

Press Release

CTT Systems AB receives an order from BIZJET international on the Cair™ system for one VIP A319 aircraft

Nyköping, Sweden, June 17, 2011, – BIZJET International based in Tulsa USA, has ordered a CTT Cair™ System to be installed, during fall 2011, in one Airbus VIP A319 aircraft. BIZJET International is a major completion center and also a member of the Lufthansa Technik Group offering top quality cabin outfitting and associated services.

The Lufthansa Technik Group, with more than 30 subsidiaries and about 26,000 employees worldwide, is one of the leading manufacturer-independent providers of services for the aviation industry. Lufthansa Technik is licensed internationally as a repair, production and development enterprise. The Group's portfolio encompasses the entire spectrum of services in the areas of maintenance, repair, overhaul, modification and conversion, engines and components.

"This is the first order we get from BIZJET and we are delighted that BIZJET selected the CTT Cair™ System on this new aircraft" says Peter Landquist, Vice President Sales/Marketing & Customer Support of CTT Systems. "We hope to continue working with BIZJET in future projects and are looking forward to a long relationship with them. Our Cair™ system is doing very well in this segment and the VIP market continues to be very strong" continues Peter Landquist.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT is also selected by Airbus to supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 17 years of operating experience on the Zonal Drying™ system plus 11 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
