A copy of the presentation will be available at www.betsson.se from 29 April.

Revenue and gross profits (gaming surplus) for the period

The revenue as presented by Betsson is the result that emerges from the transactions with the end customer i.e. the customers. The gross profits (gaming profit) represent the result that emerges after the transactions with a third party i.e. gaming suppliers and payment providers.

The Gross Profits from the Group's gaming activities represent the accepted gaming wagers minus the customers winnings after deduction of gaming taxes, licence fees to the game suppliers and the net income and expenses for payment services via banks and credit cards for depositing and withdrawing the customers' funds. Bonuses to customers and loyalty programmes do not affect the Group's gross profits.

Betsson has during Q1 further increased expansion investment in the form of additional marketing and customer offers. This strategy has proved to be a success and the company has increased gaming revenue, gross profits (gaming surplus) and the number of active customers. The company has also continued to increase the selections available for depositing and withdrawing funds which is an important requirement particularly regarding new markets.

The Group's revenue increased to SEK 227.8 million (148.1), which shows a revenue increase of 54 percent compared to the same period for the previous year. Gross profits (gaming surplus) have increased by 49 percent to SEK 179.9 million (121.1). The gross profits also include costs for payment services, which have increased in alignment with the greater selection of deposit and payments methods now available.

Income after taxes

The Group's operating income increased to SEK 56.8 million (45.5). The operating margin was 24.9 (30.7) percent. It is primarily the marketing costs which have increased due

to greater investment to attract new customers during the favourable season of the first quarter. As a result of the investments the number of active customers increased by 43 percent to 153 000. The marketing costs amounted to SEK 80.6 million (43.4). The costs include external costs for production and distribution of marketing in diverse media and cooperation agreements and affiliate- agreements. Betsson also invested within technology and technical consultants for developing and the integration of new payment solutions. The operating income has also been affected negative by currency effects of SEK 2.2 million by transfer of assets and debt in foreign currency at the closing day.

The Group's income before taxes increased to SEK 57.5 million (45.5) and income after taxes for the remaining business activity amounted to SEK 53.6 million (41.7), corresponding to SEK 1.36 (1.06) per share. In last year's report there was an additional sum of SEK 11.5 million corresponding to SEK 0.29 per share, which concerned the distributed profit in Net Entertainment.

Return on equity was 8 (8) percent and for total equity 6 (7) percent. Equity capital per share amounted on the balance sheet date to SEK 17.3 (13.78).

Gaming operations

Betsson offers, through subsidiaries, Internet gaming to end customer in the global market via gaming portal betsson.com and via the CasinoEuro.com and CherryCasino.com casino sites.

Products

During the first quarter Betsson has opened Bingo in Norwegian, English, Turkish and Danish as well as increased the number of gaming possibilities within live betting. The company has also increased the number of casino games.

In January, Betsson gained PCI authorisation which means that the company is authorised to manage larger volumes of payments by credit cards on the Internet.

Betsson currently offers the following products:

- Sports betting which offers a wide variety of possibilities for wagering, both on sports and other events of interest to European players. In all Betsson has offered over 200 000 betting markets during the first quarter.
- The betting exchange, which is a marketplace for wagering. Unlike sports betting, here customers play against each other. Betsson receives commission from those who win a wager.
- Casino with a large variety of world-class casino games that require no download. Here there are both traditional and innovative games including Black Jack, Roulette, Casino Hold'em, video poker games, gaming machines and much more.
- Poker with several different poker games connected to Ogame, the largest poker network in the world with approx. twelve million registered poker players. As well as 32 card poker on a different network. Poker via mobile telephones is also available.
- The scratch card Trio, which gives the player a high payout and winnings on average from every third card.
- Bingo offers a selection of different bingo games. A bingo host is present in the chat, where players also chat with each other.
- Betsson Trader is a stocks and shares game, so called Financial Betting.
- Games, a number of entertainment games where both luck and skill count. Within the production area, there is everything from virtual horse racing to dice games.

Casino gaming is Betsson's biggest product and represented 53.7 (46.3) percent of the gross gaming surplus (gross profits), followed by Poker 25.1 (38.4) percent and Sportsbook 18.0 (14.9) percent, while Other products accounted for 3.3 (0.4) percent of the gross profits from gaming operations.

The products growth (gaming surplus) compared to the forth quarter 2007 is as follows: Casino games 35 percent, Sportsbook 71 percent and diverse products 168 percent while gross profits from Poker decreased by 6 percent despite an increase of customers. The decrease in poker can mainly be explained by currency effects.

Customers

At the end of the quarter, the number of registered customers amounted to 1 145 000, which corresponds to an increase of 15 percent compared with the previous quarter and an increase of 67 percent compared with the first quarter for the previous year.

During the quarter Betsson has among others invested in the five markets which opened by the end of 2007. These markets were France, Greece, Italy, Spain and Germany. During the quarter the intake of new depositing clients for these five markets was 20 percent higher than the average intake of clients in Norway, which is a relatively established market for Betsson.

The number of active customers increased during the quarter by 43 percent to 153 000. The increase can primarily be explained by the success of the non-Nordic markets.

An active customer is defined as a customer who has played for money during the last three months.

Betsson actively performs marketing through various media, and through result-based cooperation and partnerships to increase the number of customers. At the same time, Betsson has an active loyalty system to attract new customers.

Markets

Betsson.com is established in 16 countries, with the Nordic countries making up the most important geographical market. CasinoEuro.com is available in 16 languages and CherryCasino.com in 13 languages.

Betsson still has its strongest footing in Scandinavia, but is now growing more and more rapidly throughout the rest of Europe.

Regarding the gross profits, the Nordic countries (Sweden, Norway, Finland and Denmark) accounted for 59 (63) percent while the rest of Europe (including Turkey) accounted for 41 (37) percent. During the quarter growth in the Nordic area was 9 percent, while in the rest of Europe growth was all of 71 percent compared to the fourth quarter 2007.

During January, Betsson began operations in Peru collaborating with a local partner. Betsson sees Peru as Betsson's first step into South America.

Personnel

The average number of employees during the period was 141 (96) for the Group. At the end of the period, there were 151 (106) employees, of which 102 (68) were based on Malta.

Investments

During the interim period the Group has invested SEK 16.4 million (7.5) in the operation. The major part of the investments are development of gaming platforms, integration of games and payment solutions as well as IT hardware for operating Internet games and renovation and refurbishing offices.

Acquisition of own shares

Betsson has during the quarter acquired its own shares in accordance with an earlier Board decision based on the AGM mandate. During the period the company has acquired a further 66 000 B shares at an average rate of SEK 59.20. The total number of shares amounted at the closing date to 310 000 B-shares acquired at an average rate of SEK 58.27. At the end of the period, the number of outstanding shares excluding repurchased shares amounted to

39 243 720, of which 5 420 000 were A-shares and 33 823 720 were B-shares.

Parent Company

The operations of the parent company, Betsson AB (publ), are primarily directed toward Group administration. The company provides and sells internal services to other Group member companies in the areas of finance, accounting, administration and management.

Net sales (including intra-Group items) for the reporting period amounted to SEK 2.2 million (4.6) and the income after financial items amounted to SEK -4.8 million (-0.7).

The parent company's investments in fixed assets amounted to SEK 0.5 million (0.0) during the reporting period, due primarily to refurbishment and investment in premises. Cash and cash equivalents amounted to SEK 86.7 million (25.4) at the closing date. The company has no bank loans or bank credits. During the interim period the Parent Company has acquired own shares for SEK 3.9 million (0.0).

Events after the end of the interim period

Betsson has launched a new casino design at betsson.com as well as signing an agreement with PlayTech in order to further increase the number of game selections, mainly by adding new languages.

Sales so far for April are in line with sales during the first quarter.

Betsson is investigating the possibility of opening Shops within EU.

Betsson.com launched in Serbia on April 28. Including Serbia Betsson now reaches 16 different countries.

Otherwise, nothing worth noting has happened after the end of the interim period.

Redemption programme

The Board suggests that the decision should be made at the Annual General Meeting 12 May to transfer SEK 197.8 million corresponding to SEK 5.00 (0.50) per share to the shareholders, of which SEK 3.50 refers to the year 2007 and SEK 1.50 is an extra payment. The transfer shall be executed through a share redemption programme. The Board's complete proposal and a description of the redemption programme is available on the company's website or at the Head Office

Accounting Principles

Betsson applies the International Financial Reporting Standards (IFRS) as adopted by the EU. This interim report has been prepared in accordance with IAS 34, Interim Financial Reporting.

The Parent Company applies the same standards as the Group, except that the Parent Company's accounts are drawn up in accordance with RFR 2.1 Reporting for Juridical Persons.

The accounting principles remain unchanged from the year-end accounting

2007. Further information on the Group's accounting and valuation principles can be found in note 2 of the Annual Report for 2007, which is available on the company's website or at the Head Office.

Risks and uncertainties

Nothing worthy of note has occurred regarding the risks and uncertainties Betsson is exposed to since the publishing of the previous report and Annual Report. For further details please refer to the Annual report for 2007.

Prospects for 2008

Betsson estimates the market for Internet gaming will continue to grow rapidly. The pressure on countries within the EU to alter their legislation and to allow competition has increased strongly during 2007 and during the start of the first quarter. A number of countries have reported that they are working on a new legislation which is compatible within EU requirements. It is uncertain when such legislation will be introduced on Betsson's main markets. However, it is clear that when it happens it will give Betsson increased possibilities for marketing and presence on the market.

The confidence for Internet as a trading site increases as more people use Internet to perform their bank business, stock deals, insurance business and purchase of commodities. The increased confidence is important for Internet commerce, especially in countries where the trust for Internet commerce up to this point has been low. This development is a fundamental driving force for the development of online gaming.

An additional underlying driving force for growth is that the next generation of playing customers are going to use the internet on a larger scale than today's playing customers.

During 2007 Turkey introduced new legislation towards online gaming. The sole purpose of the law was to protect the gaming company IDDAA controlled by the

authorities. The law is a breach of the agreement between EU and Turkey according to legal experts. The purpose of the agreement is to regulate Turkey's possible entry into the EU. The Turkish law aggravates Betsson's operation on the Turkish market.

Norway has express intentions to ban online games. Betsson evaluation is that the proposed law is difficult to implement. If the law is adopted and comes into effect it would most likely affect Betsson negatively in the short term. Norway is one of Betsson's three largest markets.

The online gaming market is estimated to grow by 20 to 30 percent during 2008. Betsson has the ambition to grow faster than the market.
