

Press Release

CTT Systems AB receives order from Comlux America on the Cair™ system for one VIP BBJ aircraft

Nyköping July 4, 2011 – Comlux America based in Indianapolis USA, has ordered a CTT Cair™ System to be installed, during spring 2012, in one Boeing VIP BBJ aircraft. Comlux America is a major completion center offering top quality cabin outfitting and associated services.

"We are very pleased to once again work with CTT for our new outfitting project on a BBJ. We have already installed the Cair™ system in a recently completed A320 VIP Cabin and on an on-going A319 VIP project. We are thoroughly convinced of the added value of the Cair™ system for Comlux VIP clientele" says David Edinger, CEO of Comlux America."

"This is the third order we get from Comlux and we are delighted to be able to continue working with Comlux on this new aircraft" says Peter Landquist, Vice President Sales & Marketing of CTT Systems. "Our Cair™ system is doing very well in this segment and the VIP market continues to be very strong" continues Peter Landquist.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 17 years of operating experience on the Zonal Drying™ system plus 11 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
