at a gold price of US\$1,000/oz and a cut-off grade of 3.0g/t. The Inferred Mineral Resource estimate is reported in accordance with the*
