Stockholm, April 13, 2010

Scribona's subsidiary, EETI, has purchase three rated RMBS/ABS bonds

Scribona is pleased to announce that over the past weeks, EETI has re-invested part of its cash flow in the purchase of three rated RMBS/ABS bonds for a total consideration of € 700k. The average discount to the face value of the bonds was about two-thirds and the expected undiscounted cash flow of these investments is well in excess of 3x the invested amount. These bonds are expected to mature within four to six years. The investments benefit from a very attractive risk/reward profile, backed by substantial data on the issuers and the securities. The bonds are performing and paying contractual coupons.

The investments include Portuguese securitisations of prime residential mortgages and Spanish ABS, backed by a diversified pool of loans to SMEs and benefiting from commercial and residential mortgages with low average LTV.

Capitalising on the continuing dislocation of the European securitisation market as well as on the experience of EETI, Scribona intends to continue to selectively re-invest part of the free cash flow of the portfolio in RMBS/ABS opportunities, as they arise.
