

## Press Release

### CTT Systems AB receives order from AMAC Aerospace for the Cair™ system to one VIP B777-300 aircraft

**Nyköping, Sweden, October 4, 2011**, – AMAC AEROSPACE (SWITZERLAND) AG has ordered the CTT Cair™ System to be installed in one VIP B777-300 aircraft. The installation will be performed during 2012.

“AMAC Aerospace is very pleased to be working again with CTT. We had a very strong collaboration on a previous project which was a driving factor for choosing them again. We look forward to working together on this new exciting project”, says Tracey Hawthorne-Kurz Director Purchasing & Logistics at AMAC Aerospace.

“We are very pleased to receive this new order from AMAC Aerospace being the third from the company and we are especially excited receiving the order for a B777-300 VIP aircraft as it is the first order for us on that aircraft type”, says Peter Landquist, Vice President Sales, Marketing & Customer Support of CTT Systems. “We strongly believe the B777 will be a very popular aircraft in the VIP sector and hope for more orders to come. This also means we now will be able to offer the system to both B777-200/300 airliners”, continues Peter Landquist.

Cair™ is focused on the passengers’ health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT’s Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT’s humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT’s humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT’s products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 17 years of operating experience on the Zonal Drying™ system plus 11 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
